One-Sheet-A-Day Math Drills: Grade 1 Addition - 200 Worksheets is the first volume of the One-Sheet-A-Day Math Drill Workbook Series, a 24 volume set of math worksheets geared to follow most math curriculums for students in grades one through seven. This One-Sheet-A-Day math drill workbook is for 1st grade students who want extra practice with two number, single digit addition. It contains 200 math practice sheets, one for each school day of the year. Upon completion, the student will be more competent in 1st

grade mathematics and ready to proceed with more difficult exercises. Unlike other math drill books, this is one of 24 workbooks created to establish a daily routine for each student to practice on their own from grades 1 through 6. It is specifically designed to gradually increase mathematic ability with the least amount of stress for both parent and student. Kids need to practice at home to support what they are learning in school, but finding resources to help with that goal can be daunting. It takes a lot of time searching online for free resources to print or for books with enough exercises. Beyond that, the options include going to libraries, enrolling them in an afterschool class or hiring a personal tutor. Who has the time and money for all of that? The answer is, not many parents. Each and every parent wants to provide enough practice work to their kids, but on top of the challenges in finding resources, questions remain about how much practice a child needs to boost

educational success: twenty sheets of practice work a day? One sheet a week? What's the optimum practice work during a whole academic year? Confused? The authors have a decade of classroom expertise and have spent a large amount of time researching and wasting resources trying all the options for their own kids. Now you can benefit from what they have learnt. The result is finding out that One-Sheet-A-Day is the optimum way to support classroom learning, and it is amazingly simple. This book eliminates the need to take home prints or run around franchises, bookstores and libraries trying to find enough material. It also prevents you from overwhelming your kids with too many math drill worksheets. There are approximately 200 school days a year. Simply have your child complete ONE per day. Work is far easier when it is part of a routine, especially for kids. The One-Sheet-per-Day program is an easy routine to start and maintain because it takes less than 20 minutes per day, using

basic skills your child already knows. Simply take one sheet from the book, ask your child to complete it in a quiet place, and return it to you to check the answers, a painless routine for you and your child, and instant feedback for both of you. Geared to follow most math curriculums, most kids can do the appropriate sheet on their own based on what they are learning at school. One-Sheet-A-Day math practice drills will give your child practice they need to score higher on test day, and build confidence in their math abilities. Roberts, Being a Collection of Drills and Health Hints, and Appreciations, of the Man Who Blazed the Trail, for Physical Education in the Young Men's Christian Association The best thing ever said about exercise was said by Robert J. Roberts: "All exercises must be safe, short, easy, beneficial, and pleasing." I am happy to write this introduction, for in so doing I can pay my proper tribute to him and at the same time can extend his idea. Roberts' platform - just ten

words - "all exercises must be safe, short, easy, beneficial, and pleasing," grew out of his long teaching and great common sense in observation of men and the effects of different exercises upon them. He had taught so-called fancy gymnastics; he was thoroughly familiar with the heavy work of the weight lifters; he took into account not only the immediate effect of exercises, but, by means of watching men for a series of years, he formed important conclusions with reference to the ultimate effects of exercises. Let us examine his platform. All exercises must be safe. Approximately one man out of ten is qualified by nature to take up the more difficult forms of gymnastics - those forms which by common repute are not safe. Roberts maintains that his work is for the masses; that he is not endeavoring to build up a system for the favored few - he wants everybody. He wants to be able to handle people in large numbers and quickly. This can be done only where the

exercises are safe. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
