*Living the Boundary* Aug 22 2020 The design of a house always represents a sort of research project. Intense, for the familiarity we have with the program. Unique, for the specificity and peculiarity of each situation. Indeed, the house is the program we are most familiar with. Starting from well-defined constraints and possibilities, each house materializes through construction, defining its own function and appearance. Therefore, the question of materiality becomes crucial, as it defines a boundary, a well-defined field of forces, a new centrality. Almost as a way of underlining the experimental role the program and the design of single family houses have in our particular design research and, at the same time, in contemporary architectural debate, this book by Francesco Cacciatore gathers the main single family house designs we have developed since the late Nineties. 130 b/w illustrations

**New Museums** Aug 14 2022 The past decade was characterised by a real museum boom which persists today. Throughout the world museums have been built that are as unique as the art they contain, and the process continues. This volume assembles approximately 15 of these museums, designed and realised by the who's who of the

architect scene.00The architecture of the museums is an artwork in itself. They include buildings such as the Changsha Meixihu International Culture & Art Centre designed by Zaha Hadid and the Zeitz Museum for contemporary African art in Cape Town. With designs that extend from exciting to dynamic to sensuously beautiful the architects have created places of encounter, communication and inspiration which make the world of art accessible to visitors in ways that are not always mapped out by curators. The volume shows magnificent photographs and documents through drawings the development of the buildings as well as the challenges of architecture today.

**The Place of Silence** Nov 17 2022 The Place of Silence explores the poetics and politics of silence in architecture. Bringing together contributions by internationally recognized scholars in architecture and the humanities, it explores the diverse practices, affects, politics and cultural meanings of silence, silent places and silent buildings in historical and contemporary contexts. What counts as silence in specific situations is highly relative, and the term itself carries complex and varied significations which make it a revealing field of study. Chapters explore a range of themes, from the apparent 'loss of silence' in the contemporary urban world; through designed silent spaces; to the forced silences of oppression, catastrophe, or technological breakdown. The book unfolds a rich and complementary array of

perspectives which address - through the lens of architecture and place - questions of sound, atmosphere, and attunement, together building a volume which will form the key scholarly resource on architecture and silence.

**Alentejo** Mar 21 2023 Bradt's Alentejo remains the only standalone guide to this emerging region, providing all the information needed to find that idyllic rural retreat, beachside boutique or romantic hotel set in a converted palace. Restaurants, wines, cafes and cultural sights have all been meticulously chosen and reviewed by the author and there is a wealth of background cultural and historical information to unlock the secrets of the Alentejo's colourful past and captivating present. This new second edition has been thoroughly updated to reflect all the most recent developments and includes a new section on castle towns, expanded information on Alandroal and Juromenha, new coverage of Alegrete and the Serra de Sao Mamede and new features on everything from The Siege of Badajoz to Alentejo wild flowers, Portuguese grape varieties and the Rebel Prince of Marvão amongst others. More hotels and tours have also been added, especially around Évora, Monsaraz and Marvão. The Alentejo is Portugal's Andalusia - without the crowds - a landscape littered with Moorish monuments, sleepy villages and Crusader castles. The beaches are glorious sweeps of white sand, broken by rocky coves nested by storks, or backed by caramel coloured sandstone cliffs. The

towns and villages of the interior appear little-changed since medieval times - clusters of sugar-cube houses tumble down hills from heavy-set castles. There are palaces and there are myriad megalithic monuments - lost in the rolling countryside in the olive groves, or among orange trees and withered cork oaks. Wild boar and lynx roam the extensive forests and heathlands - which offer wonderful hiking and hill walking. And the food. fresh Atlantic bream, sizzling prawns, forest-reared pork and dozens of glorious wines with which to wash it down. Expert author and fluent Portuguese speaker Alex Robinson has been visiting, writing and photographing Portugal for more than 20 years and in this new edition has evolved his guide to the Alentejo even further to make an ideal companion for a successful trip whatever your interest, age or budget: hikers, wine and food lovers, weekend travellers, history enthusiasts and those looking for a second home are all catered for.

**Lonely Planet Ireland** Apr 10 2022 Lonely Planet's Ireland is your passport to the most relevant, up-to-date advice on what to see and skip, and what hidden discoveries await you. Explore the Causeway Coast, have a pint in the pub, and drive the Ring of Kerry; all with your trusted travel companion. Get to the heart of Ireland and begin your journey now! Inside Lonely Planet's Ireland Travel Guide: Up-to-date information - all businesses were rechecked before publication to ensure they are still open

**Aires Mateus** Oct 28 2023 "Manuel and Francisco

Aires Mateus are adamant when they say it is very interesting to work outside their home country of Portugal, but it is especially stimulating to

return. In interviews, however, they have often pointed to the problems they are faced with when working in Portugal: lack of planning, overly restrictive regulations, very limited market for experimenting with new materials and systems, and vanishing craftsmanship. Yet they are positive that these challenges contribute to architectures continued improvement. This guidebook is both a reference to the numerous built works in Portugal by Aires Mateus and an itinerary spanning 21 cities, from north to south" -- Publicaciones Arquitectura y Arte.

AIRES MATEUS Architectural Terrains Jul 01 2021  
Of the around 20 biennials and triennials worldwide devoted to architecture, the Venice Architecture Biennale is the most prominent, considered as the world's leading biannual architecture festival. The participating architects selected every second year come from around the world to engage in the most important information exchange in the world of architecture. Aires Mateus Architects is the architectural practice operated by two brothers, Manuel and Francisco Aires Mateus. They have been invited five times to participate in Venice. This publication will introduce the five architectural installations they contributed to the biennales in the last decade. The publication consists of five individual parts, each of them a separate book, and held together by a French-fold-dustjacket. Each book is dedicated to one exhibition in Venice. The beautiful projects

presented in this volume set an outstanding example of architectural installations reflecting space in a sensitive, poetic and mathematical way. Over the last three decades, Aires Mateus have gained international recognition for their contemporary reinterpretation of architectural traditions in Portugal. Their work is poetic in nature, and much of it is based on constant exploration and experimentation. Their abstract architectural installations are the artistic manifestation of this work. VOIDS: The first time Aires Mateus presented Portugal at the Venice Biennale was in 2010. The show was curated by Kazuyo Sejima from Sanaa, the first woman ever to work as chief curator of the Venice Architecture biennale. Aires Mateus' installation "VOID" was strikingly simple, as their minimalistic architecture often is. An entire room in the Central Pavilion in the Giardini was filled with abstract models of Aires Mateus' projects. Their installation investigated the extraction of volumes, connecting positive building forms with corresponding negative space. This relationship between positive and negative spaces has always existed inherently, but rarely been so clearly and understandably articulated. RADIX: In 2012, the installation took the form of a single large sculpture which greeted the visitors in the Arsenale area. The open and closed arches of "Radix", a steel structure clad with rusting steel panels on the outside and with a golden finish on the inside, could be perceived as a

continuation of the arches of the shipyards in the docks of the Venice Arsenale. Despite the heavy steel construction, the arches of the pseudo-rectangular block and the brownish and golden color has a light appearance; it is as if it were made of wood. The arches are supported at three points, with the main arch overhanging the docks. FENDA: In 2016 the participation again took the form of an installation, but this time the visitors could enter a beautifully illuminated, mysterious cube, with which the architects symbolically marked the return to the essence of space. Space was considered from the perspective of its relationship with the human, that is anthropologically. The installation served as a reminder that this is still the essential value of architecture. FENDA is a cube with outside dimensions of 7x7x4 meters. The visitor enters by opening a black curtain, and passes through a one-meter-thick concrete wall to enter. Inside, one finds oneself in a kind of cave. The slit of light from the entrance opens and closes the visitor's path, changing the scale and perception of space. FIELD: Though it is another beautiful sculpture, this installation differs from the others: this time, one cannot enter the installation, one can only look inside. The book cover shows one of the views that the visitor can glimpse. The curators described this work as a sensitive, poetic and mathematical reflection on space. What the visitor perceives, the smell, colors and texture, remind of nature.

Subtle textures or spots of color emerge from the dark under a diffuse and warm light, evoking the beauty of controlled landscapes and blurring the limits between natural and artificial. GROUND: the upcoming exhibition at this year's biennale will again ... Every installation will be introduced with a short essay, especially written by philosophers, architects, and an art critic for this publication. With contributions by Francisco and Manuel Aires Mateus, Ricardo Carvalho, Nuno Crespo, Sofia Pinto Basto, Paulo Pires Basto, and Delfim Sardo.

*European Union Prize for Contemporary Architecture* May 31 2021 "Includes works by Snøhetta, Studio Up, Atelier Marc Barani, Grafton, RCR, Studio Fukasa, Ateliers Jean Nouvel, BIG with JDS, David Chipperfield, Coop Himmelb(L)au, Dominique Perrault, FOA, Herreros Arquitectos, Jakob+MacFarlane, JLCG, Lacaton & Vassal, LIN, MGM, MVRDV, Neutelings Riedijk, nijiric + arhitekti, OAB with Patrick Genard, OFIS with multiPlan, Studio Grnada, Zaha Hadid and many more."--Page 4 of cover.

Contemporary Housing Feb 25 2021 Following intense debate throughout the 20th century, the issue of residential housing is becoming increasingly central to the contemporary situation, characterised by large cities, urban sprawl and general fragmentation in spaces of the home and collective life. Projects are attempting to give answers through flexible systems that try to give form to new public and private spaces for

the individual. The home speaks of a world that is changing very rapidly and the selected projects can be seen as experimental attempts to give shape to new ways of experiencing the home in the future. Through an analysis of some of the most significant projects built in the last ten years, this book traces pivotal themes such as density, flexibility, the relationship with the land, constructing on the constructed, and the image of the house. Analysis is made in essays written by leading authors in the field

*Forme del vuoto* Apr 22 2023 I vuoti che il libro descrive sono spazi prodotti attraverso un processo di sottrazione, che estrae la materia sostituendola con lo spazio. È una modalità compositiva e costruttiva arcaica, riscoperta dal Moderno e utilizzata oggi da molti artisti e architetti contemporanei. *Forme del vuoto* indaga e ri-conosce i diversi caratteri che questo spazio assume. Esso si colloca tra interno ed esterno, sui bordi, nei luoghi di confine dell'architettura. La sua presenza muta profondamente gli oggetti architettonici, li trasforma in relazionali, capaci di tessere molteplici interazioni con i soggetti che li abitano e con i paesaggi urbani che li circondano, di produrre nuovi significati attraverso la modificazione di tipi e spazi consolidati nella storia dell'architettura e della città, di generare nuove possibilità del sentire. Le diverse forme che il vuoto sottratto assume sono indagate attraverso la descrizione e

la rappresentazione diagrammatica delle opere che, messe in sequenza, costruiscono un percorso, dall'interno verso l'esterno, che intende mostrare il progressivo processo di contaminazione dell'oggetto architettonico contemporaneo con il contesto in cui si colloca, la perdita di significato delle tradizionali contrapposizioni pubblico-privato, aperto-chiuso, figura-sfondo e la loro sostituzione con categorie intermedie che rispecchiano la volontà relazionale di molta architettura contemporanea. GIANPAOLA SPIRITO (Napoli, 1974), è architetto, dottore di ricerca in Composizione architettonica e professore a contratto presso la Facoltà di Architettura dell'Università degli Studi di Roma "La Sapienza". È curatrice di: Antonino Terranova, Dalle figure del reale.

Risignificazioni e progetti (Gangemi 2009). È autrice di libri e saggi tra cui: Grattacieli (White Star, 2003); I nuovi giganti (White Star, 2008); La magia del reale nelle architetture di Peter Zumthor ("Rassegna di architettura e urbanistica", 2009); Ecostrutture. Forme dell'architettura sostenibile (White Star, 2009); Tipologie insediative a confronto: il caso romano dagli anni '20 a oggi (Meltemi 2010); Dal muro cavo al volume cavo: abitare lo spazio sottratto (Gangemi 2011).

Lo spazio in architettura May 23 2023 Lo spazio in architettura è un testo fondamentale per la comprensione del lento ma affascinante percorso di avvicinamento della disciplina architettonica

alla sostanza più autentica dell'architettura stessa: lo spazio. Il libro contiene un testo didattico, concepito, secondo le intenzioni dell'autore, in modo che gli studenti di architettura possano comprendere tutta la complessità e la profondità del tema dibattuto. Esso rappresenta, inoltre, un utile strumento di approfondimento per gli architetti, i teorici e gli storici dell'architettura, così come per gli storici dell'arte e i filosofi. Questa efficacia si riscontra nel mondo iberico, dove lo scritto è conosciuto da oltre un trentennio e dove, fin dai primi anni '80, ha formato intere generazioni di architetti e studiosi della disciplina. Viene da chiedersi, a questo punto, perché *Lo spazio in architettura* appare in lingua italiana solo oggi, a più di quarant'anni di distanza dalla sua prima edizione. Qual è stato l'interesse intorno al tema dello spazio architettonico nel nostro Paese negli ultimi decenni? Quanto è rimasto delle lucide visioni di Bruno Zevi e delle originali sperimentazioni di Luigi Moretti? Forse altri, meglio di noi, hanno saputo raccogliere quell'eredità, sviluppando riflessioni teoriche e progetti più orientati verso l'idea di spazio. In Italia è tempo di colmare questa lacuna e la traduzione di questo libro rappresenta solo un primo passo.

*2G N 64 Bak Gordon Jul 25 2023* For years Portugal has captured the attention of the international architecture scene, but has also proven to be a breeding ground for architects

beyond the great masters such as Fernando Távora, Álvaro Siza and Eduardo Souto de Moura. The famous Porto School has given way to a new generation of talented architects from other parts of the country, including the Aires Mateus brothers from Lisbon (2G 28, 2003) or the architect Paulo David from Madeira (2G 47, 2008). And from an even more recent generation comes another Lisboan, Ricardo Bak Gordon, who combines the best architecture of his own country with an awareness of what is happening abroad. His works range from a large number of single-family homes that put great emphasis on domestic comfort - for example, the houses in Quelfes and Pousos, the two houses in Casa Queimada, or the two in Santa Isabel, Lisbon - to the magnificent series of renovations of various schools in Lisbon and Porto, and unique projects such as the residence of the Portuguese Embassy in Brasilia, the mill in Oliveira da Serra (Ferreira do Alentejo), Albarquel Park (Setúbal) and the FACIM waterfront in Maputo (Mozambique). In this publication, Ricardo Bak Gordon's works and projects are accompanied by texts from the architect himself, the critic Ricardo Carvalho and Britain's Jonathan Sergison (of Sergison Bates architects, 2G 34, 2005). In the Nexus section, Diogo Seizas Lopez summarises an interview with Bak Gordon on the architect's main interests.

Letture d'interni Dec 06 2021

**Urban Design Governance** Sep 22 2020 Urban Design Governance takes a deep dive into the governance of urban design around Europe. It examines interventions in the means and processes of designing the built environment as devised by public authorities and other stakeholders across the continent. In particular, the focus is on the use of soft powers and allied financial mechanisms to influence design quality in the public interest. In doing so, the book traces the scope, use and effectiveness of the range of informal (non-regulatory) urban design governance tools that governments, municipalities and others have at their disposal. Developed from the Urban Maestro project, a joint initiative of the United Nations Human Settlement programme (UN-Habitat), UCL and the Brussels Bouwmeester Maître Architecte (BMA), Urban Design Governance offers the first panorama of informal urban design

governance tools from across Europe, and places the tools within a theoretical and analytical framework with the potential to be applied locally and internationally. Last, the book discusses and reveals the essential prerequisites for the effective governance of urban design. Governments everywhere are increasingly seeing these sorts of tools as part of a necessary investment in delivering the high-quality built environments that their residents, businesses and investors demand. This book shows how.

**How Much House?** Jan 07 2022 The space we live in, reduced to a minimum, has been fascinating us for generations - the writer Thoreau lived in a self-built hut in the forest from 1845 -1847. In 1952, Le Corbusier built a hut at the Côte d'Azur for himself and his wife. Inspired by this, Urs Peter Flückiger, together with his students, built an ecologically and economically sustainable cabin in the Texan prairie. All three projects share the idea of minimal space and its relationship with the surrounding nature. In text, drawings, and photographs, this book analyses the three projects and shows parallels and similarities. Inspired by Tolstoy's story *How Much Land Does A Man Need?*, the author asks: "How much house does a man need?", thereby providing a pointed contribution to the current discussion on the requirement for housing.

*Taking the Country's Side* Mar 29 2021 An

argument for the cross-fertilization of agriculture and architecture Making the case for situating agriculture as the twin of architecture, Taking the Country's Side looks back on the 10,000-year history of these two disciplines in order to show a path forward for their mutual cooperation. This volume argues that the concept of permaculture could inform urban design today.

**Domicilio urbano** Oct 04 2021 ¿Qué sentido tiene plantearse el tema del domicilio urbano desde la perspectiva del departamento? La creciente expansión de las ciudades, acompañada por la aparición de vastos suburbios de baja densidad, es una de las características del desarrollo urbano actual. Pero este crecimiento no sólo se explica por las fluctuaciones demográficas o la migración campo-ciudad: una buena parte de los ciudadanos contemporáneos demanda mayor espacio para vivir y al mismo tiempo proclama la casa aislada rodeada por jardines como un ideal. Sin embargo, en la mayoría de los casos esta aspiración trae aparejados lejanía, sitios reducidos y dificultades de servicios públicos.. Los intentos por revertir esta situación, a través de subsidios de renovación urbana y normativas que favorecen la construcción de edificios de viviendas, han resultado en el aumento de una oferta inmobiliaria estandarizada y hasta cierto punto indiferente a la compleja realidad de la ciudad. Este libro intenta valorizar la condición urbana y las múltiples situaciones que un departamento puede ofrecer a

sus habitantes, tanto desde su dimensión individual e interior (distribución de recintos, mobiliario, estrategias de integración de baños y cocinas) como desde su perspectiva colectiva y de conjunto (escala urbana, fachadas, espacios comunes, inserción en la ciudad). Con una compilación de citas traducidas al castellano, variadas imágenes y planimetría preparada especialmente para ilustrar cada uno de los ejemplos analizados, Ediciones ARQ presenta esta nueva publicación de la serie Arquitectura - Teoría y Obra, que contribuye a enriquecer la bibliografía básica para alumnos de arquitectura.

*Progetti per paesaggi archeologici - Projets pour paysages archéologiques - Projects for archeological landscapes* Jun 24 2023 Il volume illustra la struttura tematica, l'organizzazione didattica, i luoghi e i progetti del seminario internazionale di progetto partecipato ARCILAB12. L'iniziativa organizzata dalla scuola di Architettura dell'Università di Cagliari si è svolta nel 2012 nei centri abitati di Ales, Morgongiori, Pau, Usellus e Villa Verde nell'ambito del programma transfrontaliero Maritimo Italia-Francia ACCESSIT finanziato dalla Regione Sardegna e indirizzato alla definizione di linee guida per i progetti per i paesaggi archeologici sul territorio regionale con specifico riferimento al miglioramento dell'accessibilità del patrimonio culturale. Sono state esplorate le potenzialità della valorizzazione e del miglioramento della

fruizione di siti significativi sotto il profilo archeologico e paesaggistico dei territori del monte Arci, attraverso l'elaborazione di un progetto di rete territoriale e la costruzione in scala reale di un prototipo per ognuno dei centri coinvolti. L'obiettivo del seminario consiste in un'esperienza didattica complessa in cui la conoscenza dei luoghi e il progetto trovano sintesi convergendo nella pratica del costruire. Carlo Atzeni È dottore di ricerca in Ingegneria Edile e professore associato di Architettura Tecnica presso il DICAAR dell'Università degli Studi di Cagliari. Alla Facoltà di Ingegneria e Architettura di Cagliari è coordinatore del Corso di Studi in Scienze dell'Architettura; dal 2009 è coordinatore scientifico del workshop internazionale di progetto ARCILAB. I suoi principali campi di studio e ricerca sono: il recupero e riqualificazione dell'architettura storico-tradizionale del Mediterraneo, il progetto di architettura contemporanea nei contesti storici consolidati e negli ambiti di margine a forte connotazione rurale. Le sue esperienze di ricerca più significative sono legate allo studio dell'architettura di base in Sardegna, alla redazione dei Manuali del recupero dei Centri Storici della Sardegna e dell'antica Casbah di Dellys in Algeria, all'indagine sulle nuove forme di habitat per i margini dei centri abitati delle aree interne della Sardegna. La sua attività di ricerca applicata al progetto si è distinta attraverso numerosi premi e menzioni in

concorsi internazionali e nazionali di architettura.

The Courtyard House May 11 2022 The courtyard house is one of the most enduring architectural forms, transcending regional, historical and cultural boundaries. Its balance of simple appropriate construction, environmental control and social and familial structures continues to engage architects and architectural historians. That the courtyard house is still relevant today is indicated through its ability to accommodate continual transformation without losing any of its formal integrity and cultural roots. This book presents a series of viewpoints on courtyard houses from different periods and in different regions around the world; from the Harem courtyards of the Topkapi Palace and the low-cost housing settlements of Protectorate Casablanca, to contemporary design strategies for courtyard houses in the arid Gulf region. Together, the essays illuminate issues of particular relevance in architectural, art historical, and conservation discourses today.

The Phaidon Atlas of Contemporary World Architecture Jun 19 2020 A condensed version of the information contained in the ground breaking Phaidon Atlas of Contemporary World Architecture, this travel edition is pocket sized and portable, ideal for the holiday or business traveller. Organized geographically and illustrated with global, regional and sub-regional maps, locating

each building, plus twenty seven city orientations, the book contains 1,052 buildings, each of which is illustrated with a single image, and is accompanied by a brief description as well as the address and telephone number

**European Union Prize for Contemporary Architecture--Mies Van Der Rohe Award** Dec 26 2020

Advances in Ergonomics in Design Jan 19 2023

This book provides readers with a timely snapshot of ergonomics research and methods applied to the design, development and prototyping - as well as the evaluation, training and manufacturing - of products, systems and services. Combining theoretical contributions, case studies, and reports on technical interventions, it covers a wide range of topics in ergonomic design including: ecological design; cultural and ethical aspects in design; Interface design, user involvement and human-computer interaction in design; as well as design for accessibility and many others. The book particularly focuses on new technologies such as virtual reality, state-of-the-art methodologies in information design, and human-computer interfaces. Based on the AHFE 2019 International Conference on Ergonomics in Design, held on July 24-28, 2019, Washington D.C., USA, the book offers a timely guide for both researchers and design practitioners, including industrial designers, human-computer interaction and user experience researchers, production engineers and applied psychologists.

*Wood Architecture* Jul 21 2020 Timber is having a

renaissance as an architectural material, as more architects come to understand its properties, and enjoy adding it to their repertoire of materials. With a growing crop of good new timber buildings, architects are coming to realise that this is no longer the sole preserve of the traditionalist, but a material that has an important role to play in the contemporary world. The book's introduction examines the ways in which a raw material of diminishing quality (but abundant quantity) can be 'stretched' to perform as it has never done before using new technology and careful detailing. The 40 case studies are devoted to some of the most interesting new wood projects from around the world. The projects are grouped in seven themed chapters. Featured architects from around the world include Steven Holl, Foster and Partners, Rural Studio, Renzo Piano and Shigeru Ban.

**The Importance of Wood and Timber in Sustainable Buildings** Oct 16 2022 This book emphasizes the important message that architects and structural engineers must strive to ensure that the buildings they design and construct should not be major contributors to climate change. Rather, they should be exploring the use of green materials and building methods - such as timber, wood, and associated materials - in order to safeguard the environment. These sustainable materials are not only environmentally friendly, but they have the added benefit of being easy to manufacture, cost effective, often locally

available, and easily replenished. Moreover, it has been demonstrated that wood and timber are viable materials in the construction of a wide variety of building types, including medium and high-rise buildings. The Importance of Wood and Timber in Sustainable Buildings brings together a distinguished group of contributors from different cultures and building traditions to address why now is the time to rethink our construction methods and explore replacing many of the carbon intensive materials that are currently being used with wood and timber.

**Tradition and Innovation** Feb 08 2022 The texts presented in Proportion Harmonies and Identities (PHI) Tradition and Innovation were compiled with the intent to establish a multidisciplinary platform for the presentation, interaction, and dissemination of researches. They also aim to foster the awareness and discussion on the topic of Tradition and Innovation, focusing on different visions relevant to Architecture, Arts and Humanities, Design and Social Sciences, and its importance and benefits for the sense of identity, both individual and communal. The idea of Tradition and Innovation has been a significant motor for development since the Western Early Modern Age. Its theoretical and practical foundations have become the working tools of scientists, philosophers, and artists, who seek strategies and policies to accelerate the development process in different contexts.

**Facade Construction Manual** Aug 02 2021 «Facade

Construction Manual» provides a systematic survey of contemporary expertise in the application of new materials and energy-efficient technologies in facade design. It surveys the facade design requirements made by various types of buildings, as well as the most important materials, from natural stone through to synthetics, and documents a diversity of construction forms for a wide range of building types.
