Concepts embody our knowledge of the kinds of things there are in the world. Tying our past experiences to our present interactions with the environment, they enable us to recognize and understand new objects and events. Concepts are also relevant to understanding domains such as social situations, personality types, and even artistic styles. Yet like other phenomenologically simple cognitive processes such as walking or understanding speech, concept formation and use are maddeningly complex. Research since the 1970s and the decline of the "classical view" of concepts have

greatly illuminated the psychology of concepts. But persistent theoretical disputes have sometimes obscured this progress. The Big Book of Concepts goes beyond those disputes to reveal the advances that have been made, focusing on the major empirical discoveries. By reviewing and evaluating research on diverse topics such as category learning, word meaning, conceptual development in infants and children, and the basic level of categorization, the book develops a much broader range of criteria than is usual for evaluating theories of concepts. Children love animals, and enjoy learning about them. This stunning natural history book presents the information in the form of fun facts, focus features, folklore and myth boxes, 'Did You Know?' spots, and bite sized lessons of all kinds. It is illustrated with more than 1200 pictures by some of the world's best wildlife photographers and 750 specially commissioned illustrations and cross sections. Examining a huge range of incredible animals from insects, beetles, bugs, spiders, moths and butterflies to snakes, birds of prey, wolves, dogs, horses, mighty bears, whales and elephants, this comprehensive book is a stimulating and accessible read for all 8-12 year olds. Features a directory of Web sites on whales aimed at elementary school students, compiled by Michael Benish and presented online as part of the TrackStar resource of SCR*TEC. An exploration of the world of dolphins and whales, featuring information, facts, photographs and illustrations. Links are given to related Web sites for further information throughout the book. Supporting STEM-based learning, this fact-filled book for shark aficionados ages 6-9 is the ultimate guide to sharks, from hammerheads to great whites. Entertaining and educating young readers through a combination of close-up images, quirky trivia facts, quiz questions, and fascinating tidbits, it's the perfect book for any kid who can't get enough of these ferocious fish. Which

shark species can live for 400 years? Why do some sharks glow in the dark? What was the biggest shark of all time? Find out the answers to these questions and more in DKfindout! Sharks, which features stunning wildlife photography of sharks in their native environments, throughout every stage of their life cycles. The book explains what separates sharks from other kinds of fish, introducing readers to more than 50 shark species from around the world and giving habitat and growth statistics for each one. With an eye to conservation, DKfindout! Sharksspotlights endangered shark species and offers advice for preserving ocean habitats, making it the perfect choice for eco-conscious kids looking to learn more about this amazing underwater world. Vetted by educational consultants, the DKfindout! series drives kids ages 6-9 to become experts on more than 30 of their favorite STEM- and history-related subjects, whether Vikings, volcanoes, or robots. This series covers the subjects that kids really want to learn about-ones that have a direct impact on the world around them, like climate change, space exploration, and rapidly evolving technology-making learning fun through amazing images, stimulating quizzes, and cutting-edge information. The DKfindout! series is one that kids will want to turn to again and again. Every page features detailed illustrations and colourful photographs that bring the text to life for kids. This is the perfect dolphin book for kids aged 7+ who want to learn more about these fascinating sea creatures. The Magic School Sub takes the kids deep into the ocean, where they learn allsorts of fascinating facts about whales. From

legendary author and critic bell hooks and multi-Caldecott Medalist Chris Raschka comes a new way to talk about race and identity that will appeal to parents of the youngest readers. The skin I'm in is just a covering. It cannot tell my story. If you want to know who I am, you have got to come inside and open your heart way wide. Race matters, but only so much--what's most important is who we are on the inside. Looking beyond skin, going straight to the heart, we find in each other the treasures stored down deep. Learning to cherish those treasures, to be all we imagine ourselves to be, makes us free. This award-winning book, celebrates all that makes us unique and different and offers a strong, timely and timeless message of loving yourself and others. Examines every major aquatic organism as well as lesser-known and rare life-forms including water-dwelling plants and animals and the algae and bacteria that constitute the first links in the food chain. What's your favorite animal? In My Favorite Animal: Humpback Whales, students will learn amazing facts about humpback whales. Each My Favorite Animal book features interesting non-fiction at a 2nd-grade reading level paired with questions throughout the text to check the reader's comprehension. Sample Text: Although Humpbacks are mostly solitary whales they will hunt together. They often use the "bubble-net feeding" method. They form a circle 10-100 feet across and about 50 feet under the surface of the water. They blow bubbles from their spout while circling upwards towards the surface. This creates a curtain of bubbles that traps the fish. Have you ever wondered what it would be like if a blue whale was your friend? By imagining animals in everyday scenarios readers can learn about their size, diet and other features. Engaging question and answer format will keep young readers entertained and help them to understand and retain animal facts. For example, what would a whale do on Valentine's Day? She

would make an enormous valentine card because she has the biggest heart in the animal world! Featuring superb illustrations with an engaging question and answer format, this series will keep young readers entertained and help them to understand and retain animal facts. Learn all about these large and majestic ocean-dwelling mammals, from humpback whales to blue whales to belugas! This early reader from National Geographic Kids is full of information about whales from around the world and covers where they live, what they eat, how they stay safe, and more. Perfect for beginning and young readers, National Geographic Pre-readers include simple, expert-vetted text and large, engaging photos on every page. A vocabulary tree at the beginning of the book introduces kids to key words in concept groups, helping kids make connections between words. Plus, a wrap-up activity gives kids a chance to use what they've learned, while expanding their understanding of the world. From tiny rats and bats to giant elephants and blue whales, our planet is home to an incredible variety of mammals. Featuring almost 200 profiles of individual species, DK's Pocket Genius: Mammals looks at humans, whales, wallabies, camels, and more, highlighting facts on anatomy, behavior, diet, habitats, and classification, plus extinction and conservation efforts to save endangered species. Catalog entries packed with facts provide at-a-glance information, while locator icons offer immediately recognizable references to aid navigation and understanding, and fact files round off the book with fun facts such as record breakers and timelines. Each mini-encyclopedia is filled with facts on subjects ranging from animals to history, cars to dogs, and Earth to space and combines a child-friendly layout with engaging photography and bite-size chunks of text that will encourage and inform even the most reluctant readers. In Herman Melville's classic tale of revenge, Ishmael tells his story of becoming a whaler on

the Pequod. When Ishmael and his unexpected friend Queequeg join Captain Ahab's hunt for Moby Dick, the voyage of a lifetime turns into tragedy. The adventures of sailing the seas on the hunt for the great white whale is retold in the Calico Illustrated Classics adaptation of Melville's Moby Dick. Calico Chapter Books is an imprint of Magic Wagon, a division of ABDO Group. Grades 3-8. This book depicts the wonder of the world of Whales in all its glory. Children are given a well-rounded understanding of this beautiful mammal: its anatomy, feeding habits and behavior. Filled with up-to-date information, color photos, fascinating & fun facts this book "Whales:100+ Amazing & Interesting Fun Facts with Pictures" is the best book for kids to find out more about the amazing creature Whale. This book would satisfy the children's curiosity and help them to understand why whales are special-and what makes them different from other animals. The book gives a story, history, detailed science, explores the interesting facts about largest blue whales, killer whale, sperm whale, fin whale, gray whale, bow-head whale, humpback whale, etc. in the ocean world. This is a great chance

for every kid to expand their knowledge about whales and impress family and friends with all discovered and never known before fun facts. Check out our other kids' book series (1-11) - Dolphin Facts, Penguin Facts, Kangaroos Facts, Shark Facts, Dinosaur Facts and many more. Head to the depths of the ocean to study humpback whales in this beautiful nonfiction field guide for kids. You may know that humpback whales use whale song to communicate with each other, but there's so much more to discover about these giants of the sea! In this book, acclaimed marine biologist Dr. Asha de Vos explains how humpbacks use special bubble nets to catch fish, and why their poo is so important! Filled with simple science and plenty of animal facts, this book also explains how hunting made humpback whales an endangered species—and how conservation efforts have seen their numbers increase again. Featuring stunning illustrations by Jialei Sun, Humpback Whale (Young Zoologist) is part of an exciting new series of animal books from Neon Squid aiming to inspire the next generation of biologists and conservationists. A nonfiction picture book full of great charm and beauty, The Blue Whale is both informative and completely captivating! Diving dolphins, amazing belugas and massive blue whales! Plunge into the ocean and meet some of the most amazing animals on Earth. See whales "fly" through the water, a spotted dolphin and the fearsome "wolf of the sea". Packed with fantastic facts and dramatic, atmospheric photography, Eyewonder Dolphins and Whales is great for homework and projects or just for fun. This book distills twenty-five-plus years of personal study done by a Harvard Law-trained trial attorney to determine whether Darwin's big idea—the notion that more complex species evolved from more simple ancestors—is supported by the scientific evidence. Spoiler alert: it is not. Yet most Americans have been taught to believe that Darwin's theory has been proven beyond all reasonable doubt. Sadly, most

people do not have nearly enough time to do the reading and study necessary to understand that this belief is false. This book changes all that. It is unique in that it presents technical information from more than a dozen important books in a form that is both brief and easily understood. Readers can learn a series of decisive truths about Darwin's big idea in just a few hours...truths that may well take them completely by surprise. Teaches young readers everything they need to know about the largest mammals on earth: how they have evolved over millions of years, what and how they eat, their migration patterns, and more. The most influential rationalist model of scientific knowledge is arguably the one formulated recently by Michael Friedman. The central epistemic claim of the model concerns the character of its fundamental principles which are said to be independent from experience. Friedman's position faces the modern empiricist challenge: he has to explain how the principles could still be a priori if they change under empirical pressure. This book provides a contemporary account of the epistemic character of the principles, addressing recent work on the a priori in modern analytic epistemology. Its main thesis is that at least some principles within natural science are not empirically but a priori revisable. A Priori Revisability in Science formulates a general notion of epistemic revisability and extracts two kinds of specific revisabilities: the traditional empirical one and the suggested novel a priori revisability. It presents the argument that the latter is as vital as the former and even so within natural science. To demonstrate this, the author analyzes two case studies - one from the history of geometry and one from the history of physics - and shows that the revisions were a priori. The result of this is two-fold. First, a genuine alternative of empirical revisability is developed, and not just for traditional a priori domains like

mathematics, but for the natural sciences as well. Second, a new mechanism for the dynamics of science is suggested, the a priori dynamics, at the core of which the scientific knowledge sometimes evolves through non-empirical moves. A newborn blue whale can weight as much as a full-grown hippo, about 6,000 pounds! Students will journey into the deep sea and learn all the fascinating facts about the early life of the largest animal to have ever lived. Featuring easy-to-follow text and exciting photographs, this book introduces elementary students to life science concepts, from birth to searching for food and avoiding predators, supporting the Next Generation Science Standards on growth and development of organisms, biodiversity, and social interactions in animal groups. In addition, Fast Facts provide quick, interesting bits of information. Introduce your young one (3-5) to the majesty of Whales Once almost hunted into extinction, and now slowly making a comeback, we have only now started to understand and appreciate how truly awesome these creatures are. From the Blue Whale: the largest creature ever to the Orca: one of the most intelligent creatures on earth - help be the spark that starts what could be your child's life-long love for and dedication to the preservation and protection of Whales and marine life as a whole. What to expect: Great images: The Wonderful Lives of Whales comes with great pictures to help your child get a sense of what each featured Whale looks like. Interesting Facts: For all we know about Whales, we are finding out every day that there is still so much to learn. Your child will learn a few cool facts about Whales. Easy read: Help boost child's vocabulary while they learn This book takes readers on a journey under the sea to discover the fascinating facts about whale sharks, including physical features, habitat, life cycle, food, and more. Photos, captions, and keywords supplement the narrative of this informational text, while additional search

tools--including a glossary and an index--help students locate and review important information. This book takes readers on a journey under the sea to discover the fascinating facts about beluga whales, including physical features, habitat, life cycle, food, and more. Photos, captions, and keywords supplement the narrative of this informational text, while additional search tools--including a glossary and an index--help students locate and review important information. Children's Picture Book by John Kennedy Paperback Version - 50 Pages - Rhyming Verses - Ages 5-10

Eye Wonder: Whales and Dolphins presents young readers with a wealth of information about these beautiful mammals including where they live, what they eat, how they breed, and the ways in which humans and the environment threaten their very existence. A precursor to DK's awarding-winning Eyewitness series, Eye Wonder was specially developed for children aged five plus, featuring astonishing photography exhibiting subjects within their natural setting, offering a whole new level of information through powerful images. Each title in the series now contains educational activities including true and false questions, quizzes, matching games, and mazes. Vocabulary is accessible to young readers, with the meanings of new, subject-related words clearly explained. The combination of visuals and informative, accurate text will hook even those children who usually avoid books. This easy-to-follow guide takes you on a humpback whale adventure of fascinating facts and educational anecdotes about this energetic and friendly marine mammal. Featuring beautiful color photos and information about Hawai'i's special place as the most significant breeding ground for humpback whales in the North Pacific.
