From Doon with Death Jun 18 2020 Dazzling psychological suspense. Razor-sharp dialogue. Plots that catch and hold like a noose. These are the hallmarks of crime legend Ruth Rendell, "the best mystery writer in the English-speaking world" (Time magazine). From Doon with Death, now in a striking new paperback edition, is her classic debut novel—and the book that introduced one of the most popular sleuths of the twentieth century. There is nothing extraordinary about Margaret Parsons, a timid housewife in the quiet town of Kingsmarkham, a woman devoted to her garden, her kitchen, her husband. Except that Margaret Parsons is dead, brutally strangled, her body abandoned in the nearby woods. Who would kill someone with nothing to hide? Inspector Wexford, the formidable chief of police, feels baffled -- until he discovers Margaret's dark secret: a trove of rare books, each volume breathlessly inscribed by a passionate lover identified only as Doon. As Wexford delves deeper into both Mrs. Parsons' past and the wary community circling round her memory like wolves, the case builds with relentless momentum to a surprise finale as clever as it is blindsiding. In From Doon with Death, Ruth Rendell instantly mastered the form that would become synonymous with her name. Chilling, richly characterized, and ingeniously constructed, this is psychological suspense at its very finest. Praise for From Doon with Death "One of the most remarkable novelists of her generation."—People "She has transcended her genre by her remarkable imaginative power to explore and illuminate the dark corners of the human psyche."—P.D. James

Once More We Saw Stars Jul 20 2020 "A gripping and beautiful book about the power of love in the face of unimaginable loss." --Cheryl Strayed For readers of *The Bright Hour* and *When Breath Becomes Air*, a moving, transcendent memoir of loss and a stunning exploration of marriage in the wake of unimaginable grief. As the book opens:

two-year-old Greta Greene is sitting with her grandmother on a park bench on the Upper West Side of Manhattan. A brick crumbles from a windowsill overhead, striking her unconscious, and she is immediately rushed to the hospital. But although it begins with this event and with the anguish Jayson and his wife, Stacy, confront in the wake of their daughter's trauma and the hours leading up to her death, *Once More We Saw Stars* quickly becomes a narrative that is as much about hope and healing as it is about grief and loss. Jayson recognizes, even in the midst of his ordeal, that there will be a life for him beyond it--that if only he can continue moving forward, from one moment to the next, he will survive what seems unsurvivable. With raw honesty, deep emotion, and exquisite tenderness, he captures both the fragility of life and absoluteness of death, and most important of all, the unconquerable power of love. This is an unforgettable memoir of courage and transformation--and a book that will change the way you look at the world.

Death Before Dying Aug 01 2021 Brain death-the condition of a non-functioning brain, has been widely adopted around the world as a definition of death since it was detailed in a Report by an Ad Hoc Committee of Harvard Medical School faculty in 1968. It also remains a focus of controversy and debate, an early source of criticism and scrutiny of the bioethics movement. Death before Dying: History, Medicine, and Brain Death looks at the work of the Committee in a way that has not been attempted before in terms of tracing back the context of its own sources-the reasoning of it Chair, Henry K Beecher, and the care of patients in coma and knowledge about coma and consciousness at the

time. That history requires re-thinking the debate over brain death that followed which has tended to cast the Committee's work in ways this book questions. This book, then, also questions common assumptions about the place of bioethics in medicine. This book discusses if the advent of bioethics has distorted and limited the possibilities for harnessing medicine for social progress. It challenges historical scholarship of medicine to be more curious about how medical knowledge can work as a potentially innovative source of values.

I'm Glad My Mom Died Nov 04 2021 * #1 NEW YORK TIMES BESTSELLER * #1 INTERNATIONAL BESTSELLER * MORE THAN 2 MILLION COPIES SOLD! A heartbreaking and hilarious memoir by iCarly and Sam & Cat star Jennette McCurdy about her struggles as a former child actor—including eating disorders, addiction, and a complicated relationship with her overbearing mother—and how she retook control of her life. Jennette McCurdy was six years old when she had her first acting audition. Her mother's dream was for her only daughter to become a star, and Jennette would do anything to make her mother happy. So she went along with what Mom called "calorie restriction," eating little and weighing herself five times a day. She endured extensive at-home makeovers while Mom chided, "Your eyelashes are invisible, okay? You think Dakota Fanning doesn't tint hers?" She was even showered by Mom until age sixteen while sharing her diaries, email, and all her income. In *I'm Glad My Mom Died*, Jennette recounts all this in unflinching detail—just as she chronicles what happens when the dream finally comes true. Cast in a new Nickelodeon series called *iCarly*, she is thrust into fame. Though Mom is ecstatic, emailing fan club moderators and getting on a first-name basis with the paparazzi ("Hi Gale!"), Jennette is riddled with anxiety, shame, and self-loathing, which manifest into eating disorders, addiction, and a series of unhealthy relationships. These issues only get worse when, soon after taking the lead in the *iCarly* spinoff *Sam & Cat* alongside Ariana Grande, her mother dies of cancer. Finally, after discovering therapy and quitting acting, Jennette embarks on recovery and decides for the first time in her life what she really wants. Told with refreshing candor and dark humor, *I'm Glad My Mom Died* is an inspiring story of resilience, independence, and the joy of shampooing your own hair.

Z213 : Exit Sep 02 2021 **Z213: EXIT** marks the beginning of Dimitris Lyacos' poetic trilogy *Poena Damni*. Written over the course of seventeen years, in reverse order, the present publication sees the trilogy's completion. The last episode, *The First Death*, was the first to appear in 1996, followed by the second, *Nyctivoe*, in 2001. The *Poena Damni* trilogy both straddles and crosses perceived boundaries of literary form - from the journal-like prose in *Z213: EXIT*, to the elliptical monologues of the distinctly dramatic *Nyctivoe*, to the pared down poetic idiom in *The First Death*. *Z213: EXIT* provides the main axis for the narrative: from its description of the protagonist's escape to a barren and distorted - but nonetheless real - world will emerge the grotesque ritual of redemption, enacted by the proles of *Nyctivoe* and, finally, the struggle of the mutilated hero on the island in *The First Death*.

Death Jun 11 2022 The fact that we will die, and that our death can come at any time, pervades the entirety of our living. There are many ways to think about and deal with death. Among those ways, however, a good number of them are attempts to escape its grip. In this book, Todd May seeks to confront death in its power. He considers the possibility that our mortal deaths are the end of us, and asks what this might mean for our living. What lessons can we draw from our mortality? And how might we live as creatures who die, and who know we are going to die? In answering these questions, May brings together two divergent perspectives on death. The first holds that death is not an evil, or at least that immortality would be far worse than dying. The second holds that death is indeed an evil, and that there is no escaping that fact. May shows that if we are to live with death, we need to hold these two perspectives together. Their convergence yields both a beauty and a tragedy to our living that are inextricably entwined. Drawing on the thoughts of many philosophers and writers - ancient and modern - as well as his own experience, May puts forward a particular view of how we might think about and, more importantly, live our lives in view of the inescapability of our dying. In the end, he argues, it is precisely the contingency of our lives that must be grasped and which must be folded into the hours or years that remain to each of us, so that we can live each moment as though it were at once a link to an uncertain future and yet perhaps the only link we have left.

Avoiding the First Cause of Death Jan 18 2023 Interventions that delay aging are expected to improve health. In the current US National Institute on Aging's Interventions Testing Program (ITP) the immunosuppressive drug rapamycin was found to increase the maximum life span in mice. These mice started receiving this treatment at an age corresponding to 60 years in humans. Rapamycin targets the same mechanism which was critically involved in the life span extension previously seen in certain mutants of worms flies and mice. The maximum life span was increased in some of these mutants by more than 250 percent, suggesting 1) that the maximum life span is limited by a common mechanism of death, and 2) that humans may possibly gain a few more decades beyond 120 years by interfering in this mechanism. As rapamycin has important adverse effects, this books looks into the underlying mechanisms and describes several natural interventions likely to decrease the rate of aging without using pharmacological drugs.

A man is savagely murdered outside Portland, and Detective Mason Callahan finds blood-spatter evidence that tells a troubling story. Files reveal the murder victim, Reuben Braswell, was a radical conspiracist. In his home, investigators find pages of diatribes against law enforcement as well as ties to Mason's fiancée, FBI special agent Ava McLane. The victim was her informant--and had strong reasons to be paranoid. To Ava, Braswell's rants were those of a wearying and harmless man...until they collide with her investigation into the murders of police officers and finding the connection becomes urgent. Meanwhile, Braswell's brother and Ava's twin sister both disappear, and disturbing acts of sabotage target Ava's personal life. For Mason and Ava, the brutal crimes and escalating mysteries create a perfect storm for a terrorist conspiracy that becomes dangerously personal--one that has yet to claim its last victim.

Challenging the Limits of the Human Life Span Nov 16 2022 Interventions that delay aging are expected to improve health. In the current US National Institute on Aging Interventions Testing Program (ITP) the immunosuppressive drug rapamycin was found to increase the maximum life span in mice. These mice started receiving this treatment at an age corresponding to 60 years in humans. Rapamycin targets the same mechanism which was critically involved in the life span extension previously seen in certain mutants of worms flies and mice. The maximum life span was increased in some of these mutants by more than 250 percent, suggesting 1) that the maximum life span is limited by a common mechanism of death, and 2) that humans may possibly gain a few more decades beyond 120 years by interfering in this mechanism. As rapamycin has important adverse effects, this books looks into the underlying mechanisms and describes several natural interventions likely to decrease the rate of aging without using

pharmacological drugs

Marked for Death: The First War in the Air Apr 09 2022 A dramatic and fascinating account of aerial combat during World War I, revealing the terrible risks taken by the men who fought and died in the world's first war in the air. Little more than ten years after the first powered flight, aircraft were pressed into service in World War I. Nearly forgotten in the war's massive overall death toll, some 50,000 aircrew would die in the combatant nations' fledgling air forces. The romance of aviation had a remarkable grip on the public imagination, propaganda focusing on gallant air 'aces' who become national heroes. The reality was horribly different. Marked for Death debunks popular myth to explore the brutal truths of wartime aviation: of flimsy planes and unprotected pilots; of burning nineteen-year-olds falling screaming to their deaths; of pilots blinded by the entrails of their observers. James Hamilton-Paterson also reveals how four years of war produced profound changes both in the aircraft themselves and in military attitudes and strategy. By 1918 it was widely accepted that domination of the air above the battlefield was crucial to military success, a realization that would change the nature of warfare forever.
