Sportsman's Connection's Western New York All-Outdoors Atlas & Field Guide contains maps created at twice the scale of other road atlases, which means double the detail. And while the maps are sure to be the finest quality you have ever used, the thing that makes this book unique is all the additional information. Your favorite outdoor activities including fishing lakes and streams, hunting, camping, hiking and biking, snowmobiling and off-roading, paddling, skiing, golfing and wildlife viewing are covered in great depth with helpful editorial and extensive tables, which are all cross-referenced and indexed to the map pages in a way that's fun and easy to use. The Talmud states, "In a world that lacks humanity, be human." In a world as untethered as ours has become, simply being human, a good person, is a measure of heroism. At a time when norms of civility are being routinely overwhelmed, it may be the only measure that matters. Mensch-Marks represents Rabbi Joshua Hammerman's personal Torah scroll—the sacred text of his experiences, the life lessons he has learned along his winding, circuitous journey. Mirroring 42 steps Israel wandered in the Wilderness, Hammerman offers 42 brief essays, several of which first appeared in *The New York Times Magazine*, organized into categories of character, or "mensch-marks," each one a stepping stone toward spiritual maturation. These essays span most of Rabbi Hammerman's life, revealing how he has striven to be a "mensch," a human of character, through every challenge. Mensch-Marks creates a brand-new genre. It is memoir as sacred story, as how-to book; a series of personal vignettes in dialogue with one another over the span of decades, resonating with eternal ideas that span centuries. It traces the author's own personal growth while providing a road map for people of all backgrounds seeking a life of moral vision. The wisdom is shared not from a pulpit on high, but rather from an unfolding story of a fellow traveler, one who has stumbled, failed, and persevered, struggling with the questions large and small. Through it all, Rabbi Hammerman has tried to live with dignity and grace, what he calls the "nobility of normalcy." He writes, "If by sharing what I've learned, I can add a modicum of generosity, honesty and human connection in a world overflowing with cruelty, loneliness and deceit, then I'll have done my job." The essays cover crucial moments of failure and forgiveness, loving and letting go, finding deeper meaning in one's work, and holiness in the seemingly inconsequential moments of everyday life. Rabbi Hammerman, ever the optimist, believes that we can turn things around, one mensch at a time. This handy pocket map is fully street indexed, encompassing all U.S. state and interstate highways; points of interest; schools; hospitals, and ZIP codes • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, *Vox* "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world. The official guide to the 141 miles of the Appalachian Trail between the Vermont and New York lines, paralleling the western borders of Massachusetts and Connecticut. This packaged product includes a new edition of the guidebook, in modern unidirectional format, with a set of four detached topographical maps (two sheets, printed on both sides), scaled at one inch: one mile with 100-foot contours and including elevation profiles, shelters and other features, and water sources. Features of the Massachusetts-Connecticut route include Mt. Greylock, the nearby towns of the Berkshires, and the river walks of western Connecticut. The range of the maps is from several miles into Vermont to about 20 miles into New York (reaching the train stop that connects hikers to Manhattan) The book includes local history as well as background on trail landmarks. The new National Geographic Benchmark Recreation Atlases are an ideal recreation resource complete with accurate, detailed topographic maps. They contain a wealth of robust travel information, including campground locations, state park maps, sports and activity destinations, museums, hunting and fishing information, historic sites and even climate details. Every feature is clearly labelled, field-checked and verified, and everything is organised for convenience and intuitive ease-of-use. The books feature a double laminated cover to prevent wear and tear.
