***Beauty and the Beak Dec 18 2022 The true, inspiring story and photos of Beauty, the wild bald eagle that made world news when she injured, rescued, and for the first time ever, received a 3D-printed prosthetic beak. Toby Toucan and His Noisy Beak Sep 03 2021 Toby Toucan snip snaps his very fine, but very noisy, beak morning and night. When his neighbors complain, he's very sad. Then, everyone learns that his snip snap is useful, after all.***

***Beaks of the Turtles Dec 26 2020***

***Beauty and the Beaks Jan 19 2023 When Lance, a very pretentious turkey, arrives on the farm and boasts that he is the only bird invited to a special feast, no hen is impressed, but when Beauty learns that Lance is the main course, she convinces the others to save him.***

***The Beak Book Sep 15 2022 Rhyming text describes beaks of various birds and tells what this part of the anatomy can do.***

***The Beak Book Aug 26 2023 From Caldecott Honor illustrator Robin Page comes this striking picture book exploring the fascinating and surprising ways different kinds of birds use their unique beaks. Birds around the world have so many amazing kinds of beaks! There are short beaks and long beaks, straight beaks and curved beaks, flat beaks and even spoon-shaped beaks. But what do all of these beaks do? Discover how beaks of different shapes and sizes are adapted to help birds sip nectar, make nests, battle for mates, and more!***

***Feathers: Not Just for Flying Sep 22 2020 Read Along or Enhanced eBook: Young naturalists meet sixteen birds in this elegant introduction to the many uses of feathers. A concise main text highlights how feathers are not just for flying. More curious readers are invited to explore informative sidebars, which underscore specific ways each bird uses its feathers for a variety of practical purposes. A scrapbook design showcases life-size feather illustrations.***

***Broken Beaks May 11 2022 A story about the friendship between a homeless man and a small sparrow.***

***A Handbook for the Identification of Cephalopod Beaks Jan 27 2021 This definitive work, based on collections made throughout the world, represents the collaborative effort of most of the world's experts on living cephalopods. The book provides detailed instructions for collecting, transporting, examining, and identifying the lower 'beaks' or mandibles of cephalopods, including almost all known living genera. The many new illustrations, keys, descriptions, and measurements mark this book as a major advance over previous handbooks and make it an essential reference work.***

***Time, Love , Memory Jul 01 2021 The story of Nobel Prize-winning discoveries regarding the molecular mechanisms controlling the body's circadian rhythm. How much of our fate is decided before we are born? Which of our characteristics is inscribed in our DNA? Weiner brings us into Benzer's Fly Rooms at the California Institute of Technology, where Benzer, and his associates are in the process of finding answers, often astonishing ones, to these questions. Part biography, part thrilling scientific detective story, Time, Love, Memory forcefully demonstrates how Benzer's studies are changing our world view--and even our lives. Jonathan Weiner, winner of the Pulitzer Prize for *The Beak of the Finch*, brings his brilliant reporting skills to the story of Seymour Benzer, the Brooklyn-born maverick scientist whose study of genetics and experiments with fruit fly genes has helped revolutionize or knowledge of the connections between DNA and behavior both animal and human.***

***Funny Bums, Freaky Beaks Oct 04 2021 A compendium of all the most unusual and unexpected features in the animal kingdom, from puzzling toes to weird ears, and all the other body parts in between! Carries the underlying message that everybody and everything is strange and wonderful in its own way.***

***Beaks, Bones and Bird Songs Nov 24 2020 Beaks, Bones & Bird Songs guides the reader through the myriad, and often almost miraculous, things that birds do every day to merely stay alive. Lederer shares how and why***

**birds use their sensory abilities to see ultraviolet, find food without seeing it, fly thousands of miles without stopping, change their songs in noisy cities, navigate by smell, and much more.**

**Shell, Beak, Tusk Mar 29 2021 We think of evolution as a tree with branches that make clear, linear sense—with one animal and its traits clearly derived from one that came before it genetically. But what about animals who share key traits but aren't on the same family tree? This is called convergent evolution, and it's the big idea that Bridget Heos tackles in a kid-friendly way in Shell, Beak, Tusk. From mammals to reptiles, and everything in between, Heos manages to make some intriguing comparisons—and bring to life theories of evolution and convergent evolution in bite-sized, easily digested chunks of fun facts, illustrated with full-color photography throughout.**

**Bird Beak Book Mar 21 2023**

**The Galapagos Islands Jul 13 2022**

**The Beak of the Finch Oct 28 2023 PULITZER PRIZE WINNER • A dramatic story of groundbreaking scientific research of Darwin's discovery of evolution that "spark[s] not just the intellect, but the imagination" (Washington Post Book World). "Admirable and much-needed.... Weiner's triumph is to reveal how evolution and science work, and to let them speak clearly for themselves."—The New York Times Book Review On a desert island in the heart of the Galapagos archipelago, where Darwin received his first inklings of the theory of evolution, two scientists, Peter and Rosemary Grant, have spent twenty years proving that Darwin did not know the strength of his own theory. For among the finches of Daphne Major, natural selection is neither rare nor slow: it is taking place by the hour, and we can watch. In this remarkable story, Jonathan Weiner follows these scientists as they watch Darwin's finches and come up with a new understanding of life itself. The Beak of the Finch is an elegantly written and compelling masterpiece of theory and explication in the tradition of Stephen Jay Gould.**

**Harvey Beaks #2: "It's Crazy Time" Dec 06 2021 Life can be confusing enough for just about anyone one and Harvey Beaks is no exception. Harvey knows that doing everything "right," isn't always the most fun. Doing things like Fee and Foo may not be "right," but it sure seems to be a lot more fun! While Fee and Foo may go too far at times, pushing Harvey beyond his limits, Harvey knows that he doesn't want it any other way. As scary as it may get hanging out with the two naughty imps, life in the forest would be a whole lot duller without them! See why the LA TIMES called HARVEY BEAKS a series "that's as carefree and sunny as its characters" and " a gateway to raising a wonderfully weird kid".**

**The Beaks of Birds May 23 2023 Come along on a tour of the wonderful**

**world of birds and their beaks. This book is the story of a child and two grown-up friends on a jaunt across their yard, in a park, past a pond, and through the pages of a photo album. Like them, you'll find you can figure out what birds eat by the shape of their bills--and why some have beaks like straws, pouches, or even daggers. Also like them, you'll have all kinds of questions about amazing birds--from house finches to hummingbirds to great blue herons--that use their own built-in tools for eating. Rounding out the story are five kid-friendly activities and background information parents and teachers can use.**

**Fun Fact File Jan 07 2022 The beak differences between a pelican and a cardinal are very clear. A pelican's has a pouch on the lower part of the bill that is perfect to hold water when scooping up fish. A cardinal's beak is short and thick, made for cracking open nuts and seeds. How these beaks evolved over time is an adaptation to the birds' environment and diet! Many other types of animals--such as mammals, reptiles, and amphibians--also have fascinating adaptations that help them find food, eat, and hide. The main content introduces readers to science curriculum concepts, including why certain adaptations develop and how they differ from other animal species.**

**Birds from Head to Tail May 31 2021 Part bird book, part guessing game — what a perfect pair! In this interactive book, kids get to test their bird knowledge, one body part at a time. “What bird has eyes like this?” asks a spread showing a close-up illustration of the body part without revealing the rest of the bird’s body. “A bald eagle!” answers the following spread, which features an illustration of the whole bird in its habitat, along with intriguing information about its unique body part and what makes it special. Eight birds in all are featured, along with another eight on an additional spread at the back of the book. From a great horned owl’s head to a peacock’s tail, it’s fun guessing birds by their body parts!**

**A Peek at Beaks Feb 20 2023 Have you ever seen a bird using a jackhammer? What about one scooping up a meal with a net? Of course birds can’t really use tools, at least not the way humans do. But birds have surprisingly helpful tools with them at all times—their beaks! Guess which birds have beaks resembling commonly used tools in this playful picture book from award-winning author Sara Levine. Delightfully detailed collage artwork by Kate Slater helps this book take flight!**

**The Beak of the Finch Sep 27 2023 On a remote outpost of the Galapagos, where Darwin received his first inklings of the theory of evolution, two scientists, Peter and Rosemary Grant, have spent 20 years measuring the beaks of generations of finches--to prove that Darwin did not know the strength of his own theory. "Spark(s) not just the intellect, but the imagination".--Washington Post Book World. 50 illustrations. Map.**

**Whose Beak is This? Nov 05 2021 "Children guess the identity of iconic New Zealand birds from the pictures of their beaks, while finding out some facts about the birds along the way. This approach introduces an important science concept about adaptation : birds' beaks are a very obvious adaptation to the kind of food they eat"--Publisher's website.**

**Beak of the Moon Jul 21 2020 Beak of the Moon was the bestselling novel of 1981, an instant classic that has since been described as 'unique in New Zealand literature'. Using kea as characters, the book is deeply and authentically rooted in this famous alpine parrot's raucous lifestyle and Southern Alps environment. In the remote valley of Kawee, the timeless world of the kea is suddenly disrupted when strange wingless birds appear. The destruction they bring causes hardship and corruption to kea society and forces young Strongbeak to flee the tyrannical boss Highfeather. Inspired by the prophecies of the great yellow kea, Glintamber, Strongbeak leads a group of rebellious young birds in a quest for a new world beyond the mountains. They seek adventure and discovery but instead become involved in farce and tragedy before they discover freedom in an unexpected way. In Beak of the Moon, Philip Temple has given us more than a great novel. It is a celebratory parable of the natural world of which we are all a part, a realm of myth for all to love and treasure. This new and revised edition brings his inspirational characters to life for another generation.**

**Peck, Peck, Peck Mar 09 2022 Did You Ever Wonder What Good Is A Bird's Beak? This Clever Book, With Great Photos Of Many Different Beaks, Tells The Many Uses Of Beaks.**

**The Best Beak in Boonaroo Bay Apr 10 2022 On most days Boonaroo Bay is a calm and quiet place. But this was not always so . . . One day the birds were quarrelling noisily. Which of them had the best beak? Find out how the wise old pelican restored the peace and quiet of Boonaroo Bay.**

**Bionic Beasts Feb 25 2021 What happens when a young elephant steps on a buried land mine? What happens when a sea turtle's flipper is injured by a predator? Thanks to recent advances in technology, we have new ways to design and build prosthetic body parts that can help these animals thrive. Meet an Asian elephant named Mosha, a Kemp's ridley sea turtle named Lola, a German Shepherd named Cassidy, a greylag goose named Vitória, and Pirate, a Berkshire-Tamworth pig. Each of these animals was struggling, but through a variety of techniques and technologies, humans created devices that enabled the animals to live and move more comfortably. Discover the stories of how veterinarians, doctors, and even students from around the world used 3D printing and other techniques to build bionic body parts for these amazing animals.**

**Bob the Artist Aug 22 2020 Bob the bird is just like all his friends, apart**

**from his skinny legs. When Bob is teased, he decides to try and change himself to fit in. But little does he know where all his efforts will lead him... An affirming picture book for age 3+ about the power of art and of being confident enough to be yourself.**

**Beaks, Bones and Bird Songs Jun 12 2022 "Reveals the strange and wondrous adaptations birds rely on to get by." —National Audubon Society When we see a bird flying from branch to branch happily chirping, it is easy to imagine they lead a simple life of freedom, flight, and feathers. What we don't see is the arduous, life-threatening challenges they face at every moment. Beaks, Bones, and Bird Songs guides the reader through the myriad, and often almost miraculous, things that birds do every day to merely stay alive. Like the goldfinch, which manages extreme weather changes by doubling the density of its plumage in winter. Or urban birds, which navigate traffic through a keen understanding of posted speed limits. In engaging and accessible prose, Roger Lederer shares how and why birds use their sensory abilities to see ultraviolet, find food without seeing it, fly thousands of miles without stopping, change their songs in noisy cities, navigate by smell, and much more.**

**Designed to Survive Apr 29 2021 Why does a pelican have a pouch under its beak? What is a casque? Which bird's beak is compared to a carpenter's tools? How did the tailorbird get its name? This book gives you a sneak peek into the beaks of these and many other birds of India.**

**The Ballad of Songbirds and Snakes (A Hunger Games Novel) Oct 24 2020 Ambition will fuel him. Competition will drive him. But power has its price. It is the morning of the reaping that will kick off the tenth annual Hunger Games. In the Capitol, eighteen-year-old Coriolanus Snow is preparing for his one shot at glory as a mentor in the Games. The once-mighty house of Snow has fallen on hard times, its fate hanging on the slender chance that Coriolanus will be able to outcharm, outwit, and outmaneuver his fellow students to mentor the winning tribute. The odds are against him. He's been given the humiliating assignment of mentoring the female tribute from District 12, the lowest of the low. Their fates are now completely intertwined - every choice Coriolanus makes could lead to favor or failure, triumph or ruin. Inside the arena, it will be a fight to the death. Outside the arena, Coriolanus starts to feel for his doomed tribute . . . and must weigh his need to follow the rules against his desire to survive no matter what it takes.**

**Busy Beaks Nov 17 2022 Spend a day with Australia's most vibrant and unique feathered friends. Full of splashing shorebirds, clattering cockatoos, parading penguins and greedy galahs, Busy Beaks is the perfect introduction to birds of all shapes and sizes.**

**A Chicken Followed Me Home! Jun 19 2020 Why did the chicken cross the**

**road? To follow you home! Learn all about a not-so-basic bird in this delightful nonfiction picture book. What's that? A chicken followed you home? Now what do you do? Celebrated author-illustrator Robin Page leads a step-by-step, question-and-answer-style journey through the world of chickens. Along the way you'll explore different breeds, discover different types of coops, and learn everything there is to know about chicken reproduction and hatching. Gorgeous, playful, and filled with facts, this engaging nonfiction picture book shines new light on a very familiar fowl!**

**The Beak of the Finch Jul 25 2023 Winner of the Pulitzer Prize On a desert island in the heart of the Galapagos archipelago, where Darwin received his first inklings of the theory of evolution, two scientists, Peter and Rosemary Grant, have spent twenty years proving that Darwin did not know the strength of his own theory. For among the finches of Daphne Major, natural selection is neither rare nor slow: it is taking place by the hour, and we can watch.
