Harvard Law Review: Volume 125, Number 5 - March 2012 Oct 13 2022 The Harvard Law Review is offered in a quality ebook edition, featuring active Contents, linked footnotes and cross-references, linked URLs, legible tables, and proper formatting. This current issue of the Review is March 2012, the fifth issue of academic year 2011-2012 (Volume 125). Featured articles in this issue are from such recognized scholars as Jody Freeman and Jim Rossi, on the coordination of administrative agencies when they share regulatory space, and James Whitman, reviewing Bernard Harcourt's new book on the illusion of free markets as to prisons. Student contributions explore the law relating to antitrust law and business deception; the failed Google Books settlement; mergers and acquisitions; materiality in securities law; administrative law; patentable subject matter; and paid sick leave. Finally, the issue includes two Book Notes.

Transnational Financial Associations and the Governance of Global Finance Aug 11 2022 The role of business in global governance is now widely recognized, but exploration of its role in global financial governance has been more haphazard than systematic. This book provides the first comprehensive analysis of the

role of transnational financial associations (TFAs) in the organization of global finance. This book develops three theoretical themes of assemblage, functionality, and power as enrolment. These themes challenge approaches that treat financial power as emanating from a single location or force. Whilst existing approaches tend to treat TFAs as irrelevant or as merely transmitting power originating elsewhere, this book argues that power must be created by painstakingly assembling actors, networks, and objects that are often quite autonomous and working at cross purposes to one another—a process in which TFAs play a central role. The book explores these themes in chapters examining the roles of TFAs in interacting with public authorities, constructing global financial markets, and creating financial communities. The authors additionally analyse the roles of TFAs in the European Union, in the Global South, and in promoting goals other than profitability, including Islamic finance, microfinancing, savings banks and cooperatives. Making a distinctive contribution to our understanding of global finance and global governance, *Transnational Financial Associations and the Governance of Global Finance* is an important book for students and scholars of international political economy,

finance, global governance and international relations.

[International Marketing: An Asia-Pacific Perspective](#) Mar 26 2021 *International Marketing, 6e* is written from a wholly Australasian perspective and covers issues unique to local marketers and managers

looking towards the Asia-Pacific region, the European Union, and beyond. It presents a wide range of contemporary issues faced by subsidiaries of multinational enterprises (MNEs) as well as small and medium scale enterprises (SMEs), mainly exporters, which make up the vast bulk of firms involved in international business in the Australasian region. International Marketing, 6e clearly demonstrates the links between the different stages of international marketing, connecting analysis with planning, planning with strategy and strategy with implementation. Key concepts are brought to life with comprehensively updated statistics, recent illustrations, and a variety of real-world examples and case studies.

Understanding Lone Actor Terrorism Oct 21 2020 This volume examines the lone actor terrorist phenomenon, including the larger societal trends which may or may not have led to their acts of terrorism. With lone actor terrorism becoming an increasingly common threat, the contributors to this volume aim to answer the following questions: What drives the actions of individuals who become lone actor terrorists? Are ideological and cultural issues key factors, or are personal psychological motives more useful in assessing the threat? Do lone actors evolve in a broader social context or are they primarily fixated loners? What response strategies are available to security services and law enforcement? What is the future outlook for this particular terrorist threat? Although these issues are frequently discussed, few books have taken a global perspective as their primary focus. While many books focus on lone actor terrorists in relation

to terrorist groups, such as Al-Qaida and the Islamic State, few, if any, cover lone actors of all ideological backgrounds, including the variants of active shooters and malicious insiders in information security, such as Edward Snowden - with both of these latter categories constituting an important variant of lone actors. Utilising the expertise of academics and practitioners, the volume offers a valuable multidisciplinary perspective. This book will be of much interest to students of terrorism and counter-terrorism, political violence, criminology, security studies and IR.

National Perspectives on Russia Mar 06 2022 This book presents a ground-breaking comparative study of the bilateral relations of all 27 EU member states with Russia and an assessment of their impact on the EU's efforts to conduct a coherent and effective policy towards its most important neighbour. While there has been a lot of research on European foreign policy, there has been much less on the role that national foreign policies play in it. Based on a common analytical framework, this book offers a detailed analysis of 'national perspectives on Russia' and how they interact with and affect policymaking at the EU-level. The authors provide deep insights into the relationship between individual states and Russia looking at a range of policy areas: economics, trade, energy, security, culture and education. They are not only interested in examining policy failure but also probing the possibilities of seeing national foreign policies and the bilateralism with third parties that they often entail as a potentially positive resource for the European Union. As Russia is an

example of a particularly hard case for EU foreign policy, this book yields important insights concerning the possibilities as well as limits of developing a common EU policy in the future. It will be of interest to students and scholars of European politics, EU Studies, Russian politics, foreign policy studies and international politics.

Handbook of Political Violence and Children May 20 2023 Political violence has disrupted the lives of millions of children around the world. Responding to the gravity and scale of this phenomenon, this volume is intended to stimulate discussion and research on children's exposure to political violence and its psycho-social effects. It brings together for the first time in a single volume three areas of scientific activity in different disciplines: research on effects, programs for intervention, and laws and policy for prevention of political violence to children. Section I presents reviews of research on children exposed to political violence, including child soldiers and refugee children, as well as an examination of methodology and ethics. Section II contains research on interventions with children exposed to political violence, including individual therapy and school, family, and community interventions. Section III covers legal and social issues in deterring the recruitment of children to violent causes and protecting children in armed conflict. Pulling together the work of leading scholars and practitioners in the social sciences and

international law, this volume argues that the prevention of political violence to children is possible, and it provides a crucial basis for ideas for prevention.

Collapse of Memory - Memory of Collapse

Apr 26 2021 The attraction of crises keeps going an entire sector of the media industry. Authors, painters, photographers and directors tell fascinating stories about the decline of empires and democracies as much as earthquakes and infectious diseases. Hereby, catastrophe and collapse evolve as a complex construct of experience, interpretation and emotion. The resulting narrative combines analyses of facts about the collapse with a retrospect evaluation, update and confirmation of these facts in the cultural memory of a given society. The random occurrence becomes a memorable event. The contributors of this volume have taken a narratological approach in examining collapse, disaster, catastrophe and how these in turn manifest themselves across different types of media. Die Anziehungskraft der „Krise“ stimuliert Kultur- und Medienschaffende gleichermaßen. Inspiriert erzählen sie fesselnde Geschichten vom Zusammenbruch von Imperien und Demokratien ebenso wie von Erdbeben und

Epidemien. In diesen entwickeln sich Katastrophe und Untergang als komplexe Konstrukte aus Erfahrungen, Interpretationen und Emotionen. Sie vereinen die Analyse von Fakten über eine Katastrophe mit der Aktualisierung von Erfahrungen des kulturellen Gedächtnisses im Umgang mit Katastrophen. Hierbei wird der beliebige Vorfall zum erinnerbaren Ereignis. Die Autoren dieses Bandes untersuchen aus narratologischer Perspektive Untergang, Disaster, Katastrophe und wie sie mittels verschiedener Medien erzählt werden. Food Fortification May 08 2022
Food Fortification: The evidence, ethics, and politics of adding nutrients to food critically analyses mandatory food fortification as a technology for protecting and promoting public health. Increasing numbers of foods fortified with novel amounts and combinations of nutrients are being introduced into the food supplies of countries around the world to raise populations' nutrient intakes. It is a technology that is becoming more widely used to tackle a variety of public health problems such as micronutrient malnutrition. Food fortification policies and programs are controversial. There are disputes over the ethics of food fortification as everyone who consumes fortified foods will be exposed to raised levels of nutrients irrespective of whether they will gain any benefit and often without their knowledge. There are also contested views about the evidence that is available to support such activities. This book discusses mandatory food fortification as an intervention to protect and promote public health through presenting a synthesis of the findings from research investigations into three topical case studies of mandatory food fortification: Universal salt iodisation to help prevent iodine deficiency disorders; mandatory flour fortification with folic acid to help prevent neural tube defects; and mandatory milk fortification with vitamin D to help prevent vitamin D deficiency. Each case study is assessed for its public health benefits, risks and ethical considerations.

Our Own Way in This Part of the World Nov 14 2022 Kofi Donko was a blacksmith and farmer, as well as an important healer, intellectual, spiritual leader, settler of disputes, and custodian of shared values for his Ghanaian community. In Our Own Way in This Part of the World Kwasi Konadu centers Donko's life story and experiences in a communography of Donko's community and nation from the late nineteenth century through the end of the twentieth, which were shaped by historical forces from colonial Ghana's cocoa boom to decolonization and political and religious parochialism. Although Donko touched the lives

of thousands of citizens and patients, neither he nor they appear in national or international archives covering the region. Yet his memory persists in his intellectual and healing legacy, and the story of his community offers a non-national, decolonized example of social organization structured around spiritual forces that serves as a powerful reminder of the importance for scholars to take their cues from the lived experiences and ideas of the people they study.

Automated/Mechanized Drilling and Countersinking of Airframes Jun 09 2022 Modern aircraft manufacturing involves drilling and countersinking hundreds of thousands to millions of holes. Doing this work by hand accounts for 65% of the cost of airframe assembly, 85% of the quality issues, and 80% of the lost time due to injuries. Automated drilling and countersinking replaces traditional hand methods and involves using numeric control machinery to drill and countersink a finished hole "one shot" (drilling a finished hole without using pilot holes or tool changes). This is a proven cost reducing technology that improves quality where it has been applied successfully.

The focus of this book is on automating the process of drilling and countersinking holes during airframe manufacturing. Since this is the area of greatest return on investment for airframe producers, the book provides a stepped approach for evaluating possible areas for applying automation and a detailed description of the process for choosing, acquiring, and transitioning the right machinery for success. It also provides a vision for a 10- to 15-year future state of airframe manufacture. Readers will use the information to:

- Understand the evolution of automated/mechanized drilling and countersinking airframes.
- Access decision models and matrices to help evaluate the feasibility of applying automation/mechanization to any airframe.
- Gain access to a step-by-step procedure to select the right piece of machinery.
- Learn the necessary processes for testing and transitioning machinery to production.
- Assess and acquire data to evaluate the effect of the process.
- Choose and train the right individuals to manage and run the machinery.
- Conduct cost benefit analysis models.
- Make recommendations for maintenance and spares.
- Address socio-economic factors to reconfigure a facility from hand to automated activities. No other book provides such detailed technical, economic, and social information about automating the single largest contributor to airframe cost.

Regional Disorder May 16 2020 China's rise casts a vast and uncertain shadow over the regional balance of power in the Asia Pacific, and nowhere is this clearer than in the South China Sea. The significance of the fraught territorial disputes in this potentially resource-rich sea extends far beyond the small groupings of islands that are at their heart, and into the world of great-power politics. As the struggle for hegemony between the US and China intersects with the overlapping aspirations of emerging, smaller nations, the risk of escalation to regional conflict is real. Christian Le Mi and Sarah Raine cut through the complexities of these disputes with a clear-sighted, and much-needed, analysis of the assorted strategies deployed in support of the multiple and competing claims in the SCS. They make a compelling case that the course of these disputes will determine whether the regional order in Southeast Asia is one of cooperation, or one of competition and even conflict.

Soldier Repatriation Aug 19 2020 Soldier repatriation from Afghanistan has impacted debate about the war. This study highlights this impact with particular focus on Britain, Denmark and Germany. All three countries deployed soldiers soon after the 9/11 attacks, yet their role in Afghanistan and the casualty rates suffered, have been vastly different. This book looks at how their casualties influenced the framing of the war by analysing the political discourse about the casualties, how the media

covered the repatriation and the burials, and how the dead were officially recognised and commemorated. Explaining how bodies count is not done exclusively by focusing on the political leadership and the media in the three countries, the response from the men and women in Afghanistan to the official framing of the war is given particular weight. Martinsen contributes to our understanding of European strategic culture by showing how countries respond to the same security challenges.

US Policies in Central Asia Dec 15 2022

Democracy promotion, security and energy are the predominant themes of US policy in Central Asia after the Cold War. This book analyses how the Bush administration understood and pursued its interests in the Central Asia states, namely Kyrgyzstan, Tajikistan, Kazakhstan, Uzbekistan, Turkmenistan. It discusses the shift in US interests after September 11 and highlights key ideas, actors and processes that have been driving US policy in Central Asia. The author examines the similarities between the Bush and Obama administrations' attitudes towards the region, and he points to the inadequacy of the personality focused, partisan accounts that have all too often been deployed to describe the two presidential administrations. To understand US Central Asian policy, it is necessary to appreciate the factors behind its continuities as well as the legacies of the September 11 attacks. Using case studies on the war on terror, energy and democracy, drawing on personal interviews with Americans and Central Asians as well as the fairly recent releases of declassified and leaked US Government documents via sources like the Rumsfeld Papers and Wikileaks, the

author argues that the US approached Central Asia as a non-unitary state with an ambiguous hierarchy of interests. Traditionally domestic issues could be internationalised and non-state actors were able to play significant roles. The actual relationships between its interests were neither as harmonious nor as conflicted as the administration and some of its critics claimed. Shedding new light on US relations with Central Asia, this book is of interest to scholars of Central Asia, US Politics and International Relations.

Pentecostalism and Politics of Conversion in India Jun 16 2020 This book studies the politics of Pentecostal conversion and anti-Christian violence in India. It asks: why has India been experiencing increasing incidents of anti-Christian violence since the 1990s? Why are the Bhil Adivasis increasingly converting to Pentecostalism? And, what are the implications of conversion for religion within indigenous communities on the one hand and broader issues of secularism, religious freedom and democratic rights on the other? Drawing on extended ethnographic fieldwork amongst the Bhils of Northern India since 2006, this book asserts that ideological incompatibility and antagonism between Christian missionaries and Hindu nationalists provide only a partial explanation for anti-Christian violence in India. It unravels the complex interactions between different actors/ agents in the production of anti-Christian violence and provides detailed ethnographic narratives on Pentecostal

conversion, Hindu nationalist politics and anti-Christian violence in the largest state of India that has hitherto been dominated by upper caste Rajput Hindu(tva) ideology.

Royal Marriage Secrets Dec 03 2021 With a new royal baby we witness fundamental changes in the succession laws, but then rules governing the royal weddings and the succession to the throne have always been shifting. So what is marriage and who decides? What special rules govern royal marriage and when did they come into force? How have royal marriages affected history? Were the 'Princes in the Tower' illegitimate? Did Henry VIII really have six wives? Was Queen Victoria 'Mrs Brown'? how were royal consorts chosen in the past? Did some use witchcraft to win the Crown? History has handled debateable royal marriages in various ways, but had the same rules been applied consistently, the order of succession would have been completely different. Here, all controversial English and British royal marriages are reassessed together for the first time to explore how different cases can shed light on one another. Surveying the whole phenomenon of disputed royal marriage, the author offer some intriguing new evidence, while highlighting common features and points of contrast.
