when we will retire - so why don't we like talking about it? Money is complicated, or at least it seems complicated. From ISAs to pensions and debt to tax, money management feels like a mine-field, but it doesn't need to be. Makala Green, a financial expert, The UK's first black female chartered financial expert, a businesswoman and a speaker and wealth coach with over 17 years' experience has spent years learning about the different aspects of the financial world. Here, she shares all her knowledge to help us break down barriers and gain financial freedom. The Money Edit is a no-jargon, straight-talking guide, giving us the confidence and clarity to understand money and help us make the right choices - no matter what life stage we are at. Makala busts money-myth after myth and shows us how to: 1. Cultivate a money mindset 2. Address difficult conversations about money 3. Track income and expenses and learn how to budget 4. Start saving and plan for the future 5. Get on the property ladder 6. Adapt when financial circumstances change

Makala is here to make you feel positive, confident and in control when it comes to money. Silicon Valley tries to disrupt the world — and the world says “no.” Facebook: the biggest social network in history. A stupendous, world-shaping success. But governments were giving Facebook trouble over personal data abuses, election rigging and fake news. Mark Zuckerberg wondered: what if Facebook could pivot to finance? Or, better: what if Facebook started its own private world currency? Facebook could have so much power that governments couldn't stop them. It would be the Silicon Valley dream. Facebook launched Libra in June 2019. Libra would be an international currency and payment system. It would flow instantly around the world by phone. It could even “bank the unbanked.” Libra could apparently do all this just by using a “blockchain.” But Libra would also make Facebook too big to control— and to lead the way for Facebook's Silicon Valley fellows to swing the power of their money as they pleased. Facebook and their friends could work around any single country's rules. Libra could shake whole economies. And Facebook would become the “digital identity” provider to the world. If you wanted to use money at all, you'd have to go through Facebook. Governments looked at Libra — and they saw another 2008 financial crisis in the making. Facebook's plan would have made the company even more entrenched — at the cost of broken economies worldwide. Starting with toppling the US dollar. Libra was as incompetent as it was arrogant — and the world stopped it in its tracks. But how did Facebook put forward such a bizarre and ill-considered plan, that left every regulator who saw it reeling in horror? And what happens when another company tries the same trick? Or when Facebook won't take “no” for an answer, and releases the cut-down version that they're already calling “Libra 2.0”?

The advanced level playing strategy is a powerful system that will give the blackjack player up to a 1.5% edge over the casinos. The book also contains advice on which blackjack games give you the most profit potential, the risks involved in playing blackjack, how to play without fear of getting barred, and the discipline to 'take the money and run'. The success stories speak for themselves in this book from money maestro Dave Ramsey. Instead of promising the normal dose of quick fixes, Ramsey offers a bold, no-nonsense approach to money matters, providing not only the how-to but also a grounded and uplifting hope for getting out of debt and achieving total financial health. Ramsey debunks the many myths of money (exposing the dangers of cash advance, rent-to-own, debt consolidation) and attacks the illusions and downright deceptions of the American dream, which encourages nothing but overspending and massive amounts of debt. "Don't even consider keeping up with the Joneses," Ramsey declares in his typically candid style. "They're broke!" The Total Money Makeover isn't theory. It works every single time. Toughen up, take action, and keep what's yours! Have you, like many women, put off organizing your financial life? You know you want independence, you know you want to save, and you know you want a solid retirement. But if you're overwhelmed at the thought of where and how to begin, you're not alone. You may have been raised to defer to others in matters of money, or you may feel you simply lack the understanding of how to take on financial matters. Without the confidence they need, it's easy for women to find themselves in a situation where the only action they feel they can take is hoping that everything will turn out all right in the end. But planning for the future doesn't have to be this way. *Money Confidence* is Crystal Oculee's authoritative and engaging reality check and call to action for women of all ages to take—or regain—control of their financial lives. The author shows why hope is not a financial strategy, and how, with the tools and information she provides, women can attain the independence, savings, and secure retirement they want. The author cleverly employs metaphors from familiar fairy tales to illuminate and accentuate the book's serious message: Women need to toughen up; and they can and need to identify and overcome myths and mind-sets that place them at a disadvantage when it comes to dealing with their money and finding and working with financial advisors. Oculee shows women how to communicate, be strong, ask questions, and reject advisors who don't take them seriously. Real-life scenarios of various women's experiences with money and advisors prove how women can get the confidence they need once they know what is holding them back. The author presents informative, down-to-earth explanations of common financial situations and specific financial products along with useful worksheets in a conversational and friendly tone with a good dose of sass. Women will find her valuable and easy-to-follow advice rings true. Crystal is a personal finance expert, a national financial motivational speaker, a Personal Money Trainer™, and author. "A rallying cry to bring government back under the control of the people . . . Their argument is impassioned and accessible." --Library Journal

American democracy has become coin operated. Special interest groups increasingly control every level of government. The necessity of raising huge sums of campaign cash has completely changed the character of politics and policy making, determining what elected representatives stand for and how their time is spent. The marriage of great wealth and intense political influence has rendered our country unable to address our most pressing problems, from runaway government spending to climate change to the wealth gap. It also defines our daily lives: from the cars we drive to the air we breathe to the debt we owe. In this powerful work of reportage, Wendell Potter and Nick Penniman, two vigilant watchdogs, expose legalized corruption and link it to the kitchen-table issues citizens face every day. Inciting our outrage, the authors then inspire us by introducing us to an army of reformers laying the groundwork for change, ready to be called into action. The battle plan for reform presented is practical, realistic, and concrete. No one--except some lobbyists and major political donors--likes business as usual, and this book aims to help forge a new army of reformers who are compelled by a patriotic duty to fight for a better democracy. An impassioned, infuriating, yet ultimately hopeful call to arms, Nation on the Take lays bare the reach of moneyed interests and charts a way forward, toward the recovery of America's original promise. An e-commerce payment application is literally rewarding to build—you can see the return on investment as genuine money is added to your account. But it can be stressful to manage, with security and compliance concerns and administration issues. And your entire business may depend on these features working smoothly. Let Noel Rappin guide you through the setup and complications of dealing with online financial transactions. Go beyond just the interaction with the gateway service and build an application that will be robust and useful over time. Set up a Stripe and PayPal payment gateway and accept credit card payments. Use the Stripe API to improve security by validating credit card data without sending it through your own server. Design your application for maximum flexibility against the inevitable complexities of business logic, including handling discounts. Manage the multiple failure points of dealing with payment gateways and test for failure cases. Use background jobs to simplify third-party interactions. Handle administrative tasks such as issuing refunds and discounts while maintaining data integrity and security. Create subscription plans and manage recurring payments, and stay on top of legal issues regarding taxes, reporting, and compliance. Pay affiliates or contributors from your application. By the end, you will know how to create a fully-functional web payment-taking machine. A guide to creating a personalized debt reduction plan offers daily spending strategies, expense-tracking tools, and budgeting guidance, while offering advice on discussing debt problems with family and downsizing expenses. “I'm never going to date again!” Sarah swore vehemently, standing in the middle of their hotel room, objecting to her best friend Callie's insistence on a “girl's night out.” “I'm going to join a nunnery, stave off men altogether. So I most certainly have no interest in hanging out at a bar where there will be scumbags aplenty,” she insisted petulantly. It really wasn't all men that Sarah was exasperated with, but rather the string of men she'd managed to attract who should have come with warning signs, like “Scumbag King,” “Super Sloth,” or “Lying, Cheating Dirt-bag.” “I'm not trying to find you a husband, Sarah...just a good lay. Or hell, a little flirting is fine with me,” Callie explained patiently. “You've been out of the game for months now. And I get it, you had some bad luck. But, it's time to get back on the horse—at least long enough to take one out for a ride.” Bad luck was an understatement in Sarah's opinion. In the past three years since graduating from college, she'd wound up dating a gambler who had maxed out her credit cards behind her back, and a deadbeat who, it turned out, was not a video game designer as he had said, but rather a fanatical video game player. The latest in her string of “bad luck,” a compulsive cheater who couldn't keep it in his pants—even in the midst of her twenty-fifth birthday celebration. She'd darted off to her bedroom to look for a sweater and ended up finding her sister riding her boyfriend like he was a bucking stallion. “Is this the line for pony rides?” Sarah had asked dryly before turning around and walking out of the house. She wasn't angry at her sister; Liz hadn't known the scumbag was her... **NEW YORK TIMES, WALL STREET JOURNAL, AND USA TODAY BESTSELLER** • A ten-step plan for finding peace, safety, and harmony with your money—no matter how big or small your goals and no matter how rocky the market might be—by the inspiring and savvy “Budgetnista.” “No matter where you stand in your money journey, Get Good with Money has a lesson or two for you!”—Erin Lowry, bestselling author of the Broke Millennial series Tiffany Aliche was a successful pre-school teacher with a healthy nest egg when a recession and advice from a shady advisor put her out of a job and into a huge financial hole.
