In The Slow Professor, Maggie Berg and Barbara K. Seeber discuss how adopting the principles of the Slow movement in academic life can counter the erosion of humanistic education. Study by a mathematical scholar on the ways in which African people count, keep time and records, play games, use geometry in art and architecture, etc. Based on research in Nigeria and East Africa.

Learn a four-step research-based program for differentiating instruction based on the cultural needs, beliefs, and values of diverse learners. The authors show you how to build teacher background knowledge; plan for differentiation; and differentiate context, content, process, product, and assessment. This book provides an opportunity for the education community to engage students at risk whom our schools have often failed. Many very intelligent people don't like dealing with numbers. Similarly, many gifted scientists are not especially interested in studying people and their cultural behaviour. In this book, we argue that being interested in people and their cultures, and helping students and others to use numbers to pursue these interests, are not mutually exclusive. Research methods are becoming an increasingly important requirement for students of all kinds. But many students, particularly those in the humanities, struggle with concepts drawn from the social sciences and find quantitative and statistical information inaccessible and daunting. Nonetheless, such concepts are found in nearly all areas of society, from market research and opinion polls to psychological studies of human behaviour. This book aims to provide a simple guide to the process of conducting research in the humanities, with special reference to media and culture, from the planning stage, through the data gathering, to the analysis and interpretation of results: 'planning it', 'doing it' and 'understanding it'. The book aims to show how students' own choice of research topic can be refined into a manageable research question and how the most appropriate methodologies can be applied. Each section draws on actual examples from research that the authors and their students have conducted. Topics covered include: choosing a research question and method; instrument design

*and pilot data; practical procedures; research with children; looking at statistics; and interpretation of results. Features: *Based on the authors' practical experience as researchers and teachers and is thus accessible, practical and 'how to'. *Includes students' own work as examples. *Bridges the 'divide' between social science and humanities research methods and will therefore appeal to a broad range of students and teachers. Framed around the concept of culture, Nanda and Warms's new concise book makes students aware of the fact that culture matters in driving and shaping human behavior, and that culture is a dynamic concept that interrelates various cultural systems in adaptive (or maladaptive) ways. The text focuses on how culture helps direct and explain peoples' behavior; why this is important for understanding what is going on in the world today, and how we can solve problems and effect positive change. Via ethnographic storytelling and a writing style that is both authoritative and conversational, the authors present the key concepts of anthropology in a way that draws students into the topics. The authors emphasize contemporary issues, issues of globalization, and American culture, while continuing to emphasize equalities and inequalities around gender, class, race and ethnicity, as well as the effects of globalization. The first comprehensive account to record and analyze all deaths arising from the Irish revolution between 1916 and 1921 This account covers the turbulent period from the 1916 Rising to the Anglo-Irish Treaty of December 1921—a period which saw the achievement of independence for most of nationalist Ireland and the establishment of Northern Ireland as a self-governing province of the United Kingdom.*

Separatists fought for independence against government forces and, in North East Ulster, armed loyalists. Civilians suffered violence from all combatants, sometimes as collateral damage, often as targets. Eunan O'Halpin and Daithí Ó Corráin catalogue and analyze the deaths of all men, women, and children who died during the revolutionary years—505 in 1916; 2,344 between 1917 and 1921. This study provides a unique and comprehensive picture of everyone who died: in what manner, by whose hands, and why. Through their stories we obtain original insight into the Irish revolution itself. As cultural diversity becomes increasingly significant in the field of nursing, so does its inclusion in accredited Bachelor of Science in Nursing (BSN) and Associate Degree in Nursing (ADN) programs. An analysis of one university's school of nursing program curriculum was conducted to measure the cultural awareness and competency of nursing students progressing through BSN and ADN accredited programs, using the Cultural Awareness Scale (CAS) survey and a qualitative survey. Results indicated BSN students and senior level students score higher on average compared to ADN students and junior level students respectively. However, low means overall and only 15% to 18% of participants stating they felt very prepared to provide culturally competent care suggested a lack of effectiveness and need for further investigation by the school of nursing to make necessary improvements in their cultural awareness and competency curriculum. All children should have equal access to highly qualified teachers, a strong curriculum, and research-based instructional methods. Understand why RTI is so important and how to achieve successful implementation in your school. Get a clear understanding of poverty and culture, and learn how RTI can close achievement gaps related to these issues. Examine the critical

planning phase of RTI, and preview common pitfalls of implementation. This is a mainstream comprehensive cultural anthropology text with a balanced theoretical perspective. The text has always had as its signature, the extended ethnographies within each chapter as well as excellent coverage of gender and ethnicity. The Eighth Edition features a new companion CD, packaged for free with new copies of the text as well as a robust and content-rich Web site to accompany the text. Anthropological Theory: An Introductory History, Seventh Edition, presents a selection of classic and contemporary essays in anthropology with annotations from authors R. Jon McGee and Richard L. Warms. The idea of heritage as a “capital of irreplaceable cultural, social and economic value” was already present in the European Charter of the Architectural Heritage, adopted by the Council of Europe in 1975 (par.3). Today, this discourse is getting increasing attention on the research agenda. Some argue that, although heritage is always valued highly, the current interest in the impact of heritage is caused by the democratisation of heritage and the increased importance of heritage in today’s society. Others argue that a universal scarcity of funds for heritage management and conservation is the reason to give it its proper attention. Therefore, the Raymond Lemaire International Centre for Conservation (University of Leuven) considered “Heritage Counts” a relevant and timely topic for its yearly international conference, the “thematic week”. This edition twins with the “Cultural Heritage Counts for Europe” project, funded by the EU Culture Programme. The opening day of the conference was co-organised by the lead partner of this project, EUROPA NOSTRA, and brought together European policymakers and international researchers involved in cultural heritage. This

volume specifically reports on the lectures and fruitful debates on heritage impact during the 2015 thematic week. It was observed that evolutions in discourse and policy hold a significant prospect, which also entail an increasing demand for shared insights and formation. In response, this publication reflects on heritage impact by providing research, case studies and reflections that can serve as baseline records, guidance - and hopefully inspiration. The findings are subdivided in three main chapters: "Framing the paradigm", "Impact assessments: research, methods and practice" and "Linking management, conservation and sustainable development".

groundbreaking thriller about a vigilante on a Native American
reservation who embarks on a dangerous mission to track down the
source of a heroin influx. Virgil Wounded Horse is the local
enforcer on the Rosebud Indian Reservation in South Dakota. When
justice is denied by the American legal system or the tribal council,
Virgil is hired to deliver his own punishment, the kind that's hard to
forget. But when heroin makes its way into the reservation and finds
Virgil's nephew, his vigilantism suddenly becomes personal. He
enlists the help of his ex-girlfriend and sets out to learn where the
drugs are coming from, and how to make them stop. They follow a
lead to Denver and find that drug cartels are rapidly expanding and
forming new and terrifying alliances. And back on the reservation,*

a new tribal council initiative raises uncomfortable questions about money and power. As Virgil starts to link the pieces together, he must face his own demons and reclaim his Native identity. He realizes that being a Native American in the twenty-first century comes at an incredible cost. Winter Counts is a tour-de-force of crime fiction, a bracingly honest look at a long-ignored part of American life, and a twisting, turning story that's as deeply rendered as it is thrilling.

Anthropologist Serena Nanda has heralded the importance of understanding human similarities and differences throughout her writing and teaching career. This was especially evidenced in her groundbreaking work, *Gender Diversity: Crosscultural Variations*, a masterful, far-reaching examination of the relationships between sex, gender, and sexuality and how they are culturally constructed. Rich ethnographic examples representing nine cultures illuminate the need to analyze sex/gender roles and identities on the basis of broad cultural patterns and distinct cultural features, including social class, ethnicity, age, religion, urban or rural residence, and exposure to Western cultures. The latest edition incorporates new material on hijras in Bangladesh, three gender alternatives in Indonesia, and global changes related to migration, health, and communication. Concept-reinforcing questions have been added to each chapter. *Gender Diversity, Second Edition* encourages readers to think in new ways about what they consider natural, normal, or morally right. As a concise supplement with multidisciplinary appeal, the enhanced edition is sure to energize the undergraduate classroom. *Team for Change: A Practitioner's Guide to Implementing Change in the Modern Workplace* addresses the problems and multiple complexities of change process, focusing on the most intractable and unpredictable aspect of change: the human aspect. Boldly standing up to today's nihilisms and debasements of taste. *Culture Counts* offers a noble and compelling defense of high culture and the centrality of rich aesthetic experience for a full human life. The wisdom of Roger Scruton's judgments and the elegance of his prose are themselves powerful evidence for the truth of his thesis. This*

"Culture counts" has long been a rallying cry among health advocates and policymakers concerned with racial disparities in health care. A generation ago, the women's health movement led to a host of changes that also benefited racial minorities, including more culturally aware medical staff, enhanced health education, and the mandated inclusion of women and minorities in federally funded research. Many health professionals would now agree that cultural competence is important in clinical settings, but in what ways? Shattering Culture provides an insightful view of medicine and psychiatry as they are practiced in today's culturally diverse clinical settings. The book offers a compelling account of the many ways culture shapes how doctors conduct their practices and how patients feel about the care they receive. Based on interviews with clinicians, health care staff, and patients, Shattering Culture shows the human face of health care in America. Building

on over a decade of research led by Mary-Jo Good, the book delves into the cultural backgrounds of patients and their health care providers, as well as the institutional cultures of clinical settings, to illuminate how these many cultures interact and shape the quality of patient care. Sarah Willen explores the controversial practice of matching doctors and patients based on a shared race, ethnicity, or language and finds a spectrum of arguments challenging its usefulness, including patients who may fear being judged negatively by providers from the same culture. Seth Hannah introduces the concept of cultural environments of hyperdiversity describing complex cultural identities. Antonio Bullon and Mary-Jo Good demonstrate how regulations meant to standardize the caregiving process—such as the use of templates and check boxes instead of narrative notes—have steadily limited clinician flexibility, autonomy, and the time they can dedicate to caring for patients. Elizabeth Carpenter-Song looks at positive doctor-patient relationships in mental health care settings and finds that the most successful of these are based on mutual "recognition"—patients who can express their concerns and clinicians who validate them. In the book's final essay, Hannah, Good, and Park show how navigating the maze of insurance regulations, financial arrangements, and paperwork compromises the effectiveness of mental health professionals seeking to provide quality care to minority and poor patients. Rapidly increasing diversity on one hand and bureaucratic regulations on the other are two realities that have made providing culturally sensitive care even more challenging for doctors. Few opportunities exist to go inside the world of medical and mental health clinics and see how these realities are influencing patient care. Shattering Culture provides a rare look at the day-to-day

experiences of psychiatrists and other clinicians and offers multiple perspectives on what culture means to doctors, staff, and patients and how it shapes the practice of medicine and psychiatry. Now with SAGE Publishing! Culture Counts is a concise introduction to anthropology that illustrates why culture matters in our understanding of humanity and the world around us. The Laval family was one of the most important families in late medieval France, rising to a position of unsurpassed eminence by the mid sixteenth century. Yet, at the very point where they reached this position of unrivalled importance, all was put at risk by the dual challenges of dynastic failure and the Reformation. The vagaries of dynastic failure threatened their hard won success and these problems were compounded by the decision of crucial members of the family to support Protestantism in the middle of the century. By the end of the sixteenth century the fortunes of the family were in ruins and the brief eminence of Laval in western France was over. This monograph offers a fresh look at several of the critical questions facing historians of late medieval and early modern France. It re-examines the clientage of a rising and enterprising family and explores the cultural patronage of a noble court. The book also provides a new insight into the nature of noble Protestantism, notably analysing the connections between nobles, patterns of family loyalty and religious conviction. Finally, it considers the events of wars of religion in western France from the perspective of a noble leadership that simultaneously played a vital

role in sustaining the cause and did much to undermine it. This latter issue is examined in particular through the analysis of the relationship between the houses of Laval and Rohan, two Protestant families with shared loyalties but with rival dynastic ambitions. This study is based on a complete re-examination of the archive base in both Paris and the west of France and in English archives. For many centuries the destruction of the archives of the family of Laval during the French Revolution has prevented historians from undertaking a serious study of the family. Indeed, this book is the first monograph to be published on the Comtes de Laval since the manuscript volume written by Le Blanc de La Vignole in the seventeenth century. At the same time it engages with the historiography of both French and Anglo-Saxon historiographical traditions.
