**This book is the first to trace the origins and significance of positivism on a global scale. Taking their cues from Auguste Comte and John Stuart Mill, positivists pioneered a universal, experience-based culture of scientific inquiry for studying nature and society—a new science that would enlighten all of humankind. Positivists envisaged one world united by science, but their efforts spawned many. Uncovering these worlds of positivism, the volume ranges from India, the Ottoman Empire, and the Iberian Peninsula to Central Europe, Russia, and Brazil, examining positivism’s impact as one of the most far-reaching intellectual movements of the modern world. Positivists reinvented science, claiming it to be distinct from and superior to the humanities. They predicated political governance on their refashioned science of society, and as political activists, they sought and often failed to reconcile their universalism with the values of multiculturalism. Providing a genealogy of scientific governance that is sorely needed in an age of post-truth politics, this volume breaks new ground in the fields of intellectual and global history, the history of science, and philosophy. This is a collection of surveys on important mathematical ideas, their origin, their evolution and their impact in current research. The authors are mathematicians who are leading experts in their fields.**

**The book is addressed to all mathematicians, from undergraduate students to senior researchers, regardless of the specialty. Profondément ancrés à Clermont-Ferrand, toujours à l'affût des nouveaux projets et des nouvelles tendances, nos auteurs passent chaque année au banc d'essai les adresses-clés de la vie locale dans tous les domaines. Restaurants, sorties, commerces, loisirs, hébergements et bons plans, rien ne leur échappe ! Que vous soyez habitant de Clermont-Ferrand de longue date, nouvel arrivant ou visiteur occasionnel, ce City Guide vous facilitera la vie ! « Les Français ne savent pas qui je suis. » Emmanuel Macron se plaint souvent de ne pas être compris. Ce livre est une enquête critique au coeur de sa personnalité, de son parcours, de sa manière de gouverner. Le huitième président de la Ve République s'est construit sur la transgression personnelle, familiale et politique. Son audace, son courage, son goût du risque peuvent fasciner. Ce président cambrioleur, on l'admire plus qu'on ne l'aime. On le hait plus qu'on ne le déteste. Son goût de la séduction jette un doute sur son authenticité. Macron prend la couleur du bain où il est plongé, il est l'homme de sincérités successives, contradictoires à force d'être multiples : quand est-il vrai ? Deux crises exceptionnelles, les gilets jaunes, puis la Covid-19, bouleversent son quinquennat. En révèlent les manques. Il tente de les combler, sans renier ses intentions d'origine, sans reconnaître qu'il est surpris, toujours dans la rationalisation a posteriori : au fond, ces choses-là, il les avait bien senties... Les crises sont pourtant un juge impitoyable et soulignent une faiblesse**

**de ce président : sa difficulté à faire les choses. Elles lui offrent une scène où peut s'épanouir sa nature théâtrale. La normalité n'existe pas dans le métier de président, une bonne dose d'ego est indispensable à son exercice. À la condition de l'efficacité pour le pays. À la fois récit de l'intérieur, biographie, portrait, ce livre raconte le président. Il approche de près la réalité d'un homme qui verrouille son intimité. Fait inédit, la plupart des protagonistes de cette histoire romanesque, mais vraie, ont accepté de livrer leur témoignage : Emmanuel Macron, Brigitte Macron, leurs proches, le premier cercle du pouvoir, et tous ceux qui ont croisé, combattu, affronté ce président a-normal. Séduits ou déçus. Corinne Lhaïk est journaliste. Après avoir dirigé le service politique du magazine L'Express, elle rejoint la rédaction de L'Opinion en janvier 2020. Elle suit le parcours d'Emmanuel Macron depuis 2011. Cet ebook est une version numérique du guide papier sans interactivité additionnelle. Rejoindre le MuCEM depuis le Panier, à Marseille, et se délecter d'une imprenable vue sur la mer. Faire un tour de la montagne Sainte-Victoire. S'offrir une balade à cheval en Camargue. Le Routard Provence (Alpes-de-Haute-Provence, Bouches-du-Rhône, Vaucluse) c'est aussi une première partie haute en couleur avec des cartes et des photos, pour découvrir plus facilement la région et repérer nos coups de cœur ; des adresses souvent introuvables ailleurs ; des visites**

**culturelles originales en dehors des sentiers battus ; des infos remises à jour chaque année ; des cartes et plans détaillés. Merci à tous les Routards qui partagent nos convictions : Liberté et indépendance d'esprit ; découverte et partage ; sincérité, tolérance et respect des autres ! Global climate change requires the development of programs that consider the active restoration of degraded forests and the use of native trees in afforestation to preserve the natural environment. International commitments like the UN REDD program, the Montréal Process and the Convention on Biological Diversity call for the breeding of species rarely contemplated by large industrial companies. Low-intensity breeding is the most rational strategy for those species: simple but robust, and not dependent on continuously increasing funding, and therefore effective even with a relatively small budget. It commonly focuses on high genetic diversity rather than improving economic traits and adaptability rather than productivity. Controlled crosses with full pedigrees typical of high-intensity breeding are replaced by open pollination. This book presents state-of-the-art breeding strategies from the last two decades for several forest tree species of prime importance in the natural forests of Argentina. They are distributed in the three main forestry ecoregions of the country: the subtropical dry forest (Chaco), the subtropical rain forests (Yungas and Alto Paraná rainforests) and the temperate forests of Patagonia. The book also discusses the genetic patterns of the selected species defined using genetic markers together with the**

**analysis of the variation in quantitative traits. Further, it examines the crucial features of their reproductive biology, such as the mating system and gene flow and describes the current breeding programs. Lastly, it presents the latest developments in genetic resources and their emerging applications, concluding with some reflections and perspectives related to the conditioning imposed by climate change. “This sharp critique of French winemakers, and Bordeaux’s Saint Emilion region in particular, caused quite a stir when it was published in France in 2014” (Publishers Weekly). Already provoking debate and garnering significant attention across France and within the wine world, *Vino Business* is a “truly eye-opening exposé” of the dark side of French wine by acclaimed investigative journalist Isabelle Saporta (Booklist). In recent decades, Bordeaux has come under the influence of large-scale international investors. Unafraid to name names, Saporta sheds a harsh light on how this influence has corrupted the region’s centuries-old traditions of winemaking excellence. She uncovers how the classification system was manipulated in 2012 to ensure that the wines of Saint-Émilion—Bordeaux’s most prestigious appellation—were certified premier grand cru classé A. Giving extra points to a chateaux for the size of its parking lot, the quality of the wine itself counts for only thirty percent of that coveted rank. In other chapters, Saporta investigates issues of wine labeling and pesticides, and draws comparisons to Champagne, Burgundy, and the rest of the wine world. “This fast-paced, provocative read” is a cri de coeur for the lost**

values of traditional winemaking (Dave DeSimone, Pittsburgh Tribune Review). This book is a collection of essays on neglected aspects of the Great War. It begins by asking what exactly was so "Great" about it, before turning to individual studies of various aspects of the war. These fall broadly into two categories. Firstly personal, micro-narratives that deal directly with the experience of war, often derived from contemporary interest in diaries and oral histories. Presenting both a close-up view of the viscerality, and the tedium and powerlessness of personal situations, these same narratives also address the effects of the war on hitherto under-regarded groups such as children and animals. Secondly, the authors look at the impact of the course of the war on theatres, often left out in reflections on the main European combatants and therefore not part of the regular iconography of the trenches in places such as Denmark, Canada, India, the Levant, Greece and East Africa.

Contrariant les ambitions de son père, maître pipier à Saint-Claude dans le Haut-Jura, Ulysse Vuillard choisit d'apprendre le métier de tailleur de diamant. En cette fin de XIXe siècle, Saint-Claude est le seul centre français de l'industrie diamantaire, en plein boom depuis la découverte des mines fabuleuses d'Afrique du Sud. En plus de faire son apprentissage afin de devenir un tailleur accompli, un « maître de la Lumière », Ulysse prend des cours d'anglais. Aussi est-ce vers lui que l'on se tourne à Saint-Claude quand on ouvre à Londres un bureau de représentation. Son épouse, Julie de Belleruche, Jurassienne de bonne souche, indomptable de caractère, dont il est éperdument

**amoureux, l'accompagne. Mais le démon de la taille ne le quitte pas. Ulysse ambitionne de créer le diamant dont rêverait le monde entier. Projet dévorant qu'il poursuit sans relâche, au risque de perdre ce qui vaut plus que la pierre la plus pure : l'amour de sa vie... Jean-François Bazin signe un roman à l'intrigue scintillante dans le monde feutré et fascinant des diamantaires. Elargir le cercle des connaisseurs et « rendre la Philosophie populaire » (comme le voulait Diderot) est possible, y compris en ce qui concerne les penseurs grecs et romains : c'est ce que cet ouvrage essaie de faire, en partant parfois d'anecdotes humoristiques concernant la vie des auteurs. Les spécialistes, comme « l'honnête homme » (ou femme) désireux de parfaire sa culture et de réfléchir au sens de sa vie, y trouveront leur compte. Le livre se dévore jusqu'à plus soif en compagnie des philosophes : Antisthène, Platon, Epicure, Pyrrhon, Epictète, Hypatie ou bien Augustin. Cet ebook est une version numérique du guide papier sans interactivité additionnelle. Le Routard, le meilleur compagnon de voyage depuis 45 ans. Merci à tous les Routards qui partagent nos**

**convictions : Liberté et indépendance d'esprit ; découverte et partage ; sincérité, tolérance et respect des autres. An examination of coined money and its significance to rulers, aristocrats and peasants in early medieval Europe Between the end of the Roman Empire in the fifth century and the economic transformations of the twelfth, coined money in western Europe was scarce and high in value, difficult for the majority of the population to make use of. And yet, as Rory Naismith shows in this illuminating study, coined money was made and used throughout early medieval Europe. It was, he argues, a powerful tool for articulating people's place in economic and social structures and an important gauge for levels of economic complexity. Working from the premise that using coined money carried special significance when there was less of it around, Naismith uses detailed case studies from the Mediterranean and northern Europe to propose a new reading of early medieval money as a point of contact between economic, social, and institutional history. Naismith examines structural issues, including the mining and circulation of metal and the use of bullion and other commodities as money, and then offers a chronological account of monetary development, discussing the post-Roman period of gold coinage, the rise of the silver penny in the seventh century and the reconfiguration of elite power in relation to coinage in the tenth and eleventh centuries. In the process, he counters the conventional view of early medieval currency as the domain only of elite gift-givers and intrepid long-distance traders. Even when there were**

few coins in circulation, Naismith argues, the ways they were used—to give gifts, to pay rents, to spend at markets—have much to tell us. Cet ebook est une version numérique du guide papier sans interactivité additionnelle. Plus de 1 800 adresses à travers la France de sites où poser sa tente, pour tous les budgets et tous les comforts. Nous vous avons déniché des adresses insolites, les tentes les plus improbables, plantées ou à planter sur des sites imprenables, des propriétaires rivalisant d'équipements et de trouvailles... La bible du campeur Le Routard Nos meilleurs campings en France (hébergements de plein air) c'est aussi des cartes et des photos, pour repérer plus facilement les régions et les hébergements ; des adresses souvent introuvables ailleurs ; des infos remises à jour chaque année. Merci à tous les Routards qui partagent nos convictions : Liberté et indépendance d'esprit ; découverte et partage ; sincérité, tolérance et respect des autres ! This book provides a comprehensive introduction to the current state-of-the-art in skin cancer, exploring the recent developments, appraising the current evidence and providing future directions with particular emphasis on interdisciplinary collaboration and need for clinical trials. It covers all aspects of skin cancers, including epidemiology, pathology, surgical and non-surgical treatments. It will be a valuable reference for oncologists, dermatologists, dermatopathologists, surgeons, allied health care professionals and other specialists and trainees with a special interest in skin cancer who want to update their knowledge in the multidisciplinary

management of such patients. The book will be of interest to medical physicists and radiographers who would like an overview of the current practice in skin cancer. The book can be used by students in medicine, nursing, radiography and medical physics. Features Provides a comprehensive review of all aspects of skin cancer management. Edited by experts in the area, with interdisciplinary and international collaborators. Promotes a 'Bigger picture' approach to the topic with multidisciplinary insight. This book examines the ways in which a minority of primarily white, male, French philanthropists used their social standing and talents to improve the lives of peoples of African descent in Saint-Domingue during the crucial period of the Haitian Revolution. They went to great lengths to advocate for the application of universal human rights through political activities, academic societies, religious charity, influence on public opinion, and fraternity in the armed services. The motives for their benevolence ran the gamut from genuine altruism to the selfish pursuit of prestige, which could, on occasion, lead to political or economic benefit from aiding blacks and people of color. This book offers a view that takes into account the efforts of all peoples who worked to end slavery and establish racial equality in Saint-Domingue and challenges simplistic notions of the Haitian Revolution, which lean too heavily on an assumed strict racial divide between black and white. Like its French-language companion volume *Le Cinéma français contemporain: Manuel de classe*, Alan Singerman and Michèle Bissière's *Contemporary French Cinema: A*

**Student's Book offers a detailed look at recent French cinema through its analyses of twenty notable and representative French films that have appeared since 1980. Sure to delight Anglophone fans of French film, it can be used with equal success in English-language courses and, when paired with its companion volume, dual-language ones. Acclaim for *Le Cinéma français contemporain: Manuel de classe* "From *Le Dernier Métro* to *Intouchables*, Bissière and Singerman cover the latest trends of French cinema, emphasizing context and analytical method as Singerman did in *Apprentissage du cinéma français* (Focus 2004). The authors offer a selection of films most French cinephiles will applaud, and they incorporate insights from some of the best critical work on French cinema. Students of French film will also find all the bibliographical pointers they need to dig deeper, and instructors will appreciate the pedagogical components included in the chapters."**

**—Jonathan Walsh, Department of French Studies, Wheaton College, Massachusetts "This remarkable book comes to us from two seasoned teachers and critics and beautifully complements an earlier work, Alan Singerman's *Apprentissage du cinéma français*. The time period covered, more targeted here than in the preceding text, is admirably well chosen, and the breakdown by broad category, each offering multiple options, guides the teacher while offering a choice among an abundance of interesting films. The preliminary chapters, both succinct and informative, give students an excellent overview of French cinema as a whole and of the technical knowledge**

**needed for film analysis. Each of the subsequent chapters offers an indispensable introduction discussing the plot, director, production, actors, reception, and context of the film in question and also provides a very useful filmography and bibliography... an exemplary work."**

**—Brigitte E. Humbert, Department of French and Francophone Studies, Middlebury College**

**Management of Thyroid Disease is an exciting new book edited by Fredric Wondisford, MD—developer of the revolutionary new drug, Thyrotropin—and Sally Radovick, MD, with contributions from experts in the field. It fulfills the niche of a succinct, clinical resource to help you translate research into practice. This full-color volume offers valuable information on thyroid cancer and non-cancerous lesions, the effect of drugs on thyroid function, genetic disorders, and more in an accessible, easy-to-read consistent format. Presents the expertise of authors and editorial staff comprised of leaders in the field of thyroid research and clinical management for the best-qualified guidance on diagnosis and treatment. Provides a full-color, comprehensive approach that makes valuable information easy to locate and quick to read. Covers relevant topics applicable to all levels of training and expertise to serve as a detailed clinical reference on everything from the basic to the sophisticated. Captures research advances on hot topics such as thyroid cancer and non-cancerous lesions, the effect of drugs on thyroid function, and genetic disorders so that you can incorporate them into the way you treat patients. Cet ebook est une version numérique du guide papier sans**

La petite histoire de France racontée par Jacques Bainville est une relation simple du roman national français. Elle est ici accompagnée d'une centaine d'illustrations (38 pages en couleur) de Jacques Onfroy de Bréville (JOB) réunies à partir de plusieurs ouvrages du début du 20ème siècle. A lire, à relire et à offrir.**

**[www.editions-aojb.fr](http://www.editions-aojb.fr) The leader's portrait, produced in a variety of media (statues, coins, billboards, posters, stamps), is a key instrument of propaganda in totalitarian regimes, but increasingly also dominates political communication in democratic countries as a result of the personalization and spectacularization of campaigning. Written by an international group of contributors, this**

**volume focuses on the last one hundred years, covering a wide range of countries around the globe, and dealing with dictatorial regimes and democratic systems alike. As well as discussing the effigies that are produced by the powers that be for propaganda purposes, it looks at the uses of portraiture by antagonistic groups or movements as forms of resistance, derision, denunciation and demonization. This volume will be of interest to researchers in visual studies, art history, media studies, cultural studies, politics and contemporary history.**

**In 1830, at the age of forty, Jean-Claude Colin accepted the call of his colleagues to take charge of the Society of Mary (Marists). He had joined this project as a seminarian in Lyons, France, in 1816, along with Marcellin Champagnat, future founder of the Marist teaching brothers. Since ordination, he had been an assistant priest at Cerdon (photo below), preached revival missions in rural districts and been principal of a high school-seminary. Colin always insisted that he was only a temporary superior until someone more capable could take over. Yet, by the time he resigned in 1854, he had obtained papal approval of the priests' branch, established the Society firmly in France, especially in education, and sent fifteen expeditions of missionary priests and brothers to the remote and scattered islands of the southwest Pacific. There they planted the Catholic Church in New Zealand, Wallis and Futuna, Tonga, Samoa, Fiji and New Caledonia. Between his resignation and his death in 1875, Colin wrote Constitutions for the priests and brothers of the Society of Mary and for the Marist**

sisters. He also left a rich spiritual teaching. For this achievement, the Society regards him, despite his reluctance, as its Founder. **Advances in Accelerators and Medical Physics** provides in-depth, comprehensive coverage of basic concepts in X-ray therapy, electron beam therapy, particle therapy, BNCT, RI diagnosis and therapy. Each section of the book presents the current state of the field, details about safety and education, and future trends in advanced research. This book will serve as a key resource for researchers and students to find all information on cancer radiotherapy techniques and methods. Heavy ion radiotherapy used for cancer treatment involves the acceleration of carbon ions to 70% of the speed of light to deliver radiation to cancer cells and cause cell death. This therapy is also expected to be effective in cancers that are difficult to treat or do not respond to conventional treatments. Furthermore, this therapy is associated with several advantages such as shorter treatment duration and fewer side effects. Offers a deep dive into the fundamental accelerator and medical physics techniques and technologies used in cancer radiotherapy Considers the updated status of hospitals and clinical facilities, safety, education and future research trends Covers advanced research and development of X-ray therapy, electron beam therapy and particle therapy **MANAGEMENT OF GENETIC SYNDROMES THE MOST RECENT UPDATE TO ONE OF THE MOST ESSENTIAL REFERENCES ON MEDICAL GENETICS** Cassidy and Allanson's *Management of Genetic Syndromes*, Fourth Edition is the latest version of

**a classic text in medical genetics. With newly covered disorders and cutting-edge, up-to-date information, this resource remains the most crucial reference on the management of genetic syndromes in the field of medical genetics for students, clinicians, caregivers, and researchers. The fourth edition includes current information on the identification of genetic syndromes (including newly developed diagnostic criteria), the genetic basis (including diagnostic testing), and the routine care and management for more than 60 genetic disorders. Written by experts, each chapter includes sections on: Incidence Diagnostic criteria Etiology, pathogenesis and genetics Diagnostic testing Differential diagnosis Manifestations and Management (by system)**

**The book focuses on genetic syndromes, primarily those involving developmental disabilities and congenital defects. The chapter sections dealing with Manifestations and Management represents the centerpiece of each entry and is unmatched by other genetic syndrome references. Management of Genetic Syndromes is perfect for medical geneticists, genetic counselors, primary care physicians and all healthcare professionals seeking to stay current on the routine care and management of individuals with genetic disorders. Paris has played a unique role in world gastronomy, influencing cooks and gourmets across the world. It has served as a focal point not only for its own cuisine, but for regional specialties from across France. For tourists, its food remains one of the great attractions of the city itself. Yet the history of this food remains largely unknown. A History of the Food**

**of Paris brings together archaeology, historical records, memoirs, statutes, literature, guidebooks, news items, and other sources to paint a sweeping portrait of the city's food from the Neanderthals to today's bistros and food trucks. The colorful history of the city's markets, its restaurants and their predecessors, of immigrant food, even of its various drinks appears here in all its often surprising variety, revealing new sides of this endlessly fascinating city. Contributing to a better understanding of contemporary issues of environmental sustainability from a historical perspective, this book provides a cohesive and cogent account of the history of ecological economic thought. The work unearths a diverse set of ideas within a Western and Slavic context, from the Renaissance and the Enlightenment to the late 1940s, to reveal insights firmly grounded in historiographical research and of import for addressing current sustainability challenges, not least by means of improving our grasp on how humans and nature can generously coexist in the long term. The history of ecological economic thought offered in this volume is rich and diverse, encompassing views that are bound by the observance of the tenets of the natural sciences, but which differ significantly in terms of the role of energy and materials to cultural development and the normative aspects involving resource distribution, social ideals, and policy-making. Combining the approaches of independent scholarly figures and scientific communities from different historical periods and nationalities, the book brings elements that are still missing in the scarce literature on the history of**

ecological economic thought and highlights the underlying threads which unite such initiatives. The book brings a fresh look into the historical development of ecological economic ideas and will therefore be of great interest to scholars and students of ecological economics, environmental economics, sustainability science, interdisciplinary studies, and history of economic thought. The walking guides based on trails created and marked by the French Federation of Hiking Clubs. This is an organic chemistry reference work, focusing on reactions that add a C-1 unit to a substrate. Bibliographie de l'Empire français, ou Journal général de l'imprimerie et de la librairie Catalogue du 40e Festival du Court Métrage de Clermont-Ferrand 2018 This open access multi-authored book presents a 'state of the science' synthesis of knowledge on the biodiversity of Angola, based on sources in peer-reviewed journals, in books and where appropriate, unpublished official reports. The book identifies Angola as one of the most biologically diverse countries in Africa, but notes that its fauna, flora, habitats and the processes that drive the dynamics of its ecosystems are still very poorly researched and documented. This 'state of the science' synthesis is for the use of all students of Angola's biodiversity, and for those responsible for the planning, development and sustainable management of the country's living resources. The volume brings together the results of expeditions and research undertaken in Angola since the late eighteenth century, with emphasis on work conducted in the four decades since Angola's

**independence in 1975. The individual chapters have been written by leaders in their fields, and reviewed by peers familiar with the region. This book constitutes the proceedings of 24th International Symposium, SSS 2022, which took place in Clermont-Ferrand, France, in November 2022. The 17 regular papers together with 4 invited papers and 7 brief announcements, included in this volume were carefully reviewed and selected from 58 submissions. The SSS 2022 focus on systems built such that they are able to provide on their own guarantees on their structure, performance, and/or security in the face of an adverse environment. The Symposium presents three tracks reflecting major trends related to the conference: (i) Self-stabilizing Systems: Theory and Practice, (ii) Concurrent and Distributed Computing: Foundations, Faulttolerance, and Security, and (iii) Dynamic, Mobile, and Nature-Inspired Computing. Described by Victor Hugo as ‘The Dickens of Paris’, Eugène Sue was a prolific author that popularised the genre of the serial novel in France. Sue wrote the much-admired and widely imitated ‘The Mysteries of Paris’, as well as many other sensational novels, exploring the seamy side of urban life. Though known for their melodramatic quality, Sue’s novels were the first to tackle the social ills that accompanied the Industrial Revolution in France. This comprehensive eBook presents Sue’s collected works, with numerous illustrations, rare texts appearing in digital print for the first time, informative introductions and the usual Delphi bonus material. (Version 1) \* Beautifully illustrated with images relating to Sue’s life and works \***

**Informative introductions to the novels \* 31 novels, with individual contents tables \* The complete text of the 1845 anonymous translation of 'The Mysteries of Paris' \* The complete saga of novels 'The Mysteries of the People', translated by Daniel de Leon \* The complete novels of 'The Seven Cardinal Sins', anonymous 1899 translation, published by Francis A. Niccolls \* Features rare novels appearing for the first time in digital publishing, including 'Arthur' \* Images of how the books were first published, giving your eReader a taste of the original texts \* Excellent formatting of the texts \* Famous works such as 'The Mysteries of Paris' and 'The Wandering Jew' are fully illustrated with their original artwork \* Scholarly ordering of texts into chronological order and genres Please visit [www.delphiclassics.com](http://www.delphiclassics.com) to browse through our range of exciting titles**
