**Conseils de Guerre de Versailles. Procès des chefs de la Commune et du comité central** Dec 25 2020

**Small-scale Freshwater Toxicity Investigations** Nov 23 2020 This broad review is the first to gather comprehensive information on the complete contemporary range of toxicity testing procedures and hazard assessment procedures, which is normally scattered and difficult to find. The two-volume set provides a consistent, template-based approach, linking relevant information on background, theory and practice to each bioassay. Volume 2 examines hazard assessment schemes. Includes extensive glossary.

**The Meanings of the Built Environment** Jan 06 2022 This volume analyses the interpretation of the built environment by connecting analytical frames developed in the fields of semiotics and geography. It focuses on specific components of the built environment: monuments and memorials, as it is easily recognisable that they are erected to promote specific meanings in the public space. The volume concentrates on monuments and memorials in post-Soviet countries in Eastern Europe, with a focus on Estonia. Elites in post-Soviet countries have often used monuments to shape meanings reflecting the needs of post-Soviet culture and society. However, individuals can interpret monuments in ways that are different from those envisioned by their designers. In Estonia, the relocation and removal of Soviet monuments and the erection of new ones has often created political divisions and resulted in civil disorder. This book examines the potential gap between the designers' expectations and the users' interpretations of monuments and memorials. The main argument is that connecting semiotics and geography can provide an innovative framework to understand how monuments convey meanings and how these are variously interpreted at societal levels.

**Gastroparesis** Nov 04 2021 Gastroparesis: Pathophysiology, Clinical Presentation, Diagnosis and Treatment is a reference book providing a centralized source of data on gastroparesis collected over the last decade. Contents include the pathophysiology, clinical presentation, diagnostic recommendations and treatment options for gastroparesis. The reference is split into broad subsections, with the strategy of first focusing on the key features of the disease and then turning to controversies, recent developments, patient support resources, the spectrum of treatment – including medical and surgical - and future directions. Chapters will include coverage of important topics like autonomic neuropathy, the brain-gut axis, potential pathophysiological advances at the cellular level, diagnostic and therapeutic options specifically targeted at the pylorus, and the evaluation of the female predominance in gastroparesis. This is a must-have resource for scientists looking to find the next step in their research as well as healthcare professionals ranging from Gastroenterologists to Internists, Surgeons, Nutritionists, Psychiatrists, and Psychologists, Residents and Medical Students who struggle with how to optimally take care of their gastroparetic patients. Provides a comprehensive overview of what is known regarding the pathophysiology, clinical presentation, diagnostic considerations and treatment options for gastroparesis Includes key updates made in the last decade, including the progress made by the NIH Gastroparesis Consortium Presents both sides of key controversies in the field, including the debate between classification of gastroparesis versus functional dyspepsia Fully reviews the major advances in pharmacologic agents for therapy, both anti-emetics and prokinetics Extensive update on the "Pyloric Revolution" and our understanding of the pathophysiology of gastroparesis and how the focus on the pylorus has literally transformed our treatment strategy with an emphasis on both surgical and endoscopic advances in addressing pyloric dysfunction

**Handbook of Environmental Psychology and Quality of Life Research** Jun 30 2021 This Handbook presents a broad overview of the current research carried out in environmental psychology which puts into perspective quality of life and relationships with living spaces, and shows how this original analytical framework can be used to understand different environmental and societal issues. Adopting an original approach, this Handbook focuses on the links with other specialties in psychology, especially social and health psychology, together with other disciplines such as geography, architecture, sociology, anthropology, urbanism and engineering. Faced with the problems of society which involve the quality of life of individuals and communities, it is fundamental to consider the relationships an individual has with his different living spaces. This issue of the links between quality of life and environment is becoming increasingly significant with, at a local level, problems resulting from different types of annoyances, such as pollution and noise, while, at a global level, there is the central question of climate change with its harmful consequences for humans and the planet. How can the impact on well-being of environmental nuisances and threats (for example, natural risks, pollution, and noise) be reduced? How can the quality of life within daily living spaces (home, cities, work environments) be improved? Why is it important to understand the psychological issues of our relationship with the global environment (climatic warming, ecological behaviours)? This Handbook is intended not only for students of various disciplines (geography, architecture, psychology, town planning, etc.) but also for social decision-makers and players who will find in it both theoretical and methodological perspectives, so that psychological and environmental dimensions can be better taken into account in their working practices.

**Churches in Early Medieval Ireland** May 10 2022 This is the first book devoted to churches in Ireland dating from the arrival of Christianity in the fifth century to the early stages of the Romanesque around 1100, including those built to house treasures of the golden age of Irish art, such as the Book of Kells and the Ardagh chalice. • Carrag•in's comprehensive survey of the surviving examples forms the basis for a far-reaching analysis of why these buildings looked as they did, and what they meant in the context of early Irish society. • Carrag•in also identifies a clear political and ideological context for the first Romanesque churches in Ireland and shows that, to a considerable extent, the Irish Romanesque represents the perpetuation of a long-established architectural tradition.

**Les élites urbaines au Moyen Age** Jul 12 2022 Quelle autre ville que Rome, l'Urbs par excellence, aurait pu mieux convenir à un congrès consacré aux élites urbaines médiévales ? Accueilli par l'Ecole française de Rome, le XXVIIe Congrès de la Société des Historiens médiévistes français, auxquels se sont joints de nombreux collègues italiens, livre la réflexion de 21 communications prolongées par les conclusions de Jacques Le Goff, qui se veulent à la fois un bilan des recherches actuelles sur les liens complexes tissés entre la ville et leurs élites, et une impulsion donnée à de nouvelles voies d'approche de ces deux réalités mouvantes et difficiles à appréhender au Moyen Âge. Les élites urbaines se déclinent sur le mode comparatif - l'étude des mots, dans leur diversité temporelle et spatiale, le montre bien : plus nobles, plus riches, plus savantes etc. que les autres, bien que ces diverses formes de domination ne suffisent pas toujours à établir fermement leur contrôle sur le pouvoir urbain. Sont dégagées, notamment en Italie, les évolutions de l'oligarchie urbaine, contrôlée d'abord par les milites et les vassaux de l'évêque ou du comte, puis par les grands marchands, enfin par les serviteurs du prince lorsque celui-ci s'affirme. La méthode prosopographique précise les contours fluctuants de ces élites, dévoile les modalités de leur renouvellement - appuyées sur des stratégies complexes matrimoniales, commerciales, culturelles et politiques -, les hiérarchies et les conflits internes. Les pratiques de légitimation et de représentation du pouvoir dans et sur la ville, parmi lesquelles le jeu subtil de la renommée joue un rôle prépondérant, contribuent aussi à mieux cerner l'image d'eux-mêmes forgée par les puissants, mais aussi acceptée, non sans difficultés, par l'ensemble de la société urbaine.

**Annuario della Scuola Archeologica di Atene e delle Missioni Italiane in Oriente, Supplemento 8. Monetary and social aspects of Hellenistic Crete** Jun 18 2020 Nel giugno del 2018 presso la Scuola Archeologica Italiana ad Atene si è svolto il convegno internazionale di studi Monetary and Social Aspects of Hellenistic Crete, al quale hanno partecipato numerosi studiosi di diversi ambiti disciplinari impegnati in ricerche su Creta in epoca ellenistica I. L'idea di organizzare l'incontro scaturiva dalla volontà di avviare una discussione tra numismatici, archeologi, storici, epigrafisti su aspetti della società cretese tra la fine del IV e il I a.C., al fine di indagare l'incidenza che la moneta ha avuto nello sviluppo delle comunità locali, vuoi se emessa in risposta a esigenze di spesa per assetti urbanistici e difensivi, vuoi se connessa a pratiche di mercenariato o per mobilitazioni di carattere militare, vuoi se funzionale a relazioni commerciali o a scelte di politiche interne e/o esterne [...] Renata Cantilena

**Tadao Ando et la maison Koshino** Dec 17 2022

**GABA and Sleep** May 22 2023 GABA (gamma-aminobutyric acid) is the main neurotransmitter regulating sleep. The majority of drugs presently in use for the treatment of sleep disorders act by enhancing GABAergic neuronal inhibition. The

GABA system is, therefore, of prime clinical relevance for the therapy of insomnia. The focus of this volume is on the neuropsychopharmacology and the clinical impact of the GABA system in regulating sleep and wakefulness. It presents molecular, neuropharmacological, systems-biological and clinical approaches to the understanding of the mechanism of action of GABA and GABAergic drugs. It also explores the role of GABA in the basic drives that affect sleep, and the influences that adapt sleep and wakefulness to external events.

*Handbook of Membrane Separations* Mar 28 2021 The Handbook of Membrane Separations: Chemical, Pharmaceutical, Food, and Biotechnological Applications, Second Edition provides detailed information on membrane separation technologies from an international team of experts. The handbook fills an important gap in the current literature by providing a comprehensive discussion of membrane application

**Land, Proto-Industry and Population in Catalonia, c. 1680-1829** Aug 25 2023 This monograph makes a fresh contribution to a longstanding but far from exhausted debate concerning the transition to capitalism in Europe. The work investigates key aspects of this transformation: the changes on the land, the origins of the industrial revolution, the modern rise of population and the growth of markets. It does so from a new perspective, however, by focusing on an area of southern Europe, Catalonia. Catalonia's interest as an area for study lies in its precocity within a southern European context, as one of the few regions on the European periphery to industrialise in comparable ways and at the same time as areas of northern Europe. Population growth was similarly rapid. The study engages critically with several important debates in economic and social history, such as the transition to agrarian capitalism, whether or not sharecropping should be viewed as a backwards form of agricultural production, theories of proto-industrialisation and theories of population change. It also questions claims that the nuclear family of north-western Europe was a superior model for industrialisation than the more extended family structures prevalent in southern Europe. Not only could the extended family be as dynamic as the nuclear family when required but, more importantly, attention needs to be paid to other institutions and factors that may have conditioned family forms and decision-making processes. The approach taken by this work is a micro-study of one community, Igualada, an important proto-industrial centre but also situated within the viticultural region. It grew rapidly over the eighteenth century from around 1,700 inhabitants in 1717 to 4,900 in 1787 and around 7,700 by 1830. Only at the micro-level is it feasible for an individual study to reconstruct networks of relationships and patterns of decision-making at the household level. At the core of the book, therefore, is a family reconstitution of 8,700 families, supplemented by a wide body of additional sources, such as landholding contracts, tax records, manorial surveys, inventories, marriage contracts and letters.

**Lettres inédites du comte de Cavour au Commandeur Urbain Rattazzi** Oct 15 2022

*Cognitive Development and Cognitive Neuroscience* Apr 21 2023 Cognitive Development and Cognitive Neuroscience: The Learning Brain is a thoroughly revised edition of the bestselling Cognitive Development. The new edition of this full-colour textbook has been updated with the latest research in cognitive neuroscience, going beyond Piaget and traditional theories to demonstrate how emerging data from the brain sciences require a new theoretical framework for teaching cognitive development, based on learning. Building on the framework for teaching cognitive development presented in the first edition, Goswami shows how different cognitive domains such as language, causal reasoning and theory of mind may emerge from automatic neural perceptual processes. Cognitive Neuroscience and Cognitive Development integrates principles and data from cognitive science, neuroscience, computer modelling and studies of non-human animals into a model that transforms the study of cognitive development to produce both a key introductory text and a book which encourages the reader to move beyond the superficial and gain a deeper understanding of the subject matter. Cognitive Development and Cognitive Neuroscience is essential for students of developmental and cognitive psychology, education, language and the learning sciences. It will also be of interest to anyone training to work with children.

*Capillary Electrophoresis - Mass Spectrometry (CE-MS)* Jan 18 2023 This monograph offers the reader a complete overview on both principles and applications of CE-MS. Starting with an introductory chapter on detection in CE, also related and more specialized techniques such as electrophoretic and chromatographic preconcentration are discussed. A special emphasis is put on CE-MS interfaces, which are described in detail. In a separate chapter, attention is paid to sheath-liquid interfacing. The developments and possibilities of microchip CE-MS are also described. Applications to all relevant areas are discussed in distinct chapters, each written by experts in the respective fields. Besides applications in pharmaceutical analysis and bioanalysis, recent implementations in food science, forensic analysis, analysis of intact proteins, metabolomics and proteomics are highlighted. MS is a perfectly appropriate detection system for CE, as efficient separation is coupled to sensitive and selection detection. Moreover, MS can provide structure information on the separated compounds. CE-MS has now been developed into a strong hyphenated system complementary to LC-MS. This monograph is an unique source of knowledge for everyone dealing with and interested in CE-MS.

*Innate Immune Cell Determinants of T Cell Immunity: From Basic Mechanisms to Clinical Implications* Mar 08 2022 Long-lasting T cell immunity is delivered by an array of individual T lymphocytes expressing clonally distributed and highly specific antigen receptors recognizing an almost infinite number of antigens that might enter in contact with the host. Following antigen-specific priming in lymphnodes, naïve CD4 and CD8 T lymphocytes proliferate generating clones of effector cells that migrate to peripheral tissues and deliver unique antigen-specific effector functions. Moreover, a proportion of these effector lymphocytes survive as memory T cells that can be rapidly mobilized upon new exposure to the same antigen, even years after their primary induction. Innate immune cells play crucial roles in the induction and maintenance of this efficient protection system. Following the seminal discovery of Steinman and Cohen in 1974 describing a rare cell type capable of initiating antigen-specific responses in lymphnodes, Dendritic Cells (DC) have taken up the stage for several decades as professional Antigen Presenting Cells (APC). Although DC possess all attributes to prime naïve T lymphocytes, other immune cell subsets become crucial accessory cells during secondary and even primary activation. For instance, Monocytes (Mo) are rapidly recruited to inflammatory sites and have recently been recognized as capable of shaping T cell immunity, either directly through Ag presentation, or indirectly through the secretion of soluble factors. In addition, upon sensing of T cell-derived cytokines, Mo differentiate into functionally different APC types that further impact on the quality and persistence of memory T cell responses in peripheral tissues. Other innate immune cells, including Myeloid Derived Suppressor Cells, Granulocytes and iNKT lymphocytes, are known to modulate T cell activation by interacting with and modifying the function of professional APC. Notably, innate immune cell determinants also account for the tissue-specific regulation of T cell immunity. Hence, the newly discovered family of Innate Lymphoid Cells, has been recognized to shape CD4+ T cell responses at mucosal surfaces. Although the actions of innate immune cells fulfills the need of initiating and maintaining protective T cell responses, the excessive presence or activity of individual determinants may be detrimental to the host, because it could promote tissue destruction as in autoimmunity and allergy, or conversely, prevent the induction of immune responses against malignant tissues, and even modulate the response to therapeutic agents. Thus, understanding how defined innate immune cell subsets control T cell immunity is of fundamental relevance to understand human health, and of practical relevance for preventing and curing human diseases. In this research topic, we intend to provide an excellent platform for the collection of manuscripts addressing in depth how diverse innate immune cell subsets impact on T cell responses through molecularly defined pathways and evaluating the rational translation of basic research into clinical applications.

*AIDS Bibliography* Jun 23 2023

**Peace Ethology** Feb 19 2023 A scholarly collection of timely essays on the behavioral science of peace With contributions from experts representing a wide variety of scholarly fields (behavioral and social sciences, philosophy, environmental science, anthropology and economics), Peace Ethology offers original essays on the most recent research and findings on the topic of the behavioral science of peace. This much-needed volume includes writings that examine four main areas of study: the proximate causation of peace, the developmental aspects of peace, the function and systems of peace and the evolution of peace. The popular belief persists that, by nature, humans are not pre-disposed to peace. However, archeological and paleontological evidence reveals that the vast majority of our time as a species has been spent in small hunter-gatherer bands that are basically peaceful and egalitarian in nature. The text also reveals that most of the earth's people are living in more peaceful societies than in centuries past. This hopeful compendium of essays: Contains writings from noted experts from a variety of academic studies Offers a social-psychological perspective on the causation of peaceful behavior Includes information on children's peacekeeping and peacemaking Presents ideas for overcoming social tension between police and civilians Provides the most recent thinking on the behavioral science of peace Written for students and academics of the behavioral and social sciences, Peace Ethology offers scholarly essays on the development, nature, and current state of peace.

*The Journal of Immunology* Jul 20 2020

**Coming Together** Jan 26 2021 Archaeologists, anthropologists, and classicists discuss how urbanization first emerged in strikingly different sociopolitical contexts in North America, Europe, and the Near East. The pursuit for universally applicable definitions of the terms "urban" and "city" has frequently distracted scholars from scrutinizing processes of how ancient nucleated settlements evolved and developed. Based on the premise that similar social dynamics to a great extent governed nucleation trajectories throughout human history, Coming Together focuses on both prehistoric aggregated and early urban settlements. Drawing from a variety of theoretical and methodological approaches, archaeologists, anthropologists, and classicists discuss how nucleation unfolded in strikingly different sociopolitical contexts in North America, Europe, and the Near East. The major themes of the volume are nucleation's origins, pathways to sustainability, and the transformative role of these sites in sociopolitical and cultural change. Attila Gyucha is Postdoctoral Research Scientist at the Field Museum of Natural History and the author of Prehistoric Village Social Dynamics: the Early Copper Age in the Körös Region.

*Time for Play* Aug 01 2021 Over the last 15 years AZC's architectural work has developed through a diverse range of experiences. This book, Time for Play, presents exhibition pavilions, temporary installations, and ideas competitions – a mix of

built and un-built projects. "...Today's situation promotes innovation, supports creativity and enriches projects, calling on our intelligence. We are forced to take a new look at practices and uses, to consider different ways of doing things, to think about the humanity of a place; and all this when we still find it so hard to understand community needs, and even more so to keep up with changing society." And this is the position taken by AZC architects. Faced with a changing world, they propose solutions that are novel in their shape, use, cost and temporality.

*The Urbanisation of the North-Western Provinces of the Roman Empire* Dec 05 2021 This study investigates the development of urbanism in the north-western provinces of the Roman empire. Key themes include continuity and discontinuity between pre-Roman and Roman 'urban' systems, relationships between juridical statuses and levels of monumentality, levels of connectivity and economic integration, and regional urban hierarchies.

**Sleep-Wake Neurobiology and Pharmacology** Feb 24 2021 This volume connects current ideas and concepts about sleep functions and circadian rhythms with the search for novel target-selective sleep-wake therapeutics. To do so, it provides a timely, state-of-the-art overview of sleep-wake mechanisms in health and disease, ongoing developments in drug discovery, and their prospects for the clinical treatment of sleep-disordered patients. It particularly focuses on the concept that sleep and wakefulness mutually affect each other, and the future therapeutic interventions with either sleep- or wake-promoting agents that are expected to not only improve the quality of sleep but also the waking behavior, cognition, mood and other sleep-associated physiological functions. The chapter 'Sleep Physiology, Circadian Rhythms, Waking Performance and the Development of Sleep-Wake Therapeutics' available open access under a CC BY 4.0 license at [link.springer.com](https://link.springer.com)

**Guide du Routard Andalousie 2023/24** Apr 09 2022 Cet ebook est la version numérique du guide sans interactivité additionnelle. Nouvelle mise à jour du Routard, le guide de voyage n°1 en France ! Le bleu de la mer et du ciel tranchent avec le blanc des villages. Les montagnes caressent la Costa del Sol et le soleil brille. Voilà l'Andalousie : l'ombre des rues et l'ardeur des regards, la quiétude de l'après-midi, l'effervescence des fêtes et le goût acidulé des olives... Dans Le Routard Andalousie mis à jour par nos spécialistes, vous trouverez : Une première partie en couleurs pour découvrir la région à l'aide de photos et de cartes illustrant les coups de cœur de nos auteurs ; des itinéraires thématiques et géographiques, avec toutes les infos et astuces dont vous avez besoin pour réussir et profiter pleinement de votre voyage ; des activités (à Sevilla, passer une nuit blanche dans le quartier de Triana, à Córdoba, se laisser porter par la sobre beauté de la forêt de colonnes de la Mezquita et virer mystique – juste le temps de la visite !) des visites (explorer le sublime desierto de los Coloraos de Gorafe, toujours à Málaga, visiter le Centre Pompidou, sous le fameux Cube de Daniel Buren, symbole de la vivacité culturelle de la ville.), à partager en famille, entre amis ou en solo ; plus de 40 cartes et plans avec toutes les bonnes adresses du Routard positionnées ; et, bien sûr, le meilleur de la destination et des pas de côté pour découvrir l'Andalousie hors des sentiers battus... Merci à tous les Routards qui sont solidaires de nos convictions depuis bientôt 50 ans : liberté et indépendance d'esprit ; découverte et partage ; sincérité, tolérance et respect des autres.

Synchronisme des littératures depuis leur origine jusqu'à nos jours, considérées dans leurs rapports avec les croyances, les moeurs, les institutions sociales. Coup-d'oeil sur l'avenir intellectuel, politique et religieux de la France May 30 2021
