The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name. Multidrug-resistant tuberculosis (MDR-TB) and extensively drug-resistant tuberculosis (XDR-TB) are increasingly encountered in resource-limited settings. In the context of a national response to MDR- and XDR-TB, health workers in TB clinics (in district hospitals and some accredited health centers) will need to diagnose MDR-TB, initiate second-line anti-TB drugs, and monitor MDR-TB treatment. This Field Guide was created to help health workers carry out these tasks. It is a job aid that medical officers and TB nurses are meant to use frequently during the day for quick reference. It is based on the Emergency Update 2008 of Guidelines for Programmatic Management of Drug-resistant Tuberculosis, and may be considered a companion document to these guidelines. It also draws on the experience of the international health NGO Partners In Health (PIH) in many countries. This module should be introduced to health workers in the context of a training course with a strong emphasis on TB-HIV co-management. A new selection of Melville's darkest and most enthralling stories in a beautiful Pushkin Collection edition Includes "Bartleby, the Scrivener", "Benito Cereno" and "The Lightning-Rod Man" A lawyer hires a new copyist, only to be met with stubborn, confounding resistance. A nameless guide discovers hidden worlds of luxury and bleak exploitation. After boarding a beleaguered Spanish slave ship, an American trader's cheerful outlook is repeatedly shadowed by paralyzing unease. In these stories of the surreal mundanity of office life and obscure tensions at sea, Melville's darkly modern sensibility plunges us into a world of irony and mystery, where nothing is as it first appears. Why do some lawyers devote themselves to a specific social movement or political cause? What can we learn from such lawyers about the relationship between law and politics. CAUSE LAWYERING offers an insightful portrait of lawyers who sacrifice financial advantage in the name of a more just society. These telling essays show how cause lawyering is indispensable to the legitimization of professional authority. #1 New York Times Bestseller Legendary venture capitalist John Doerr reveals how the goal-setting system of Objectives and Key Results (OKRs) has helped tech giants from Intel to Google achieve explosive growth—and how it can help any organization thrive. In the fall of 1999, John Doerr met with the founders of a start-up whom he'd just given \$12.5 million, the biggest investment of his career. Larry Page and Sergey Brin had amazing technology, entrepreneurial energy, and sky-high ambitions, but no real business plan. For Google to change the world (or even to survive), Page and Brin had to learn how to make tough choices on priorities while keeping their team on track. They'd have to know when to pull the plug on losing propositions, to fail fast. And they needed timely, relevant data to track their progress—to measure what mattered. Doerr taught them about a proven approach to operating excellence: Objectives and Key Results. He had first discovered OKRs in the 1970s as an engineer at Intel, where the legendary Andy Grove ("the greatest manager of his or any era") drove the best-run company Doerr had ever seen. Later, as a venture capitalist, Doerr shared Grove's brainchild with more than fifty companies. Wherever the process was faithfully practiced, it worked. In this goal-setting system, objectives define what we seek to achieve; key results are how those top-priority goals will be attained with specific, measurable actions within a set time frame. Everyone's goals, from entry level to CEO, are transparent to the entire organization. The benefits are profound. OKRs surface an organization's most important work. They focus effort and foster coordination. They keep employees on track. They link objectives across silos to unify and strengthen the entire company. Along the way, OKRs enhance workplace satisfaction and boost retention. In Measure What Matters, Doerr shares a broad range of first-person, behind-the-scenes case studies, with narrators including Bono and Bill Gates, to demonstrate the focus, agility, and explosive growth that OKRs have spurred at so many great organizations. This book will help a new generation of leaders capture the same magic. Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. Twelve Years a Slave is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's Uncle Tom's Cabin, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War. This colorful book captures some of the most beautiful and rare scale models of American Ford, Edsel, Lincoln, and Mercury cars and light trucks from the classic 1930-69 period. During the last thirty years, a small number of builders have devoted themselves to making, by hand, model cars in scale. Often limited to only a few hundred pieces, these unusual and expensive models have flawless finishing and astounding detail. For the first time ever in one source, the author has assembled hundreds of high-resolution color photographs from his and others'

private collections, and from the builders themselves. Read about the history of these Ford replicas, the cars they are modelled upon, and learn where you can get them. This book is a must read for people who enjoy scale models and Ford Motor Company cars. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. Studies in Applied Linguistics and Language Learning brings together new and original studies in the area of critical applied linguistics, language policy and planning, and language learning and teaching. The book, divided into three sections, first offers critical views on various aspects of language in society, ranging from the construction of national identity, language and justice, racial and identity issues in the ELT industry, to language in business discourse. It then reports on language policy in the school curriculum, language learning in tertiary education, and Aboriginal languages policy. In the third section, it addresses issues in language learning and teaching, such as the role of parents in literacy learning, multiple script literacy, and language learning and maintenance strategies. This edition of the World Bank has been revised and expanded by the Terminology Unit in the Languages Services Division of the World Bank in collaboration with the English, Spanish, and French Translation Sections. The Glossary is intended to assist the Bank's translators and interpreters, other Bank staff using French and Spanish in their work, and free-lance translator's and interpreters employed by the Bank. For this reason, the Glossary contains not only financial and economic terminology and terms relating to the Bank's procedures and practices, but also terms that frequently occur in Bank documents, and others for which the Bank has a preferred equivalent. Although many of these terms, relating to such fields as agriculture, education, energy, housing, law, technology, and transportation, could be found in other sources, they have been assembled here for ease of reference. A list of acronyms occurring frequently in Bank texts (the terms to which they refer being found in the Glossary) and a list of international, regional, and national organizations will be found at the end of the Glossary. This volume uses the study of firm dynamics to investigate the factors preventing faster productivity growth in Latin America and the Caribbean, pushing past the limits of traditional macroeconomic analyses. Each chapter is dedicated to an examination of a different factor affecting firm productivity - innovation, ICT usage, on-the-job-training, firm age, access to credit, and international linkages - highlighting the differences in firm characteristics, behaviors, and strategies. By showcasing this remarkable heterogeneity, this collection challenges regional policymakers to look beyond one-size-fits-all solutions and create balanced policy mixes tailored to distinct firm needs. This book is open access under a CC BY-NC-ND 3.0 IGO license. A collection of scholars from Cape Verde, Brazil, Portugal, the United States, the United Kingdom and Spain writing about Cape Verde De Kampioen is the magazine of The Royal Dutch Touring Club ANWB in The Netherlands. It's published 10 times a year with a circulation of approximately 3,5 million copies. "This book documents the latest research findings about the success of free voluntary reading in developing high levels of literacy"--Provided by publisher. Acronym agglomeration is an affliction of the age, and there are acronym addicts who, in their weakness, find it impossible to resist them. More than once in recent months my peers have cautioned me about my apparent readiness to use not only acronyms, but abbreviations, foreign isms, codes, and other cryptic symbols rather than common, ordinary American words. Many among us, though, either have not received or have chosen to ignore such advice. As a consequence, what we write and speak is full of mystery and confusion. It is then for the reader and listener and for the writer and speaker that Reta C. Moser has compiled this guide. Its effective application to the art of communication is urged. Such use should help avoid many of the misunderstandings involving terminology which occur daily. Although such misunderstandings are certainly crucial in humanistic and social situations, they are often of immediate import and the trigger to disaster in scientific, technical, and political situations. Some 15,000 acronyms and 25,000 definitions are provided (a 50- and 47 -percent increase over the 1964 edition!), with due credit to Miss Moser's diligence in making the compilation and with the acknowledgment that the acronymical phenomenon is very much with us. This edition, like the first, is certain to be of value to writers, librarians, editors, and others who must identify and deal with acronyms. This book provides an introduction to the genetics, genomics, and breeding of the olive tree, a multi-functional long-lived crop plant that is relevant not only for culinary olive and oil production, but also for shaping the landscape and history of many rural areas for centuries. Today, the recognized health benefits of extra-virgin olive oil provide new impulses for introducing innovation in olive crop management and olive breeding for a deeper understanding of the biological processes underlying fruit quality, adaptation to crop environment and response to threatening epidemics due to biological agents such as *Xylella fastidiosa*. The individual chapters discuss genetic resources; classic and modern breeding methods for providing new olive cultivars; the genotype x environment interactions determining the response to biotic and abiotic stresses; fruit metabolism related to oil production and the synthesis of health beneficial molecules; the mapping of genes and quantitative trait locus; and genomic, transcriptomic and proteomic strategies pertinent to the development of a molecular platform and template amenable to precise and rapid genetic modifications using recently developed genome editing tools. This book brings together scientists from all over the world who have defined and developed the field of Coordination Dynamics. Grounded in the concepts of self-organization and the tools of nonlinear dynamics, appropriately extended to handle informational aspects of living things, Coordination Dynamics aims to understand the coordinated functioning of a variety of different systems at multiple levels of description. The book addresses the themes of Coordination Dynamics and Dynamic Patterns in the context of the following topics: Coordination of Brain and Behavior, Perception-Action Coupling, Control, Posture, Learning, Intention, Attention, and Cognition. "This report makes recommendations on new therapeutic regimens for visceral and cutaneous leishmaniasis, on the use of rapid diagnostic tests, details on the management of Leishmania-HIV coinfection and consideration of social factors and climate change as risk factors for increased spread. Recommendations for research include the furtherance of epidemiological knowledge of the disease and clinical studies to address the lack of an evidence-based therapeutic regimen for cutaneous and mucocutaneous leishmaniasis and post-kala-azar dermal leishmaniasis (PKDL). This report not only provides clear guidance on implementation but should also raise awareness about the global burden of leishmaniasis and its neglect. It puts forward directions for formulation of national control programmes and elaborates the strategic approaches in the fight against the leishmaniases. The committee's work reflects the latest scientific and other relevant developments in the field of leishmaniasis that can be considered by Member States when setting national programmes and making public health decisions."--P. [4] of cover. Sixteenth in a series of annual reports comparing

business regulation in 190 economies, Doing Business 2019 measures aspects of regulation affecting areas of everyday business activity. This report identifies policy options and makes recommendations on market-oriented actions to promote the purchase of the most environmentally friendly vehicles. This book contributes to the existing knowledge about the extent of cartels' overcharges and other harm to businesses and consumers worldwide, and sheds light on new and effective "leniency programmes", as well as on optimal sanctions in cartel cases. Billedkunstneres arbejder, inspireret af grammofonplader, form og indhold. This book is a study of the Basque variety spoken in Lekeitio (Vizcaya). As such we have intended to make a direct contribution to Basque dialectology, aiming at setting certain standards for research in this area. In addition, we believe that some of the materials assembled in this work will be of interest to a larger audience beyond Basque specialists. It is for this reason that we decided to write the present book in English. In our opinion, certain linguistic aspects are treated in more detail here than in any previous work on any other Basque variety. A case in point would be accentuation, both at the lexical level and in its relation to the syntactic process of focalization. How regulations are implemented and enforced, and how compliance is ensured and promoted, are critical determinants of whether a regulatory system is working as intended. Inspections are one of the most important ways to enforce regulations and to ensure regulatory compliance. Based on the 2014 ... This book reviews progress in the fight against hard core cartels. It quantifies the harm caused by cartels and identifies improved methods of investigation. It also examines progress in strengthening sanctions against businesses and individuals. Este Manual estudia esencialmente y con extensión los modos de transportes convencionales: marítimos, ferroviarios, carreteras, aéreos, vías navegables, multimodales, y de forma más concisa los transportes continentales: oleoductos, gasoductos, cintas transportadoras, energía eléctrica, atómica, eólica y nuevas energías. Contempla también las referencias legales y regímenes jurídicos aplicables a cada modo de transporte, incidiendo en los de mayor significación doctrinal como son los Códigos, Reglas, Convenios, Reglamentos, Contratos, Acuerdos y Protocolos. INDICE RESUMIDO: El transporte marítimo. El transporte ferroviario. El transporte por carretera. El transporte aéreo. Vías navegables. Transporte multimodal. Otros sistemas de transporte. Envase-Embalaje. Instrucciones para el transporte. Tablas de uso práctico en los transportes. This volume is addressed to researchers in the field of phraseology, and to teachers, translators and lexicographers. It is a collection of essays offering a comprehensive, modern analysis of phrasemes, embracing a wide range of subjects and themes, from linguistic, both applied and theoretical, to cultural aspects. The contrastive approach underlying this variety of themes allows the divergences and analogies between phraseological units in two or more languages to be outlined. The languages compared here are both major and minor, European and non-European, and the text includes contrastive analyses of the most commonly investigated languages (French-German, English-Spanish, Russian-German), as well as some less frequently investigated languages (like Ukrainian, Romanian, Georgian and Thai), which are not as well-represented in phraseological description, despite their scientific interest. De Kampioen is the magazine of The Royal Dutch Touring Club ANWB in The Netherlands. It's published 10 times a year with a circulation of approximately 3,5 million copies. (Guitar Educational). From the former editor of Guitar One magazine, here is a daily dose of vitamins to keep your chops fine tuned! Musical styles include rock, blues, jazz, metal, country, and funk. Techniques taught include alternate picking, arpeggios, sweep picking, string skipping, legato, string bending, and rhythm guitar. These exercises will increase speed, and improve dexterity and pick- and fret-hand accuracy. The accompanying CD includes all 365 workout licks plus play-along grooves in every style at eight different metronome settings. A comprehensive book about the buses of the Lough Swilly company, which is the major bus operator in North Donegal. It details every bus the Lough Swilly ever owned and illustrates them as well. A clinically relevant introduction focusing on those microbes that cause disease in humans. Following basic principles, basic concepts in the immune response, and general principles of laboratory diagnosis, sections cover bacteriology, virology, mycology and parasitology. Chapters in these sections begin with etiology, then discuss epidemiology, host defenses, identification, diagnosis, prevention, and control. Expanded information on immunology and a new chapter on arthropods are included. Annotation copyrighted by Book News, Inc., Portland, OR Pavlenko challenges the monolingual bias of modern linguistics and psychology by bringing together insights from many different fields.
