The current educational facility of Public Schools is not aligned with the demands of the K to Program. The program proposes multiple fields of specialties. Responding to this, the existing facilities will not anymore be conducive learning environment for the students. Along with this argument, the proponent reinforces the study with David Kolb's Theory on Experiential Learning. The proponent of this thesis is in the direction of producing guidelines that will be of addition to the 2007 Educational Facilities Manual of the Philippines which is not updated and inadequate in terms of the parameters needed by the students to have a pleasant learning environment for the K to 12 Program. The said guidelines will be having heavy considerations on 3 classifications namely, the student population, size of property, and construction cost estimates of every kind of room/ space depicted from the K to 12 Program. Excerpt from Music in the Public Schools: A Manual of Suggestions for

Teachers Music in the public schools is a serious factor in the mental, physical, and emotional development of the child, and is as important in character molding as any other subject in the school curriculum. The four essentials of this subject are conceptions of good music, voice training, sight singing, and musical interpretation, and in this manual they are developed side by side for each of the eight years of elementary school life. This development is presented in the form of weekly outlines, by means of which results commensurate with the importance and dignity of the subject may be more easily obtained. These outlines are brief, definite, and free from irrelevant matter, and while they may be used advantageously with any series of music books, they are designed to be used with the New Educational Music Course. No special attention has been paid to written work in music, as it is more or less beyond the scope of this book. The New Educational Music Haulers furnish ideal material for music education in the public schools, and are adapted for

study, page after page, in consecutive order. Teachers who find it advisable or desirable to vary the consecutive order of presentation, to give special attention to one problem rather than another, or to carry on several lines of study simultaneously, will find that the grouping of the material in these readers makes such adjustment an easy matter. While all good methods of teaching have the same underlying principles, yet they may differ in detail. This manual simply presents one method, with occasional alternatives, which has proved eminently successful in teaching the New Educational Music Course in various public schools.
