Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In Unequal Treatment, a panel of experts

documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene? Unequal Treatment offers recommendations for improvements in medical care financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives. Unequal Treatment will be vitally important to health care policymakers, administrators, providers, educators, and students as well as advocates for people of color. This Corrective Action Decision Document/Closure Report (CADDKR) has been prepared for Corrective Action Unit (CAU) 527: Horn Silver Mine, Nevada Test Site (NTS), Nevada, in accordance with the Federal Facility Agreement and Consent Order (1996). Corrective Action Unit 527 is located within Area 26 of the NTS and consists of CAS 26-20-01, Contaminated Waste Dump No. 1. This CADDKR refers to the site as CAU 527 or the Horn Silver Mine (HSM). This CADDKR provides or references the specific information necessary to support the closure of this CAU. Corrective action investigation activities were performed from November 12, 2003 through January 21, 2004. Additional sampling of liquid obtained from HSM-3 was conducted on May 3, 2004. Corrective action investigation activities were performed as set forth in the Corrective Action Investigation Plan for Corrective Action Unit 527 (NNSAiNV, 2002a). Assessment of the data generated from investigation activities identified the explosive nitrobenzene as a contaminant of concern (COC) on the floor of the 500-foot drift (HSM No. 2). No other COCs were identified in the rock samples collected during the investigation activities. The air samples collected from borings HSM-1, HSM-2, and HSM-3 showed volatile organic compounds (primarily gasoline-related contaminants) to be present above the acceptable residential exposure criteria in the boreholes. A conservative modeling effort demonstrated that these concentrations would not migrate to the surface at concentrations that will present an unacceptable risk to future land users. However, other COCs are assumed to exist based on historical documentation on the types of waste placed in the shaft; therefore, the mine including the 300- and 500-foot drifts is considered to be contaminated above action levels. Current results of the field investigation show there are no active transport mechanisms or exposure routes for the contaminants identified in the 500-foot drift. The analytical data did not show the migration of COCs beyond the floor of the 500-foot drift or from the air within the drift. On a conservative basis, the subsurface volume of the zone of contamination is limited to a depth from 150 ft to a maximum of 670 feet below ground surface extending to a radius of 300 feet from the mineshaft. Based on these data, a use restriction will be established for this volume of soil. In addition, the security of the mineshaft is maintained and does not allow unauthorized personnel to enter the vicinity of the mineshaft. Since the removal of the contaminants is not feasible, the close in place with administrative controls corrective action

alternative is appropriate because it will prevent inadvertent contact with the subsurface COCs and meets all applicable state and federal regulations for closure of the site. Post-closure monitoring will be conducted for one year. This monitoring will include using the lysimeter at HSM-3 and the data logger to measure precipitation-induced vadose zone moisture flow through the rock beneath the waste shaft at the Horn Silver Mine. Results of the monitoring will be documented in a letter report at the end of one year, anticipated in June 2005. A copy of this report will be submitted to the Nevada Division of Environmental Protection. After one year of monitoring, a determination will be made by the Nevada Division of Environmental Protection and U.S. Department of Energy, National Nuclear Security Administration Nevada Site Office if future monitoring is needed or if use restriction boundaries need to be adjusted. If a large enough pulse of water moves into the lysimeter, a sample will be collected for laboratory analysis. If there is not sufficient volume of liquid collected for a sample or if no COCs are detected in collected samples at the end of this time period, it is recommended that the monitoring wells at the HSM be sealed in accordance with the State of Nevada regulations.

The United States Government Printing Office (GPO) was created in June 1860, and is an agency of the U.S. federal government based in Washington D.C. The office prints documents produced by and for the federal government, including Congress, the Supreme Court, the Executive Office of the President and other executive departments, and independent agencies. A hearing is a meeting of the Senate, House, joint or certain Government committee that is open to the public so that they can listen in on the opinions of the legislation. Hearings can also be held to explore certain topics or a current issue. It typically takes between two months up to two years to be published. This is one of those hearings. The volumes of this series present almost 300 indispensable toxicological evaluation documents on important occupational toxicants and carcinogens. They describe the toxicological database which determines the level of a MAK value (Maximum Concentrations at the Workplace). Each evaluation document is written to a standard format and includes sections about toxic effects, modes of action, effects in man, effects on animals, genotoxicity and carcinogenicity, manifesto. Volume 10 contains 16 reviews, 3 of them on metal-working fluid components. From the contents: Ozone, Trichloroethylene, Cyclohexanone, o-Anisidine, 2-Chloroacrylonitrile, p-Chlorobenzotrifluoride, Cobalt, Diethylene glycol, Ethylene, Hydroquinone, N-Methyl-2-pyrrolidone, Polyethylene glycol, Polypropylene glycol, Sodium pyrrithione. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement.

Certain tax-exempt org's. seeking to influence political elections -- called Section 527 org's. -- are estimated to annually spend hundreds of millions of dollars. In Fed. elections, these org's. have been able to use unregulated "soft money" for indirect or "issue advocacy." In July 2000, Congress passed P.L. 106-230 to require Section 527 org's. to provide the IRS with data on their purposes, officers, contributors, and expenses. The objectives of this report are to determine the extent to which IRS: discloses to the public in an accessible manner the data that Section 527 org's. file with IRS, (2) oversees Section 527 org's. compliance with the specified filing requirements, and (3) develops a strategic plan for

carrying out its new responsibilities. Charts and tables. This book has detailed abstracts of: All 527 documents in Prince George's County, Maryland, Land Records Book RR - Maryland Archives microfilm CR 49526-1 (MSA CE65-18) recorded during the period of September 1759 through March 1763. This folio contains details of land transactions, land divisions of estates, sales of lands seized for debts, marriage contracts, Bill of Sales, mortgages, entries of slaves, manumission of slaves, stray livestock and depositions taken by the court. The United States Government Printing Office (GPO) was created in June 1860, and is an agency of the U.S. federal government based in Washington D.C. The office prints documents produced by and for the federal government, including Congress, the Supreme Court, the Executive Office of the President and other executive departments, and independent agencies. A hearing is a meeting of the Senate, House, joint or certain Government committee that is open to the public so that they can listen in on the opinions of the legislation. Hearings can also be held to explore certain topics or a current issue. It typically takes between two months up to two years to be published. This is one of those hearings. Excerpt from General Index to the Documents: Relative to the Colonial History of the State of New York Abeel, David, arrives at Albany from Canada, VI. 526; empowered to effect an exchange of prisoners, 527. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. 34 Moussa Abadi and Odette Rosenstock, after becoming trapped in Nazi-occupied Paris, formed the Marcel Network, which was able to shelter over five hundred Jewish children in Catholic schools and convents and with Protestant families during World War II. The United States Government Printing Office (GPO) was created in June 1860, and is an agency of the U.S. federal government based in Washington D.C. The office prints documents produced by and for the federal government, including Congress, the Supreme Court, the Executive Office of the President and other executive departments, and independent agencies. A hearing is a meeting of the Senate, House, joint or certain Government committee that is open to the public so that they can listen in on the opinions of the legislation. Hearings can also be held to explore certain topics or a current issue. It typically takes between two months up to two years to be published. This is one of those hearings. The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those

instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts. The text consists of articles and related study materials prepared for the annual ALI-ABA Course of Study on Banking and Commercial Lending Law. This volume contains documents recorded in Deed Book RR in Prince George's County, Maryland, between September 1759 and March 1763. Deed books of this time period contain much more than land records. You are likely to find land sales, leases, releases, mortgages, deeds of sale, registration of livestock marks, notice of stray livestock, slave manumissions, marriage contracts, and more. No family history research is complete without looking at deed books.

The Massachusetts Amendments were created to reflect their state-specific amendments to the National Electrical CodeA(R) 2008 - the worlds most widely adopted safety code. The National Electrical CodeA(R) is now advancing electrical safety requirements with the 2008 edition in an effort to maximize public safety, emergency preparation, and electrical worker protection. With regulations for electrical wiring and equipment in virtually all types of buildings, this new edition responds to industry needs with expanded requirements based on research, new technologies, and recent events. This resource is a must have for Massachusetts workers involved in electrical design, installation, inspection, and safety. It has been updated for enhanced usability in the field, making it ideal for handling on-the-job electrical situations safely and effectively. Delmar, a part of Cengage Learning is pleased to make this amendment, as well as the National Electrical CodeA(R), available directly from us, for the convenience of our customers who work in and around the electrical trades. They may be used independently, or as a companion to any electrical book, including Delmar's best-selling wiring series, as well as our guides to using the NECA(R). This five-volume series provides a comprehensive overview of all important aspects of modern drying technology, concentrating on the transfer of cutting-edge research results to industrial use. Volume 5 is dedicated to process intensification by hybrid processes that combine convective or contact heat transfer with microwaves, ultrasound or radiation. Process intensification by more efficient choice, distribution, and flow of the drying medium - such as impinging jet drying, pulse combustion drying, superheated steam drying, drying in specially designed spouted beds - are thoroughly discussed. Moreover, methods that favorably affect the process by changing the structure of the drying product, e.g. foaming, electroporation, are treated. Emphasis is placed on drying, including freeze-drying, of sensitive materials such as foods, biomaterials and pharmaceuticals.

Released Volumes of Modern Drying Technology: \* Volume 1: Computational Tools at Different Scales ISBN 978-3-527-31556-7 \* Volume 2: Experimental Techniques ISBN 978-3-527-31557-4 \* Volume 3: Product Quality and Formulation ISBN 978-3-527-31558-1 \* Volume 4: Energy Savings ISBN 978-3-527-31559-8 \* Set (Volume 1-5) ISBN 978-3-527-31554-3

The volumes of this series present almost 300 indispensable toxicological evaluation documents on important occupational toxicants and carcinogens. They describe the toxicological database which determines the level of a MAK value (Maximum Concentrations at the Workplace). Each evaluation document is written to a standard format and includes sections about toxic effects, modes of action, effects in man, effects on animals, genotoxicity and

carcinogenicity, manifesto. Volume 11 contains 16 reviews plus a section about dusts. From the contents: alpha-Amylase, p-tert-Butylphenol, 1-Chloro-1-nitropropane, Diazinon, 2,4-Dichlorophenoxyacetic acid including salts and esters, 2-Ethoxyethanol and 2-Ethoxyethyl acetate, Ethylene thiourea, n-Heptane, Maleic anhydride, N-Methyl-N,2,4,6-tetranitroaniline, Naphthalene, Pentyl acetate, Phenylhydrazine, Phthalic anhydride, Rosin(Colophony), 2,4,5-Trichlorophenoxyacetic acid; Dusts, Derivation of MAK values for dusts from long-term threshold values, Portland cement. Field notes Vol. 527 documents Arthur Cronquist's botanical collecting in Georgia in 1947 while he was a professor of botany at the University of Georgia. It consists of a list of specimen numbers 4216-4405, collected March 30-May 4, 1947. The list contains collection locations and dates, brief descriptions, and many have herbarium determination (added later). The notebook also contains a few miscellaneous notes and a list of specimens from Minnesota in the University of Minnesota Herbarium. Certain tax-exempt organizations seeking to influence political elections called Section 527 organizations- are estimated to annually spend hundreds of millions of dollars. In federal elections, these organizations have been able to use unregulated "soft money" for indirect or "issue advocacy," such as that conducted when an organization sponsors an advertisement that supports or opposes a candidate's position on an issue. Although all states required these organizations to provide some type of data on their finances and activities to the public, no central source provided such data. In July 2000, Congress passed P.L. 106-230 to require Section 527 organizations to provide the Internal Revenue Service (IRS) with data on their purposes, officers, contributors, and expenses. Congress established tight time frames for reporting these data to IRS and the law, or implementing regulations, calls for IRS to then disclose these data to the public. You asked us to study three related issues associated with responsibilities IRS gained in P.L. 106-230. Given the requirements of P.L. 106-230, our objectives were to determine the extent to which IRS (1) discloses to the public in an accessible manner the data that Section 527 organizations file with IRS, (2) oversees Section 527 organizations' compliance with the specified filing requirements, and (3) develops a strategic plan for carrying out its new responsibilities. To meet these objectives, we reviewed P.L. 106-230 and relevant Internal Revenue Code rulings on Section 527 political organizations. We interviewed responsible IRS officials and obtained documentation about processes, plans, and initiatives for disclosure and oversight related to Section 527 organizations. We also interviewed officials at the Federal Election Commission (FEC), which publicly discloses data about federal election activities, to understand the similarities and differences in disclosure and oversight processes between FEC and IRS. The passage of Citizens United by the Supreme Court in 2010 sparked a renewed debate about campaign spending by large political action committees, or Super PACs. Its ruling said that it is okay for corporations and labor unions to spend as much as they want in advertising and other methods to convince people to vote for or against a candidate. This book provides a wide range of opinions on the issue. Includes primary and secondary sources from a variety of perspectives; eyewitnesses, scientific journals, government officials, and many others.
