The House of Lords Constitution Committee have today published their 4th report of the 2009-10 session on 'The Cabinet Office and the Centre of Government' (HLP 30, ISBN 9780108459320) in which they suggest that power within the cabinet has become increasingly centralised to the Prime Minister and recommend that structures of accountability should be reformed to mirror that change. The Committee expresses support for the principles of collective responsibility but recognise that increasingly the Cabinet Office has become responsible for overseeing the delivery of government policy across departments. They stress that accountability mechanisms within the UK constitution are not set up to reflect this new reality with parliamentary and select committee scrutiny

based on individual Ministers reporting to Parliament for activities within their departments. The Committee also considers the role of the Minister for the Cabinet Office, and state that the responsibilities of the post are currently poorly defined. They recommend that the Government reassess the functions of the Minister for the Cabinet Office to ensure that the postholder's responsibilities accurately reflect the strategic role the Cabinet Office plays in delivering government policy. The report goes on to consider the approach taken to changes to the machinery of government and the change in the role and function of the Lord Chancellor which took place during Tony Blair's time as Prime Minister. The Committee states that the process of change involved 'wholly inadequate' consultation both within government and with the senior judiciary, and further states that there was "no justification for failure to consult on these important reforms". The Committee recommends that in future the Cabinet Office should play a formal role in investigating any machinery of government changes, particularly those with constitutional implications. Dunn investigates factors leading to the initiation and persistence of institutionalized cabinets in the governments of T.C. Douglas in Saskatchewan, Duff Roblin and Walter Weir in Manitoba, and W.R. Bennett in British Columbia. He describes the

transition from unaided, or relatively uncoordinated, central executive structures to those that are more structured, collegial, and prone to emphasize planning and coordination. He also examines how the premier's role has expanded from simply choosing cabinets to reorganizing their structure and decision-making processes as well. The institutionalization of provincial cabinets has had major effects on both political actors and functions in the three provinces studied. Dunn shows that cabinet structure has changed, and been changed by, power relations within the cabinet. The major European powers drafted war plans before 1914 and executed them in August 1914; none brought the expected victory by Christmas. Why? This tightly focused collection of essays by international experts in military history reassesses the war plans of 1914 in a broad diplomatic, military, and political setting for the first time in three decades. The book analyzes the war plans of Austria-Hungary, France, Germany, Great Britain, Italy, and Russia on the basis of the latest research and explores their demise in the opening months of World War I. Collectively and comparatively, these essays place contingency war planning before 1914 in the different contexts and challenges each state faced as well as into a broad European paradigm. This is the first such undertaking since Paul Kennedy's groundbreaking War Plans of the Great Powers (1979), and the end result is

brehtaking in both scope and depth of analysis. Sam Allen--author of The Wood Finisher's Handbook ("Authoritative...a compelling addition"--Chip Chats), The Wood Joiner's Handbook ("An excellent choice"--Fine Woodworking) and others--now provides novice woodworkers with the finest guide to creating cabinetry. It takes newcomers by the hand and leads them through every process in detail, from understanding the properties of wood to reading a plan, from layout, squaring, and cutting to joinery and assembly. Allen discusses lumber grades, sizes, and prices; edge treatments for plywood and reconstituted wood products; transferring patterns; and handling all the necessary tools. There's advice on case and panel construction, designing shelves, drawer hardware, and making freestanding modular cabinets, along with plans for modular built-ins, cabinets for home entertainment, and electronics built-in cabinets. The most complete visual guide to furniture construction ever published! Includes hundreds of clearly-labeled drawings and exploded diagrams that explain everything there is to know about joints, subassemblies and furniture design. Charting Your Course is the story of 2003 Malcolm Baldrige National

Quality Award winner  
Community Consolidated School District 15 of Palatine, Illinois. The book shares the story of the school district's journey toward continuous improvement as they followed the Baldrige Award Criteria. The authors share both the good and the bad results encountered along the way, allowing the reader to learn from his experiences. The book will help other schools answer the many questions that will inevitably come up as they begin to follow the Baldrige criteria, and will help them avoid making some of the same mistakes. PRAISE FOR CHARTING YOUR COURSE "A case study of the only school district in the state of Illinois to earn the top quality award from the Lincoln Foundation for Business Excellence. Charting Your Course is must reading for superintendents and principals who are serious about achieving organizational excellence. In this straightforward account of a school district seriously embracing the Malcolm Baldrige criteria, the authors detail what worked and what went awry, and offer concrete suggestions on avoiding some of their mistakes."- Dr. Paul D. How do we plan under conditions of uncertainty? The perspective of military planners is a key

organizing framework: do they see themselves as preparing to administer a peace, or preparing to fight a future war? Most interwar volumes examine only the 1920s and the 1930s. This new volume goes back, and forward in time, to draw on a greater expanse of history in order to tease out lessons for contemporary planners. These chapters are grouped into four periods: 1815-1856, 1871-1914, 1918-1938, and post-Second World War. They progress from low-tech to high-tech concerns, for example, the first period examines armies, while the second period examines navies, the third assesses navies combined with air forces, and finally for the Kaiser chapter explores nuclear issues and decision-making. *Old-House Journal* is the original magazine devoted to restoring and preserving old houses. For more than 35 years, our mission has been to help old-house owners repair, restore, update, and decorate buildings of every age and architectural style. Each issue explores hands-on restoration techniques, practical architectural guidelines, historical overviews, and homeowner stories—all in a trusted, authoritative voice. The leading text on design communication, updated and expanded *Kitchen and Bath Design Presentation* is the National Kitchen and Bath Association's complete guide to preparing clear and accurate project documents and plans. This updated second edition has been expanded to include more information on hand

drafting, specifications, and project presentation, with additional CAD coverage featuring software programs approved for the NKBA certification exams. This full-color guide includes detailed information on the NKBA graphics and presentation standards, plus extensive reference appendices including sample documents, cabinet nomenclature, and metric conversions. Each chapter includes a summary and review questions, and samples of NKBA drawings throughout provide ample illustration of the techniques discussed. Design presentation is the key communication between designer and client, contractor, and supplier. Accuracy and precision are essential, and mistakes can be costly in terms of both time and money. The National Kitchen and Bath Association established the standard guidelines for safe and effective kitchen planning, and Kitchen and Bath Design Presentation provides a thorough breakdown of the NKBA standards in design communication. Learn the secrets to accurate measurement with tips from the pros Master the art of hand drafting, and review the fundamentals of CAD Understand drafting conventions, dimensioning, and construction planning Study the NKBA's graphics and presentation standards, including specs, titling, copyright, and more Comprehensive coverage and clear instruction make this book ideal for CKD and CBD exam prep, and easy navigation

and strong visual design make it a useful reference for professionals needing to communicate their vision. Designers must be skilled at translating idea to reality, and Kitchen and Bath Design Presentation is the industry standard guide to doing it right.
