India's National Security Jun 09 2022 This fourteenth volume of India's National Security Annual Review intensively analyses India's national security with respect to the changing internal and external dynamics. In the global environment, the situation is characterised by rising tensions between United States and Russia, intensified rivalry between United States (US) and China, and increasing cooperation between China and Russia. For India which seeks peaceful growth to emerge as a major power, this poses severe diplomatic challenges. This volume discusses the complexity of these challenges and the deftness with which India gets the best out of its strategic partnerships with the US and Russia while warding off the transgressions of a mighty adversary like China. It also studies the impact of internal convulsions and external intrusions on India's security from South Asian nations such as Afghanistan, Bangladesh, Nepal and Sri Lanka. Examining the field of internal security, the essays carry rare insights into the causes of expansion of Naxalite violence in tribal areas and the dynamics of conflict resolution in the Northeast, as well as India's deep concern as a growing power with its economic slowdown in the recent past, and energy and cyber security. Bringing together contributions from eminent scholars and diplomats, the volume will be indispensable for policymakers, government think tanks, defence and strategic studies experts, as well as students and researchers of international relations, foreign policy and political science.

Philosophies of Multiculturalism Aug 19 2020 This edited collection offers a comparative approach to the topic of multiculturalism, including different authors with contrasting arguments from different philosophical traditions and ideologies. It puts together perspectives that have been largely neglected as valid normative ways to address the political and moral questions that arise from the coexistence of different cultures in the same geographical space. The essays in this volume cover both historical perspectives, taking in the work of Hobbes, Tocqueville and Nietzsche among others, and contemporary Eastern and Western approaches, including Marxism, anarchism, Islam, Daoism, Indian and African philosophies.

Natural Burial Jul 30 2021 This book unravels the many different experiences, meanings and realities of natural burial. Twenty years after the first natural burial ground opened there is an opportunity to reflect on how a concept for a very different approach to caring for our dead has become a reality: new providers, new landscapes and a hybrid of new and traditional rituals. In this short time the natural burial movement has flourished. In the UK there are more than 200 sites, and the concept has travelled to North America, Holland, Australia, New Zealand and Japan.

This survey of natural burials draws on interviews with those involved in the natural burial process – including burial ground managers, celebrants, priests, bereaved family, funeral directors – providing a variety of viewpoints on the concept as a philosophy and landscape practice. Site surveys, design plans and case studies illustrate the challenges involved in creating a natural burial site, and a key longitudinal case study of a single site investigates the evolving nature of the practice. *Natural Burial* is the first book on this subject to bring together all the groups and individuals involved in the practice, explaining the facts behind this type of burial and exploring a topic which is attracting significant media interest and an upsurge of sites internationally.

BRICS and International Tax Law May 16 2020 With the ongoing expansion of outbound foreign direct investment (FDI) in the countries representing the BRICS economic bloc (Brazil, Russia, India, China, and South Africa) – and with all of them at the same time listed among the top seven countries plagued by tax evasion and avoidance in the guise of illicit outflows – the five governments, both individually and through cooperative initiatives, have devised new international tax strategies that are proving to be of great interest and value to other countries, both developing and developed. The core of these strategies addresses the necessity of stemming the outflow of revenue while strongly supporting FDI, both inbound and outbound while complying with international obligations including those arising from human rights laws. This book is the first in-depth commentary on this new and evolving area of international tax law. The detailed analysis covers the entire field of BRICS international tax law, considering topics such as the following: – information exchange procedures and pitfalls; – response to the OECD's Base Erosion and Profit-Sharing (BEPS) initiative; – role of bilateral and multilateral double taxation conventions including the Multilateral Instrument and the Bilateral Investment Treaties; – thin capitalization; – transfer pricing; – controlled foreign corporation rules; – shortcomings related to authorities' limited manpower; – international audit and investigation procedures; – the BRICS approach to residence and mandatory and binding arbitration; and – the BRICS approach to shaping the developing world's international tax system. Notably, the author personally conducted interviews with senior international representatives of the BRICS tax authorities, as well as with leading BRICS academics and practitioners. Tax cases, together with human rights and investment cases and administrative guidelines in all five countries are also included in the analysis. The study concludes with recommendations for improving each of the five countries' tax law and procedures, especially in the area of dispute resolution. The author's goal is to extend the existing body of knowledge of the BRICS' international tax laws in order to assist in developing an understanding of the BRICS approach to dealing with evasion and avoidance: an approach which facilitates both outbound and inbound FDI, simplifies tax authority administration and establishes a basis for resolving international disputes which is compatible with sovereignty. In achieving this objective, the author has produced a major work that is of immeasurable value to tax advisers, government and governance officials, academics and researchers both in developing international taxation strategies and in helping to resolve disputes with tax authorities.

Rituparno Ghosh Oct 21 2020 An iconic filmmaker and inheritor of the legendary Satyajit Ray's legacy, Rituparno Ghosh was one of the finest auteurs to emerge out of contemporary Bengal. His films, though rooted firmly in middle-class values, desires and aspirations, are highly critical of hetero-patriarchal power structures. From the very outset, Ghosh displayed a strong feminist sensibility which later evolved into radical queer politics. This volume analyses his films, his craft, his stardom and his contribution to sexual identity politics. In this first scholarly study undertaken on Rituparno Ghosh, the essays discuss the cultural import of his work within the dynamics of a rapidly evolving film industry in Bengal and more largely the cinematic landscape of India. The anthology also contains a conversation section (interviews with the filmmaker and with industry cast and crew) drawing a critical and personal portrait of this remarkable filmmaker.

EFA Global Monitoring Report – 2013–2014 – Teaching and Learning Achieving quality for all Nov 14 2022 The 2013/2014 Education for All Global Monitoring Report shows that a lack of attention to education quality and a failure to reach the marginalized have contributed to a learning crisis that needs urgent attention. Worldwide, 250 million children many of them from disadvantaged backgrounds are not learning the basics. *Teaching and Learning: Achieving Quality for All* describes how policy-makers can support and sustain a quality education system for all children, regardless of background, by providing the best teachers. The Report also documents global progress in achieving Education for All goals and provides lessons for setting a new education agenda post-2015. In addition, the Report identifies that insufficient financing is hindering advances in education.

India and the Responsibility to Protect Jun 16 2020 Bloomfield charts India's profoundly ambiguous engagement with the thorny problem of protecting vulnerable persons from atrocities without fatally undermining the sovereign state system, a matter which is now substantially shaped by debates about the responsibility to protect (R2P) norm. Books about India's evolving role in world affairs and about R2P have proliferated recently, but this is the first to draw these two debates together. It examines India's historical responses to humanitarian crises, starting with the 1971 Bangladesh Liberation War, concentrating on the years 2011 and 2012 when India sat on the UN Security Council. Three serious humanitarian crises broke during its tenure - in Côte d'Ivoire, Libya and Syria - which collectively sparked a ferocious debate within India. The book examines what became largely a battle over 'what sort of actor' modern India is, or should be, to determine how this contest shaped both India's responses to these humanitarian tragedies and also the wider debates about rising India's international identity. The book's findings also have important (and largely negative) implications for the broader effort to make R2P a recognised and actionable

international norm.

The Legal Protection of Refugees with Disabilities Mar 06 2022 This ground-breaking book focuses on the 'forgotten refugees', detailing people with disabilities who have crossed borders in search of protection from disaster or human conflict. The authors explore the intersection between one of the oldest international human rights treaties, the 1951 Convention relating to the Status of Refugees, with one of the newest: the Convention on the Rights of Persons with Disabilities (CRPD). Drawing on fieldwork in six countries hosting refugees in a variety of contexts – Malaysia, Indonesia, Pakistan, Uganda, Jordan and Turkey – the book examines how the CRPD is (or should) be changing the way that governments and aid agencies engage with and accommodate persons with disabilities in situations of displacement. The timeliness of the book is underscored by the adoption in mid-2016 of the UN Charter on Inclusion of Persons with Disabilities in Humanitarian Action adopted at the World Humanitarian Summit.

Understanding Substance Use Oct 13 2022 Changes to drug and alcohol policy post-1995 introduced the partnership style of working and many different routes by which treatment can be accessed. This means that a wide variety of professional groups now work with drug and alcohol users. "The book makes a major contribution to the understanding substance use, drawing on relevant and recent policy. It draws on practice and engages the reader in current debates in the area. The book provides theoretical underpinnings that are influential in practice. As key aspect of social work practice, substance misuse is relevant for practitioners. A much needed book for students, practitioners and policy-makers." Bridget Ng'andu, Ruskin College This book provides an analytical and critical discussion of policy and practice in this area. It lays out the key debates and issues for understanding, exploring, dealing and working with substance misuse issues, users, their families and other professionals. The reader is introduced to the policy framework and why it is important for generic social work and other health and social care practitioners to have an understanding of substance misuse and the issues involved. The reader is assisted to think about how they can use their professional skills and values to inform assessments and interventions with substance users and reflective exercises encourage the reader to consider values issues and examine their own attitudes. This book will be valuable to students and practitioners wishing to update their skills and knowledge.

Social Movement De-Radicalisation and the Decline of Terrorism Jun 21 2023 By drawing on social movement theories, this book explains how terrorist movements decline, using the case of Irish Republicanism. The continuity of terrorism and political violence from generation to generation demonstrates the need to go beyond a focus on groups or individuals in order to explain how terrorism ends. The concept of de-radicalisation has been critiqued for its lack of explanatory value in accounting for disengagement from terrorism or how the risk of terrorism re-emerging is reduced. However, building on the morphogenetic approach, this book distinguishes between structure/culture and agency over time in order to analyse the causal influence between the two. Two processes are analysed: disengagement framing processes explain how actors change attitudes to violence and the book identifies which factors ensure frames resonate with audiences; and social movement de-radicalisation accounts for the outcomes of disengagement in initiating structural change which transforms the landscape the next generation finds itself in. The fundamental aim of the book is to provide theoretical and conceptual insights into how terrorism can not only come to an end, but can be prevented from emerging to be a significant threat again within a society. This book will be of much interest to students of terrorism and political violence, social movement theory, British and Irish Politics, war and conflict studies, security studies and IR in general.

Business Ethics Jan 24 2021 Business Ethics introduces students to ethical issues and decision-making in a variety of contemporary contexts. It develops an awareness of the many ways in which ethical considerations can manifest in commercial domains, thereby helping prepare students for their professional careers. Business Ethics shows how theory works in practice. It includes hundreds of real-world examples that will help engage students. Examples draw on recent and emerging concerns, such as the moral implications of social media and the enforcement of codes of behaviour within industries. The book also addresses corporate social responsibility, stakeholder management and sustainability, reflecting the broad scope of business ethics today. Comprehensive online resources are available at www.cambridge.edu.au/academic/businessethics. Student resources include additional review questions and case studies, with answer guides, to help students reinforce learning and prepare for assessment tasks. Instructor resources include an extensive set of tutorial exercises, PowerPoint slides and a test bank of assessment resources.

Regional Risk and Security in Japan May 20 2023 Japan's unusual position in the realm of international politics encapsulates a three-fold juxtaposition: both in and out of Asia, both occupied by and a close ally of the United

States, and both a key trade partner and a strategic rival of China. Whilst international relations theory offers a number of ways to analyse these relations, this book instead utilizes the concept of risk to provide an innovative perspective on Japan's relations with China, North Korea and the US. The book elucidates how risk, potential harm and harm are faced disproportionately by certain groups in society. This is demonstrated by providing an empirically rich analysis of the domestic implications of security relations with China, North Korea and the United States through the presence of US troops in Okinawa. Beginning with a theoretical discussion of risk, it goes on to demonstrate how the concept of risk adds value to the study of international relations in three senses. First, the concept helps to break down the boundaries between the international and domestic. Second, the focus on risk and the everyday directs us to ask basic questions about the costs and benefits of a security policy meant to secure the national population. Third, what implications do these two points have for governance? The question is one of governance as Japan's externally oriented security policy produces domestic insecurity shared disproportionately, not equally, as this volume makes clear. Developing the theory of risk as a tool for understanding international relations, this book will be of great interest to students and scholars of Asian politics, Japanese politics, international relations and security studies, as well as to policy makers and practitioners working in the field.

Coalitions in the Climate Change Negotiations Aug 31 2021 This edited volume provides both a broad overview of cooperation patterns in the UNFCCC climate change negotiations and an in-depth analysis of specific coalitions and their relations. Over the course of three parts, this book maps out and takes stock of patterns of cooperation in the climate change negotiations since their inception in 1995. In Part I, the authors focus on the evolution of coalitions over time, examining why these emerged and how they function. Part II drills deeper into a set of coalitions, particularly "new" political groups that have emerged in the last rounds of negotiations around the Copenhagen Accord and the Paris Agreement. Finally, Part III explores common themes and open questions in coalition research, and provides a comprehensive overview of coalitions in the climate change negotiations. By taking a broad approach to the study of coalitions in the climate change negotiations, this volume is an essential reference source for researchers, students, and negotiators with an interest in the dynamics of climate negotiations.

Unwinnable Mar 26 2021 Afghanistan was an unwinnable war. As British and American troops withdraw, discover this definitive account that explains why. It could have been a very different story. British forces could have successfully withdrawn from Afghanistan in 2002, having done the job they set out to do: to defeat al-Qaeda. Instead, in the years that followed, Britain paid a devastating price for their presence in Helmand province. So why did Britain enter, and remain, in an ill-fated war? Why did it fail so dramatically, and was this expedition doomed from the beginning? Drawing on unprecedented access to military reports, government documents and senior individuals, Professor Theo Farrell provides an extraordinary work of scholarship. He explains the origins of the war, details the campaigns over the subsequent years, and examines the West's failure to understand the dynamics of local conflict and learn the lessons of history that ultimately led to devastating costs and repercussions still relevant today. 'The best book so far on Britain's...war in Afghanistan' International Affairs 'Masterful, irrefutable... Farrell records all these military encounters with the irresistible pace of a novelist' Sunday Times

Understanding Management Critically Oct 01 2021 In these times of global economic crisis, social unrest towards the powers that be, and a yearning for alternative systems and organization, it is now more relevant than ever for you to take a critical stance to your management studies in order to analyse, understand and question the world around you and the capitalist stronghold in which you live and work. This new thought-provoking text uses critical theory and revolutionary ideas to help you challenge the status quo and prevailing ideologies in management. It covers key issues, thinkers and topics in an accessible style to provide a broad and clear understanding of vital theory which is applied to the real world through international case studies and reflective questions and think points for you to carry into practice. A companion website provides additional learning materials for personal study and class activities <https://study.sagepub.com/dyer> This text is essential reading for any undergraduate or postgraduate student studying critical management or any management course with a critical slant.

Vision and Visual Perception Aug 11 2022 Vision is about insight, and visual perception is about cognition - and they form the foundation of how we see the world. Duco A. Schreuder, a physicist and psychologist, explores the

finer details of each in this groundbreaking book that explores human consciousness and perception. Sharing virtually everything he's learned over a varied career spanning more than sixty years, he examines a wide array of topics, including how we understand what we visually process, how we store and retrieve information, the role that neurons play in how what we see, and much more. While Schreuder isn't afraid to disagree with other leading thinkers, he relies on science and focuses on the facts behind it so you can understand lighting, visual perception, engineering design, and applied and experimental physics. Looking is about insight, whereas seeing is about knowledge, and you need to know how each one works to truly understand how humanity views the world. Whether you're an illuminating engineer considering the fundamentals of the trade or a student or professional in an allied discipline, you'll be well served by taking a closer look at Vision and Visual Perception.

Colonial Counterinsurgency and Mass Violence Feb 22 2021 Whether out of historical interest, romantic identification with the colonized or as models for contemporary counter-insurgency experts, the mass violence of insurgency and counter-insurgency in the post-war decolonization of the European empires has long exerted an intense fascination. In the main, the dramas in French Algeria and British Kenya in the 1950s have dominated the scene, overshadowing the equally violent events that unfolded in the Dutch, Belgian and Portuguese empires. Colonial counterinsurgency and mass violence is the first book in English to treat the intense conflict that occurred during the 'Indonesian revolution'—the decolonization struggle of the Dutch East Indies between 1945 and 1949. This case is particularly significant as the first episode of post-war colonial violence, indeed one with global reverberations. International opinion was ranged against the Dutch, and the nascent United Nations condemned its euphemistically termed 'police actions' to reclaim the archipelago from Indonesian nationalists after defeat by the Japanese in 1942. As this book makes clear, however, intra-Indonesian violence was no less prevalent, as rival independence visions vied for control and villagers were caught between the fronts. Taking a multi-perspectival approach, eighteen authors examine the origins of the conflict as well as its representational and memory dimensions. Colonial counterinsurgency and mass violence will appeal to scholars of imperial history, mass violence and memory studies alike. This book is based on a special issue of the Journal of Genocide Research.

An Introduction to LTE Apr 19 2023 Following on from the successful first edition (March 2012), this book gives a clear explanation of what LTE does and how it works. The content is expressed at a systems level, offering readers the opportunity to grasp the key factors that make LTE the hot topic amongst vendors and operators across the globe. The book assumes no more than a basic knowledge of mobile telecommunication systems, and the reader is not expected to have any previous knowledge of the complex mathematical operations that underpin LTE. This second edition introduces new material for the current state of the industry, such as the new features of LTE in Releases 11 and 12, notably coordinated multipoint transmission and proximity services; the main short- and long-term solutions for LTE voice calls, namely circuit switched fallback and the IP multimedia subsystem; and the evolution and current state of the LTE market. It also extends some of the material from the first edition, such as inter-operation with other technologies such as GSM, UMTS, wireless local area networks and cdma2000; additional features of LTE Advanced, notably heterogeneous networks and traffic offloading; data transport in the evolved packet core; coverage and capacity estimation for LTE; and a more rigorous treatment of modulation, demodulation and OFDMA. The author breaks down the system into logical blocks, by initially introducing the architecture of LTE, explaining the techniques used for radio transmission and reception and the overall operation of the system, and concluding with more specialized topics such as LTE voice calls and the later releases of the specifications. This methodical approach enables readers to move on to tackle the specifications and the more advanced texts with confidence.

Making Sovereign Financing and Human Rights Work Sep 12 2022 Poor public resource management and the global financial crisis curbing fundamental fiscal space, millions thrown into poverty, and authoritarian regimes running successful criminal campaigns with the help of financial assistance are all phenomena that raise fundamental questions around finance and human rights. They also highlight the urgent need for more systematic and robust legal and economic thinking about sovereign finance and human rights. This edited collection aims to contribute to filling this gap by introducing novel legal theories and analyses of the links between sovereign debt and human rights from a variety of perspectives. These chapters include studies of financial complicity, UN sanctions, ethics, transitional justice, criminal law, insolvency proceedings, millennium development goals, global financial architecture, corporations, extraterritoriality, state of necessity, sovereign wealth and hedge funds, project financing, state responsibility, international financial institutions, the right to development, UN initiatives, litigation, as well as case studies from Africa, Asia and Latin America. These chapters are then theorised by the editors in an introductory chapter. In July 2012 the UN Human Rights Council finally issued its own guidelines on foreign debt and human rights, yet much remains to be done to promote better understanding of the legal and economic implications of the

interface between finance and human rights. This book will contribute to that understanding as well as help practitioners in their everyday work. The authors include world-renowned lawyers and economists, experienced practitioners and officials from international organisations.

Affordable Housing in the Urban Global South Apr 14 2020 The global increase in the number of slums calls for policies which improve the conditions of the urban poor, sustainably. This volume provides an extensive overview of current housing policies in Asia, Africa and Latin America and presents the facts and trends of recent housing policies. The chapters provide ideas and tools for pro-poor interventions with respect to the provision of land for housing, building materials, labour, participation and finance. The book looks at the role of the various stakeholders involved in such interventions, including national and local governments, private sector organisations, NGOs and Community-based Organisations.

Liberia and the Dialectic of Law Jul 22 2023 It is the condition of modernity that an institution cannot depend on a god, tradition, or any other transcendental source to secure its foundations, which thereby come to rest upon – or rather in, and through – its subjects. Never wholly separated from its subjects, and yet never identical with them: this contradictory condition provides a way of seeing how modern law gives form to life, and how law takes form, enlivened by its subjects. By driving Theodor Adorno's dialectical philosophy into the concept of law, the book shows how this contradictory condition enables law to become instituted in ways that are hostile to its subjects, but also how law remains open to its subjects, and thus disposed towards transformation. To flesh out an understanding of this contradiction, the book examines the making and remaking of "Liberia", from its conception as an idea of liberty at the beginning of the nineteenth century to its reconstruction at the beginning of the twenty-first with the assistance of an international intervention to "establish a state based on the rule of law". In so doing, the book shows how law is at the epicentre of a colonising power in Liberia that renders subjects as mere objects; but at the same time, the book exposes the instability of this power, by showing how law is also enlivened by its subjects as it takes form in and through their lives and interactions. It is this fundamentally contradictory condition of law that ultimately denies power any absolute hold, leaving law open to the self-expression of its subjects.

Routledge Handbook of Medical Law and Ethics Apr 26 2021 This book explores the scope, application and role of medical law, regulatory norms and ethics, and addresses key challenges introduced by contemporary advances in biomedical research and healthcare. While mindful of national developments, the handbook supports a global perspective in its approach to medical law. Contributors include leading scholars in both medical law and ethics, who have developed specially commissioned pieces in order to present a critical overview and analysis of the current state of medical law and ethics. Each chapter offers comprehensive coverage of longstanding and traditional topics in medical law and ethics, and provides dynamic insights into contemporary and emerging issues in this heavily debated field. Topics covered include: Bioethics, health and human rights Medical liability Law and emerging health technologies Public health law Personalized medicine The law and ethics of access to medicines in developing countries Medical research in the genome era Emerging legal and ethical issues in reproductive technologies This advanced level reference work will prove invaluable to legal practitioners, scholars, students and researchers in the disciplines of law, medicine, genetics, dentistry, theology, and medical ethics.

The Creation of Kazakh National Identity Nov 21 2020 This monograph utilizes three theoretical models to explain Kazakhstan's emergence as an independent state and its changing relationships with the broader world, particularly Russia, since the beginning of the twentieth century. The book first explores the construction of Kazakh national identity and the ways in which intellectuals appealed to history to substantiate their claims about Kazakhstan's future. Secondly, the narrative demonstrates that not all segments of totalitarian machinery work in unison. While terror reached its peak in the 1930s, cultural and ideological control was not as rigid as it would become in the late 1940s and early 1950s. Most importantly, the work is grounded in the study of the social universe. The book introduces the notion of "cosmos," the peculiar connections between social, economic, and political forces. While not necessarily directly dependent on each other, they nevertheless created a unique interplay among the segments of societal structures and the state's relationship with the wider universe. Taking this framework as the point of departure, this research analyzes Kazakhstan's "multi-vectorism" as uniquely fit to contemporary global arrangements, when no global power dominates, and the lines between friend and foe are blurred. This compelling approach to Kazakhstan's history will appeal to postgraduate students and scholars in Russian history and world history.

International Trials and Reconciliation Apr 07 2022 Transitional justice is a burgeoning field of scholarly inquiry. Yet while the transitional justice literature is replete with claims about the benefits of criminal trials, too often these claims lack an empirical basis and hence remain unproven. While there has been much discussion about whether criminal trials can aid reconciliation, the extent to which they actually do so in practice remains under-explored. This book investigates the relationship between criminal trials and reconciliation, through a particular focus on the International

Criminal Tribunal for the former Yugoslavia (ICTY). Using detailed empirical data – in the form of qualitative interviews and observations from five years of fieldwork – to assess and analyze the ICTY's impact on reconciliation in Bosnia-Herzegovina, Croatia and Kosovo, *International Trials and Reconciliation: Assessing the Impact of the International Criminal Tribunal for the former Yugoslavia* argues that reconciliation is not a realistic aim for a criminal court. They are, Janine Clark argues, only one part of a rich tapestry of justice, which must also include non-retributive transitional justice processes and mechanisms. Challenging many of the common yet untested assumptions about the benefits of criminal trials, this innovative and extremely timely monograph will be invaluable for those with interests in the theory and practice of transitional justice.
