The Trouble with Highlanders Jan 10 2022 She has hardly any choices left, and they're all dangerous... With her clan on the wrong side of the struggle for the Scottish throne, heiress Daphne Macleod, once the toast of the court, is out of options. Norris Sutherland, heir to the Earl of Sutherland, once helped Daphne escape an unwanted betrothal, but she walked away from him without a backward glance. Now after her fall from privilege and on the run from a vicious clan leader who wants to marry her, then murder her for her (supposed) hidden fortune, Daphne needs Norris more than ever. But he may be lost forever...unless she can somehow convince him to forgive her. A romantic tale of the Scottish highlands, readers of Lora Leigh, Connie Brockway and Amanda Scott will be waiting to be swept up in this 15th century Scottish Historical Romance. Introduction to Python Programming Feb 20 2023 Introduction to Python Programming is written for students who are beginners in the field of computer programming. This book presents an intuitive approach to the concepts of Python Programming for students. This book differs from traditional texts not only in its philosophy but also in its overall focus, level of activities, development of topics, and attention to programming details. The contents of the book are chosen with utmost care after analyzing the syllabus for Python course prescribed by various top universities in USA, Europe, and Asia. Since the prerequisite know-how varies significantly from student to student, the book's overall overture addresses the challenges of teaching and learning of students which is fine-tuned by the authors' experience with large sections of students. This book uses natural language expressions instead of the traditional shortened words of the programming world. This book has been written with the goal to provide students with a textbook that can be easily understood and to make a connection between what students are learning and how they may apply that knowledge. Features of this book This book does not assume any previous programming experience, although of course, any exposure to other programming languages is useful This book introduces all of the key concepts of Python programming language with helpful illustrations Programming examples are presented in a clear and consistent manner Each line of code is numbered and explained in detail Use of f-strings throughout the book Hundreds of real-world examples are included and they come from fields such as entertainment, sports, music and environmental studies Students can periodically check their progress with in-chapter quizzes that appear in all chapters

The Illustrated Guide to Assistive Technology & Devices May 14 2022 A Doody's Core Title 2012 This new illustrated guide to assistive technologies and devices chronicles the use of AT/AD - technology used by individuals with disabilities to perform functions that might otherwise be difficult or impossible. This book empowers people to use assistive technologies to overcome some of their physical or mental limitations and have a more equal playing field. It includes real-life examples about how people with disabilities are using assistive technology (AT) to assist them in daily tasks, and discusses emotional issues related to AT/AD.

Consumer Behavior and Marketing Strategy May 02 2021 This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis. Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are included in each chapter.

PoC or GTFO Nov 19 2022 This highly anticipated print collection gathers articles published in the much-loved International Journal of Proof-of-Concept or Get The Fuck Out. PoC|GTFO follows in the tradition of Phrack and Uninformed by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like "Reliable Code Execution on a Tamagotchi," "ELFs are Dorky, Elves are Cool," "Burning a Phone," "Forget Not the Humble Timing Attack," and "A Sermon on Hacker Privilege." Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.

What Do Science, Technology, and Innovation Mean from Africa? May 26 2023 Explorations of science, technology, and innovation in Africa not as the product of "technology transfer" from elsewhere but as the working of African knowledge. In the STI literature, Africa has often been regarded as a recipient of science, technology, and innovation rather than a maker of them. In this book, scholars from a range of disciplines show that STI in Africa is not merely the product of "technology transfer" from elsewhere but the working of African knowledge. Their contributions focus on African ways of looking, meaning-making, and creating. The chapter authors see Africans as intellectual agents whose perspectives constitute authoritative knowledge and whose strategic deployment of both endogenous and inbound things represents an African-centered notion of STI. "Things do not (always) mean the same from everywhere," observes Clapperton Chakanetsa Mavhunga, the volume's editor. Western, colonialist definitions of STI are not universalizable. The contributors discuss topics that include the trivialization of indigenous knowledge under colonialism; the creative labor of chimurenga, the transformation of everyday surroundings into military infrastructure; the role of enslaved Africans in America as innovators and synthesizers; the African ethos of "fixing"; the constitutive appropriation that makes mobile technologies African; and an African innovation strategy that builds on domestic capacities. The contributors describe an Africa that is creative, technological, and scientific, showing that African STI is the latest iteration of a long process of accumulative, multicultural knowledge production. Contributors Geri Augusto, Shadreck Chirikure, Chux Daniels, Ron Eglash, Ellen Foster, Garrick E. Louis, D. A. Masolo, Clapperton Chakanetsa Mavhunga, Neda Nazemi, Toluwalogo Odumosu, Katrien Pype, Scott Remer

PROPHECIES for the End of the World Jul 24 2020 Extremely accurate prophecies about the end of the world by Our Saints. In this edition, you will find a (back-)translation of some of the prophecies and the instructions of famous Orthodox Saints and hermits. You will have the opportunity to read the words of people who have long since left this world. The words they have left, as prophecies and instructions to us poor and fools are greatly valuable in strengthening our faith and instruction and confirmation of the authenticity and truthfulness of the Orthodox Christianity as a true path to God. Some of the translations of the texts contain specific prophecies related with the lands of Serbia, Russia and Greece. However, many of them apply to all of us,

modern Orthodox Christians, as well as to all people on earth. Their words are a warning of a bleak future that awaits us and our descendants.

Chasing Innovation Jun 14 2022 A vivid look at how India has developed the idea of entrepreneurial citizens as leaders mobilizing society and how people try to live that promise Can entrepreneurs develop a nation, serve the poor, and pursue creative freedom, all while generating economic value? In *Chasing Innovation*, Lilly Irani shows the contradictions that arise as designers, engineers, and businesspeople frame development and governance as opportunities to innovate. Irani documents the rise of "entrepreneurial citizenship" in India over the past seventy years, demonstrating how a global ethos of development through design has come to shape state policy, economic investment, and the middle class in one of the world's fastest-growing nations. Drawing on her own professional experience as a Silicon Valley designer and nearly a decade of fieldwork following a Delhi design studio, Irani vividly chronicles the practices and mindsets that hold up professional design as the answer to the challenges of a country of more than one billion people, most of whom are poor. While discussions of entrepreneurial citizenship promise that Indian children can grow up to lead a nation aspiring to uplift the poor, in reality, social, economic, and political structures constrain whose enterprise, which hopes, and which needs can be seen as worthy of investment. In the process, Irani warns, powerful investors, philanthropies, and companies exploit citizens' social relations, empathy, and political hope in the quest to generate economic value. Irani argues that the move to recast social change as innovation, with innovators as heroes, frames others—craftspeople, workers, and activists—as of lower value, or even dangers to entrepreneurial forms of development. With meticulous historical context and compelling stories, *Chasing Innovation* lays bare how long-standing power hierarchies such as class, caste, language, and colonialism continue to shape opportunity in a world where good ideas supposedly rule all.

Startup Aug 05 2021 The classic account of the early days of tech, named one of the 10 best business books of the year by *Business Week*: "Riveting, wry, and often wise."—The Washington Post Jerry Kaplan had a dream: he would redefine the known universe (and get very rich) by creating a new kind of computer. All he needed was sixty million dollars, a few hundred employees, and a maniacal belief in his ability to win the Silicon Valley startup game. Kaplan, a well-known figure in the computer industry, founded GO Corporation in 1987, and for several years it was one of the hottest new ventures in the Valley. Startup tells the story of Kaplan's wild ride: how he assembled a brilliant but fractious team of engineers, software designers, and investors; pioneered the emerging market for hand-held computers operated with a pen instead of a keyboard; and careened from crisis to crisis without ever losing his passion for his revolutionary idea. Along the way, Kaplan vividly recreates his encounters with eccentric employees, risk-addicted venture capitalists, and industry giants such as Bill Gates and John Sculley. And no one—including Kaplan himself—is spared his sharp wit. "What separates Kaplan's tale from other start-up stories is the insight he provides about dealing with two of America's largest computer companies—IBM and Microsoft...Readers interested in entrepreneurial adventurism will find Kaplan's tale entertaining."—Publishers Weekly "Kaplan tells it with novelistic style replete with races against the clock and sharp character sketches...An insider's well-written story of the death of a new machine."—Kirkus Reviews "A winner."—Wired

Communities Dominate Brands Apr 24 2023 *Communities Dominate Brands: Business and marketing challenges for the 21st century* is a book about how the new phenomenon of digitally connected communities are emerging as a force to counterbalance the power of the big brands and advertising. The book explores the problems faced by branding, marketing and advertising facing multiple radical changes in this decade. *Communities Dominate Brands* discusses how disruptive effects of digitalisation and connectedness introduce threats and opportunities. The authors compellingly illustrate how modern consumers are forming communities and peer-groups to pool their power resulting in a dramatic revolution of how businesses interact with their customers. The book provides practical guidance of how to move from obsolete interruptive advertising to interactive engagement marketing and community based communications, with dozens of real business examples from around the world. *Communities Dominate Brands* addresses its topic from a marketing (including advertising and branding) perspective and maintains a rigorous focus on business and profit dimensions of the issues involved. The book discusses such recent phenomena as blogging, virtual environments, mobile phone based swarming and massively multiplayer games. The book introduces a new generation of consumers called Generation-C (for Community). The book also discusses such new concepts as the Connected Age, Reachability, the Four C's, Alpha Users, and introduces Communities as an unavoidable new element into the traditional communication model. Combining the digital trends, modern management theories, and emerging new customer behaviour, *Communities Dominate Brands* arrives to its conclusion, that traditional marketing methods are increasingly ineffective and even becoming counterproductive. The power of the brands and the abuses by marketing have created a vacuum for a counterbalance, and digitally connected communities, the blogosphere, gamers, and especially the always-on connectedness of those on mobile phone networks, are emerging as the counterforce to redress the balance. The power of smart mobs and digitally enlightened communities will react rapidly to marketing excesses as the natural force balancing the power of the brands. The way a business can and must interact with the powerful new communities is through engagement marketing, by enticing the communities to interact with the brands. *Communities Dominate Brands* covers the major changes taking place in business and industry worldwide from leading digitally connected societies such as Finland, Korea, Japan, Hong Kong, UK and the USA. The authors discuss the business relevance of such community related technologies and phenomena such as blogging, CANs, iPod, MMOGs, MVNOs, PVRs, Ringing Tones, SMS text messaging, swarming, VOD. This is the definitive business book on the impact of new technologies, not explaining how technology works, but showing what businesses need to do to make money in the new digitally converging environment. *Communities Dominate Brands* analyses early successes of engaging communities by global brands such as Adidas, Apple, Audi, BBC, Boeing, Coca Cola, eBay, Ford, Google, Guinness, Hush Puppies, Lonely Planet, MTV, Nokia, Orange, Philips, Red Bull, Sony, Tesco, Tony & Guy, Vodafone, etc. The lessons are amplified with insights from rough punishment by communities suffered by Hutchison/Three networks, Kryptonite locks, Mazda, the Philippines Government, etc. Fully indexed, impeccably researched with documented sources, offering over 50 current business examples and over a dozen case studies, *Communities Dominate Brands* is a hands-on practical business handbook on how to adjust marketing to deal with communities. With tools such as the Four C's and Reachability, the authors provide a competitive head-start to all who want to achieve customer satisfaction and return business in the 21st century.

Fundamentals of Telemedicine and Telehealth Dec 29 2020 Fundamentals of Telemedicine and Telehealth provides an overview on the use of information and communication technologies (ICTs) to solve health problems, especially for people living in remote and underserved areas. With the advent of new technologies and improvement of internet connectivity, telehealth has become a new subject requiring a new understanding of IT devices and how to utilize them to fulfill health needs. The book discusses topics such as digitizing patient information, technology requirements, existing resources, planning for telehealth projects, and primary care and specialized applications. Additionally, it discusses the use of telemedicine for patient empowerment and telecare in remote locations. Authored by IMIA Telehealth working group, this book is a valuable source for graduate students, healthcare workers, researchers and clinicians interested in using telehealth as part of their practice or research. Presents components of healthcare that can be benefitted from remote access and when to rely on them Explains the current technologies and tools and how to put them to effective use in daily healthcare Provides legal provisions for telehealth implementation, discussing the risks of remote healthcare provision and cross border care

A New Literacies Sampler Mar 12 2022 The study of new literacies is quickly emerging as a major research field. This book «samples» work in the broad area of new literacies research along two dimensions. First, it samples some typical examples of new literacies - video gaming, fan fiction writing, weblogging, role play gaming, using websites to participate in affinity practices, memes, and other social activities involving mobile technologies. Second, the studies collectively sample from a wide range of approaches potentially available for researching and studying new literacies from a sociocultural perspective. Readers will come away with a rich sense of what new literacies are, and a generous appreciation of how they are being researched.

The Smartphone Oct 31 2023 We think we know everything about smartphones. We use them constantly. We depend on them for every conceivable purpose. We are familiar with every inch of their compact frames. But there is more to the smartphone than meets the eye. How are smartphones made? How have they shaped the way we socialise? And who tracks the movements they record? These are just some of the questions that journalist Elizabeth Woyke answers in an illuminating look at this feature of our day-to-day lives. Features interviews with key figures in industry.

Network Data Analytics Dec 21 2022 In order to carry out data analytics, we need powerful and flexible computing software. However the software available for data analytics is often proprietary and can be expensive. This book reviews Apache tools, which are open source and easy to use. After providing an overview of the background of data analytics, covering the different types of analysis and the basics of using Hadoop as a tool, it focuses on different Hadoop ecosystem tools, like Apache Flume, Apache Spark, Apache Storm, Apache Hive, R, and Python, which can be used for different types of analysis. It then examines the different machine learning techniques that are useful for data analytics, and how to visualize data with different graphs and charts. Presenting data analytics from a practice-oriented viewpoint, the book discusses useful tools and approaches for data analytics, supported by concrete code examples. The book is a valuable reference resource for graduate students and professionals in related fields, and is also of interest to general readers with an understanding of data analytics.

Closing the Feedback Loop Aug 29 2023 This book is a collection of articles, written by both academics and practitioners as an evidence base for citizen engagement through information and communication technologies (ICTs). In it, the authors ask: how do ICTs empower through participation, transparency and accountability? Specifically, the authors examine two principal questions: Are technologies an accelerator to closing the “accountability gap” – the space between the supply (governments, service providers) and demand (citizens, communities, civil society organizations or CSOs) that requires bridging for open and collaborative governance? And under what conditions does this occur? The introductory chapters lay the theoretical groundwork for understanding the potential of technologies to achieving intended goals. Chapter 1 takes us through the theoretical linkages between empowerment, participation, transparency and accountability. In Chapter 2, the authors devise an informational capability framework, relating human abilities and well-being to the use of ICTs. The chapters to follow highlight practical examples that operationalize ICT-led initiatives. Chapter 3 reviews a sample of projects targeting the goals of transparency and accountability in governance to make preliminary conclusions around what evidence exists to date, and where to go from here. In chapter 4, the author reviews the process of interactive community mapping (ICM) with examples that support general local development and others that mitigate natural disasters. Chapter 5 examines crowdsourcing in fragile states to track aid flows, report on incitement or organize grassroots movements. In chapter 6, the author reviews Check My School (CMS), a community monitoring project in the Philippines designed to track the provision of services in public schools. Chapter 7 introduces four key ICT-led, citizen-governance initiatives in primary health care in Karnataka, India. Chapter 8 analyzes the World Bank Institute’s use of ICTs in expanding citizen project input to understand the extent to which technologies can either engender a new “feedback loop” or ameliorate a “broken loop”. The authors’ analysis of the evidence signals ICTs as an accelerator to closing the “accountability gap”. In Chapter 9, the authors conclude with the Loch Ness model to illustrate how technologies contribute to shrinking the gap, why the gap remains open in many cases, and what can be done to help close it. This collection is a critical addition to existing literature on ICTs and citizen engagement for two main reasons: first, it is expansive, covering initiatives that leverage a wide range of technology tools, from mobile phone reporting to crowdsourcing to interactive mapping; second, it is the first of its kind to offer concrete recommendations on how to close feedback loops.

Programming the Mobile Web Mar 31 2021 Today's market for mobile apps goes beyond the iPhone to include BlackBerry, Nokia, Windows Phone, and smartphones powered by Android, webOS, and other platforms. If you're an experienced web developer, this book shows you how to build a standard app core that you can extend to work with specific devices. You'll learn the particulars and pitfalls of building mobile apps with HTML, CSS, and other standard web tools. Introduction to Sociology 3e Jun 26 2023 Introduction to Sociology 3e aligns to the topics and objectives of many introductory sociology courses. It is arranged in a manner that provides foundational sociological theories and contexts, then progresses through various aspects of human and societal interactions. The new edition is focused on driving meaningful and memorable learning experiences related to critical thinking about society and culture. The text includes comprehensive coverage of core concepts, discussions and data relevant to a diverse audience, and features that draw learners into the discipline in powerful and personal ways. Overall, Introduction to Sociology 3e aims to center the course and discipline as crucial elements for understanding relationships, society, and civic engagement; the authors seek to lay the foundation for students to apply what they learn throughout their lives and careers.

The Study of Organizational Climate in Sime Darby Jan 22 2023 Master's Thesis from the year 2013 in the subject Business economics - Business Management, Corporate Governance, , course: Master of Business Administration, language: English, abstract: Sime Darby is one of the biggest multinational companies in Malaysia. It has large number of plantations around Malaysia. Not to mention, it has also ventured into other businesses that brought profit to the business. The pressures are increasingly heavy so that it might cause negative effects on the employees and organization. In addition, the fact that bribery and corruption cases have happened before, causes the pressure to retain the image and name of Sime Darby. Organizational climate is known as the weather for the employees that changes accordingly to the emotions, moods, feelings and environments as well as surrounding of the places. One employee can affect the moods, feelings and environment of those above. The purpose of this study is to find the level of awareness on these variables: administration and operation climate, work motivation climate and ethics at the workplace climate. Also, it is used to find the relationship between the independent variables with dependent variable. The independent variables used are administration and operation climate, work motivation climate and ethics at the workplace climate. The dependent variable is organizational climate. The results showed that there is a relationship between each independent variable with the dependent variable. The correlations fall within +1 and -1 for all variables towards dependent variable. Several recommendations have been given to the readers to understand the effects of positive and negative organizational climate to the organization.

The Space Elevator Jun 22 2020 The authors take the reader through the history of the concept, technical design and economic practicalities of building an elevator to space, and, ultimately, the implications of what such a low cost transportation system would mean to society. Based on three years of NASA-funded studies and written for the technically literate layperson, Edwards and Westling discuss the recent technological advances that now make the space elevator feasible. They conclude by addressing the effects that the space elevator could have on mankind's future from communications and energy to colonizing space.

Sensors for Health Monitoring Mar 24 2023 Sensors for Health Monitoring discusses the characteristics of U-Healthcare systems in different domains, providing a foundation for working professionals and undergraduate and postgraduate students. The book provides information and advice on how to choose the best sensors for a U-Healthcare system, advises and guides readers on how to overcome challenges relating to data acquisition and signal processing, and presents comprehensive coverage of up-to-date requirements in hardware, communication and calculation for next-generation uHealth systems. It then compares new technological and technical trends and discusses how they address expected u-Health requirements. In addition, detailed information on system operations is presented and challenges in ubiquitous computing are highlighted. The book not only helps beginners with a holistic approach toward understanding u-Health systems, but also presents researchers with the technological trends and design challenges they may face when designing such systems. Presents an outstanding update on the use of U-Health data analysis and management tools in different applications, highlighting sensor systems Highlights Internet of Things enabled U-Healthcare Covers different data transmission techniques, applications and challenges with extensive case studies for U-Healthcare systems

GialloModena Sep 29 2023 “C’è una città che credete di conoscere. Dopo queste dieci storie non la guarderete più con gli stessi occhi” La terra è rotonda e ruota intorno alla Ghirlandina. O meglio, ogni modenese, anche quelli che negheranno sempre, fino all’evidenza, è legato alla Pioppa e per quanto si possa allontanare, fino all’altro capo del mondo, quel legame continuerà ad esercitare la sua tenace influenza. Quindi non importa se ti senti cittadino del mondo, non importa se parli le lingue e usi il pc, alla fine a quella Pioppa ti aggrappi nei momenti difficili, il dialetto torna di prepotenza e il salvaschermo sarà tuo malgrado tinto di giallo-blu. Questa raccolta di storie “GialloModena” è un po’ la rappresentazione di tale legame, ognuno di noi vive di qua e di là, abbiamo età e vite diverse, sono diverse le esperienze che ci hanno fatto maturare. Tutto diverso, tranne Modena, e per non farci mancare nulla abbiamo imbarcato anche un bolognese trapiantato a Latina, che non si dica che siamo campanilisti. Ringtone Oct 07 2021 This book recounts one of the greatest and most spectacular business successes and downfalls in history: that of Nokia in mobile phones. The analysis of Nokia's story distills more general observations and learning points for leaders of other corporations, management scholars, and students.
