Based on a true tale, *My Sister Sara* begins in December 1948. The Leroux family stands on Cape Town's docks to welcome their newest member, a blonde, blue-eyed war orphan that patriotic Pa has "ordered" from Germany. The God-fearing clan falls in love with the bright four-year-old. Even stern Pa, an architect of Apartheid, is softened by the orphan's presence until a document arrives revealing a terrible secret. Everything changes. The truth must never come out. Pa swears the family to secrecy. Sara is fed and clothed but never shown affection again. And never told the reason why. Told through the eyes of her adoptive brother Jo, Sara's past underscores her present against the heinous backdrop of Apartheid in the 1950's and 60's. She must call on Anne Frank-like courage to resist her enemies, even those with the Leroux name, if she is to have any hope of finding her place in the world. Publisher description The Dove Flyer tells the story of the last years of the Jewish community in Baghdad, before their expulsion in 1950 and settlement in Israel. The young narrator, Kabi, watches as the members of his extended family each develop different dreams and a different sets of fears throughout these tumultuous, transitional times: his mother wants to move out of the new Jewish quarter and back to their old Muslim neighborhood where she felt safer; his father wants to emigrate to the promised land, the new State of Israel, where he will farm and grow rice; his uncle Hizkel, a Zionist, is arrested and taken off to prison to await trial and a possible death sentence; his headmaster, Salim, believes in the equality of Arabs and Jews; and his uncle Edouard just wants to hang out on the rooftop with his doves. Meanwhile, as World War II draws closer and Israeli statehood seems more assured, a noose begins to tighten around Jewish Iraqis. Houses are appropriated, Jews are beaten in the streets and hung in public, and young Kabi watches as the storied legacy of the Jewish community in Baghdad is dismantled piecemeal and finally decimated. As for the land of milk and honey, there is neither milk, nor honey. It is a desert, a place as barren and coarse as the community Kabi and his family left behind was vibrant, bountiful, and dreamy. An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as "beauty"? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a "sexual selection" distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution. After coming to Vienna from Sudan to win a better life for himself, Hamza struggles to escape from the margins of society and the stigma of the immigrant. Following several years of hardship, his fortunes begin to change when he meets Sandra, a young Austrian woman, who shows him the Palm House. In this famous Viennese greenhouse, the frost of Hamza's heart begins to thaw, and he slowly opens himself to Sandra, revealing his bitter yet beautiful past in Sudan and beyond. This masterful novel draws on the 1001 Nights as well as Sudanese folk traditions, and demonstrates the remarkable power of storytelling to overcome even the most dire circumstances. Critically acclaimed across the Arab world, this novel can be read on its own, or as a sequel to Eltayeb's first novel, *Cities without Palms* (AUC Press, 2009). Homeopathy is over 200 years old and is still experiencing an uninterrupted influx of new practitioners and patients. Many patients and therapists swear by this "alternative healing method", which in some countries is even financed by health insurances. This seems completely incomprehensible to critics: For them it is clearly evident that homeopathy is hopelessly unscientific and has at best a placebo effect. The positions of supporters and opponents seem to be just as immutable as they are incompatible. This book answers some essential and fascinating questions: What remains of the founding ideas of homeopathy in 21st century medicine? Does it really work and, if so, how? Which of the original theories can we still apply today with a clear conscience and use for the benefit of patients and the healthcare system? Where does homeopathy have its limits and does it indeed need to be critically reconsidered and evaluated? The author has dealt with the points of criticism for years, but at the same time also takes seriously the wishes and concerns of patients who often feel insufficiently cared for by conventional medical practice. Against the background of her own personal history, her book attempts to bridge the gap between these two traditionally opposing camps. English Idioms in use Advanced is a vocabulary book for advanced level learners. This text: establishes a theoretical basis for simulation methodology provides details of an important simulation language (GPSS - General Purpose Simulation System) integrates these two elements in a systems simulation case study Valuable additions to the second edition include coverage of random number generators with astronomic period, new entropy-based tests of uniformity, gamma variate generation, results on the GLD, and variance reduction techniques. GPSS/PC is an interactive implementation of GPSS for the IBM-PC compatible family of microcomputers. The disk accompanying *Modern Statistical, Systems, and GPSS Simulation* contains the limited educational version of GPSS/PC with many illustrative examples discussed in the text.
