Dialogues between Media Jun 20 2023 Comparative Literature is changing fast with methodologies, topics, and research interests emerging and reemerging. The fifth volume of ICLA 2016 proceedings, Dialogues between Media, focuses on the current interest in inter-arts studies, as well as papers on comics studies, further testimony to the

fact that comics have truly arrived in mainstream academic discourse. "Adaptation" is a key term for the studies presented in this volume; various articles discuss the adaptation of literary source texts in different target media - cinematic versions, comics adaptations, TV series, theatre, and opera. Essays on the interplay of media beyond adaptation further show many of the strands that are woven into dialogues between media, and thus the expanding range of comparative literature.

C++: Eine kompakte Einführung Oct 12 2022 Mit diesem Buch lernen Programmierneinsteiger C++ praxisorientiert und in kompakter Form. André Willms erklärt zunächst die leichter zu verstehenden prozeduralen Mechanismen der Sprache, um dann auf die höhere Abstraktionsebene der objektorientierten Programmierung und die dafür notwendigen Sprachmittel, einschließlich der Standardbibliothek, einzugehen. Dazu hat der Autor einen besonderen Ansatz gewählt: Gleich im ersten Kapitel stellt er das Ergebnis eines größeren Text-Adventure-Projekts vor und gibt dem Leser die Möglichkeit, sich Schritt für Schritt die erforderlichen Kenntnisse anzueignen, so dass er das Programm nicht nur verstehen, sondern auch erweitern und schließlich selbst programmieren kann. Zusätzlich wird jedes Thema in kleineren Beispielen erläutert, um die Anwendung der Sprachelemente zu verdeutlichen. Behandelt werden im Einzelnen die Grundelemente eines C++-Programms, Arithmetik in C++, Verzweigungen, Schleifen, Funktionen, Klassen, Arrays und Verweise, Strings, dynamische Speicherverwaltung, Namensbereiche, Operatoren, Templates, die Standard Template Library (STL), Vererbung sowie Ausnahmen. Das in diesem Buch verwendete C++ entspricht dem C++14-Standard. Alle Programmcodes lassen sich sowohl mit einem C++14- als auch mit einem C++11-Compiler übersetzen.

The Standard Pesticide User's Guide Dec 02 2021 Covers all aspects of pesticide principles and use, including topics such as: environmental considerations; insects; plant disease agents; weeds; integrated pest management; laws; liability; recordkeeping; labels; safety; formulations; application equipment; transportation; storage; decontamination; and disposal. Using a non-technical presentation, it helps readers gain an understanding of why pesticides are used, how to apply them safely and how to do this within the letter of the

law. Supplies the necessary information for pesticide applicators to use pesticides in a responsible manner. Offer readers quick and easy access to reference material such as the United States and Canadian Pesticide Control Offices, restricted use pesticides, pesticide information telephone numbers and Web page addresses, cold weather handling of liquid chemical products, etc. Because the science of pesticide use has become a highly specialized field, this book is an excellent desk reference for those seeking re-certification and those currently working in the field.

Gas Turbine Powerhouse May 07 2022 This book tells the story of the power generation gas turbine from the perspective of one of the leading companies in the field over a period of nearly 100 years, written by an engineer. Especially in times of imminent global economic crises it appears to be worthwhile to reflect on real economic values based on engineering ingenuity and enduring management of technological leadership. Though the book is primarily designed as a technical history of the BBC/ABB/Alstom power generation gas turbines, its scope is sufficiently broad to cover general development trends, including parallel competitor activities. A special benefit is the historical breakdown to the gas turbine component level, so that the book actually outlines the development of axial compressors from early beginnings, the progress in combustion technology towards extraordinary low emission values and that of axial turbines with special emphasis on early turbine cooling innovations. The sheer length of certain engineering developments over several decades allows interesting historic observations and deductions on inherent business mechanisms, the effects of technology preparations and organisational consequences. A look into the mirror of the past provides revelations on the impact of far-reaching business decisions. 2017 Winner of the Historian Engineer Award of the ASME (American Society of Mechanical Engineers)

Learning Rates of Electric Vehicles Dec 14 2022 Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport-related carbon dioxide (CO<sub>2</sub>) and air pollutant emissions. However, battery-electric vehicles (BEVs) and plug-in hybrid-electric vehicles (PHEVs) have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges, which still hampers the market potential of these vehicles. Despite

persisting shortfalls, mechanisms such as technological learning and economics of scale promise to improve the techno-economic performance of BEVs and PHEVs in the short- to mid-term. Here, the author seeks to obtain insight into the techno-economic prospects of BEVs and PHEVs by: (i) establishing experience curves and (ii) quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time-series analysis. The analysis captures the situation in Germany between 2010 and 2016.

Anders im vorliegenden Lehrbuch, das einen fundierten und umfassenden Überblick über die wichtigen

Facetten der Marketingkommunikation gibt. Denn ohne Kenntnis über die dabei zugrunde liegenden Kommunikationsprinzipien ist dauerhafter Markterfolg nicht schaffbar. Die einzelnen Kapitel des Lehrbuches werden durch Lernzielformulierungen und Übungsaufgaben eingerahmt.

Information Structure in Lesser-described Languages May 19 2023 The articles compiled in this volume offer new insights into the wealth of prosodic and syntactic phenomena involved in the encoding of information structure categories. They present data from languages which are rarely, if ever, taken into account in the most prominent approaches in information structure theory, and which belong to the Afroasiatic, Amerindian, Australian, Caucasian, and Niger-Congo language stocks. In addition to the significant descriptive value of these pioneering contributions, several studies also draw attention to previously undescribed or typologically rare phenomena. By adapting a variety of methods to under-described and endangered languages, ranging from experimental to naturalistic corpus studies, this volume also aims to serve as an invitation for further research in this direction.
