What really sets the best managers above the rest? It's their power to build a cadre of employees who have great inner work lives—consistently positive emotions; strong motivation; and favorable perceptions of the organization, their work, and their colleagues. The worst managers undermine inner work life, often unwittingly. As Teresa Amabile and Steven Kramer explain in *The Progress Principle*, seemingly mundane workday events can make or break employees' inner work lives. But it's forward momentum in meaningful work—progress—that creates the best inner work lives. Through rigorous analysis of nearly 12,000 diary entries provided by 238 employees in 7 companies, the authors explain how managers can foster progress and enhance inner work life every day. The book shows how to remove obstacles to progress, including meaningless tasks and toxic relationships. It also explains how to activate two forces that enable progress: (1) catalysts—events that directly facilitate project work, such as clear goals and autonomy—and (2) nourishers—interpersonal events that uplift workers, including encouragement and demonstrations of respect and collegiality. Brimming with honest examples from the companies studied, *The Progress Principle* equips aspiring and seasoned leaders alike with the insights they need to maximize their people's performance. Motivation-Hygiene theory or popularly known as Herzberg's Motivation-Hygiene theory was introduced by Herzberg, Mausner, & Synderman in 1959. Originally, it explains the motivation and hygiene factors that affect job satisfaction. Motivation factors play important role in improving job satisfaction, while hygiene factors do not contribute toward job satisfaction although their absence will lead to dissatisfaction. This study was conducted to

test the applicability of this theory on learning satisfaction. The objectives of the study are (1) to identify teaching approach (instructional strategies) preferred by learners in higher learning institution, specifically IIUM, (2) to examine the relationship between motivation factors and hygiene factors with learning satisfaction, (3) to test the applicability of Herzberg's Motivation-Hygiene theory on learning satisfaction, and (4) to test the applicability of the theory in the Islamic setting in IIUM. The study employed a quantitative research, using survey method, by using questionnaire as the research instrument. Pilot study was conducted to pre-test the research instrument. The data were collected from 240 undergraduate students of different departments under Human Sciences Division of Kulliyah of Islamic Revealed Knowledge and Human Sciences (KIRKHS), International Islamic University Malaysia (IIUM). Using stratified random sampling based on department, gender, and nationality, data were collected in April and May 2014. Data were analyzed using SPSS version 20 for descriptive statistics and inferential statistics to achieve the objectives of the study and to test their hypotheses. Four general hypotheses and five specific hypotheses were generated in this study. The finding proved that all factors were significantly correlated, but majorities of the factors showed weak relationship. The result showed that there was a similarity between motivation and hygiene factors in contributing towards learning satisfaction. This indicated that the theory was not applicable on learning satisfaction as well as in the Islamic setting, since the findings rejected the general statement of the theory. 101 management theories from the world's best management thinkers - the fast, focussed and express route to success. This revision of *ORGANIZATIONAL BEHAVIOR* includes a renewed emphasis on the text's multifaceted approach, which is reflected in a new subtitle: *SCIENCE, THE REAL WORLD, AND YOU*. "Science" refers to roots of the discipline and the way the book is anchored in research tradition--both classic research as well as leading-edge scholarship. "The Real World" reflects current trends in organizations and takes shape as examples from all types of organizations. "You" reflects the opportunities to grow and develop both as individuals and organizations. The book helps students learn not only the concepts and theories that enhance the management of human behavior at work, but also how to practice these skills. A wealth of proven features, cases, exercises, and examples--including six new focus companies--stimulate interest and discussion; demonstrate how theories and research apply; and prompt cognitive and skill-based learning. Established organizational behavior topics are discussed, including motivation, leadership, teamwork, and communication, as are emerging issues shaping the field. The exciting theme of change clearly demonstrates how attitudes and behaviors within an organization are affected by change and the new opportunities and experiences change presents. Supporting themes focus on globalization, diversity, and ethics. "Mantle and Lichy have assembled a guide that will help you hire, motivate, and

mentor a software development team that functions at the highest level. Their rules of thumb and coaching advice are great blueprints for new and experienced software engineering managers alike." —Tom Conrad, CTO, Pandora "I wish I'd had this material available years ago. I see lots and lots of 'meat' in here that I'll use over and over again as I try to become a better manager. The writing style is right on, and I love the personal anecdotes." —Steve Johnson, VP, Custom Solutions, DigitalFish All too often, software development is deemed unmanageable. The news is filled with stories of projects that have run catastrophically over schedule and budget. Although adding some formal discipline to the development process has improved the situation, it has by no means solved the problem. How can it be, with so much time and money spent to get software development under control, that it remains so unmanageable? In *Managing the Unmanageable: Rules, Tools, and Insights for Managing Software People and Teams*, Mickey W. Mantle and Ron Lichy answer that persistent question with a simple observation: You first must make programmers and software teams manageable. That is, you need to begin by understanding your people—how to hire them, motivate them, and lead them to develop and deliver great products. Drawing on their combined seventy years of software development and management experience, and highlighting the insights and wisdom of other successful managers, Mantle and Lichy provide the guidance you need to manage people and teams in order to deliver software successfully. Whether you are new to software management, or have already been working in that role, you will appreciate the real-world knowledge and practical tools packed into this guide. "When first published, *Motivation to Work* challenged the received wisdom by showing that worker fulfillment came from achievement and growth within the job itself. In his new introduction Herzberg examines thirty years of motivational research in job-related areas."--Back cover. The easy-to-use format makes it a handy and highly portable reference. Imagine overseeing a workforce so motivated that employees relish more hours of work, shoulder more responsibility themselves; and favor challenging jobs over paychecks or bonuses. In *One More Time: How Do You Motivate Employees?* Frederick Herzberg shows managers how to shift from relying on

extrinsic incentives to activating the real drivers of high performance: interesting, challenging work and the opportunity to continually achieve and grow into greater responsibility. The results? An ultramotivated workforce. Since 1922, Harvard Business Review has been a leading source of breakthrough management ideas-many of which still speak to and influence us today. Business - dominant institution of modern times; Adam and Abraham; Industry's concepts of man; The basic needs of man; Psychological growth; The motivation hygiene theory; Verification of the theory of motivation hygiene. Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics, entrepreneurship, global business, and managing change. Introduction to Business includes hundreds of current business examples from a range of industries and geographic locations, which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond. Quality work that fosters job satisfaction and health enjoys top priority in industry all over the world. This was not always so. Until recently analysis of job attitudes focused primarily on human relations problems within organizations. While American industry was trying to solve the unsolvable problem of avoiding interpersonal dissatisfaction, problems with the potential for solution, such as training and quality production, were ignored. When first published, 'The Motivation to Work' challenged the received wisdom by showing that worker fulfillment came from achievement and growth within the job itself. In his new introduction, Herzberg examines thirty years of motivational research in job-related areas. Based on workers' accounts of real events that have made them feel good or bad on the job, the findings of Herzberg and his colleagues have stimulated research and controversy that continue to the present day. The authors surprisingly found that while a poor work environment generated discontent, improved conditions seldom brought about improved attitudes. Instead, satisfaction came most often from factors intrinsic to work: achievements, job recognition, and work that was challenging, interesting, and responsible. The evidence marshaled by this volume called into question many previous assumptions about job

satisfaction and worker motivation. Feelings about intrinsic and extrinsic factors could not be validly averaged on a single scale of measurement. Motivation and performance are not merely dependent upon environmental needs and external rewards. Frederick Herzberg and his staff based their motivation—hygiene theory on a variety of human needs and applied it to a strategy of job enrichment that has widely influenced motivation and job design strategies. 'Motivation to Work' is a landmark volume that is of enduring interest to sociologists, psychologists, labor studies specialists, and organization analysts. The United States is among the wealthiest nations in the world, but it is far from the healthiest. Although life expectancy and survival rates in the United States have improved dramatically over the past century, Americans live shorter lives and experience more injuries and illnesses than people in other high-income countries. The U.S. health disadvantage cannot be attributed solely to the adverse health status of racial or ethnic minorities or poor people: even highly advantaged Americans are in worse health than their counterparts in other, "peer" countries. In light of the new and growing evidence about the U.S. health disadvantage, the National Institutes of Health asked the National Research Council (NRC) and the Institute of Medicine (IOM) to convene a panel of experts to study the issue. The Panel on Understanding Cross-National Health Differences Among High-Income Countries examined whether the U.S. health disadvantage exists across the life span, considered potential explanations, and assessed the larger implications of the findings. U.S. Health in International Perspective presents detailed evidence on the issue, explores the possible explanations for the shorter and less healthy lives of Americans than those of people in comparable countries, and recommends actions by both government and nongovernment agencies and organizations to address the U.S. health disadvantage. This entry discusses Herzberg's motivation-hygiene theory and highlights the factors that employees find satisfying and dissatisfying in their jobs. Herzberg classified these factors into two--motivator and hygiene factors. The theory proposed that the motivator factor relates to job content, and the hygiene factor relates to job context. Th entry also examines Herzberg's motivation-hygiene theory (two-factor theory) and assesses its limitations and implications in understanding the factors that motivate individuals.
