The ACE Programmer's Guide Mar 21 2023 This book analyzes the application of the legal principle of non-discrimination in the context of energy network operation. Since the early 1990s, the duty not to discriminate has applied to energy network operators, in order to achieve a liberalized European energy market in which European consumers have a free and real choice of energy supplier. The book provides guidance to those working in the context of the non-discrimination obligation, such as energy network operators, regulatory authorities, national courts, and other energy market players, as well as those studying the rules for (academic) research purposes. The book's conclusions serve as a tool for critical consideration and offer suggestions for improvements to the legal framework and its application on a European, as well as a national, level. Several questions are answered, including why energy network operators have a non-discrimination obligation in the context of energy market liberalization, how European law has tried to remove and control the discrimination problem since the early 1990s, and when different treatment of energy network users amounts to 'forbidden' discrimination. The book's conclusions are underpinned by comparisons with competition law, public procurement law, and telecommunications law, as well as a case study on how energy network operators and regulators in several Member States currently interpret and apply the non-discrimination obligation. Ace in the Hole Nov 05 2021 Using newly released documents, the author presents an integrated look at American nuclear policy and diplomacy in crises from the Berlin blockade to Vietnam. The book answers the question why, when the atomic bomb had been used with such devastating effect against the Japanese Empire in 1945, American leaders put this most apocalyptic of weapons back on the shelf, never to be used again in anger. It documents the myopia of Potomac strategists in involving the U.S. in wars of attrition in Korea and Southeast Asia, marginal areas where American vital interests were in no way endangered. Despite the presence of hundreds, then thousands of nuclear bombs and warheads in the nation's stockpile, the greatest military weapon in history became politically impossible to use. And yet overwhelming nuclear superiority did serve its ultimate purpose in the Cold War. When American vital interests were threatened—over Berlin and Cuba—the Soviets backed down from confrontation. Despite errors in strategic judgment brought on by fear of Communist expansion, and in some cases outright incompetence, the ace in the hole proved decisive.
