This book presents recent research into developing and applying computational tools to estimate the performance and safety of hydraulic structures from the planning and construction stage to the service period. Based on the results of a close collaboration between the author and his colleagues, friends, students and field engineers, it shows how to achieve a good correlation between numerical computation and the actual in situ behavior of hydraulic structures. The book's heuristic and visualized style disseminates the philosophy and road map as well as the findings of the research. The chapters reflect the various aspects of the three typical and practical methods (the finite element method, the block

element method, the composite element method) that the author has been working on and made essential contributions to since the 1980s. This book is an advanced continuation of Hydraulic Structures by the same author, published by Springer in 2015. In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. With a family that loves music as much as hers does, it was only a matter of time before it was Ava's turn to pick out an instrument. Her mother plays the piano, her father plays the violin, and one brother plays the cello while the other plays the clarinet. As soon as Ava selects an instrument, she will be able to join them as they practice for the annual holiday concert. And her family has definite ideas on what instrument Ava should select, from the piano to the flute to the violin. But Ava isn't interested in any of them. Ava wants to play the tuba. And she gets her wish. But playing the tuba isn't as easy as it seems. And there is no place for a tuba in the annual concert. But with the encouragement of her music teacher, Ava finds a place for her and her tuba in a special holiday celebration. Shortly before his death, Abe Bickman (the "Patriarch") gave his son, David, his modest family archive. This archive comprised: an envelope, postmarked in 1948 and with a return address in Brazil, in which were contained several black & white photographs; several letters from relatives in the Ukraine, written in Yiddish in the 1920s; and a military passport issued by the Czarist Russian government in the very early 1900s. The author had the letters and passport translated and then reconnected with relatives in Brazil. He subsequently went to Brazil and met many of his cousins living there, some of whom helped him to locate, and eventually meet, cousins from Ukraine, Belarus, Russia, Israel and the United States. Bickman's research into his father's family history also involved gathering information from public archives in Canada, the United States and Ukraine, where he found his earliest direct paternal ancestor bearing the family surname (then "Bikman"). Bickman discovered that much of his father's family's history is a microcosm of the history of Eastern European Jewry from 1774 to the present and, in this process, learned much more about himself than he ever anticipated. Contains student story book with plot that teach proper use of adverbs. Ernestine is in over her head. Monday through Sunday, Ernestine's week is packed with after-school lessons—tuba, knitting, sculpting, water ballet, yoga, yodeling, and karate. Overwhelmed and exhausted, Ernestine decides to take matters into her own hands and heads off to the park with her Nanny where she builds a fort, watches the clouds, and plays all kinds of unstructured and imaginative games. But when a teacher calls Ernestine's mom to report that she has not shown up for yodeling, her parents search everywhere until at last they hear their daughter's laughter coming from the park. Ernestine tells her parents what a wonderful afternoon she's had, and explains her plight, asking, "I like my lessons, but can't I stop some of them?" This

saga hilariously captures the dilemma of the modern-day over-scheduled child in riotous color and absurd extremes. A delightful heroine, Ernestine will be sure to put “play” back on everyone’s agenda, demonstrating that in today’s overscheduled world, everyone needs the joy of play and the simple wonders of childhood. A guide to making optimal use of one of the most important tools available to today’s synthetic organic chemist Compatible with virtually all functional groups without protection and capable of forming carbon-carbon bonds under neutral conditions-often with complete stereospecificity-the Stille reaction is an indispensable component of the synthetic organic chemist's toolkit. In the years since Stille's pioneering work, chemists have developed a vast number of applications for this incredibly versatile metal-catalyzed cross-coupling reaction. This paperback edition of the 50th volume in the definitive Organic Reactions series describes many of those uses. Drawing upon their considerable experience as professional synthetic organic chemists who have worked extensively with the Stille reaction, the authors approach their subject from the preparative viewpoint, paying particular attention throughout to limitations, interfering influences, effects of structure, and the selection of experimental techniques. Focusing primarily on the single reaction of the Stille reaction, they provide comprehensive coverage of: * Experimental conditions and selecting optimal experimental parameters * Traditional and recently developed experimental procedures * Side reactions and techniques for avoiding them * Documented reactions-33 tables list 570 reactions, complete with conditions, yields, structures of major products, and common failures * Easy-to-follow recipes for casual users of the Stille reaction The Stille Reaction is an indispensable working resource for all synthetic organic chemists, especially medicinal chemists. It is also an excellent graduate-level text for students of organic and medicinal chemistry. Includes the proceedings of the British Pharmaceutical Conference at its 7th-64th annual meetings.
