This book is the result of more than three years of work. My inspiration for writing my third book on the subject of creating wire trees and other pieces using wire, came to me while showing my work at many art and craft shows, and in art galleries. Interested people would ask me how I got started, and, some people, who were really interested in my work, said I should write a book showing how I create my tree sculpture. I have taken great care in creating this third book, not only adding many more different types of sculpture, but also adding many extras I think the reader will find very helpful. I not only explain and illustrate for you, how to create each piece, I also show or explain how to use a basic item to create many more variations of each item. This book contains 138 pages with over 400 photos and illustrations. Plus, based on my over 30 years of creating and showing my work, I have added many pages I have called "Extras". These extras will help you with many different topics, such as: Photography, Pricing your work, Shipping your work, Accepting commissions, Attending art and craft shows, Consigning your work, and many more. You can view all my tree sculpture in full color at: [www.salvillano.com](http://www.salvillano.com) The inspiration for creating my sculpture grew from a lifetime love of trees. I am in awe of the stately presence and silent majesty they possess. I find the structure of trees to be one of the perfections in nature. With their roots embracing the earth; in winter they show their bones, in spring gentle buds, in summer a canopy of green and in fall a magical kaleidoscope of colors. Beauty, pure beauty. How to Create Tree Sculpture by Sal Villano This book offers complete step by step fully illustrated instructions, clearly showing how you can create three very different types of wire tree

sculptures. All material and tools needed to create these tree sculptures are readily available through easy to locate sources, such as craft stores, hobby shops, hardware stores and florists. This book is the culmination of years of creating wire trees, and other natural forms, using only different types and grades of wire. Clearly written and profusely illustrated by Sal Villano, the detailed instructions are very easy to follow. You will be guided step by step, in the creation of a Willow Tree an Oak Tree and a Wind Swept Tree sculpture. Upon completion of the three small trees you will then be able to create many of the other larger wire tree sculptures shown on the authors web site at: [salvillano.com](http://salvillano.com) Reprint of the original, first published in 1857. The publishing house Anatiposi publishes historical books as reprints. Due to their age, these books may have missing pages or inferior quality. Our aim is to preserve these books and make them available to the public so that they do not get lost. Create amazing, fun and original sculptures using wire. In this riveting, action-packed novel from award-winning author Will Hobbs, a teenage boy hoping to help his loved ones must fight for his life as he makes the dangerous journey across the Mexican border into the United States. When falling crop prices threaten his family with starvation, fifteen-year-old Victor Flores heads north in an attempt to "cross the wire" from Mexico into America so he can find work and help ease the finances at home. But with no coyote money to pay the smugglers who sneak illegal workers across the border, Victor struggles to survive as he jumps trains, stows away on trucks, and hikes grueling miles through the Arizona desert. Victor's passage is fraught with freezing cold, scorching heat, hunger, and dead ends. It's a gauntlet run by many attempting to cross the border, but few make it. Through Victor's desperate perseverance, Will Hobbs brings to life a story that is true for many, polarizing for some, but life-changing for all who read it. Acclaim for Crossing the Wire includes the following: New York Public Library Books for the Teen Age, Junior Library Guild Selection, Americas Awards Commended Title, Heartland Award, Southwest Book Award, and Notable Books for Global Society. 22 cm.
