Comparative Succession Law Jan 05 2022 *Launching a major new research project examining the principles of succession law in comparative perspective, this book discusses the formalities which the law imposes in order for a person to make a testamentary disposal of property. Among the questions considered are the following. How are wills made? What precisely are the rules - as to the signature of the testator, the use of witnesses, the need for a notary public or lawyer, and so on? Is there is a choice of will-type and, if so, which type is used most often and what are the advantages and disadvantages of each? How common is will-making or do most people die intestate? What happens if formalities are not observed? How can requirements of form be explained and justified? How did the law develop historically, what is the state of the law today, and what are the prospects for the future? The focus is on Europe, and on countries which have been influenced by the European experience. Thus in addition to giving a detailed treatment of the law in Austria, Belgium, England and Wales, France, Germany, Hungary, Italy, the Netherlands, Poland, and Spain, the book explores legal developments in Australia, New Zealand, the United States of America, and in some of the countries of Latin America with a particular emphasis on Brazil. It also includes chapters on two of the mixed jurisdictions - Scotland and South Africa - and on Islamic Law. The book opens with chapters on Roman law and on the early modern law in Europe, thus setting the historical scene as well as anticipating and complementing the accounts of national history which appear in subsequent chapters; and it concludes with an assessment of the overall development of the law in the countries surveyed, and with some wider reflections on the nature and purpose of testamentary formalities.*

Race After Hitler Feb 06 2022 *Heide Fehrenbach traces the complex history of German attitudes to race following 1945 by focusing on the experiences of and the debates surrounding the several thousand postwar children born to African American GIs and their German partners.*

Wagner & Cinema Nov 15 2022 *The work of Richard Wagner is a continuing source of artistic inspiration and ideological controversy in literature, philosophy, and music, as well as cinema. In this book, a diverse group of established scholars examines Wagner's influence on cinema from the silent era to the present.*

Journal of Institutional and Theoretical Economics Dec 24 2020

Institutional Competition between Common Law and Civil Law Dec 16 2022 *This book addresses two countervailing challenges to theory and policy in law and economics. The first is the rise of legal origins theory, which denies the comparative law view of convergence between common law and civil law by the assertion of an economic superiority of common law. The second is the series of economic crises in the very financial markets on which that assertion was based. Both trends unsettled certainties about the rule of law and institutional economics. Meeting legal origins theory in its main areas of political science, sociology and economics, the book extends the interdisciplinary reach to neglected aspects of comparative law, legal history, dynamic econometric analysis and "quasi-natural experiments" with counterfactual evidence of different institutional regimes in divided countries. These combined methodological tools make tests of the economic impact of different legal origins much more reliable. This is shown for developed and newly industrialized countries as well as developing, transforming and emerging countries with or without financial center advantage, affected or not by financial crises. The Asian financial crises and the American subprime crisis have been, or could have been resolved using the resources of common law or civil law. These cases and data on access to justice in Africa, Asia and Latin America reveal the problem of substantive law remaining "law on the books" without efficient procedural rules and judicial structures. The single most striking common law-civil law divide is that lawyer-dominated common law procedure is slower and costlier than judge-managed civil law procedure. Countries as diverse as the Netherlands, Japan, and China show functional interaction between culture and law in legal reforms. Such interaction can reduce the occurrence of legal disputes as well as facilitate their resolution. It can use economic crises as catalysts for legal reforms or rely on regional integration, and it should replace the discredited method of legal "transplants" by sustained dialogue between legal advisors and all actors involved in legal reforms.*

European Integration as an Elite Process Jun 22 2023 *Max Haller's impressive book presents an analysis of the process of European integration which keeps the relation between elites and citizens at the forefront. It is shown on the basis of new empirical data (surveys, interviews, analyses of documents and biographies) that European integration has been led since the beginning by the elites and that today there exists a considerable split between elites and citizens; this split is becoming more profound in the course of time. The book covers the following themes: - the structure, interests and behaviour of the different elites (political, economic, bureaucratic) - the expectations and perceptions of the populations concerning the integration process and the elites - the strategies of the elites to win the consent of the people, in view of widespread scepticism - proposals for reform of the EU, especially with regard to a strengthening of democratic elements which could reduce the split between elites and citizens. A timely and original read, this book will be a useful addition to the library of any political sociologist, political scientist or scholar of European integration.*

Globalization Mar 19 2023 *This textbook deals with the progressive global dissolution of political, economic, and social boundaries, which has significant implications for labor markets, the international division of labor, social security, and income distribution. Politically, it is eroding the sovereign ability of nation-states to shape their own affairs; socially, it conjures up the specter of an increasingly global culture of unity. Against the background of the empirical effects of globalization processes in a number of areas, the book discusses to what extent these fears are justified, whether they cannot also be explained by other developments, and whether the benefits of globalization justify the costs and risks resulting from it.*

Portfoliomanagement Nov 22 2020 *Das Lehrbuch deckt sowohl die Kapitalmarktmodelle als auch deren Anwendungen im Portfoliomanagement ab. Es zeigt u.a. die Berechnung der Rendite und des Risikos von einzelnen Anlagen und Portfolios, die Konstruktion der Effizienzkurve anhand des Markowitz-Modells und des Marktmodells, die Bestimmung des optimalen Portfolios mit der Effizienzkurve und den investorenspezifischen Indifferenzkurven sowie die Performancemessung von Portfolios. Das Buch beinhaltet zahlreiche Aufgaben (im Text sowie auch am Ende der jeweiligen Kapitel). Besonders von Interesse ist es somit für Dozierende und Studierende der Wirtschaftswissenschaften mit dem Schwerpunkt Finanzwissenschaften, aber auch für Fach- und Führungskräfte, die für ihren Aufgabenbereich grundlegende Kenntnisse für ein erfolgreiches Portfoliomanagement benötigen oder eine Weiterbildung wie beispielsweise zum CFA® und CIIA® anstreben.*

New State Spaces Aug 12 2022 In this synthetic, interdisciplinary work, Neil Brenner develops a new interpretation of the transformation of statehood under contemporary globalizing capitalism. Whereas most analysts of the emergent, post-Westphalian world order have focused on supranational and national institutional realignments, 'New State Spaces' shows that strategic subnational spaces, such as cities and city-regions, represent essential arenas in which states are being transformed. Brenner traces the transformation of urban governance in western Europe during the last four decades and, on this basis, argues that inherited geographies of state power are being fundamentally rescaled. Through a combination of theory construction, historical analysis and cross-national case studies of urban policy change, 'New State Spaces' provides an innovative analysis of the new formations of state power that are currently emerging. This is a mature and sophisticated analysis by a major young scholar

Coworking Atmospheres Jul 23 2023 The study by Alexandra Bernhardt deals with coworking spaces and their atmospheres. In addition to a comprehensive consideration of the role of atmospheres, the special significance of community in the context of these work spaces is examined in more detail. Two case studies in urban coworking spaces form the core of the investigation, following a qualitative research design oriented towards ethnography and a plurality of methods. In the context of the analysis, on the one hand, what constitutes coworking in everyday life and thus the new communality at work is considered: relevant practices and rituals, spatial arrangements and atmospheres are elaborated in their composition. On the other hand, coworkers, their spatial actions, and the attitudes associated with them come into closer focus: It is shown how users access coworking spaces as work and community spaces and what role atmospheres play. In addition, social entities are highlighted that are taken up by coworkers in relation to their coworking space and that help shape everyday coworking space life. Tensions that arise from the coexistence of community and service logic are also uncovered, and how they are dealt with is examined in more detail.

Heidegger's Philosophy of Being Apr 20 2023 This scrupulously researched and rigorously argued book is the first to interpret and evaluate the central topic of Martin Heidegger's philosophy--his celebrated "Question of Being"--in the context of the full range of Heidegger's thought. With this comprehensive approach, Herman Philipse distinguishes in unprecedented ways the center from the periphery, the essential from the incidental in Heidegger's philosophy. Among other achievements, this allows him to shed new light on the controversial relationship between Heidegger's life and thought--in particular the connections between his philosophy and his involvement with Nazism. Philipse begins by explaining which problems an interpretation of Heidegger's question of being should solve, and he specifies which type of interpretation is the best basis for an evaluation of Heidegger's thought. He then identifies various strands or leitmotifs in Heidegger's idea of being, and shows how these strands hang together in the philosopher's work. In doing so, Philipse offers new insights into Heidegger's views on such subjects as human existence, authenticity, logic, and language, and into his readings of such philosophers as Aristotle, Kant, Hegel, and Nietzsche. Philipse then integrates into his interpretation of Heidegger's overall theory the latest scholarship about the philosopher's engagement with Nazism. Finally, Philipse examines the fundamental structures of Heidegger's philosophy and assesses whether Heidegger's views are true, probable, or possess some other epistemic or existential value. As the most thorough interpretation of Heidegger's theory of being now available, this work represents a new phase in the vigorous debate about the philosopher's life and works.

History of Scholarship May 29 2021 The history of scholarship has undergone a complete renewal in recent years, and is now a major branch of research with vast territories to explore; a substantial introduction to History of Scholarship surveys the past vicissitudes of the history of scholarship and its current expansion. The authors, all specialists of international standing, come from a variety of backgrounds: classical studies, history of religions, philosophy, early modern intellectual and religious history. Their papers illustrate a variety of themes and approaches, including Renaissance antiquarianism and philology; the rise of the notion of criticism; Biblical and patristic scholarship, and its implications for both confessional orthodoxy and eighteenth-century free thought; the history of philosophy; and German historiographical thought in both the eighteenth and the nineteenth centuries. This challenging volume constitutes a collection of remarkable quality, helping to establish the history of scholarship as a more broadly acknowledged, worthwhile field of study in its own right.

Testamentary Formalities Dec 04 2021 Launching a major new research project examining the principles of succession law in comparative perspective, this volume analyses the formalities imposed by the law on making a will across a wide range of European and international jurisdictions.

Balancing Renewable Electricity Aug 24 2023 An important aim behind the restructuring of Germany's and Europe's electricity systems is to reduce the environmental burden, especially with respect to greenhouse gas emissions, of the current systems. Emissions must be brought down to a level that is sustainable in the long run and consistent with greenhouse gas emission reduction goals. Meeting these goals will require a system (as best as current knowledge suggests) that will be able to cope simultaneously with the fundamental demands for economic efficiency, environmental sustainability and supply security. Making use of existing scenarios, this study sketches such a system. It focuses in particular on auxiliary systems such as energy storage methods and network extensions. The study introduces technologies that can balance electricity in energy systems and that can serve as enabling technologies for the integration of large quantities of renewable energies in the power supply system. It begins with a discussion of normative aims for the future electricity system before continuing with a description of current policies and political developments and an overview of relevant existing energy system studies. These sections serve as background for the remainder of the study. They are followed by discussion and analysis of the growing demand for means to balance the fluctuations found in electricity generated in power systems with a high penetration of renewable energies, the potentials of diverse technologies, requirements for electrical networks, economic impacts and important legal issues. Finally, the main challenges to the achievement of developing balancing technologies and processes for renewable electricity-dominant systems are summarised and recommendations made.

Human Subjects Research after the Holocaust Jun 29 2021 "An engaging, compelling and disturbing confrontation with evil ...a book that will be transformative in its call for individual and collective moral responsibility." – Michael A. Grodin, M.D., Professor and Director, Project on Medicine and the Holocaust, Elie Wiesel Center for Judaic Studies, Boston University Human Subjects Research after the Holocaust challenges you to confront the misguided medical ethics of the Third Reich personally, and to apply the lessons learned to contemporary human subjects research. While it is comforting to believe that Nazi physicians, nurses, and bioscientists were either incompetent, mad, or few in number, they were, in fact, the best in the world at the time, and the vast majority participated in the government program of "applied biology." They were not coerced to behave as they did—they enthusiastically exploited widely accepted eugenic theories to design horrendous medical experiments, gas chambers and euthanasia programs, which ultimately led to mass murder in the concentration camps. Americans provided financial support for their research, modeled their medical education and research after the Germans, and continued to perform unethical human subjects research even after the Nuremberg Doctors' Trial. The German Medical Association apologized in 2012 for the behavior of its physicians during the Third Reich. By examining the medical crimes of human subjects researchers during the Third Reich, you will naturally examine your own behavior and that of your colleagues, and perhaps ask yourself "If the best physicians and bioscientists of the early 20th century could do evil while believing they were doing good, can I be certain that I

will never do the same?"

Globalisation and Contextual Factors in Accounting Mar 07 2022 This research monograph critically examines convergence of financial reporting in Germany by taking into account the influence of political, social and economic factors on accounting. African Traditional Religion in South Africa Oct 22 2020 In a changing South Africa, recovering the meaning and power of African tradition is a matter of crucial importance. This work participates in that recovery by providing a comprehensive guide to research on the indigenous religious heritage of this dynamic country. Detailed reviews of over 600 books, articles, and theses are offered along with introductory essays and detailed annotations that define the field of study. This work plus two forthcoming volumes, *Christianity in South Africa: An Annotated Bibliography* and *Islam, Hinduism, and Judaism in South Africa: An Annotated Bibliography* will become the standard reference work on South African religions. Scholars and students in Religious Studies, Social Anthropology, History, and African Studies will find this set particularly useful. This work organizes and annotates all the relevant literature on Khoisan, Xhosa, Zulu, Sotho-Tswana, Swazi, Tsonga, and Venda traditions. The annotations are concise yet detailed essays written in an engaging and accessible style and supported by an exhaustive index, which comprise a full and complex profile of African traditional religion in South Africa.

Freud, Jung, and Jonah Jul 11 2022 Religion, more than sexuality, cast psychoanalysis in controversy and onto the world stage even as it threatened to dismantle the psychoanalytic collective. In the founding years of the first psychoanalytic periodicals, relational dynamics shaped the psychoanalytic corpus on religion. The psychoanalytic pioneers developed their ideas in tandem even if in protest to one another. Religion is a topic worthy of engagement, not least because the symbolized terrain in the history of religion was so often deployed as a vehicle for motivating, disciplining, or editing out a member of the psychoanalytic community in publication. This book offers an interdisciplinary approach to religion and psychology, including a compelling denouement that reveals new narratives about longstanding rumours in the early history of the psychoanalytic movement. Above all, this volume demonstrates that the first generation of psychoanalysts succeeded in writing themselves into the history of religious thought and sacralizing the origins of psychoanalysis.

The Early Modern Subject May 17 2020 Udo Thiel presents a critical evaluation of the understanding of self-consciousness and personal identity in early modern philosophy. He explores over a century of European philosophical debate from Descartes to Hume, and argues that our interest in human subjectivity remains strongly influenced by the conceptual framework of early modern thought.

Elemente einer analytischen Hydrologie Sep 01 2021 Dieses Buch stellt die wesentlichen hydrologischen Prozesse in Fluss- bzw. Seeinzugsgebieten vor. Dazu werden Modelle und Modellbausteine beschrieben. Deren Anwendung geschieht beispielhaft auf verschiedenen räumlichen und zeitlichen Skalen. Ausgehend von diesen Konzepten werden für einzelne Fragestellungen aus dem wasserwirtschaftlichen und gewässerökologischen Kontext (z. B. Hoch- und Niedrigwasser, Uferfiltration, Seenmanagement) Lösungen entwickelt. Besondere Schwerpunkte bilden hierbei die Hydrologie des unterirdischen Wassers und die Wechselwirkungen zwischen Grund- und Oberflächengewässern. Das Lehrbuch gibt vertiefte Einblicke in die hydrologische Modellierung, die bereits auf entsprechende berufliche Tätigkeiten z.B. im Wasserwesen, Umweltschutz und Gewässermanagement allgemein vorbereiten.
