The Association officially endorses this definition of Instructional Technology which has been developed over three years by the Committee on Definition and Terminology. The Association recognizes that other theoretical frameworks exist and that these are valid, but believes that these are part of the more inclusive theoretical framework of Instructional Technology used in this definition. In making this definition and the document explaining it available, we hope to help other organizations clarify their relationship to the broad field of Instructional Technology. Although the Association offers this definition as its current position, it is committed to a continuous reevaluation of the definition and to revising and publishing it so that it reflects changing concepts and terminology. A document of this magnitude can only be produced as the result of the dedication and effort of the persons who formed the committee and of its chairperson, Barbara Seels and her collaborator, Rita C. Richey. Without their energies, skill, perseverance, and willingness to risk stating their perceptions in this format we could not have offered this document. Whether or not we agree with the statements presented here, they will provide a benchmark and a point of dialogue for further development of a profession which seeks to provide conditions for effective learning. If all firms face similar obstacles to profitable growth, how do some companies successfully burst through these barriers, leaving their competitors in the dust? Rita Gunther McGrath and Ian C. MacMillan argue that an answer to this question lies in MarketBusters. Best of all, the authors say, opportunities for identifying and executing such moves can be unearthed throughout a company's existing business platform—if managers know where and how to look for them. The authors practical tools and checklists to help leaders determine the best marketbusting move to use in a given situation. Vivid company examples illustrate the moves in practice, and clear guidelines aid managers in implementing their chosen moves effectively. Driving continuous growth is imperative for every leader in every industry. MarketBusters is the field guide that will help them succeed. MARKET BUSTERS OFFERS: * A Unique Perspective on Growth Opportunities: Big “breakthrough” moves are risky and often unsuccessful. Today's executives are looking to drive growth off a platform of established markets, with existing customers, and with existing products and offerings. This book shows them how to do that. * A Highly Practical Approach: Actionable, tools-oriented focus of this book will appeal to executives under pressure to show results fast. Manning successfully argues that theory and ethics should once again be reunited...thorough and provocative...--THE MIDWEST BOOK REVIEW This book is a guide for a range of mid-to-upper level job seekers. This book is for those who are recently made redundant or furloughed, or those who are employed but looking to pivot. If you are a Do-It-Yourself (DIY) type, you will find innovative ideas and concrete steps. If you aren't into DIY, that's okay, as I can partner with you and coach you through the activity. Ultimately, this process is about positioning yourself so you can align yourself with the job market while exploring, and discovering your best self. This is a change curve, I won't lie, and you may initially experience denial and doubt. In due course, you will emerge from the process with resiliency. Sure, you can send out your resume and application online and hope for the best.

To truly thrive and succeed, you must do more. That's why I wrote this book - to help you achieve the next level and best success for you regardless of your career track. Cycles occur. Catastrophes happen. Like some struggling companies today, leaders in any industry must learn to innovate during a crisis in order to survive. Job seekers must do the same. Regardless of the crisis, as a job seeker, you must ask yourself: What is the best strategy to thrive in this new environment? Uncertain about thriving during a crisis? Don't be. This book will show you how to move from your old way of thinking to building resilience. Sincerely, Rita C. Reed

This book adopts the format of the editors' previous book, *Buddhists Talk about Jesus, Christians Talk about the Buddha*. In that book eight scholar-practitioners--four of them Buddhist and four Christian--explored their relationship to the great religious figure of the other tradition. Then the remaining contributors, two from each tradition, addressed themselves, rebuttal fashion, to the views expressed. In the new book the subject is the differences and similarities between Buddhist meditation and Christian prayer. What can a Christian, for example, learn from the mental and physical rigor of Buddhist meditative practice? What can a Buddhist learn from traditional Christian prayer? Can one mix distinct religious identity (Christian) with practice techniques associated with another religion (Buddhist) without compromising the religious specificity of either the identities or the techniques? Christian contributors include Frances S. Adeney, Mary Frohlich, Paul O. Ingram, Ursula King, Terry C. Muck, Yagi Seiichi, and Bardwell Smith. Buddhist contributors include Robert Aitken, Grace Burford, Rita Gross, John Makransky, Ken Tanaka, Robert Thurman, and Taitetsu Unno.

Zhangzhou Ware was produced during the 16th and 17th centuries in Fujian, China. They were meant to meet the trading demands of neighboring countries in Asia. This catalog substantiates historical accounts of the Philippines as one of the thriving markets of China's ceramic trade in the late Ming period. This collection, featured in hundreds of full color photographs, clearly shows to the world the great range and variety of Zhangzhou ware shipped to the Philippines during the 16th and 17th centuries of the Ming dynasty. Today, Zhangzhou ware continues to attract collectors because of its rustic charm. Situated at the crossroads of gender studies, narratology, and cultural studies, this book investigates the impact that the demographic and cultural revolutions of the last century have had on Italian women's life courses and on their literary imaginations. The geographic and chronological focus is Italy of the 1990s. The study is divided into two parts that represent an ideal progression from contexts to texts.

A Blueprint for Building Entrepreneurial Organizations Nobody needs to tell you that in the new economy, managers using conventional strategies are losing out to smart, fast, entrepreneurial competitors who move on ideas others overlook and who confidently act while others dither. Are the managers of leading companies simply doomed to let this happen? Not at all, argue Rita Gunther McGrath and Ian MacMillan. The fundamental problem is that the tools, training, and conceptual frameworks that work for business-as-usual can't, and don't, work when your main challenge is to bury old business models and aggressively create completely new ones. To succeed, today's strategists need the thought process and discipline that are second nature to successful entrepreneurs. *The Entrepreneurial Mindset* offers a refreshingly practical blueprint for thinking and acting in environments that are fast-paced, rapidly changing, and highly uncertain. It provides both a guide to energizing the organization to find tomorrow's opportunities and a set of entrepreneurial principles you can use personally to transform the arenas in which you compete. Using lessons drawn from leading entrepreneurs and entrepreneurial companies, *The Entrepreneurial Mindset* presents a set of practices for capitalizing on uncertainty and

rapid change. Like McGrath and MacMillan's bestselling Harvard Business Review articles, such as "Discovery-Driven Planning," the book provides simple but powerful ways to stop acting by the old rules and start thinking with the discipline of habitual entrepreneurs. The Entrepreneurial Mindset will show you how to: * Eliminate paralyzing uncertainty by creating an entrepreneurial frame that shapes a shared understanding of what is to be accomplished and what would be worthwhile * Create a richly stocked opportunity register in which you mobilize great ideas for redesigning existing products, finding new sources of differentiation, resegmenting existing markets, reconfiguring market spaces, and seizing the huge upside potential of breakthroughs * Build a dynamic portfolio of businesses and options that continuously move your organization toward the future * Execute dynamically your ideas so that you can move fast, with confidence and without undue risk * Develop your own way of leading with an entrepreneurial mindset to create a vibrant entrepreneurial climate within your organization

The Entrepreneurial Mindset is about succeeding in an unpredictable world. It will help everyone from independent entrepreneurs to managers of large corporations develop insights that others overlook and act on them to build the truly entrepreneurial organizations of the future. The glaciers that advanced and then receded through the Great Lakes region shaped Michigan's terrain and soil in ways that challenge and sometimes confound modern-day gardeners. Michigan today has 450 varieties of soil! Before they can garden successfully, Michigan gardeners need to know what soil they have and how to address its shortcomings—and do that within the limitations of the state's climate and northern growing season. This book explains how Michigan gardeners can lengthen their growing seasons through careful plant selection, exploiting microclimates, and using season-extending products. Chapters focus on lawns, vegetables, flowers, and trees, plant diseases, and invasive plants. Author Rita C. Henehan lives in White Pigeon, Michigan. She is a Master Gardener and frequent contributor to garden publications coast to coast, and often appears on the radio program "Green Thumbs Up." This volume is devoted to a study of the Puritans, the contributors survey the impact of Puritan sermons, thought, and law on society in general. There is little doubt today that the Puritan movement in England and the New World helped to reshape the basic institutions of the Anglo-Saxon world. In previous issues, we have surveyed the Puritan views concerning civil law, economics, science, and other kingdom institutions. Now we focus on those aspects of Puritan life that concerned the family, the institutional church, music, death, and Cromwell's Protectorate. Whatever politics you adopt, he says, should be liberal; whatever economics you adopt, of course, should be interventionist. Not impressed by biblical law. Dr. Lloyd-Jones falls back upon the conventional "unconventionality" of late-twentieth-century British politics—all in the name of liberal innovation. He ignores the fact that the dominion covenant was reestablished, after the Fall, with Noah. The Fall has now become an excuse for not doing anything to cure its effects. However, he said in his 1975 essay, "Looking at history it seems to me that one of the greatest dangers confronting the Christian is to become a political conservative, and an opponent of legitimate reform, and the legitimate rights of people" (p. 103). But if explicitly Christian reform is doomed, what kind of "legitimate reform" does he have in mind? Why, "Calvinist reform," meaning economic interventionism, since Arminianism supposedly leads to *laissez-faire*: "Arminianism over-stresses liberty. It produced the *laissez-faire* view of economics, and it always introduces inequalities—some people becoming enormously wealthy, and others languishing in poverty and destitution" (p. 106). Free enterprise creates inequality! If these conclusions seem preposterous to you, you will want to order the latest *Journal of Christian Reconstruction*, which contains my article showing how free enterprise economics came to the Puritan colonies in the final years of the 17th century. You will want to read Gordon Geddes' essay on the Puritan view of death, Greg Bahnsen's defense of biblical law against Merideth Kline's attack, Rita Mancha's study of women in Calvinist thought, Richard Flinn's essay on the Puritan concept of the family, James Jordan's essay on Puritanism and music, and David Chilton's defense of Oliver Cromwell. "Puritanism and Society" will provide you with information which will enable you to decide whether Dr. Lloyd-Jones' assessment is correct, whether his view on 17th-century Puritanism's outlook is truly heretical. These three issues of *The Journal* have created considerable controversy. The idea that Puritanism was essentially a "package deal"—a comprehensive world-and-life outlook that affected all spheres of social life—has alienated numerous self-proclaimed neo-Puritans. This series has also driven another group to abandon the Puritan tradition, and to adopt a kind of neo-anabaptism to replace the older "theonomic" Puritan tradition. The

"reprinting neo-Puritans" have faced a dual challenge: either adopt the theonomic tradition which was fundamental to the Puritan movement, or else abandon Puritanism's tradition in favor of new-anabaptism. Predictably, they wish to do neither. Yet to remain "betwixt and between" is to remain caught in a crossfire. The interesting product of this immobility has been a narrowing of focus: endless articles on the ("beneficial") emotionalism of Puritanism, and a stream of biographical articles, primarily dealing with the less well-known later preachers who have defended predestination, but who had little or no lasting influence on Western culture, and who were not explicitly Puritan in their outlook. In an unbiased, authoritative guide on C-sections, mothers-to-be are offered vital information on the procedure, such as why Cesareans are performed, what the procedure entails, and strategies to help them recover from the surgery. Highlights from the first Corpus Linguistics conference in North America An introduction to the land, history, people, economy, and environment of Iowa. Across the globe, from mega-cities to isolated resource enclaves, the provision and governance of security takes place within assemblages that are de-territorialized in terms of actors, technologies, norms and discourses. They are embedded in a complex transnational architecture, defying conventional distinctions between public and private, global and local. Drawing on theories of globalization and late modernity, along with insights from criminology, political science and sociology, Security Beyond the State maps the emergence of the global private security sector and develops a novel analytical framework for understanding these global security assemblages. Through in-depth examinations of four African countries – Kenya, Nigeria, Sierra Leone and South Africa – it demonstrates how global security assemblages affect the distribution of social power, the dynamics of state stability, and the operations of the international political economy, with significant implications for who gets secured and how in a global era. In A Haiku Diary, Rita Randazzo explores daily life in a difficult year, using the haiku poem to compress each day to its essence. As she struggles with mid-life challenges, she returns again and again to the natural world for balance and sustenance. Based on extensive research and the authors' combined thirty years of experience, Discovery-Driven Growth provides a breakthrough system for managing strategic growth. You will learn how to identify and prioritize your company's full portfolio of opportunities - from new product lines to entirely new businesses. The authors then show how to best execute specific initiatives, test major project assumptions, and develop a culture that values disciplined experimentation and learning over meeting mindless and unrealistic goals. Tools for dealing with each challenge are backed by examples from companies, from small firms to global giants, that have successfully put these methods into practice. Written by a respected internationally known math professional development professional and a language arts specialist this book will provide a teaching and learning resource book for teachers of children in Kindergarten to Grade 2 (4-8 year olds) that will help all children learn important mathematics based on the Common Core Standards of Mathematics and English Language Arts and reflects the knowledge and skills that young people need for success in college and careers. Rita Janes and Elizabeth Strong are well versed in the theoretical underpinnings of using Children's Literature to teach young children number sense through investigations and problem solving tasks. The book is based on the learning standards and practices in both the CCSS-M and the CCSS-LA. This title was first published in 2003. Lorenzo Warriner Pease was sent as an American missionary to Cyprus, arriving there on 25 November 1834; he died in August 1839. His eleven

manuscript diaries, now preserved in the Union Theological Seminary in New York, cover his journey to Cyprus, his time and travels there, and his extended visits to Syria, the Lebanon and Palestine, and to Greece. Rita Severis's edition of these diaries, with introduction and notes, now makes this unique source available, and is richly illustrated with engravings and pictures of the period. This was a time of change in the area: Pease saw the arrival of King Otto in the new Greek kingdom; he commented on the turbulent affairs of the Near East under Muhammad Ali; he was himself involved in the movement for social and intellectual reform in Cyprus. Keenly observant, curious, well-educated and a born linguist, Pease filled his diaries with accounts of the places and people he saw - customs, monuments, education and religious life, meteorology and geology: for much he provides a unique and well-informed witness. He writes, too, of his mission, of the work of his fellow missionaries within the Ottoman Empire, and of his family - two of his children lie buried with him in Cyprus. Supercritical fluid technology can be seen as a green and environmentally friendly alternative to conventional. Current information on these topics is spread through different publications in different peer-reviewed journals. The editors were therefore of This fascinating survey of Cyprus during the eighteenth, nineteenth and the first half of the twentieth centuries offers a unique view of a country as seen through the eyes of artists and travellers. It is based on over 350 works which are for the first time presented, pertaining to two periods of the history of Cyprus, those of Ottoman and British rule. A panorama of topography, monuments and ethnography is unfolded through the paintings and drawings of both amateur and professional artists. The political background and nationality of the artists and the influences of Imperialism, Orientalism and Colonialism are explored, and the book considers how attitudes changed during the period under discussion. The book also looks at the perception of the island, once a French, Ottoman and British colony, in relation to those of neighbouring countries such as Greece and Malta. This essential new text is designed for courses in contemporary moral issues, applied ethics, and leadership. Emphasizing personal choice in the study of ethics, the authors take the reader on a journey of self-discovery rather than a mere academic survey of the field of ethics. A Practical Guide to Ethics: Living and Leading with Integrity helps students develop their skills in ethical decision-making and put those decisions into effective practice. Its unique focus on leadership, especially the moral dimensions of understanding one's own values, teaches students to understand and, through dialog and negotiation, communicate their own beliefs as a step to building coalitions with those who may hold different views. It is also distinctive in combining ethical theory with both multicultural ethics (Confucianism, Hinduism, Islam, feminism) and a practical orientation to moral decision-making and leadership. AECT Design & Development Outstanding Book Award for 2008! Design and Development Research thoroughly discusses methods and strategies appropriate for conducting design and development research. Rich with examples and explanations, the book describes actual strategies that researchers have used to conduct two major types of design and development research: 1) product and tool research and 2) model research. Common challenges confronted by researchers in the field when planning and conducting a study are explored and procedural explanations are supported by a wide variety of examples taken from current literature. Samples of actual research tools are also presented. Important features in this volume include: concise checklists at the end of each chapter to give a clear summary of the steps involved in the various phases of a project; an examination of the critical types of information and data often gathered in studies, and

unique procedures for collecting these data; examples of data collection instruments, as well as the use of technology in data collection; and a discussion of the process of extracting meaning from data and interpreting product and tool and model research findings. Design and Development Research is appropriate for both experienced researchers and those preparing to become researchers. It is intended for scholars interested in planning and conducting design and development research, and is intended to stimulate future thinking about methods, strategies, and issues related to the field. ?The Encyclopedia of Terminology for Educational Communications and Technology is a volume of scholarly definitions and short discussions of approximately 180 key terms of the field.
