***of Beauty Oct 17 2022 This dissertation is a theological analysis of the trinitarian shape of Jonathan Edwards' aesthetics of beauty. The contributions of this dissertation lie chiefly in three areas. The primary aim of this study is to advance the burgeoning field of the study of Jonathan Edwards by elucidating his views of beauty. In so doing, I present him as a rich source for the theological engagement of beauty, which could serve not only the field of Edwards studies, but also that of theological aesthetics more broadly.***

This edition carefully preserves the original texts while providing extensive introductions, annotations, and bibliography. The Mercersburg Theology Study Series presents for the first time attractive, readable, scholarly modern editions of the key writings of the nineteenth-century movement known as the Mercersburg Theology. *edited by Raymond KJibansky. As with the earlier series the present chronicles purport to give a survey of significant trends in contemporary philosophical discussion. The time space covered by the present series is (approximately) 1966-1978. The need for such surveys has, I believe, increased rather than decreased over the last years. The philosophical scene appears, for various reasons, more complex than ever before. The continuing process of specialization in most branches, the emergence of new schools of thought, particularly in philosophical logic and the philosophy of language, the convergence of interest (though not necessarily of opinion) of different traditions upon certain problems, and the increasing attention being paid to the history of philosophy in discussions of contemporary problems are the most important contributory factors. Surveys of the present kind are a valuable source of knowledge of this complexity and may as such be an assistance in renewing the understanding of one's own philosophical problems. The surveys, it is to be hoped, may also help to strengthen the Socratic element of modern philosophy, the dialogue or *Kommunikationsgemeinschaft*. So far, four volumes have been prepared for the*

The question of how morphologically complex words are organized and processed in the mental lexicon is addressed from different theoretical perspectives (single and dual route models), for different modalities (auditory and visual comprehension, writing), and for language development. Experimental work is reported, as well as computational and statistical modeling. Thus, this volume provides a useful overview of the range of issues currently attracting research at the intersection of morphology and psycholinguistics.***

***Afghanistan Jan 28 2021 A colossal history of Afghanistan from its earliest organization into a coherent state up to its turbulent present. Located at the intersection of Asia and the Middle East, Afghanistan has been strategically important for thousands of years. Its ancient routes and strategic position between India, Inner Asia, China, Persia, and beyond has meant the region has been subject to frequent invasions, both peaceful and military. As a result, modern Afghanistan is a culturally and ethnically diverse country, but one divided by conflict, political instability, and by mass displacements of its people. In this magisterial illustrated history, Jonathan L. Lee tells the story of how a small tribal confederacy in a politically and culturally significant but volatile region became a modern nation-state. Drawing on more than forty years of study, Lee places the current conflict in Afghanistan in its historical context and challenges many of the West's preconceived ideas about the country. Focusing particularly on the powerful Durrani monarchy, which united the country in 1747 and ruled for nearly two and a half centuries, Lee chronicles the origins of the dynasty as clients of Safavid Persia and Mughal India: the***

***The Power of the Church Dec 19 2022 This volume is a collection of essays on the early creeds by John Nevin and Philip Schaff, the two principal representatives of the Mercersburg Theology that was birthed in nineteenth-century Pennsylvania. It also contains a critical response by John Proudfit, a more traditionally scholastic Calvinist. In these essays Nevin and Schaff argued that the early creeds provide an indispensable lens through which the Bible should be interpreted and an essential bond to preserve the unity of the church through the centuries. According to these Mercersburg theologians the liturgical and confessional use of the early creeds is crucial for shaping the identity of Christians and mediating the life of Christ to believers. ***The Formation of the Modern Self Mar 30 2021 Charting a genealogy of the modern idea of the self, Felix Ó Murchadha explores the accounts of self-identity expounded by key Early Modern philosophers, Montaigne, Descartes, Pascal, Spinoza, Hume and Kant. The question of the self as we would discuss it today only came to the forefront of philosophical concern with Modernity, beginning with an appeal to the inherited models of the self found in Stoicism, Scepticism, Augustinianism and Pelagianism, before continuing to develop as a subject of philosophical debate. Exploring this trajectory, The Formation of the Modern Self pursues a***

***number of themes central to the Early Modern development of selfhood, including, amongst others, grace and passion. It examines on the one hand the deep-rooted dependence on the divine and the longing for happiness and salvation and, on the other hand, the distancing from the Stoic ideal of apatheia, as philosophers from Descartes to Spinoza recognised the passions as essential to human agency. Fundamental to the new question of the self was the relation of faith and reason. Uncovering commonalities and differences amongst Early Modern philosophers, Ó Murchadha traces how the voluntarism of Modernity led to the sceptical approach to the self in Montaigne and Hume and how this sceptical strand, in turn, culminated in Kant's rational faith. More than a history of the self in philosophy, The Formation of the Modern Self inspires a fresh look at self-identity, uncovering not only how our modern idea of selfhood developed but just how embedded the concept of self is in external considerations: from ethics, to reason, to religion.***

***in 2015), accounts for the development of legal thought from ancient Greek times through the twentieth century. The entire set will be completed with an index. Volume 7: The Jurists' Philosophy of Law from Rome to the Seventeenth Century edited by Andrea Padovani and Peter Stein Volume 7 is the second of the historical volumes and acts as a complement to the previous Volume 6, discussing from the jurists' perspective what that previous volume discusses from the philosophers' perspective. The subjects of analysis are, first, the Roman jurists' conception of law, second, the metaphysical and logical presuppositions of late medieval legal science, and, lastly, the connection between legal and political thought up to the 17th century. The discussion shows how legal science proceeds at every step of the way, from Rome to early modern times, as an enterprise that cannot be untangled from other forms of thought, thus giving rise to an interest in logic, medieval theology, philosophy, and politics—all areas where legal science has had an influence. Volume 8: A History of the Philosophy of Law in The Common Law World, 1600-1900 by Michael Lobban Volume 8, the third of the historical volumes, offers a history of legal philosophy in common-law countries***

***from the 17th to the 19th century. Its main focus (like that of Volume 9) is on the ways in which jurists and legal philosophers thought about law and legal reasoning. The volume begins with a discussion of the 'common law mind' as it evolved in late medieval and early modern England. It goes on to examine the different jurisprudential traditions which developed in England and the United States, showing that while Coke's vision of the common law continued to exert a strong influence on American jurists, in England a more positivist approach took root, which found its fullest articulation in the work of Bentham and Austin.***

*Paul, The Apostle of Obedience Feb 09 2022  
Jason A. Myers reconsiders the meaning and context of the phrase "the obedience of faith" in Rom 1:5 and how it contributes to the theme of obedience in Romans. In contrast to previous studies that have nearly exclusively focused on the obedience language in light of the Hebrew Bible and Second Temple literature, Myers instead investigates how this language functioned within the Greco-Roman world, particularly in the discourse of the Roman Empire. By studying both the Greco-Roman contexts and the use of obedience language during the Empire, Myers sheds fresh light on the meaning of "the obedience of faith," and concludes that such examination helps contemporary readers understand how Gentiles in Paul's audience would have heard and received the terms and images relating to obedience. In addition, he argues that Paul's use of obedience language, both at the beginning and end of Romans (1:5; 15:18), serves as rhetorical bookends, and signals a*
