Essay from the year 2011 in the subject Business economics - Personnel and Organisation, grade: 1,3, International University of Applied Sciences Bad Honnef - Bonn (International Management), course: International Human Resource Management, language: English, abstract: Introduction Designate a person a loser and he will behave like one. But why is it, that some managers are not aware of the severe consequences treating their employees like that? Is it because of a deficit in managing people within an opposed cultural working environment or is it because of an inconvenient HRM strategy? Skinner, B. (1971) argued, that people are simply a product of the stimuli they get from the external world. Interestingly, negative reinforcement causes behavioral change in undesirable ways, whereas positive reinforcement causes rather intended change. General management is therefore not only accountable for defining such stimuli according the corporate strategy, but also its degree of involvement is a prerequisite for a successful HRM (Baron, J. & Kreps, D., 1999). The ideas and practices that comprise "conservation" are often assumed to have arisen within the last two centuries. However, while conservation today has been undeniably entwined with processes of modernity, its historical roots run much deeper. Considering a variety of preindustrial European settings, this book assembles case studies from the medieval and early modern eras to demonstrate that practices like those advocated by modern conservationists were far more widespread and intentional than is widely acknowledged. As the first book-length treatment of the subject, *Conservation's Roots* provides broad social, historical, and environmental context for the emergence of the nineteenth-century conservation movement. Scientific Essay from the year 2010 in the subject Business economics - Personnel and Organisation, grade: 1,0, University of St Andrews, course: Managing People in Global Markets, language: English, abstract: "The primary cause of failure in multinational ventures stem from a lack of understanding of the essential differences in managing human resources in foreign environments" (Desatnick & Bennett 1978). The world has become more globalized, competitive, dynamic and uncertain than ever before. As more and more firms operate internationally, the search for the elements of global competitive advantage is a prominent theme in the management literature (Dickman & Müller-Camen, 2006: 580). There is a clear need to develop an understanding of how to compete successfully on the global playing field. A major component of this understanding appears to be the field of human resource management and, in particular, the field of international human resource management (IHRM) (Schuler, et al., 1993: 419). The effective management of human resources in an international context is increasingly seen as a key source of competitive advantage in international business; and the quality of management seems to be even more critical in international than in domestic operations (e.g. Monks, et al., 2001). Due to the importance of the topic, there has been a significant amount of research on IHRM in recent years. Some of the major debates are concerned with the development of models and concepts of strategic international human resource management (SIHRM) (e.g. Schuler & Tariq 2007) and the question whether successful domestic HR strategies can be applied in a global context (e.g. Schuler & Jackson, 2007: 162). The aim of this essay is to compare domestic human resource management (DHRM) with the concept of IHRM. After briefly defining the key terms, the author with outline both concepts and identify all major similarities and differences. At the end, some final conclus Sustainable practices within the mining and energy sectors are assuming greater significance due to uncertainty and change within the global economy and safety, security, and health concerns. Accompanys: 9780324580341 . Seminar paper from the year 2005 in the subject Business economics - Personnel and Organisation, grade: Very Good, Turku School of Economics, course: International Business Operations, 24 entries in the bibliography, language: English, abstract: Recruitment and selection in International Human Resource Management is crucial; finding the right people to fill key positions can determine a company's international operation. Furthermore, it is extremely costly for the company if the expatriate fails. The performance of an expatriate is often determined by factors like (in)ability to adjust to foreign culture, the length of the assignment, willingness to move and work-related factors. What should be considered when selecting an expatriate are therefore criteria like technical ability, cross-cultural suitability, family requirements, country requirements as well as language and company requirements. However, recruitment and selection are only the first step for international Human Resource Management. The aim of this paper is therefore to point out the increasing importance of Human Resource Management especially from internationally operating companies' point of view. Furthermore, it will be pointed out what International Human Resource Management is and why it is necessary for Multi National Companies (MNCs) to concern about this topic. In addition, challenges and requirements of HRM will be illustrated and highlighted. This work will furthermore portray the recruitment and selection process as well as the necessity of training and development within global companies. It will describe the workplace conflict and deal with subjects such as industrial relations and employment law. "A clarifying must-read in these uncertain times." —GOVERNOR ANDREW CUOMO Journey behind the front lines of the coronavirus pandemic with Northwell Health, New York's largest health system. What was it like at the epicenter, inside the health system that cared for more COVID-19 patients than any other in the United States? Leading Through a Pandemic: The Inside Story of Lessons Learned about Innovation, Leadership, and Humanity During the COVID-19Crisis takes readers inside Northwell Health, New York's largest health system. From the C-suite to the front lines, the book reports on groundwork that positioned Northwell as uniquely prepared for the pandemic. Two decades ago, Northwell leaders began preparing for disasters—floods, hurricanes, blackouts, viruses, and more based on the belief that "bad things will happen and we have to be ready." Following a course highly unusual for an American health system, Northwell developed one of the most advanced non-government emergency response systems in the country. Northwell reached a point where leaders could confidently say "we are comfortable being uncomfortable in a crisis." But even with sustained preparation, the pandemic stands as a singularly humbling experience. Leading Through a Pandemic offers guidance on how hospitals and health systems throughout the country can prepare more effectively for the next viral threat. The book includes dramatic stories from the front lines at the peak of the viral assault and lessons of what went well, and what did not. The authors draw upon the Northwell experience to prescribe changes in the health care system for next time. Beyond the obvious need for increased stockpiles of supplies and equipment is the far more challenging task of fundamentally changing the culture of American health care to embrace a more robust emergency response capability in hospitals and systems of all sizes across the nation. The book is a must read for health care professionals, policy-makers, journalists, and readers whose curiosity demands a deeper dive into the surreal realm of the coronavirus pandemic. Examines strategic international human resource management in Australian multi-national enterprises operating in the European Union. Lazarova, provides concise coverage of key HRM concepts, balancing comparative approaches and US and non-US schools of thought. Not limited to the multinational firm, this book reflects the most current knowledge in the field and considers all types of organizations embedded in the global context. Extensive references make it easy for readers to explore concepts in more depth.
