Lequeu Feb 14 2023 Jean-Jacques Lequeu does in fact hide behind the most enigmatic and controversial smile in the history of art, writes Philippe Duboy in a book that is one of the most tantalizing examples of architectural investigation ever produced. It is an extraordinary compilation - part speculative biography, part meticulous research, with hundreds of intriguing drawings, many in color - that unravels the mystery of this eighteenth-century maverick artist whose drawings have established him variously as a visionary architect associated with Boullée and Ledoux, forerunner of surrealism, and inventor of bad taste. Lequeu's architectural drawings from the legendary portfolios Architecture civile and Nouvelle methode are presented here in their entirety, along with his Lewd Figures, perhaps the oddest feature of the whole collection. The drawings are accompanied by long

captions, misspelt and ungrammatical, but written in a flawless bureaucratic hand. The artist's marginalia provide insights into his visions, which seem dominated by an obsession with petrified forms and a recurring preoccupation with sex. Interleaved with the drawings are curious autobiographical papers. And it is here that Duboy's investigation of Lequeu begins to reveal strange clues. He discovers that Lequeu was not an architect at all but a government bureaucrat, a draftsman who ended up living in a brothel. Between the brothel and the obscure office from which he was eventually fired, he produced his encyclopedia of the universe - bizarre portraits of nuns baring their breasts and other lewd figures, and architectural fantasies of vast imaginary cities. Duboy takes his study further, into the realm of Charles Fourier and his brother-in-law Anthelme Brillat-Savarin and from there to the world of the dadaists, surrealists, and futurists, particularly the circles of Marcel Duchamp and Le Corbusier. He suggests that Duchamp and Raymond Rousell tampered with the Lequeu drawings to concoct a character and oeuvre even more puzzling. There are glimpses of Duchamp's convolutions of mind that will stir a reassessment of his work. Duchamp emerges here, for the first time, as an intrepid and unwavering despiser of Le Corbusier. Twentieth-century reputations are as much at stake in this study as those of the eighteenth-century artist, notes Robin Middleton. Philippe Duboy is Professor of the History of Cities, Paris-Belleville School of Architecture.

Condemned Buildings Sep 09 2022 *Condemned Building* is one of our most requested out-of-print books, so we've done a special limited edition reprint (only 750 copies) to meet the ongoing demand for this book. Not long after this book was published, the only one on the work of this gifted architect and delineator, Doug died of leukemia. Fans and friends, including legions of students, quickly bought up the remaining copies, and the difficulty of finding this book has undoubtedly only increased its appeal. Doug said that these projects were "the underbelly of canonical architectural principles and

forms", and indeed many are dark, brooding, or sexual in nature: a "kamasutra with the negative." The book covers ten projects, in model, drawing, and "psychoanalytical" text. Douglas Darden taught at Harvard, Columbia, and most recently the University of Colorado at Denver. He was a Fellow of the American Academy in Rome. He is sorely missed, but we're happy to be able to offer his book once again.

Pornotopia May 17 2023 Published for the first time in 1953, Playboy was not only the first pornographic popular magazine in America; it also came to embody an entirely new lifestyle through the construction of a series of utopian multimedia spaces — from the Playboy Mansion and fictional Playboy's Penthouse of 1959 to the Playboy Clubs and hotels appearing around the world in the 1960s. Simultaneously, the invention of the contraceptive pill provided access to a biochemical technique that separated (hetero) sexuality and reproduction. Addressing these concurrent cultural shifts, Paul Preciado investigates the strategic relationships between space, gender, and sexuality in popular sites related to the production and consumption of pornography that have tended to reside at the margins of traditional histories of architecture: bachelor pads, multimedia rotating beds, and design objects, among others. Combining historical perspectives with contemporary critical theory, gender and queer theory, porn studies, the history of technology, and a range of primary transdisciplinary sources — treatises on sexuality, medical and pharmaceutical handbooks, architecture journals, erotic magazines,

building manuals, and novels — Pornotopia explores the use of architecture as a biopolitical technique for governing sexual relations and the production of gender in the postwar United States.

"Striking Images, Iconoclasm Past and Present " Nov 11 2022 All cultures make, and break, images. Striking Images, Iconoclasm Past and Present explores how and why people have made and modified images and other cultural material from pre-history into the 21st century. With its impressive chronological sweep and disciplinary breadth, this is the first book about iconoclasm (the breaking of images) and the transformation of broader sets of signs that includes contributions from archaeologists, curators, and museum conservators as well as historians of art, literature and religious studies. The chapters examine themes critical to the study of iconoclasm: violence, punishment, memory, intentionality, ruins and relics and their survival. The conclusion shows how cross-disciplinary debate amongst the contributors informed Tate Britain's 'Art under Attack' exhibition (2013) and addresses the challenges iconoclasm presents to the modern museum. By juxtaposing objects and places usually considered in isolation, Striking Images raises provocative questions about our understandings of cross-cultural differences and the value of representational objects from the broken swords of pre-historical bog graves to the Bamiyan Buddhas and contemporary art. Are any such objects ever 'finished?', or are they simply subject to constant transformation? In dialogue with each other, the essays consider this question and expand the field of iconoclasm - and cultural - studies.

The Egyptian Revival Jun 18 2023 In this beautifully illustrated and closely argued book, a completely updated and much expanded third edition of his magisterial survey, Curl describes in lively and stimulating prose the numerous revivals of the Egyptian style from Antiquity to the present day. Drawing on a wealth of sources, his pioneering and definitive work analyzes the remarkable and

persistent influence of Ancient Egyptian culture on the West. The author deftly develops his argument that the civilization of Ancient Egypt is central, rather than peripheral, to the development of much of Western architecture, art, design, and religion. Curl examines: the persistence of Egyptian motifs in design from Graeco-Roman Antiquity, through the Medieval, Baroque, and Neo-Classical periods rise of Egyptology in the nineteenth and twentieth-century manifestations of Egyptianisms prompted by the discovery of Tutankhamun's tomb various aspects of Egyptianizing tendencies in the Art Deco style and afterwards. For students of art, architectural and ancient history, and those interested in western European culture generally, this book will be an inspiring and invaluable addition to the available literature.

Fire in the Minds of Men Aug 16 2020 This book traces the origins of a faith--perhaps the faith of the century. Modern revolutionaries are believers, no less committed and intense than were Christians or Muslims of an earlier era. What is new is the belief that a perfect secular order will emerge from forcible overthrow of traditional authority. This inherently implausible idea energized Europe in the nineteenth century, and became the most pronounced ideological export of the West to the rest of the world in the twentieth century. Billington is interested in revolutionaries--the innovative creators of a

new tradition. His historical frame extends from the waning of the French Revolution in the late eighteenth century to the beginnings of the Russian Revolution in the early twentieth century. The theater was Europe of the industrial era; the main stage was the journalistic offices within great cities such as Paris, Berlin, London, and St. Petersburg. Billington claims with considerable evidence that revolutionary ideologies were shaped as much by the occultism and proto-romanticism of Germany as the critical rationalism of the French Enlightenment. The conversion of social theory to political practice was essentially the work of three Russian revolutions: in 1905, March 1917, and November 1917. Events in the outer rim of the European world brought discussions about revolution out of the school rooms and press rooms of Paris and Berlin into the halls of power. Despite his hard realism about the adverse practical consequences of revolutionary dogma, Billington appreciates the identity of its best sponsors, people who preached social justice transcending traditional national, ethnic, and gender boundaries. When this book originally appeared The New Republic hailed it as "remarkable, learned and lively," while The New Yorker noted that Billington "pays great attention to the lives and emotions of individuals and this makes his book absorbing." It is an invaluable work of history and contribution to our understanding of political life.

Biographique du Moyen-Âge Jul 27 2021 The index to the Biographical Archive of the Middle Ages makes accessible about 130,000 biographical articles from nearly 200 volumes. The entries contain short biographical information on approx. 95,000 persons from Europe and the Middle East who shaped the cultural development and the religious life during one thousand years.

The Architecture of the French Enlightenment Nov 30 2021 Allan Braham's comprehensive treatment of this brilliant and complex period introduces the reader to the major buildings, architects,

and architectural patrons of the day. At the same time, it explores the broader determinants of architectural production: the rapid economic expansion of Paris and the main provincial centers and the increasing demand for improved public amenities--theaters, schools, markets, and hospitals. This generously illustrated book provides a vivid commentary on society and manners in pre-Revolutionary France.
