L'ethos del mercato. Un'introduzione ai fondamenti antropologici e relazionali dell'economia Jan 21 2021
The Charismatic Principle in Social Life Jun 06 2022 Max Weber laid the foundations for the meaning of 'charisma' in modern secular usage. This new volume argues for the importance of the 'charismatic principle' in history, economics and society. This volume brings together a number of contributors at the cross section between economics, theology, sociology and politics in order to set a research agenda for the following issues: What does it mean to have a 'charism'? How does it work in society? How might one distinguish a 'charism' from a talent? Are 'charism's given only to "special" people, or are they also present in ordinary people? Is a 'charism' necessarily associated with religion, or, is it, as we submit, possible to imagine 'charisms' at work within a secular perspective? Which are the principle perspectives of the role of 'charisms' in social history? How have the 'charisms' of noted personalities (e.g., Benedict, Francis, Gandhi) changed economic and social history? What insights might be drawn from 'civil charisms' such as the cooperative movement, non-profit organizations, social economy, and values-based organizations? This book seeks to answer these questions through the employment of an interdisciplinary perspective, which examines the theme of the charismatic principle in social life in different fields of application. *Resources, Production and Structural Dynamics* Aug 28 2021 Economists since the First Industrial Revolution have been interested in the links between economic growth and resources, often pointing to resource scarcities as a hindrance to growth. Offering a counter perspective, this volume highlights the positive role that scarcities can play in inducing technical progress and economic growth. It outlines a structural framework for the political economy of scarcity and rents, and offers a novel way of organizing the evidence concerning the role of resources in industrial growth. This book proposes a major shift in the treatment of scarcity issues by focusing on bottlenecks and opportunities arising within the production system, and will appeal to economists and policy makers interested in the role of resources as triggers of structural change.

New Metropolitan Perspectives Feb 19 2021 ?This book presents the outcomes of the symposium "NEW METROPOLITAN PERSPECTIVES," held at Mediterranea University, Reggio Calabria, Italy on May 26–28, 2020. Addressing the challenge of Knowledge Dynamics and Innovation-driven Policies Towards Urban and Regional Transition, the book presents a multi-disciplinary debate on the new frontiers of strategic and spatial planning, economic programs and decision support tools in connection with urban–rural area networks and metropolitan centers. The respective papers focus on six major tracks: Innovation dynamics, smart cities and ICT; Urban regeneration, community-led practices and PPP; Local development, inland and urban areas in territorial cohesion strategies; Mobility, accessibility and infrastructures; Heritage, landscape and identity; and Risk management, environment and energy. The book also includes a Special Section on Rhegion United Nations 2020-

2030. Given its scope, the book will benefit all researchers, practitioners and policymakers interested in issues concerning metropolitan and marginal areas.

Economia civile Feb 14 2023

Thomas Aquinas and the Civil Economy Tradition Jul 27 2021 Delving into the history of economic thought, this book presents a picture of the Mediterranean spirit of capitalism, a tradition that has its protagonists in Thomas Aquinas and the eighteenth-century civil economy, and seeks to understand its presence and relevance for contemporary societies. The book argues that it is reductive to attribute to the 'Protestant ethic' the different formations of capitalism in the Western world. Instead, it is vital to acknowledge the differences in the ways in which the market is lived, enterprises are created and conducted, and civic life in general is understood in different regions. This thought-provoking study demonstrates that in Southern Europe, the legacy of Aquinas and the civil economy adds different terms to those recurring in classical and neo-classical economy: common good, reciprocity, virtue, public trust, mutual assistance, and public happiness. It is these ideas of a market as a place for mutual assistance which can be said to characterize the Mediterranean spirit of capitalism. Thomas Aquinas and the Civil Economy Tradition will be of interest to advanced students and researchers in the history of economic thought, economic philosophy, Christian ethics, and moral theology.

Corporate Social Responsibility Jan 01 2022 This book highlights the multi-faceted nature of corporate social responsibility and the need for greater engagement across academia to help develop the mechanisms needed to encourage socially responsible approaches across the board. The product of a cross-disciplinary collaboration of authors from various academic disciplines, the book reflects the emergent diversity of academics now studying corporate social responsibility (CSR). Accordingly, it includes contributions from economists to social anthropologists, from accountants to philosophers, and from clinical psychologists to social geographers. Together they provide new insights into aspects that challenge, hinder and enable CSR practitioners and corporations with regard to their financial impact and accountability, governance and supply chains. The book is divided into four parts focusing on the practical, sociological, theoretical and environmental aspects of corporate social responsibility.

Civil Economy Apr 04 2022 This volume has a double purpose. First of all, it follows an Italian tradition of thought that began in the 15th and 16th centuries as Civic Humanism and continued up until the golden period of Italian Enlightenment as represented by the Schools of Milan and Naples. Its main contribution to the history of economic thought is its conception of the market as a place centered on the principle of reciprocity and civil virtues. This book explains why the civil approach to economics disappeared from cultural debates, scientific enquiries and the public arena at the end of the 18th century, only to surface again in more recent times. Secondly, the book draws attention to a new reading of the whole of economic reality. Indeed, the civil economy in one sense is mainly a cultural perspective from which it is possible to interpret the entire economic discourse. If a theory is considered as substantially a point of view on reality, then this cultural perspective can also set the basis for a diverse economic theory. Where does the key element of such diversity lie? It lies in the attempt to integrate within the economic system the three basic principles of any social order: the principle of exchange of equivalents, the principle of redistribution and the principle of reciprocity. Though this book draws on the history of economic ideas, it focuses on the present day from an ancient perspective in order to find convincing answers to the new questions arising in the era of globalization.

Civil Economy and Organisation Nov 18 2020 This book aims to move beyond the concepts of 'bureaucracy', 'hierarchical control' and 'performance' that classic organizational and managerial studies often focus upon. Instead, it considers these managerial leverages as instruments that are liable to lead to a decline in positive worker behaviors. It proposes a shift from traditional management towards a type of organization based upon self-control, equality and liberation - a model far better suited to the turbulent business environment of today. In order to support this analysis, it draws on interdisciplinary research, including the Italian Civil Economy tradition, the connection between agapic love and leadership, and philosophical perspectives on management. It will be of interest to scholars working in the fields of management studies, philosophy, organisation studies and business ethics.

Economia civile e sviluppo sostenibile. Progettare e misurare un nuovo modello di benessere Jul 19 2023

Dalla società del rischio all'economia civile Dec 12 2022 A partire dalla cultura dell'economia civile di mercato si analizzano le cause antropologiche, morali ed economiche che stanno alla base dell'attuale crisi sistemica. Pur riconoscendo la bontà del mercato come strumento per costruire relazioni non basate sul soprasso, l'economia civile vede nel capitalismo finanziario di matrice anglosassone alcuni errori fondamentali quando esso pretende che l'economia sia fondata "solo" sugli interessi individuali ed egoistici, slegata da qualsiasi "laccio" di carattere etico, e che invece il sociale e il politico siano il luogo del bene comune. Al contrario l'economia civile si fonda sulla centralità della persona e sulla sua responsabilità individuale rispetto al mercato, alla comunità e allo Stato. Il volume non tratta solo una riflessione teorica, ma partendo dall'esperienza più che trentennale dell'autore nel campo dell'economia civile, offre spunti operativi alle persone già impegnate a vario titolo nella società civile; agli studenti che vogliono conoscere una scienza economica che non escluda dalla ricerca valori come la gratuità, la reciprocità,

la cooperazione e la fiducia; al mondo del non profit e delle imprese sensibili alla cultura dell'economia civile; alle persone che vogliono inserirsi in questo mondo con competenza professionale.

Humanism and Religion in the History of Economic Thought. Selected Papers from the 10th Aispe Conference May 05 2022 363.81

I distretti dell'economia civile. Come sviluppare la sostenibilità ambientale, sociale ed economica dei territori Oct 30 2021

L'impresa civile May 17 2023 In questa età di crisi economica e finanziaria molte cose vanno ripensate se vogliamo immaginare e costruire un'economia di mercato e un modello di sviluppo sostenibili. Tra queste "cose" c'è senz'altro l'impresa. Non ci basta che produca qualità, reddito, occupazione; né che paghi le giuste imposte. E' sempre più evidente che l'istituzione impresa è chiamata a un "di più" che la renda davvero amica della città, e in tal modo sia percepita come elemento costruttore del tessuto civile. L'idea che ispira il libro è la tradizione italiana dell'economia civile, che ha la sua origine nell'Umanesimo e poi nella Napoli del Settecento, possa offrire ancora oggi suggestioni e spunti per immaginare un'impresa civile che, pur restando impresa (e non necessariamente impresa non-profit), sia però luogo e strumento di incivilimento e di ben-vivere. Essa supera la contrapposizione non profit/for-profit, tipica della tradizione anglosassone, e recupera anche la tradizione italiana dell'economia aziendale. Un posto a sé occupa in questo contesto l'analisi dell'imprenditore come figura sociale che, diversa dallo speculatore, assume le caratteristiche dell'imprenditore civile.

La ferita dell'altro Apr 23 2021 Questo saggio, divenuto ormai un classico dell'economia civile, suggerisce un percorso all'interno della modernità con l'intento di esplicitare le premesse antropologiche e culturali su cui si fondano l'economia contemporanea e le sue promesse. La scienza economica, con la sua promessa di una vita in comune senza sacrificio, rappresenta una grande via di fuga dal contagio della relazione personale. La crisi che le società di mercato stanno attraversando è infatti essenzialmente crisi di rapporti umani, originata dall'illusione che l'impresa burocratica e gerarchica ci possa regalare una buona convivenza senza l'incontro rischioso con l'altro e con la sua ferita.

The New Social and Impact Economy Mar 03 2022 This edited volume discusses the development of the new social and impact economy in ten countries around the globe. The new social and impact economy is an attempt to conceptualize developments after the 2008 economic crisis, which emphasized the pitfalls of the Neo-Liberal economic system. In the aftermath of the crisis, new organizational entities evolved, which combined social and business objectives as part of their mission. Using data gathered by two recent international research projects—the ICSEM project and the FAB-MOVE project—the book provides an initial portrait of the forces at play in the evolution of the new social and impact economy, linking those to the past crisis as well as to Covid19 and comparing the emergence of the phenomenon in a varied group of countries. The book begins with an overview of the classical definitions of social economy and proposes a comprehensive concept of new social and impact economy, its characteristics, and sources. Ten country chapters as well as a comparative chapter on international social economy organizations follow. The volume concludes with an overall analysis of the data from the country chapters, forming a typology of social economy traditions and linking it to recent Post Capitalism trends. Creating a conceptual framework to analyze the new phenomena in social economy, this volume is ideal for academics and practitioners in the fields of social economy; social, economic and welfare policies; social and business entrepreneurship in a comparative fashion; social and technological innovation as well as CSR specialists and practitioners.

L'economia civile nella società del rischio Sep 09 2022

A Modern Guide to the Economics of Happiness Oct 18 2020 Exploring the modern approach to the economics of happiness, which came about with the Easterlin Paradox, this book analyses and assesses the idea that as a country gets richer the happiness of its citizens remains the same. The book moves through three distinct pillars of study in the field: first analysing the historical and philosophical foundations of the debate; then the methodological and measurements issues and their political implications; and finally empirical applications and discussion about what determines a happy life.

Economic Theory and its History May 25 2021 This collection brings together leading economists from around the world to explore key issues in economic analysis and the history of economic thought. This book deals with

important themes in economics in terms of an approach that has its roots in the works of the classical economists from Adam Smith to David Ricardo. The chapters have been inspired by the work of Neri Salvadori, who has made key contributions in various areas including the theory of production, the theory of value and distribution, the theory of economic growth, as well as the theory of renewable and deplorable natural resources. The main themes in this book include production, value and distribution; endogenous economic growth; renewable and exhaustible natural resources; capital and profits; oligopolistic competition; effective demand and capacity utilization; financial regulation; and themes in the history of economic analysis. Several of the contributions are closely related to the works of Neri Salvadori. This is demonstrated with respect to important contemporary topics including the sources of economic growth, the role of exhaustible resources in economic development, the reduction and disposal of waste, the redistribution of income and wealth, and the regulation of an inherently unstable financial sector. All contributions are brand new, original and concise, written by leading exponents in their field of expertise. Together this volume represents an invaluable contribution to economic analysis and the history of economic thought. This book is suitable for those who study economic theory and its history, political economy as well as philosophy.

L'apostasia dell'economia civile. Segno dei nostri tempi Feb 02 2022

Civil Happiness Jun 25 2021 Economists have long laboured under the misapprehension that all humans exist as rational beings that find happiness in maximizing their personal utility. This impressive volume presents an historical review of the evolution of economic thought, from economic philosophy to contemporary mathematical economics, and its critique of how the human and social dimensions of economics have been lost in this evolutionary process. Examining the crucial period in the late eighteenth century when economists such as Smith and Genovesi tried to reconcile the classical tradition of Civil humanism emerging commercial society, this key book analyses the impact that the hedonist approach to economics had in removing the ethical conception of happiness. In addition, it focuses on the impact that J.S. Mill, Wicksteed and Pareto had in shifting methodological thinking away from an emphasis on civil happiness. Simply put, this book is essential reading for economists everywhere.

Dall'economia civile francescana all'economia capitalistica moderna Jul 07 2022 Il saggio mostra uno scenario dove risulta chiaro che la società medievale, a partire dal monachesimo di S. Benedetto e proseguendo con l'analisi della Scuola francescana, racchiude in sé il cuore del rapporto tra etica, mercato ed economia. Nel libro il lettore troverà incarnati nella questi principi, che servono non per promuovere un ritorno nostalgico al passato, ma una nuova agorà per guardare all'avvenire, tenendo presenti i valori antropologici che provengono dal pensiero francescano e che si trovano in sintonia con le aspirazioni dell'uomo contemporaneo.

Producer Cooperatives as a New Mode of Production Mar 23 2021 The notion that there is no alternative to capitalism emerged after the fall of the Berlin Wall and made rapid headway due to increasing economic globalisation. More recently, this belief that there is no viable alternative has held firm despite the financial crisis, high unemployment levels and an ever-increasing gap between rich and poor. However, since the appearance of Benjamin Ward's seminal 1958 article, economic theorists have been developing a workable alternative: a system of self-managed firms. The core argument outlined in this book is that a well-organised system of producer cooperatives would give rise to a new mode of production and, ultimately, a genuinely socialist society. This argument is developed through three key steps. First, following on from Jaroslav Vanek's definition, it is argued that a 'Labour-Managed Firm', a firm which strictly segregates capital incomes from labour incomes, would implement a new production mode because it would reverse the pre-existing relation between capital and labour. Second, given that a system of these 'Labour-Managed Firm' cooperatives would reverse the capital-labour relationship, it is suggested that this would constitute a form of market socialism. Third, it is argued that compared to capitalism a system of producer cooperatives offers a wealth of advantages, including the potential for efficiency gains, the eradication of unemployment and the end of exploitation. Ultimately, this book concludes that self-management could take the place of central planning in Marxist visions for the future.

The International Handbook of Social Enterprise Law Dec 20 2020 This open-access book brings together international experts who shed new light on the status of social enterprises, benefit corporations and other purpose-driven companies. The respective chapters take a multidisciplinary approach (combining law, philosophy, history, sociology and economics) and provide valuable insights on fostering social entrepreneurship and advancing the common good. In recent years, we have witnessed a significant shift of how business activities are conducted, mainly through the rise of social enterprises. In an effort to target social problems at their roots, social entrepreneurs create organizations that bring transformative social changes by considering, among others, ethical, social, and environmental factors. A variety of social enterprise models are emerging internationally and are proving their vitality and importance. But what does the term "social enterprise" mean? What are its roots? And how does it work in practice within the legal framework of any country? This handbook attempts to answer these questions from a theoretical, historical, and comparative perspective, bringing together 44 contributions written by 71 expert researchers and practitioners in this field. The first part provides an overview of the social enterprise movement, its evolution, and the different forms entities can take to meet global challenges, overcoming the limits of what governments and states can do. The second part focuses on the emergence of benefit corporations and the growing

importance of sustainability and societal values, while also analyzing their different legal forms and adaptation to their regulatory environment. In turn, the last part presents the status quo of purpose-driven companies in 36 developed and emerging economies worldwide. This handbook offers food for thought and guidance for everyone interested in this field. It will benefit practitioners and decision-makers involved in social and community organizations, as well as in international development and, more generally speaking, social sciences and economics.

Nuove direttrici di sviluppo per l'economia civile Apr 16 2023

Lezioni di commercio o sia di economia civile dell'abate Antonio Genovesi napoletano cui vanno uniti opuscoli interessantissimi riguardanti l'economia politica e l'agricoltura. Volume primo [-secondo] May 13 2020

Economia civile e lavoro Nov 11 2022

La pratica del "tu" Jan 13 2023 Prosegue l'opera di divulgazione, intrapresa con il primo volume, delle personalità e dei temi dell'economia civile in chiave umanistica. L'autore propone di investire nell'economia della conoscenza, di sottoporre parole e idee a una manutenzione attenta a scoprirne la forza originaria e di trovare infine uno spazio, nello studio economico, a concetti quali dono e azione gratuita per una economia che sia non solo formalmente corretta, ma anche giusta nella prassi. Aprirsi a nuovi orizzonti culturali della ricerca economica fino a includere il valore di legame, è la sfida intellettuale che l'Autore intende cogliere seguendo queste direttrici, affinché l'economia civile non sia solo una prospettiva teorica ma anche cultura, azioni e opere concrete.

Catalogue Apr 11 2020

Servant Leadership, Social Entrepreneurship and the Will to Serve Jul 15 2020 This book brings together a number of important essays on the intersection of servant leadership and social entrepreneurship, examining them through a shared focus on 'the will to serve'. This combination bears out the insight that inspiring social and economic leaders are able to transform a conflictual human settlement into a collaborative and caring human community. The book seeks to answer the question of whether we can induce from their 'way of doing things' a model of civic entrepreneurship and leadership that can inspire people in profit, non-profit and public organizations. It also examines the extent to which the will to serve is compatible with the will to maximize profit or the will to gain economic, political or religious power. Furthermore, it asks how far different spiritual traditions create different models and examples of servant leadership and social entrepreneurship. This book will be of interest to researchers working in the fields of business ethics, business spirituality and corporate social responsibility.

Il mercato e il dono Nov 30 2021 Il tema cruciale del libro è l'invenzione del capitalismo e dei suoi diversi «spiriti»: quello protestante e quello cattolico. In particolare l'autore ricostruisce le ragioni storiche e filosofi che, di matrici nordiche, che hanno portato al capitalismo attuale. Perché il modello latino dell'economia sociale o civile ha avuto diversa sorte? L'idea smithiana di scambio economico come reciproca indifferenza e quella di mercato come luogo delle relazioni anonime e impersonali reggono ancora l'intero impianto dell'economia contemporanea. Si è passati dalla condanna dello «sterco del demonio o mammona» al culto del denaro, trasformato in una vera e propria religione. I capitalismi, però, non sono tutti uguali – o almeno non lo erano fino a un'epoca recente. L'Europa, in particolare, aveva generato una sua propria via al capitalismo. Un capitalismo sociale, un'economia di mercato civile che dobbiamo riscoprire di fronte ai fallimenti del capitalismo finanziario.

Corporate Management in a Knowledge-Based Economy Sep 16 2020 Corporate Management in a Knowledge-Based Economy traces the evolution of corporate governance over time, with a particular focus on the changing nature of power. The control of scarce resources used in production materials, labour and capital has evolved considerably over the past centuries, with government, landowners, non-owner managers, and institutional investors acting as controlling powers at different points in time. In order to appropriately protect the various, and changing, stakeholders, the system of corporate governance has also developed over the years a process that continues to the present. In today's knowledge-based economy, with the rising importance of intangible assets, a new corporate management paradigm is needed. This book incorporates theoretical work as well as practical applications to analyse these developments and explore emerging trends of the 21st century. It examines how the pursuit of profit maximization has resulted in governance failures and it focuses on the prospective role of business ethics (once again in the spotlight following the credit crisis) in helping reform flawed governance structures. It argues that, in the long term, a system based on ethics can maximize social responsibility, customer satisfaction, human capital development and economic targets.

L'economia civile integrale e la primavera delle comunità locali Jun 18 2023 Il presente volume vuole offrire un contributo al dibattito sull'insostenibilità del modello di sviluppo. Questo tema, affrontato più volte in sede internazionale, nell'ambito delle Conferenze ONU, è giunto a un momento di svolta con l'adozione dell'Agenda 2030, con la quale si indica la strada verso modelli di economia e di società più sostenibili, in una accezione ampia di sostenibilità, riconoscendo, di fatto, ufficialmente i limiti del modello di sviluppo attuale. Il testo si rivolge a un pubblico ampio, al fine di stimolare la consapevolezza e la coscienza critica rispetto a questioni fondamentali per la qualità della vita e per il futuro dell'umanità e del pianeta. Ma, soprattutto, portando all'attenzione alcuni "casi studio" di esperienze trasformative del modello di sviluppo economico, realizzate in contesti locali difficili, vuole anche lanciare il messaggio che modelli alternativi sono possibili partendo dalle "sperimentazioni dal basso", dalle

“primavere delle comunità locali” promosse da organizzazioni di Terzo Settore e di cittadinanza attiva. Un incoraggiamento alle donne e agli uomini impegnati quotidianamente e, molto spesso, volontariamente nel terzo settore e in forme di cittadinanza attiva affinché continuino nella loro significativa e concreta testimonianza di un cambiamento dal basso, in direzione del bene comune.
