**Systematics and Evolution** Nov 22 2022 This volume includes treatments of systematics and related topics for both fungi and fungus-like organisms in four eukaryotic supergroups, as well as specialized chapters on nomenclature, techniques and evolution. These organisms are of great interest to mycologists, plant pathologists and others, including those interested in the animal parasitic Microsporidia. Our knowledge of the systematics and evolution of fungi has made great strides since the first edition of this volume, largely driven by molecular phylogenetic analyses. Consensus among mycologists has led to a stable systematic treatment that has since become widely adopted and is incorporated into this second edition, along with a great deal of new information on evolution and ecology. The systematic chapters cover occurrence, distribution, economic importance, morphology and ultrastructure, development of taxonomic theory, classification and maintenance and culture. Other chapters deal with nomenclatural changes necessitated by revisions of the International Code of Nomenclature for algae, fungi and plants, including the elimination of separate names for asexual states, as well as methods for preservation of cultures and specimens, character evolution and methods for ultrastructural study, the fungal fossil record and the impact of whole genomes on fungal studies.

**Ancient Hunting Strategies in Southern South America** Jul 27 2020

This book presents the state of the art for the studies of strategies and tactics for the procurement of preys in Argentina in different regions and chronologies (from the end of the Pleistocene until historic moments). The chapters are related to the performance of these practices in hunter-gatherer, shepherd and farmer societies. From the environmental point of view, they show cases in diverse areas such as plains, mountains, forests, sea coast, steppes and puna. Likewise, the range of preys considered includes ungulates (camelids and deer), runner birds (*Rhea pennata*) and minor prey (mammals and fish). The book is aimed at professionals and students of archaeology interested in the analysis of tactics and strategies for prey capture. Every chapter offers an important contribution in theoretical, methodological and technical terms. In addition, these works possess a high comparative value on study cases of very different chronologies and environments of the Southern hemisphere. This book is a result of the 1st Workshop "Strategies and tactics in order to obtain preys in the past: its discussion from the integration of different lines of evidence" which was conducted in San Rafael, Mendoza, Argentina, between the 8th and 10th of August, 2018.

**Self-Building** Jul 07 2021 This book deals about the Islamic Gnosticism and present a comprehensive narrative about the Theoretical Gnosticism (Irfan-e-Nazari). In accordance with Islamic Ideology the most exalted aim of God and his divinely appointed prophets is the training and guidance of human being in their spiritual journey from earthly temporary abode towards the eternal Gods Celestial-Kingdom. The main contents of the book as mentioned earlier are the etiquette and instructions of Gnostic journey, ways and manners of servitude, detailed descriptions of deeds and worships that must be performed by a wayfarer, and what sort of behaviors and restrictions they must practice in order to attain the desired results. The book consists of preface and three parts covering the following topics: Self-purification, Human Virtues, What to be?, Heart in Qur'an, Hard-heartedness, Self-refinement, Self-struggle, Egotism, Worldliness, Piety, Characteristics of the Pious, Repentance or Self-Cleansing, Training and Perfection of Self, Faith, Means of Achieving Perfection and Gods Nearness, Invocations, Instructions, Obstacles of the Path, Nourishment of Moral Virtues, Righteous Deeds etc. The most prevalent misunderstanding

about Islamic Mysticism which must be clarified is that relinquishment of worldly involvement, seclusion, and monasticism are not prerequisites for undertaking a spiritual migration towards God-Almighty; on the contrary, as it would be shown in the later part of this book, Islam demands from its followers that while living among the people a normal social life discharging the individual and collective obligations, they shouldnt be negligent of their own selves and must pay special attention towards their spiritual purification.

**The Dog Who Spoke and More Mayan Folktales** Jun 05 2021 In the delightful Mayan folktale *The Dog Who Spoke*, we learn what happens when a dog's master magically transforms into a dog-man who reasons like a man but acts like a dog. This and the other Mayan folktales in this bilingual collection brim with the enchanting creativity of rural Guatemala's oral culture. In addition to stories about ghosts and humans turning into animals, the volume also offers humorous yarns. Hailing from the Lake Atitlán region in the Guatemalan highlands, these tales reflect the dynamics of, and conflicts between, Guatemala's Indian, Ladino, and white cultures. The animals, humans, and supernatural forces that figure in these stories represent Mayan cultural values, social mores, and history. James D. Sexton and Fredy Rodríguez-Mejía allow the thirty-three stories to speak for themselves—first in the original Spanish and then in English translations that maintain the meaning and rural inflection of the originals. Available in print for the first time, with

a glossary of Indian and Spanish terms, these Guatemalan folktales represent generations of transmitted oral culture that is fast disappearing and deserves a wider audience.
