Inland & Maritime Waterways & Ports Feb 21 2023 *Inland & Maritime Waterways & Ports: Design, Construction, and Operation* covers the proceedings of the technical sessions in the 25th Permanent International Association of Navigation Congress, held in Scotland. This book is organized into two sections encompassing 10 chapters. The first section deals first with means for the protection of banks and bottom waterways against the attack by currents and waves, including those generated by ships. These topics are followed by discussions on methods of increasing waterways capacity and safety; sedimentation reduction and improving and maintaining navigable depths in alluvial channels; integration of ocean-coastal-inland navigation; and improvements of maritime ports and inland terminals. The second section starts with discussions of the developments in the construction of ships, navigational aids, waterways and harbors, traffic management and installations, with particular emphasis on risk analysis and safety criteria regarding transportation, unloading, and storage of liquefied natural and petroleum gases. Other topics covered in this section include economic optimization of the whole dredging cycle; cargo handling systems and equipment; design and construction of port facilities and arrangement of quay platforms; and coastal erosion caused by harbor works and corrective measures. This book will prove useful to design and navigation engineers and researchers.

Proceedings of the Second International Clean Air Congress Jan 08 2022 *Proceedings of the Second International Clean Air Congress* documents the information and experiences exchanged at the Second International Clean Air Congress held in Washington, D.C. on December 6-11, 1970. This book compiles technical papers of five representatives from the national non-governmental air pollution prevention association of Argentina, France, West Germany, Japan, and the United Kingdom that aims to determine how they might work together cooperatively to contribute to the conservation of the world's air resources. The topics discussed include the Swedish experiences on sensory evaluation of odorous air pollutant intensities; chronic fluoride intoxication due to air pollution; and organic ozone reactions as singlet oxygen sources. The emission and control of air pollutants from the incineration of municipal solid wastes and gaseous plume diffusion about isolated structures of simple geometry are also covered. This publication is a good reference for environmentalists and students interested in the scientific, technological, and administrative aspects of air pollution control.

Propriété physiques du béton et de ses constituants Jul 02 2021 À l'état durci, le béton est un matériau poreux complexe. Ses propriétés

d'usage (performances mécaniques ou thermiques, durabilité...) sont liées à sa structure poreuse qui elle-même dépend de l'arrangement des grains à l'état frais. Étudiant les propriétés des matériaux granulaires et celles de leurs mélanges, cet ouvrage propose différents outils permettant au formulateur de concevoir des bétons de façon innovante. Afin de décrire les méthodes de caractérisation des matériaux, il analyse les propriétés physiques sur lesquelles elles reposent et établit ainsi leurs limites. Il développe également les notions de porosité et de surface spécifique et présente les propriétés de transport des bétons (diffusion et perméation). Chaque chapitre se termine par plusieurs exercices permettant d'assimiler les connaissances théoriques présentées et de les appliquer à des problèmes concrets de génie civil.

The English Reports: King's Bench Division Jun 20 2020 V. 1-11. House of Lords (1677-1865) -- v. 12-20. Privy Council (including Indian Appeals) (1809-1865) -- v. 21-47. Le livre de l'interne en réanimation Jan 20 2023 Le livre de l'interne en réanimation est un guide indispensable à l'interne et au chef de clinique en réanimation. Pratique et synthétique, il rassemble en 27 chapitres toutes les pathologies susceptibles d'être prises en charge en réanimation médicale, chirurgicale ou polyvalente. Sont traités : - les différentes techniques de réanimation ; - la ventilation mécanique ; - tous les types de pathologies infectieuses, métaboliques, circonstanciées ; - les états de choc ; - les troubles de l'équilibre hydro-électrolytique, de l'endocrinologie, de l'appareil digestif ; - la chirurgie cardiaque et la neurochirurgie ; - les bases de réanimation pédiatrique ; mais aussi la réanimation en traumatologie, en obstétrique, la toxicologie, les prélèvements d'organe, des notions d'organisation des soins et d'éthique... Ce livre est agrémenté de nombreux schémas, arbres décisionnels et tableaux ainsi que d'un index facilitant la recherche par mots-clés. Cet ouvrage s'adresse aux étudiants préparant l'examen classant national, aux internes de médecine d'urgence, d'anesthésie-réanimation ou de réanimation médicale et aux praticiens de toutes spécialités.

Dietetics in the 90s Feb 09 2022

Syndrome de Fatigue Chronique / Chronic Fatigue Syndrome Aug 15 2022 G Serratrice Les organisateurs de ce symposium en ont choisi le titre: {laquo} Syndrome de fatigue chronique {raquo}, titre dont chacun des termes doit être défini avec précision, ce qui, paradoxalement, n'est pas aisé. Syndrome: ensemble de symptômes ou de signes s'observant dans des états pathologiques différents mais ne déterminant pas à eux seuls la cause de la maladie. Fatigue: symptôme plus ou moins exprimé, moteur, intellectuel, sensoriel, sexuel selon les cas. Mais aussi signe traduit par l'incapacité à maintenir une force initiale pendant un effort continu. Ceci sépare la fatigue de la faiblesse, qui est l'incapacité à produire une force. Stricto sensu, l'asthénie et la fai blesse sont équivalentes. Mais l'usage, tout au moins en France, fait souvent confondre asthénie et fatigue. Chronique enfin. C'est sans doute sur cet adjectif que s'accumulent les plus grandes ambiguïtés. La simple lecture du programme d'aujourd'hui indique la difficulté de se situer entre une définition stricte - chronique signifiant {laquo} permanent {raquo}, {laquo} qui dure {raquo} - et l'usage, surtout dans l'acception anglo-américaine, qui réserve l'appellation de chronique à une forme

particulière de fatigue, parfois dite post-virale. En fait, il convient, pour une claire compréhension, de séparer ce que l'on pourrait nommer les états de fatigue chronique {laquo} déterminés {raquo} dans leur mécanisme et ceux qui restent {laquo} indéterminés {raquo}. A l'évidence, les états dont le mécanisme est déterminé sont très diversifiés.

International Law Studies Sep 23 2020 Discussions by the Naval War College classes on international law situations.

Les sciences humaines dans le centre de l'art May 24 2023 Cet ouvrage propose de décrypter le rôle des sciences humaines dans l'art contemporain au fil de son développement et de son institutionnalisation en France. Cette approche communicationnelle s'intéresse aussi bien aux pratiques qu'aux discours, aux dispositifs (comme l'exposition) qu'aux représentations (en particulier des sciences). Comment observer les sciences humaines dans le champ artistique, alors que leur réception, leurs réappropriations, ne sont pas visibles de manière immédiate ? Comment rendre compte d'un usage collectif de ces savoirs et, donc, les situer dans des règles et normes partagées par les acteurs de l'art contemporain ? Comment repérer et analyser les manières différenciées d'y recourir dans ce cadre commun ? Par l'observation et l'examen détaillé des centres d'art et des expositions d'art contemporain, *Les sciences humaines dans le centre d'art* vise à éclairer la circulation sociale des savoirs et les manières de l'étudier.

Twenty-Seventh International Congress on Large Dams Vingt-Septième Congrès International des Grands Barrages Jun 13 2022 The International Committee on Large Dams (ICOLD) held its 27th International Congress in Marseille, France (12-19 November 2021). The proceedings of the congress focus on four main questions: 1. Reservoir sedimentation and sustainable development; 2. Safety and risk analysis; 3. Geology and dams, and 4. Small dams and levees. The book thoroughly discusses these questions and is indispensable for academics, engineers and professionals involved or interested in engineering, hydraulic engineering and related disciplines.

Les Termes de la ley: or, Certaine difficult and obscure words and termes of the common lawes and statutes of this realme now in use expounded and explained. Now newly imprinted ... enlarged and augmented. With a new addition of many hundred words. [A translation of John Rastell's "Expositiones terminorum legum anglorum."] Eng.&Norm. Fr Dec 07 2021

The Histories of the International Polar Years and the Inception and Development of the International Geophysical Year Oct 05 2021 *Annals of the International Geophysical Year, Volume I: The Histories of the International Polar Years and the Inception and Development of the International Geophysical Year* covers the significant contributions of remarkable scientific enterprises known as the First and Second International Polar Years. This book is organized into three parts encompassing 39 chapters. The first part deals with the First International Polar Year, its origin, planning, and program. Considerable chapters survey the accomplishments of numerous space expeditions from various countries, including Austria, Britain, Canada, Denmark, Finland, France, Germany, Georgia, Norway, Russia, Sweden, and United States. The second part is the French translation of the information presented in the first part. The third part highlights the achievements of the Second International Polar Year in the field of geophysics. This part specifically discusses the study of the aurora, based on visual observations and spectrographic evaluation. This book will prove useful to geophysicists and researchers in the allied fields.

GERD Sep 28 2023 GERD: A New Understanding of Pathology, Pathophysiology, and Treatment transforms the assessment of

gastroesophageal reflux disease (GERD) from its present state, which is largely dependent on clinical definition and management, to a more objective scientific basis that depends on pathologic assessment. Sequential chapters in this single-author book describe the fetal development of the esophagus, the normal adult state, and the way exposure to gastric juice causes epithelial and lower esophageal sphincter damage at a cellular level. It allows recognition of the pathologic manifestations of lower esophageal sphincter damage and develops new histopathologic criteria for quantitating such damage. This understanding provides new pathologic criteria for definition and diagnosis of GERD from its earliest cellular stage. Algorithms based on measurement of sphincter damage can identify, even before the onset of clinical GERD, persons who will never develop GERD during life, those who develop GERD but remain with mild and easily controlled disease, and those who will progress to severe GERD with failure to control symptoms, Barrett esophagus and adenocarcinoma. Aggressive early intervention in the last group with the objective of preventing disease progression to its end points of uncontrolled symptoms and adenocarcinoma becomes feasible. Provides a new method of assessment of GERD that has never previously been presented, creating a pathway to control Describes a new pathologic test based on standard histology that can define lower esophageal sphincter damage Sequential chapters outline the way GERD progresses from the perspective of the amount of damage to the lower esophageal sphincter Provides new avenues of clinical research and technologic innovations in pathology and treatment aimed at preventing esophageal adenocarcinoma

Rabies in the Tropics Dec 27 2020 Rabies-as in former times-is still today a major killer affecting man and animals especially in many tropical and sub-tropical countries of Asia, Africa and South America. Some 50,000 people and literally millions of animals suffer and die of this disease each year. This dramatic death toll and the enormous economic losses which ensue are nowadays un tolerable and no longer justified. Worldwide strategy for Rabies control has been established and the World Health Organization recently formulated an elimination programme for dog Rabies. Methods for wildlife Rabies control are also under way. For the realisation of control campaigns, careful epid emiological analysis is necessary. This involves: - antigenical characterisation of Rabies Virus Strains using monoclonal antibodies, - observation of foci, - follow-up of the front wave of the disease, - specific ecology of target populations and Rabies carrier species. The financial point of view of such campaigns has of course to be ascertained. It is for the first time ever that representatives and specialists of different biological disciplines from nearly 70 countries have had the opportunity in Tunis to discuss these important issues and to evaluate, on the basis of their own experimental results and personal epidemiological observations, the possibility of ultimate elimination of Rabies in tropical and sub-tropical countries and also to contribute their share for a better understanding of the natural history of this disease.

Studies in the History of the Exact Sciences in Honour of David Pingree Dec 19 2022 This collection of essays reflects the wide range of David Pingree's expertise in the scientific texts (above all, concerning astronomy and astrology) of Ancient Mesopotamia, Greece, India, Persia, and the medieval Arabic, Hebrew and Latin traditions. Both theoretical aspects and the practical applications of the exact sciences-in time keeping, prediction of the future, and the operation of magic-are dealt with. The book includes several critical editions and translations of hitherto unknown or understudied texts, and a particular emphasis is on the diffusion of scientific learning from one culture to another, and through time. Above all, the essays show the variety and sophistication of the exact sciences in non-Western societies in pre-modern times.

Histamine and Anti-Histaminics Mar 10 2022 It was an agreeable, though strenuous task to edit a book with so many distinguished contributors, on a subject to which I have given half of my life. In 1959, when Prof. O. EICHLER invited me to edit a book on "Histamine and Anti histaminics", as a supplement to HEFFTER'S Handbuch, I thought the task could be done in three years. Now, five years are gone and only half is fulfilled. Though, so far as the "Histamine" part of the book is concerned, the initial plan has been followed very closely, we had to leave the Anti-histaminics for another volume of unpredictable dimensions. In 1924, eight pages inserted in a Chapter on M utterkorn, by ARTHUR R. CUSHING were considered enough, in vol. II, Part II, pg. 1319-1326, of the Handbuch. Now, 922 pages did not suffice to cover all the aspects of the subject. Especially in the last few years the subject has expanded in so many directions, that the antihistaminic part had to be excluded from the present volume. Possibly, another thousand pages will be necessary to cover what remains of the subject. In planning the book we made great use of the excellent and classical mono graph by W. FELDBERG and E. SCHILF on Histamin, published by Julius Springer, in 1930.

Recommandations relatives à des prescriptions techniques harmonisées à l'échelle européenne applicables aux bateaux de navigation intérieure Aug 27 2023 Ces Recommandations établissent un régime paneuropéen de prescriptions techniques applicables aux bateaux de navigation intérieure transportant des marchandises et des passagers internationalement. Elles sont le résultat des efforts des gouvernements pour unifier les règlements divergents en vigueur dans différentes organisations intergouvernementales et dans les pays membres de la CEE-ONU. Les Recommandations fixent également des règles strictes en ce qui concerne la pollution de l'air et des eaux et la réduction du bruit, des normes acceptées au niveau international relatives à l'équipage minimal des bateaux ainsi qu'au temps de travail et de repos des bateliers.

Epileptic Syndromes in Infancy, Childhood and Adolescence Nov 06 2021 This text examines epileptic syndromes in infancy, childhood and adolescence.

Méthodes de mesure de la pression artérielle Jun 25 2023 La mesure de la pression artérielle permet une appréciation globale de l'hémodynamique cardio-vasculaire. Elle constitue aussi l'élément de base pour le dépistage et le traitement de l'hypertension artérielle. La variabilité spontanée de la pression artérielle justifie la répétition de sa mesure dans différentes conditions : consultation, auto-mesure, mesure ambulatoire, à l'effort, etc. Cette diversification a entraîné le développement d'un grand nombre d'appareils alliant la souplesse de l'électronique et la grande capacité des microprocesseurs. Leur meilleure adaptation aux conditions de mesure a facilité une plus grande diffusion. De ce fait, une révision et une redefinition des normes actuelles de l'hypertension artérielle sont souhaitées en fonction de ces nouvelles mesures. Ainsi, l'omnipraticien se trouve de plus en plus confronté à la fois à ses propres mesures et à celles effectuées dans ces nouvelles conditions. Devant cette multitude de chiffres et pour éviter toute erreur d'interprétation, il paraît indispensable, pour tous, de mieux connaître la signification de chacune de ces méthodes et leur éventuel intérêt en pratique clinique. C'est le but du livre que présente le Docteur Asmar aujourd'hui. Professeur Michel Safar Ce livre a été réalisé sous l'étroite bienveillance de Monsieur le Professeur Michel Safar. L'auteur remercie : - Le Professeur M. Safar et le Professeur P. -F. Plouin pour leur aide à la réalisation de cet ouvrage. - Le Docteur D. Vasmant pour sa contribution à ce travail.

International Law Situations with Solutions and Notes. 1911 Oct 25 2020

Arbidol: an antiviral against globally prevalent viruses Apr 11 2022 Antiviral drug development has led to significant advances in the control of globally prevalent viral infections by the hepatitis C (HCV) and the human immunodeficiency viruses. Nonetheless, there are current gaps in the armamentarium against global viral infections due to some herpes viruses, the hepatitis B virus, and the deadly filovirus Ebola and arenavirus Tacaribe responsible of outbreaks of hemorrhagic fever in emerging countries. Arbidol (ARB) is a cost-effective antiviral with broad-spectrum activity, administered for decades in Russia and China against flu. We showed that ARB inhibits HCV infection, and has potent antiviral activity against the Ebola, Tacaribe, hepatitis B and human herpes-8 viruses. Since these viruses have divergent life cycles, we posit that ARB may exhibit varied modes of action against different viruses. Careful dissection of molecular mechanisms of action of ARB against HCV and the Ebola virus revealed that ARB blocked viral entry. ARB might, therefore, constitute a pharmacological approach against globally prevalent viruses, and an affordable molecule for emerging countries in urgent need for effective antiviral therapies.

Proteomics Feb 26 2021 "Proteomics" is an introduction to the exciting new field of proteomics, an interdisciplinary science that includes biology, bioinformatics, and protein chemistry. The purpose of this book is to provide the active researcher with an overview of the types of questions being addressed in proteomics studies and the technologies used to address those questions. Key subjects covered in this book include: "Proteomics" provides a starting point for researchers who would like a theoretical understanding of the new technologies in the field, and obtain a solid grasp of the fundamentals before integrating new tools into their experiments. Written with attention to detail, but without being overwhelmingly technical, "Proteomics" is a user-friendly guide needed by most biologists today.

Biomedical Nanomaterials Jun 01 2021 This book characterizes how to design and synthesize nanomaterials of an organic and mineral nature. The book also discusses the visualization of developed nanomaterials and their bio-applications, as well as describes the biomedical effects and environmental impact of nanomaterials. This is an ideal book for students studying biomedicine or the life sciences, as well as researchers and professionals in medicine, environmental protection, biotechnology, agriculture, and the food industry. More specifically, this book addresses the important nanomaterials and nanobiotechnologies that are used in those fields in biomedicine and life sciences.
