Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Meis that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about

the school is to be amazed. In 1999, the school debuted a programme that taught *The 7 Habits of Highly Effective People* to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well. This book recovers Aristotle's understanding of the roles of rhetoric and prudence in public leadership, comparing it to the other major political theories of leadership: utilitarianism, as advocated by J.S. Mill, and duty-ethics, as advocated by Immanuel Kant. *Project Leadership*, the classic, best-selling textbook originally by Wendy Briner, Michael Geddes and Colin Hastings, anticipated so many of the changes in approaches to project management that are now regarded as mainstream - not least the focus on behaviours. The *Third Edition* by experts Sarah Coleman and Donnie MacNicol has been substantially rewritten, introducing new material and experience reflecting the transformation that has taken place in the world of projects and leadership. *Project Leadership Third Edition* looks at the nature of the leadership role in projects, why it is significant and how it impacts the processes throughout the project life-cycle from shaping and scoping, start up and delivery through to project closure. The authors put considerable emphasis on a set of core capabilities around the themes of vision and

strategy, relationship building, communication and engagement. The book also focuses on building personal and organizational project leadership capability including models, tools and diagnostics drawing on experiences of working with projects and organizations from multiple sectors and across the globe. The Foreword and Endorsements have been provided by industry leaders. Sarah Coleman and Donnie MacNicol have retained and built on the wonderful range of simple, imaginative and very applicable models and perspectives developed by the previous authors. Every project leader, aspiring project leader and organization with project management communities should own and use a copy of this book. Now with an all-new chapter on Followership! Adopted at more than 1600 institutions in 89 countries and translated into 13 different languages, this market-leading text successfully combines an academically robust account of the major theories and models of leadership with an accessible style and special emphasis on how leadership theory can inform leadership practice. Peter G. Northouse uses a consistent structure for each chapter, allowing students to easily compare and contrast the various theories. Case studies and questionnaires provide students with practical examples and opportunities to deepen their personal understanding of their own leadership style. *Leadership: Theory and Practice, Eighth Edition* provides readers with a user-friendly account of a wide range of leadership research in a clear, concise, and interesting manner. "Calls for reform of the public service are routinely heard from politicians, private sector interests, civil society organisations and public servants themselves. Public service reform programmes have become the norm in many countries, including Ireland. But the overheated rhetoric that

usually accompanies the launch of such programmes is often rapidly followed by the disappointment of unfulfilled ambition and apparent failure." "This book looks at the realities of public service reform in Ireland today. It begins with the conviction that reform is an ongoing process of adaptation to the rapidly changing requirements of society, rather than anything that can be captured in a once-off programme. It recognises the achievements of recent reform efforts, and it sets out some key elements that the authors believe should be part of the next phase of reform. In particular it identifies specific actions that are needed to improve accountability for performance, to adapt organisational structures to contemporary needs, and to put in place the vital leadership capability. The authors recognise that other actions will also be required in the short term, and that the process of adaptation will rapidly move on to other challenges, but they insist that the next phase of reform must, as a priority, address at least these three areas." "The book draws on management theory, international best practice and, not least, the authors' own experience at the frontline of public service delivery. Its proposals are practical and immediate, but are also well grounded in a vision of a high-performance public service that can meet the most demanding expectations of today's citizens."--BOOK JACKET.
