**Media and the Making of Modern Germany** Mar 24 2023 Few developments in the industrial era have had a greater impact on everyday social life than the explosion of the mass media and commercial entertainments, and none have exerted a more profound influence on the nature of modern politics. Nowhere in Europe were the tensions and controversies surrounding the rise of mass culture more politically charged than in Germany—debates that played fatefully into the hands of the radical right. Corey Ross provides the first general account of the expansion of the mass media in Germany up to the Second World War, examining how the rise of film, radio, recorded music, popular press, and advertising fitted into the wider development of social, political, and cultural life. Spanning the period from the late nineteenth century to the Third Reich, *Media and the Making of Modern Germany* shows how the social impact and meaning of 'mass culture' were by no means straightforward or homogenizing, but rather changed under different political and economic circumstances. By locating the rapid expansion of communications media and commercial entertainments firmly within their broader social and political context, Ross sheds new light on the relationship between mass media, social change, and political culture during this tumultuous period in German history.

**Musikerfahrung und Sozialisation - Mit Musik geht alles besser** Mar 12 2022 Diplomarbeit aus dem Jahr 2000 im Fachbereich Pädagogik - Pädagogische Soziologie, Note: 1,0, Universität Wien (Erziehungswissenschaften), Sprache: Deutsch, Abstract: ABSTRACT - This paper deals with experiences with music and socialization. It shows the influence of music on human development, especially in childhood and adolescence. A leading thesis of this paper is that with music everything works better. This question is answered by the reflections of situations in which music helps to a positive result. The functions of music, music as a background, relaxation with music, the coping with conflict situations, music as a social contact, help for self-realization, music and its symbol function, fun and pleasure with music, the annoyance and disturbance because of music and mutual dependence of music and society are specifically explained in this paper. Special attention relating to this lies in adolescence. The "new type of socialization" is set in combination with these functions. This new type shows the strong self-admiration of youth. A very important aspect of this paper is the development of identity, which supports the development of self and individuality. That is the reason, why a special interest lies in these aspects. Therefore the process of "Separation and Individuation" by MAHLER and the "Development of Identity" by ERIKSON, which explain the essential stages of development in childhood, are shown in this paper. They play an important role, especially in the process of socialization. The models by JOSSELSN and ERIKSON build up on these aspects. They explain the development of identity in adolescence and important facts of socialization. The leading

question of the importance of experiences with music for the process of human socialization is regarded with respects to these aspects. Another try is to compare music with society and to project the developments in society on the development of music. The dependent relationship of music, society and politi

**International History of the Recording Industry** May 26 2023 This book explores the fascinating world of the record business, its technology, the music and the musicians from Edison's phonograph to the compact disc. The great artists - Caruso, Toscanini, Louis Armstrong, Elvis Presley and their successors - all achieved fame through the medium of records, and in turn have influenced the recording industry. But just as important are the record producers, those invisible figures who decide from behind the scenes how a record will sound. The history of recording is also the history of record companies: the book follows the vicissitudes of the multinational giants, without neglecting the small pioneering labels which have brought valuable new talents to the fore.

Film Music in the Sound Era Jun 27 2023 Film Music in the Sound Era: A Research and Information Guide offers a comprehensive bibliography of scholarship on music in sound film (1927–2017). Thematically organized sections cover historical studies, studies of musicians and filmmakers, genre studies, theory and aesthetics, and other key aspects of film music studies. Broad coverage of works from around the globe, paired with robust indexes and thorough cross-referencing, make this research guide an invaluable tool for all scholars and students investigating the intersection of music and film. This guide is published in two volumes: Volume 1: Histories, Theories, and Genres covers overviews, historical surveys, theory and criticism, studies of film genres, and case studies of individual films. Volume 2: People, Cultures, and Contexts covers individual people, social and cultural studies, studies of musical genre, pedagogy, and the Industry. A complete index is included in each volume.

The development of community music in Munich May 22 2020 In German music education, the focus has historically been on formal music education in schools. Participatory music making in the community, or community music, has so far received little attention in

theory or practice. This thesis constitutes the first in-depth analysis of the development of community music in Germany, conducted using empirical data and literature analysis. The development of the Munich Community Music Action Research Group is highlighted as an example of the potential of community music in the German context. The research shows that the context-specific development of a framework for community music in Germany, within the community music spirit of participation reflected in the action research methodology, gives voice to and connects community musicians, and has contributed considerably to the development of community music theory and practice, not only in Munich, but across Germany. Alicia de Bánffy-Hall arbeitet seit 15 Jahren europaweit als Community Musician in Forschung und Praxis. Projekte u.a. mit Orchestern, Museen, Schulen, Gemeindezentren und freie Projekte. Seit 2016 ist sie an der katholischen Universität Eichstätt-Ingolstadt am MA inklusive Musikpädagogik/Community Music tätig. Seit 2018 Mitglied des Editorial Boards des International Journal of Community Music. Alicia de Bánffy-Hall has worked in community music practice and research for over 15 years: with community centres, nurseries, schools, and arts organisations. In 2016, she accepted a post as a lecturer at the University of Eichstätt-Ingolstadt where she established the first MA in inclusive music education/community music in Germany. In 2018, she joined the editorial board of the International Journal of Community Music.

*Music in World War II* Jul 28 2023 How can music withstand the death and destruction brought on by war? Global conflicts of the 20th century fundamentally transformed not only national boundaries, power relations, and global economies, but also the arts and culture of every nation involved. An important, unacknowledged aspect of these conflicts is that they have unique musical soundtracks. *Music in World War II* explores how music and sound took on radically different dimensions in the United States and Europe before, during, and after World War II. Additionally, the collection examines the impact of radio and film as the disseminators of the war's musical soundtrack. Contributors contend that the European and American soundtrack of World War II was largely one of escapism rather than the lofty, solemn, heroic, and celebratory mode

of "war music" in the past. Furthermore, they explore the variety of experiences of populations forced from their homes and interned in civilian and POW camps in Europe and the United States, examining how music in these environments played a crucial role in maintaining ties to an idealized "home" and constructing politicized notions of national and ethnic identity. This fascinating and well-constructed volume of essays builds understanding of the role and importance of music during periods of conflict and highlights the unique aspects of music during World War II.

**Effective Sustainability Communication for Music Festivals and**

**other Mega-Events** Nov 08 2021 Festivals are an important part of the

music event industry, especially for young adults. But compared to the beginnings, their meanings have changed: Attendees want to celebrate without any compromises. However, today mankind is confronted with the greatest sustainability challenges, which are not satisfactorily tackled. Still, with a rising awareness of these issues, companies' interest in including sustainability issues in their communications strategy has increased. This study attempts to explore how a Sustainability Communication (SC) concept needs to be designed to reach fans of music festivals and influence them towards a more sustainable behaviour. For that purpose, it deals with sustainability management, background information about SC and the attendees' needs. Moreover, it shows rays of hope for this issue in the festival landscape. Afterwards the results of a survey conducted among festival fans (more than 750 participants), examining their attitude regarding sustainability issues, were assessed. This study aims to equip the reader with a thorough knowledge of the potential of Sustainability Communication within and through festivals, as well as give an insight into how a SC strategy must consider the needs of fans to realize a more sustainable event.

Dislocated Memories May 14 2022 This title draws together three significant areas of inquiry: Jewish music, German culture, and the legacy of the Holocaust. Jewish music - a highly debated topic - encompasses a multiplicity of musics and cultures, reflecting an inherent and evolving hybridity and transnationalism. German culture refers to an equally diverse concept that, in this volume, includes the various cultures of prewar Germany, occupied Germany, the divided and reunified Germany, and even 'German (Jewish) memory,' which is not necessarily physically bound to Germany.
