**Logistics Management in the 21st Century and Beyond** Feb 22 2023 In this ever-evolving world, the essence of logistics management continues to transform, driven by a myriad of factors such as technological advancements, globalization, and changing consumer demands. As we traverse the 21st century and beyond, the logistics landscape is rapidly morphing into a complex network of interconnected systems that require astute management for optimal efficiency and effectiveness. This book, "Logistics Management in the 21st Century and Beyond," aims to provide a comprehensive exploration of the current trends, challenges, and future potentials of logistics management. In the 21st century, logistics management has stepped out of the shadow of being merely a support function. Today, it is recognized as a strategic business function that directly impacts a company's bottom line and its competitive positioning. The era marked by the rise of e-commerce giants, real-time tracking, and just-in-time delivery systems has set new parameters for logistics management, pushing its boundaries beyond traditional norms. However, the advent of these developments also ushers in various challenges. Environmental concerns, demand for same-day or even same-hour delivery, a shifting supply chain due to global

politics, and the need for data-driven decision-making are just a few of the hurdles that logistics managers face in the current century. This book delves into these issues, offering insights into managing logistics in this complex era and strategies to navigate these challenges effectively. Moreover, this book also paves the way to the future, exploring the potential impacts of emerging technologies such as blockchain, artificial intelligence, and autonomous vehicles on logistics management. It also discusses the importance of sustainability and resilience in logistics, as climate change and global crises like the COVID-19 pandemic have demonstrated the need for logistics systems that can withstand shocks and adapt to new circumstances. "Logistics Management in the 21st Century and Beyond" is a guide to the current state of logistics management and a roadmap to its future. It is intended for logistics professionals, business managers, students, and anyone interested in understanding the dynamic field of logistics management. It provides a wealth of knowledge and practical insights, highlighting the importance of logistics in our interconnected, fast-paced, and ever-changing world. Embark on this journey to unravel the complexities of logistics management in the 21st century and look beyond to foresee its future. Our exploration will lead you to the understanding that logistics, in essence, is the lifeline of the modern global economy, and its efficient and effective management is the key to thriving in this competitive era.

*A Surge from the Forest: Towards Rescuing the Africa's Giant from the Boko Haram's Clench* Mar 14 2022 Research Paper

(postgraduate) from the year 2014 in the subject Politics - International Politics - Topic: Peace and Conflict Studies, Security, grade: Post-Graduate, Obafemi Awolowo University, course: History, language: English, abstract: That Boko Haram, a Nigerian based terrorist group, has been terrorizing every part of Northern

Nigeria is no longer a new phenomenon as lives and properties are being lost on a daily basis to the insurgent's sinister activity. What is new however, is the recent onslaught of the terrorist group. In the time past, it had the habit of hiding in the forest known as 'Sambisa' from where it perpetrated its malevolence acts. However, it appears as if the carnages and horror the country has seen in recent times are not enough as the insurgent group, once believed to be hiding its face in the forest of Sambisa, is now tending towards separatist expansionism as it is laying claim to the control of some parts of the country, engaging the military in what is rapidly becoming a conventional warfare. Indeed, Boko Haram has fully changed tactics as its attack is becoming more brutal with its well-equipped sophisticated weapons. Suicide-bombers are being dispatched ahead of high-speed convoys; the dissidents showed an eagerness to die in battle rather than duck bullets. Without the airstrikes, the results would have been otherwise. Given the approach of the Nigerian politicians to this issue, this crisis may remain a recurring problem. In the middle of these crises, the Nigerian government seemed to be short of ideas on how to curtail the excesses of this deadly group and nip its activities in the bud. After a critical field-work in the crisis-prone area, this research analysis the problems and offers a far-reaching recommendations on how the crisis can be permanently dealt with.

Biafra's War 1967-1970 Mar 02 2021 Almost half a century has

passed since the Nigerian Civil War ended. But memories die hard, because a million or more people perished in that internecine struggle, the majority women and children, who were starved to death. Biafra's war was modern Africa's first extended conflict. It lasted almost three years and was based largely on ethnic, by inference, tribal grounds. It involved, on the one side, a largely Christian or animist southeastern quadrant of Nigeria which called itself Biafra, pitted militarily against the country's more populous and preponderant Islamic north. These divisions – almost always brutal – persist. Not a week goes by without reports coming in of Christian communities or individuals persecuted by Islamic zealots. It was also a conflict that saw significant Cold War involvement: the Soviets (and Britain) siding and supplying Federal Nigeria with weapons, aircraft and expertise and several Western states – Portugal, South Africa and France especially – providing clandestine help to the rebel state. For that reason alone, this book is an important contribution towards understanding Nigeria's ethnic divisions, which are no better today than they were then. Biafra was the first of a series of religious wars that threaten to engulf much of Africa. Similar conflicts have recently taken place in the Ivory Coast, Kenya, Southern Sudan, the Central African Republic, Senegal (Cassamance), both Congo Republics and elsewhere. As the war progressed, Biafra also attracted mercenary involvement, many of whom arriving from the Congo which had already seen much turmoil. Western pilots were hired by Lagos and they flew the first Soviet MiG-17 jet fighters to have played an active role in a 'Western' war. Al Venter spent time covering this struggle. He left the rebel enclave in December 1969, only weeks before it ended and claims the distinction of being the only foreign correspondent to have been rocketed by both sides: first by Biafra's tiny Swedish-built Minicon fighter planes while he was on a ship lying at anchor in Warri harbour and thereafter, by MiG jets flown by mercenaries. Among his colleagues inside the beleaguered territory were the

celebrated Italian photographer Romano Cagnoni as well as Frederick Forsyth who originally reported for the BBC and then resigned because of the partisan, pro-Nigerian stance taken by Whitehall. He briefly shared quarters with French photographer Giles Caron who was later killed in Cambodia. Prior to that Venter had been working for John Holt in Lagos. It is interesting that his office at the time was at Ikeja International Airport (Murtala Muhammed today) where the second Nigerian army mutiny was plotted and from where it was launched. From this perspective he had a proverbial 'ringside seat' of the tribal divisions that followed as hostilities escalated. Venter took numerous photos while on this West African assignment, both in Nigeria while he was based there and later in Biafra itself. Others come from various sources, including some from the same mercenary pilots who originally targeted him from the air.

Never Answer To A Whistle Apr 22 2020 It was meant to be a simple task of repossessing an executive jet from Nigeria... Mike became embroiled in a mess created by an English aristocrat involved in illegal currency dealing. At the same time, Mossad agents were plotting the kidnapping of a Nigerian diplomat in Kensington. To escape certain death from two groups of very angry Nigerians, Mike took off from Lagos International Airport, without permission, only to have the Nigerian Air Force waiting to shoot him down. They didn't succeed but Mike was arrested in The Ivory Coast where he finally landed. In a horrible twist, Mike's friends, two engineers who helped him escape, were jailed in Nigeria for two years. This incredible true story will make you hold your breath, laugh and cry!

*The Brotherhood* May 28 2023 The Brotherhood is an intriguing story of a matrix of the deadly operations of Nigerian university cult

gangs and religious groups set in one of the most populous black nation's foremost university. Capone Aboy, the head of the Black Eagles confraternity had planned to make his group the most respected and feared confraternity on campus. In order to achieve this, he had to raise funds, manipulate the political system of the Students Union Government and weaken rival confraternities. Everything was taking shape, until Sister Evelyn, a Christian fellowship leader came across his part. Although her effort to get him 'born again' was unsuccessful, a strange relationship had developed between the two. Things were going well for the confraternity until a series of errors by their hit-man triggered a bloody chain reaction which led to the death of several people, including Capone Aboy's cousin. A cult war ensued leading to a trail of blood, deaths and destruction. In the moment of victory by the Black Eagles confraternity, Capone Aboy came to realize that despite achieving his desire on campus, his life was empty, and the only thing that meant anything to him was his love for Sister Evelyn.

**Carl Gustaf von Rosen** Aug 26 2020 In medieval romance literature, a knight-errant is a traveller of noble birth in search of adventures in which to exhibit military skill, valour and generosity. Count Carl Gustaf von Rosen was all that, although he did not explicitly look for adventures. His forty-year flying career took him to different parts of the world, giving him a bird's-eye view of the unfair distribution of global wealth. He started as a Red Cross pilot in Ethiopia during the Italian war of 1935-1936, he built an Air Force for Emperor Haile Selassie from 1946 to 1956, and he experienced the painful birth of new African states after the colonial era. He became personally involved in the Nigerian conflict on the side of the breakaway, starving Biafra, creating a tiny air unit of rocket-armed, 100 HP trainer aircraft, to destroy, on the ground, the aggressive Nigerian military jets flown by mercenaries announcing

their presence over Biafra with: “This is Genocide calling”, before dropping the bombs. In the early 1970’s when drought hit Ethiopia, von Rosen launched a method of food drops from the air to starving mountain villagers. His son Eric and daughter-in-law Heli worked with him for two years, witnessing the revolution, the Red Terror of the military junta, and the growing conflict between Ethiopia and Somalia; both claiming possession of the semi-desert region of Ogaden. Ultimately, this conflict caused the death of Carl Gustaf von Rosen. He was killed in a Somali attack on Gode in July 1977. Heli von Rosen tells the story.

**The Politics of Post-War Demobilisation and Reintegration in Nigeria** Apr 02 2021 With an increasing international interest in post civil war demobilisation and reintegration, especially in Africa, Ojeleye presents a well timed body of knowledge on the Nigerian civil war. Moreover, this book provides an in-depth study of the modalities and processes of the demobilisation and reintegration exercises carried out at the end of the Nigerian civil war and assesses their implications for national politics in the West African nation. The author identifies the political, socio-economic and cultural background to the Nigerian civil war and discusses the central theme of demobilisation, disarmament and reintegration (DDR) in Nigeria against the backdrop of the policy of the country's post war reconstruction, reconciliation and rehabilitation exercise (the 3Rs). Though the central theme is Nigeria, it compares the

demobilisation and reintegration exercise in Nigeria with other attempts in Sub Sahara Africa by highlighting the important deviations and drawing some conclusions on the Nigerian experience. It also touches on issues relating to international involvement and intervention in civil wars and the roles of the African Union, the Commonwealth of Nations and the United Nations.

Indeed, the speedy attainment of allied air control over Iraq and what that allowed allied air and space assets to accomplish afterwards by enabling the prompt achievement of the coalition's military objectives on the ground marked, in the view of many, the final coming of age of airpower. [...] The Chapter concentrates on the development and capacity of the NAF in the context of its assets, and its role in new emerging face of warfare in the 21<sup>st</sup> century. [...] Thus, this chapter will speculate in the challenges facing the NAF in the light of the recent dramatic changes in the international, regional and national environment within which it exists, it will also try to investigate the application, vulnerabilities and doctrine of the NAF in the context of the security architecture of the early -mid 21<sup>st</sup> century and the argumentation it may entail. [...] THE CHANGING SECURITY ENVIRONMENT The uncertainty of events in the former Soviet-Union, Eastern and Central Europe and the war in the Gulf would appear to dash the hopes that the new world order is in any way a safer place than the previous era. [...] Since the majority of the peoples of the globe live in the Third World, this situation is a cause of great concernP This assessment is illustrated by the fact that most of the wars which have occurred since 1945 took place in the Third World, whilst in this period Europe and North America experienced an unprecedented era of peace.

The Nigerian Military and the State Jun 28 2023 The Nigerian civil war was the watershed in the history of the Nigerian military. It

demonstrated the need for a modern, professional army, navy and airforce, with sophisticated weaponry, and led to a huge increase in expenditure and personnel. It also demonstrated - very significantly - how the military could wield supreme political power. Peters traces the history of the Nigerian military from its colonial constabulary-type organization as part of the Royal West African Frontier Force, to the establishment of the military state. Revealing the extent to which the military is considered a glamorous calling and a passport to wealth, Peters shows how its officers are drawn from the educated elite and play leading roles in all aspects of life: political, economic and social. The military has succeeded in guaranteeing a measure of national cohesion, and has increased the number of states in Nigeria to ensure regional stability; its ranks include all ethnic groups; and it has played an important role as an international peace-keeping force. But while it has claimed to correct the evils of civilian rule, it has resisted democracy and has failed to correct the financial profligacy, economic mismanagement, corruption and nepotism it sought to eradicate. This study provides a thorough account of Nigerian society through a focus on its single most powerful institution.

**Shadows** May 16 2022 "Describes fully for the first time the aviation aspects of the Nigerian Civil War, Biafra's motley mix of antiquated and modern aircraft was acquired through various dubious and clandestine channels. They faced the Nigerian Air Force. Largely Soviet-supplied and mercenary7-crewed MiG-17s. L-29 Delfins and Hyushin II-28s. Despite being lan-locked for most of the war Biafra held out, its only link to the outside world being an air bridge to a converted bush airstrip deep in the Biafran heartland. The strip supported an amazing airlift of arms and food--the largest civilian relief airlift in history--which, for almost 18 months kept a nation alive. A special section traces the intgiging web of British aircraft dealers trying to sell aircraft to the Biafran government--expressly against the wishes of Whitehall."--Dust cover

*The Last Flight* Aug 31 2023 The Biafran chief pilot breaks his silence to reveal all. Writing from the vantage position of being a part of the nucleus and foundation member of the Nigerian Air Force and later an active air combatant in the Nigeria-Biafra air war, Captain Okpe gives a robust and exciting account as well as some incredible perspectives of the political and military intrigues on both sides of the divide.

Defence Policy of Nigeria: Capability and Context Jun 24 2020 This Reader provides a structurally coherent explanation and review of the magnified role conception and organizational task expansion for the Nigerian military establishment in foreign policy. It argues essentially that one of the most problematic and intractable areas of public policy in Nigeria since the Civil War concerns the development of a professional defence establishment adequate to meet the challenges arising from the altered parameters of our security environment. The correction of this condition is the primary motivation of the Armed Forces modernization and augmentation program that touches upon all elements of Nigeria's military power. This Reader is at once a review and a critique of the major facets of this modernization and augmentation process of the Nigerian armed forces within the operative context of the changing dimension of threat perception and the strategic parameters that have guided Nigerian military planning since the Civil War in 1970.

Biafra Genocide Dec 31 2020 One of the great tragedies of Africa is not only the fact that a million people mostly civilians and a large proportion of them children died in one of Africa's first post-independence wars, but that until it happened the world thought

Nigeria was immune from the wasting disease of tribalism. It certainly was not because the Biafran War is still the most expansive tribal conflagration that the continent has experienced barring perhaps the ongoing Great Lakes conflict involving the forces of East and West, only this time, with the British siding with the Soviets. Worse, some of the religious differences that emerged before and after that dreadful carnage are still with us today. During the course of hostilities that lasted almost four years, a lot of other shortcomings surfaced in Africa's most populous nation, including the kind of corruption that, until then, had always been linked to countries rich in oil. Disunity, incompetence and instability from which Nigeria never really recovered also emerged. Two bloody army coups followed after the rebels capitulated, together with an appalling series of massacres, mostly of southern Christians by Muslim northerners. Half a century later the slaughter continues.

*The Biafran Army 1967-70* Dec 23 2022 Synonymous with the starvation that killed almost two million people, Biafra was a parastate that voted to secede from Nigeria in May 1967. Formally recognized by Gabon, Ivory Coast, Tanzania, and Zambia, and supported by France, Israel, Portugal, Spain, South Africa, Rhodesia, and even the Vatican, Biafra's attempt to leave Nigeria resulted in the Nigerian Civil War, which was to last until January 1970. Although lacking official support from abroad, the Biafran authorities quickly built up a military. Their efforts to set up an air force, supported by numerous Europeans - were widely publicized. Indeed, Biafra-related adventures of Polish World War II ace Jan Zumbach, or the Swedish pilot Carl Gustaf von Rosen reached the status of legends before long. Far less is known about the Biafran Army and Navy, their capabilities and intentions, or the conduct of their combat operations. Indeed, the establishment of multiple commando units, and a special guerrilla outfit designed to emulate the Viet Cong, but especially the local manufacture of weapons -

including armored vehicles - remain largely unknown to the public. Based on years of thorough research, Biafran Army is the first work ever to offer a comprehensive, in-depth study of the build-up, training, composition, equipment, and combat operations of all the three branches - the army, the air force, and the navy - of the secessionist military during the Nigerian Civil War. Illustrated by more than 120 rare photographs, maps, and color profiles, this account provides a unique source of reference for enthusiasts and professionals alike.

**THE MILITARY AND PUBLIC RELATIONS ? Issues, Strategies and Challenges** Oct 21 2022 Public Relations practice, its approaches and methods have become widely and deeply entrenched in business, government and in many other complex organizations especially in the developed nations of the world. In same manner, its relevance and utility as tool of institutional promotion have equally come to be appreciated in the Armed Forces. The text therefore, within context of the evolution, growth and development of the broad discipline of Public Relations appropriately situates its practice in the military. It articulates and highlights in-depth, the many aspects to public relations practice in the armed Forces drawing examples extensively from especially the experiences of the United States and UK Armed Services. Divided into Four Parts, the book examines the role of the Military in society and traces the evolution of modern public Relations and its development in the military. Under 'Public Relations Principles, Approaches and Practice', it analyses the role and function of public relations in the interface of military and society, and further highlight the purpose of military public relations, its targets, strategies and tactics. It examines Public Relations practice in the Nigerian Military including public perception and management. Current and topical Issues in Public Relations and Communication such as 'Technology, the Military and Public Relations', 'Social Media, Public Relations and the Military', 'Security Threats, Crisis

Management and the Role of Communications', and 'Challenges to Military Public Relations Practice' were analyzed. The book finally concludes with 'The Importance of Military Public Relations in a Democratic Society'. Given the perpetual need to constantly 'keep the military in the public eye', the book strongly posits that it is appropriate that public relations be properly positioned as the strategic machinery through which the military could seek to identify with the people and invariably, national interest in order for them to render accounts of their performances and seek informed public support as obtains in developed democracies. This book will be a useful source of reference to especially military public relations officers and indeed all military officers across the world. It further should bring forth better insight to the understanding by the civilian populace, communications professionals, and research scholars specializing in military public relations or public affairs operating in diverse regions of the world.

The Biafra Story Dec 11 2021 A fearless act of journalism in 1960s Nigeria and the true story behind the international bestselling novel The Dogs of War. The Nigerian civil war of the late 1960s was one of the first occasions when Western consciences were awakened and deeply affronted by the level of suffering and the scale of atrocity

being played out in the African continent. This was thanks not just to advances in communication technology but to the courage and journalistic skills of foreign correspondents like Frederick Forsyth, who had already earned an enviable reputation for tenacity and accuracy working for Reuters and the BBC. In *The Biafra Story*, Forsyth reveals the depth of the British Government's active involvement in the conflict—information which many in power would have preferred to remain secret. General Gowon's genocide of the Biafran people was facilitated by a ready supply of British arms and advice. Still tragically relevant in its depiction of global affairs, this powerful book also launched Frederick Forsyth to literary stardom by providing him with the background material for *The Dogs of War*. The dramatic events and shocking political exposures, all delivered with Forsyth's bold and perceptive style, makes *The Biafra Story* a compelling lesson in courage.

**Counter-Insurgency in Nigeria** Apr 26 2023 This book offers a detailed examination of the counter-insurgency operations undertaken by the Nigerian military against Boko Haram between 2011 and 2017. Based on extensive fieldwork conducted with military units in Nigeria, *Counter-Insurgency in Nigeria* has two main aims. First, it seeks to provide an understanding of the Nigerian military's internal role – a role that today, as a result of internal threats, pivots towards counter-insurgency. The book illustrates how organizational culture, historical experience, institutions, and doctrine, are critical to understanding the Nigerian military and its attitudes and actions against the threat of civil disobedience, today and in the past. The second aim of the book is to examine the Nigerian military campaign against Boko Haram insurgents – specifically, plans and operations between June 2011 and April 2017. Within this second theme, emphasis is placed on the idea of battlefield innovation and the reorganization within the Nigerian military since 2013, as the Nigerian Army and Air Force recalibrated themselves for COIN warfare. A certain mystique has

surrounded the technicalities of COIN operations by the Army against Boko Haram, and this book aims to disperse that veil of secrecy. Furthermore, the work's analysis of the air force's role in counter-insurgency is unprecedented within the literature on military warfare in Nigeria. This book will be of great interest to students of military studies, counter-insurgency, counter-terrorism, African politics and security studies in general.
