George goes green! “This picture book offers young children an appealing introduction to reusing and recycling.”—Booklist George loves to go to the science museum. So, when he finds out that the museum is planning a “Green Day” dedicated to recycling and planting trees, George is curious and wants to help out! But little monkeys eager to help can sometimes become little monkeys getting into trouble. When George begins to find and recycle things around town that aren’t quite ready for the recycle bin, he gets into a jam. Thankfully, George isn’t the only one who wants to help. The whole community can’t wait to lend a

hand—and help George and the museum plant some trees! Originally published to coincide with the opening of the Margret & H.A. Rey Center in Waterville, New Hampshire, a model for energy conservation offering literary, educational, and other programs, this book also includes kid-friendly tips for helping the environment. Individual Big Book A first garden story board book that reveals how plants grow with lift-the-flaps and a pullout height chart. Teach your child how a tiny seed grows into a flower in this fascinating lift-the-flap garden story. A pullout height chart ends the book--a great way for children to remember how a sunflower grows, and to measure how fast your child grows, too! Through illustrations, photography, and flaps, sixteen delightful board book pages reveal the wonder of how plants grow as you follow the story of a mystery seed. How was it planted? What does it need? What will it become? As days go by, it's hard to imagine the tiny shoot will ever grow into a big, strong plant. Could it magically become the tallest of all the garden flowers? Flaps unfold to show plants growing, creatures hiding, and what's happening underground. The book includes very simple gardening projects and facts about garden creatures (which ones are good for plants, and which ones are bad), and children will find out what a pollinator is, and how to attract pollinators to the garden. The perfect gift for aspiring gardeners, complete with a height chart. Get ready to bloom and learn all about flowers and plants with the Cat in the Hat--a perfect gift for aspiring gardeners on Earth Day and every day! The Cat in the Hat's Learning Library is a nonfiction picture book series that introduces beginning readers ages 5-8 to important basic concepts. An easy and fun introduction to plant biology! With the able assistance of Thing 1 and Thing 2 - the Cat in the Hat explores the world of plants. Kids will learn about the various parts of plants, seeds, and flowers; basic photosynthesis and pollination; and seed dispersal. Featuring beloved characters from Dr. Seuss's The Cat in the Hat, the Learning Library are unjacketed hardcover picture books that explore a range of nonfiction topics about the world we live in and include an index, glossary, and suggestions for further reading. A small seed surprises itself by becoming a flowering moonflower vine. Emergent readers explore basic plant parts and what plants need to grow. In this Scottish

folk song, a generous family always has room for another person and invites in everyone who passes by. Join Splat the Cat in New York Times bestselling author-artist Rob Scotton's hilarious springtime adventure! Splat and Seymour plant a seed and watch it grow in this edition of the Splat the Cat picture book series. Fans of Splat will delight as they learn all about gardening. Complete with a sheet of fun stickers. When Ping admits that he is the only child in China unable to grow a flower from the seeds distributed by the Emperor, he is rewarded for his honesty. A young boy creates a summer playhouse by planting sunflowers and saves the seeds to make another house the next year. In this book, learn about the parts of a plant. In medieval Paris, Marguerite helps her nearly blind father finish painting an illuminated manuscript for his patron, Lady Isabelle. 46 color illustrations. Publisher description Each package is full of interesting, fun activities designed to enhance the teaching of integrated units. The idea of each sheet is to complement other classroom work, or to provide starting points or conclusions to thematic work. My first Herbarium is a great notebook for kids who love nature and being outdoors. In the times of sensory overload in our digital world, collecting leaves and flowers is a great back to the roots hobby for children and their family. Spend time in the garden or go on a walk together learning more about botany while looking for flowers and herbs to treasure in this cute notebook. Comes in a handy 6x9 inches (15,24 x 22,86cm) size to throw in your bag and easily take it with you. Inside the books there is space for glueing or taping in dried leaves, herbs and flowers, adding information about the plants like location, size and other characteristics. You will also find space to do sketches and add further notes. This notebook makes a great gift for children, because it teaches to live in close touch with nature and helps to learn more about plants and flowers while having fun strolling through the woods and fields. SIZE: 6x9 inches PAGES: 124 Pages (with space for adding 60 different plants) PAPER: Cream paper with custom interior for glueing in plants and adding information COVER: Softcover (Matte) Have fun and get creative! This PLANT JOURNAL NOTEBOOK features... 50 sheets / 100 pages: Each page has a place to write in name of plant, acquired date and from where, sections to write light/water/apply notes about

each plant, and ruled lines that are 1cm apart to journal and make notes about each plant! 6x9 paperback: Super portable but enough space to write your heart out! A beautiful finish: A rich matte finish that feels lovely to the touch. Please note: Paperweight is 55#, which is thick enough to hold up when using most pens without bleed through. Pages are not perforated or removable. Please check out preview to see what is inside before buying. Developed by leading science educator and former president of the National Science Teacher's Association, Ed Ortleb, "Plants and Animals" offers curriculum-oriented worksheets that provide a focused unit of information on each subject. No teacher preparation is required to use the pages. Activities include coloring, cutting, pasting, sequencing, matching, drawing, games, and puzzles. Extension activities and background information included in teacher guide. A little girl seeks to regain her father's attention during the tulipomania craze in seventeenth-century Holland. Fall has come, the wind is gusting, and Leaf Man is on the move. Is he drifting east, over the marsh and ducks and geese? Or is he heading west, above the orchards, prairie meadows, and spotted cows? No one's quite sure, but this much is certain: A Leaf Man's got to go where the wind blows. With illustrations made from actual fall leaves and die-cut pages on every spread that reveal gorgeous landscape vistas, here is a playful, whimsical, and evocative book that celebrates the natural world and the rich imaginative life of children. Includes an author's note and leaf-identifying labels. What does a plant need to survive? Read about some of the things all plants need. When a little boy plants a carrot seed, everyone tells him it won't grow. But when you are very young, there are some things that you just know, and the little boy knows that one day a carrot will come up. So he waters his seed, and pulls the weeds, and he waits ... First published in 1945 and never out of print, this timeless combination of Ruth Krauss's simple text and Crockett Johnson's eloquent illustrations creates a triumphant and deeply satisfying story for readers of all ages. Science in the context of the seven days of creation presented in the Bible. This textbook uses activities to reinforce scientific principles presented. The brilliant colors of fall foliage take center stage in this picture book perfect for fans of the classic Red Leaf, Yellow Leaf. With her trademark bold, graphic style

Monica Wellington has created a picture book about autumn, trees, and leaves. When the seasons change, a young girl visits the arboretum to collect fallen leaves and make a book with them. Brilliant illustrations show each variety of tree the girl encounters, from the common oak to the lesser known ginkgo. Spreads silhouetting leaves up-close help young children learn to identify them. Like the girl in the book, young readers will be eager to make their very own leaf books. Text and illustrations relate the growth of a small seed that survives the winter cold to become a beautiful spring flower. This e-book includes all of the impressionistic charts for botany. If you want to make an impression, then using these charts will enable you to get the idea across. Set contains all 18 charts. Chart 1: The Tree absorbs minerals through its roots Chart 2: Water Seekers Chart 3: Boulder in the road Chart 4: Position of root in relation to the foliage Chart 5: From the Dead to the living: Nitrogen Cycle Chart 6: The Piston Pump Chart 7: The Sun's drink Chart 8: The Sun's worshipers Chart 9: The Chemical Laboratory Chart 10: Seeds Travel Chart 11: How Plants are Supported Chart 12: Roots another Means of Support Chart 13: How Plants Defend Themselves Chart 14: Reproduction by Spores Chart 15: Love in Plants Chart 16: Go, My Son: Seed Travels Chart 17: Roots Hold the Soil Chart 18: The Terraced Mountain "Building on a rhyme that will be familiar to many children, author-illustrator Cole creates an enticing guide to creating a garden. 'This is the garden that Jack planted...' The final illustration presents a satisfied-looking boy surrounded by a lush, bird-filled flower garden....A concluding page of gardening suggestions serves as a springboard to books with more specific guidelines."--Horn Book. Notebook Large Size 8.5 x 11 Ruled 150 Pages Softcover The Perfect Garden Logbook for The Artistic Plant Lover! Track your plants with this softcover garden tracker journal featuring a horticulture floral art illustration quote for gardener or farmer. The first page gives you a spot to write your name. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series. High-school level biology presented in an engaging way for elementary and middle school students. Shows the parts of a plant in an easy-to-read text that incorporates phonics instruction. The many different animals that live in a great Kapok tree in the Brazilian rainforest try to convince a man with an ax of the importance of not cutting down their home. This book begins with a lesson on the nature of botany and the process of classifying plants. It then discusses the development of plants from seeds, the reproduction processes in plants, the way plants make their food, and how plants get their water and nutrients and distribute them throughout the body of the plant. As students study these topics, they also learn about many different kinds of plants in creation and where they belong in the plant classification system. The activities and projects use easy-to-find household items and truly make the lessons come alive! They include making a "light hut" in which to grow plants, dissection of a bean seed, growing seeds in plastic bags to watch the germination process, making a leaf skeleton, observing how plants grow towards light, measuring transpiration, forcing bulbs to grow out of season, and forcing pine cones to open and close. We recommend that you spend the entire school year covering this book. Hundreds of plant species with specialized appendices on edible plants, herbs, plants used in decoration and graphic design. Inspirational, royalty-free illustrations for designers, artists, botanists, and gardeners.
