Solid State Nuclear Track Detectors is a collection of papers that covers various aspects of solid state nuclear track detectors. The book presents 130 articles that cover the concerns in the mechanisms, operations, and applications of solid state nuclear track detectors. The materials in the text are thematically grouped into three parts. The book first discusses the fundamental mechanisms, which include determination of the screening parameter from measurements of differential energy loss and atomic displacement effects from heavy ion induced coulomb explosion. Next, the selection presents articles that deal with the methodology of detectors, such as experimental track widths of low energy heavy ions in nuclear emulsion and structure of light nuclei tracks. The remaining papers cover the fields of applications, such as nuclear fusion; prospection of radioactive and fissionable minerals; dosimetry; and autoradiography. The book will be of great use to researchers and practitioners of disciplines related to nuclear science. This book presents the proceedings of the First International EURO-PAR Conference on Parallel Processing, held in Stockholm, Sweden in August 1995. EURO-PAR is the merger of the former PARLE and CONPAR-VAPP conference

series; the aim of this merger is to create the premier annual scientific conference on parallel processing in Europe. The book presents 50 full revised research papers and 11 posters selected from a total of 196 submissions on the basis of 582 reviews. The scope of the contributions spans the full spectrum of parallel processing ranging from theory over design to application; thus the volume is a "must" for anybody interested in the scientific aspects of parallel processing or its advanced applications. This book constitutes the joint refereed proceedings of six international workshops held as part of OTM 2003 in Catania, Sicily, Italy, in November 2003. The 80 revised full workshop papers presented together with various abstracts and summaries were carefully reviewed and selected from a total of 170 submissions. In accordance with the workshops, the papers are organized in topical main sections on industrial issues, human computer interface for the semantic Web and Web applications, Java technologies for real-time and embedded systems, regulatory ontologies and the modelling of complaint regulations, metadata for security, and reliable and secure middleware.
