The philosophical musings of author, television personality, and tractor nut Roger Welsch -- the 21st century's answer to Will Rogers -- have inflamed the minds of a generation (not to mention

inflaming other delicate tissues). Finally, three of his most important books about the correlation between farm equipment and relationships are combined in one convenient volume, The Tractor Trilogy. Even with some of Roger's new stuff added in, this tiny package still fits into the front pouch of most overalls! Old Tractors and the Men Who Love Them seduces readers into joining the cult of Allis-Chalmers. Learn how to acquire rusty tractors while dodging an angry spouse, why the best solution to any problem begins in the local tavern, and why you should never eat peanuts in the shop. Busted Tractors and Rusty Knuckles chronicles the revival of The Woodpecker, a scrap-yard orphaned Allis-Chalmers WC. Meet local tractor experts who keep Roger on the right track, learn techniques such as goo removal and fender wrestling, and get some good advice from fellow tractor fanatics. Love, Sex, and Tractors cracks the nut that has confounded mankind since the invention of the wheel: Can men, women, and tractors coexist in peace? And where does a case of Old Milwaukee fit in the equation? In perhaps his greatest contribution to society, Roger unveils the secret to male survival: The Male Generic Apology. Book jacket. Excerpt from Utilization of Tractors and Cost of Tractor Power on Grain Farms: Northern Great Plains and Pacific Northwest, 1933 In certain sections of the Northern Great Plains, particularly western North Dakota, eastern Montana, and in many areas of South Dakota, conditions of extreme drought prevailed in 1955. As a result very little harvest was reported in these drought areas and the harvest work done with power equipment was abnormal. The use of equipment in a normal season rather than that reported in 1955 has been used in calculating the cost of operating power equipment. I Am Not a Tractor! celebrates the courage, vision, and creativity of the farmworkers and community leaders who have transformed one of the worst

agricultural situations in the United States into one of the best. Susan L. Marquis highlights past abuses workers suffered in Florida's tomato fields: toxic pesticide exposure, beatings, sexual assault, rampant wage theft, and even, astonishingly, modern-day slavery. Marquis unveils how, even without new legislation, regulation, or government participation, these farmworkers have dramatically improved their work conditions. Marquis credits this success to the immigrants from Mexico, Haiti, and Guatemala who formed the Coalition of Immokalee Workers, a neuroscience major who takes great pride in the watermelon crew he runs, a leading farmer/grower who was once homeless, and a retired New York State judge who volunteered to stuff envelopes and ended up building a groundbreaking institution. Through the Fair Food Program that they have developed, fought for, and implemented, these people have changed the lives of more than thirty thousand field workers. *I Am Not a Tractor!* offers a range of solutions to a problem that is rooted in our nation's slave history and that is worsened by ongoing conflict over immigration. Tractor Mac and his friends on the farm discover that teamwork makes all the difference. A visit to a family farm with a special tractor brings back memories for a grandfather who shares them with his grandson. Grandpa Joe takes his grandson Timmy back to the site of his family's farm, where the old house and a ramshackle barn still stand. Stacey Gabel Inspired by her young son's fascinations with tractors and his equally strong desire to learn, read and inspect anything to do with tractors, Stacey wanted to create a book for a genre that didn't seem to exist. She wanted to give young readers, like her son, something more than just tractor brochures to read. As a result, Stacey has authored a first reader book dealing with tractors and what these great machines accomplish on a farm. As a young girl growing up in Northwest Ohio, Stacey spent countless hours reading books, playing school and babysitting children. These same activities shaped her career as a middle school teacher and now author. Stacey holds a bachelor's degree in elementary education from the Ohio State University and a master's degree in elementary education from Bowling Green State University. She still resides in rural northwest Ohio with her husband and two children. Artist Richard Neuman transforms images of everyday life into universally appealing paintings - each with a touch of whimsy. His meticulously detailed pieces of artwork range from tractors to bulldozers; barns to baskets;lighthouses to schoolhouses. Richard holds a bachelors

degree in advertising design and a master's degree in art graphics with a minor in business. His corporate career was based in the publishing and advertising industry. He has worked in New York City for the world's largest advertising agency and in Ohio for two Fortune 500 companies. In 1986 he left the corporate world to form his own company focusing on his artwork. His success is attributed to the combination of his artistic talent with a broad background in product development, marketing and a high utilization of technology. Richard uses traditional media combined with digital technology to provide artwork ready for use in printing, web publishing and product manufacturing. The popularity of his work is worldwide with private patrons in dozens of countries. Disney, Hallmark and Cracker Barrel have marketed his art. Clients include General Electric, KOA, Longaberger Basket Company, HealthNet, Biogen Idec, John Deere Company and Creative Memories.
