The essays in Part I address legal validity, the normativity of law, and Kelsen's famous but puzzling idea of a legal system's 'basic norm'. Part II engages with the difficult issues raised by the social realities of law and the actual practices of legal officials. Part III focuses on conceptual features of legal systems and the logical structure of legal norms. All the essays were written for this volume by internationally renowned scholars from seven countries. Also included, in English translation, is an important polemical essay by Kelsen himself. Excerpt from *The Customs Service: Complete Course of Instructions, With Questions and Answers* Employment in the Civil Service is becoming more and more attractive to men of worthy intelligence and earnest purpose. With the gradual but steady elimination of political influence from appointments and promotions, capable men of clean records and honest aims can now safely rely on having a fair chance, if reached on the eligible list, to prove their quality. Naturally, the first consideration is to pass the test, but of still greater importance is the absolute necessity of attaining a high place on the eligible list. In its desire to further the merit system and to give to employees in the service every possible opportunity to advance from grade to grade by promotional tests, the U.S. Civil Service Commission has greatly reduced the number of positions in the Customs and Internal Revenue Service, obtainable through open competitive examination. To become a Day Inspector, Weigher or Ganger, for instance, one must enter the service at the bottom, so to speak, by taking either the First Grade, or the Sub-Clerical examination. Up to a few years ago all the positions were open to men from the outside and separate lists were maintained for each one. All answers to exercises, quizzes and tests, plus worked out solutions. General Chemistry uses a mastery-learning method. In this method, students build comprehension by adding new concepts while reviewing and rehearsing key material throughout the year. This method is implemented in carefully crafted exercises, quizzes, and the textbook narrative, and it facilitates learning, mastery and retention. Students appreciate the smaller profile and lighter weight of our books. This is possible because of aspects of our Textbook Philosophy. When mastery is the goal, you must cull down the material to an amount that can reasonably be mastered in one year. Related subjects are integrated into the narrative. The history of modern chemistry, mathematics and technical communication is emphasized throughout. Integration protects a course from seeming compartmentalized from other subjects. That's certainly not how the real world is. Real chemists use math and writing skills every day. Their knowledge about how the scientific enterprise works is greatly enhanced by their knowledge of great scientists who came before. Our approach to implementing a Kingdom Perspective does not entail unnaturally inserting Bible verses or devotional insets. A better approach for Christians is to do science from the faith-informed perspective of disciples of Christ studying God's created order. This is apparent in General Chemistry from the observations about order in the universe, in how nature submits to scientific study and modeling, and in the fitness of creation as a habitat for humanity and animal life. Complete First Second edition is an official preparation course for Cambridge English: First, also known as First Certificate in English (FCE). It combines the very best in contemporary classroom practice with first-hand knowledge of the challenges students face. The information, practice and advice contained in the course ensure that they are fully prepared for all parts of the test, with strategies and skills to maximise their score. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.
