[Ideas for Action 2019](#) Sep 27 2020 Ideas for Action is a youth competition on initiatives to implement the Sustainable Development Goals launched in November 2014 by the World Bank Group and the Zicklin Center for Business Ethics Research at the Wharton School of the University of Pennsylvania. The 2019 winners (3 top teams, 4 runners-up, and 11 honorable mentions) were selected from more than 3,000 proposals submitted by more than 21,000 team members from 142 countries. This year witnessed an unparalleled level of growing recognition with a 50 percent increase in proposals over 2018. The winning proposals were selected through a rigorous selection process that judged the projects on depth and clarity, significance of impact, originality and creativity, and feasibility. The teams had to showcase a strong proposal that presented a potential for impact on a large number of people with a practical roadmap for implementation. In addition to young staff members, reviewers included executives from Firmenich, Flour Mills of Nigeria, the German-Brazilian Chamber of Commerce and Industry, PepsiCo, the Wharton School, and the World Bank Group. Other competition partners included the International Labour Organization, Hemofarm, the World Bank Group's Youth to Youth Community (Y2Y) and Youth Summit, Knowledge @ Wharton, and the United Nations Youth Assembly. Youth participation in the 2030 Development Agenda is crucial. This initiative is a knowledge-sharing platform that empowers young professionals with the support and tools needed to engage in the conversation with leading professionals in the global development industry and the private sector. Through their use of technology—such as rainwater harvesting, reusable plastics, mobile apps, and devices—young people have ideas to make an exponential impact. The goal is to support truly workable and actionable results by connecting leading schools of finance and management with governments around the world to build partnerships that bolster these ideas into effective implementation. This book recognizes the incredible talent and spirit that these young people bring to the global development conversation.

**Tax Theory Applied to the Digital Economy** Dec 23 2022 Digital technology allows businesses to operate in a country without a physical presence, which poses challenges for traditional taxation. The digital debate focuses on direct taxation and the creation of new taxing rights arising from the tax claims of market jurisdictions on income obtained by foreign digital suppliers conducting business therein without any physical presence. Tax Theory Applied to the Digital Economy analyzes the tax-disruptive aspects of digital business models and reviews current tax initiatives in light of traditional tax theory principles. The analysis concludes that market countries' tax claims are unsubstantiated and contravene the most basic foundations of tax theory, giving rise to a series of legal, economic, tax policy, and tax administration issues that policy makers cannot overlook. The authors propose establishing a digital data tax (DDT) that is a license-type consumption tax, rather than an income tax, on the international supply of Internet bandwidth to access digital markets. The DDT can be applied either globally or unilaterally, and could become a significant source of tax revenues for market jurisdictions. It is aligned with tax principles and it does not conflict with other tax initiatives: the DDT taxes foreign digital companies as consumers, while income tax proposals tax them as suppliers. The authors also propose creating a new global internet tax agency (GITA) under the auspices of the United Nations that would provide a neutral forum for political discussion and technical assistance in the area of digital taxation. The digital economy is a global phenomenon that requires a global solution: the creation of global taxing mechanisms and global institutions that provide technical assistance and support for successful global implementation. The book explains difficult technical concepts in plain language and contributes to the digital tax debate in a way that can be understood by anyone. Such understanding is essential to obtaining global support, achieving tax compliance, and fostering multilateral tax cooperation.

[The World Bank](#) Jul 06 2021 This effort constitutes the most comprehensive and authoritative work to date on the history of the International Bank for Reconstruction and Development, or the World Bank. Author-editors John Lewis, Richard Webb, and Devesh Kapur chronicle the evolution of this institution and offer insights into its successes, failures, and prospects for the future. The result of their intense labors is an invaluable resource for other researchers and a fascinating study in its own right. The work is divided into two volumes. The first is organized thematically and examines the critical events and policy issues in the World Bank's development over the last fifty years. Chapter topics include poverty alleviation, structural adjustment lending, environmental programs, the International Finance Corporation (IFC), the International Development Association (IDA), and the evolution of the Bank as an institution. The second volume contains case studies written by experts with experience in the various regions in which the Bank operates. There are chapters on the Bank's activities in Korea, Mexico, Africa, South Asia, and Eastern Europe. Volume 2 also contains essays on the World Bank's relationship with the United States, Japan, and Western Europe, and its partnership with the International Monetary Fund (IMF). By special arrangement, the authors have had wide-ranging access to confidential documents at the World Bank, making this work a unique source of information on the internal workings of this critical institution. They have also drawn on extensive interviews with current and past Bank officials. Moreover, publication could not be more timely, coming as it does when many in the development community and in the U.S. Congress are questioning the Bank's track record and even its reason for existence. The World Bank: Its First Half Century will be of great interest not only to development practitioners but also to students of international relations, development economics, and global finance. During the course of the project, John P. Lewis and Richard Webb were nonresident

senior fellows, and Devesh Kapur was a program associate, in the Foreign Policy Studies program at the Brookings Institution.
