[In the Shadow of the Moon](#) May 12 2022 From an award-winning author, astronomer, and anthropologist, an exploration of the scientific and cultural significance of the mesmerizing cosmic display. Since the first humans looked up and saw the sun swallowed by darkness, our species has been captivated by solar eclipses. Astronomer and

anthropologist Anthony Aveni explains the history and culture surrounding solar eclipses, from prehistoric Stonehenge to Babylonian creation myths, to a confirmation of Einstein's theory of general relativity, to a spectacle that left New York City in the moon's shadow, to future eclipses that will capture human imaginations. In one accessible and engaging read, Aveni explains the science behind the phenomenon, tracks eclipses across the ancient world, and examines the roles of solar eclipses in modern times to reveal the profound effects these cosmic events have had on human history. Colored by his own experiences—Aveni has witnessed eight total solar eclipses in his lifetime—his account of astronomy's most storied phenomenon will enthrall anyone who has looked up at the sky with wonder. "Aveni's authoritative but accessible text is the clearest statement of the way our perception of eclipses has changed over the centuries." —Stuart Clark, *New Scientist* "Authoritative and engaging." —Marcelo Gleiser, NPR's 13.7 "A recommended way to share the spirit of the occasion." —Laurence A. Marschall, *Natural History* magazine "Everything you need to enjoy a solar eclipse—and even predict one, just like the Babylonians did! Aveni's

entertaining explorations show the very different impacts eclipses have had on past and present cultures." —David DeVorkin, National Air and Space Museum, Smithsonian Institution

**Head First HTML5**

**Programming** Sep 04 2021

HTML has been on a wild ride. Sure, HTML started as a mere markup language, but more recently HTML's put on some major muscle. Now we've got a language tuned for building web applications with Web storage, 2D drawing, offline support, sockets and threads, and more. And to speak this language you've got to go beyond HTML5 markup and into the world of the DOM, events, and JavaScript APIs. Now you probably already know all about HTML markup

(otherwise known as structure) and you know all about CSS style (presentation), but what you've been missing is JavaScript (behavior). If all you know about are structure and presentation, you can create some great looking pages, but they're still just pages. When you add behavior with JavaScript, you can create an interactive experience; even better, you can create full blown web applications. **Head First HTML5 Programming** is your ultimate tour guide to creating web applications with HTML5 and JavaScript, and we give you everything you need to know to build them, including: how to add interactivity to your pages, how to communicate with the world of Web services, and how to use the great new APIs being developed for HTML5. Here are just some of the things you'll learn in **Head First HTML5 Programming**: Learn how to make your pages truly interactive by using the power of the DOM. Finally understand how JavaScript works and take yourself from novice to well-informed in just a few chapters. Learn how JavaScript APIs fit into the HTML5 ecosystem, and how to use any API in your web pages. Use the Geolocation API to know where your users are. Bring out your inner artist with Canvas, HTML5's new 2D drawing surface. Go beyond just plugging a video into your pages, and create custom video experiences. Learn the secret to grabbing five megabytes of storage in every user's browser. Improve your page's responsiveness and performance with Web

workers. And much more.

### **Head First HTML and CSS**

Mar 30 2021 Tired of reading HTML books that only make sense after you're an expert? Then it's about time you picked up **Head First HTML** and really learned HTML. You want to learn HTML so you can finally create those web pages you've always wanted, so you can communicate more effectively with friends, family, fans, and fanatic customers. You also want to do it right so you can actually maintain and expand your web pages over time so they work in all browsers and mobile devices. Oh, and if you've never heard of CSS, that's okay--we won't tell anyone you're still partying like it's 1999--but if you're going to create web pages in the 21st century then you'll want to know and understand CSS. Learn the real secrets of creating web pages, and why everything your boss told you about HTML tables is probably wrong (and what to do instead). Most importantly, hold your own with your co-worker (and impress cocktail party guests) when he casually mentions how his HTML is now strict, and his CSS is in an external style sheet. With **Head First HTML**, you'll avoid the embarrassment of thinking web-safe colors still matter, and the foolishness of slipping a font tag into your pages. Best of all, you'll learn HTML and CSS in a way that won't put you to sleep. If you've read a **Head First** book, you know what to expect: a visually-rich format designed for the way your brain works. Using the latest research in neurobiology,

cognitive science, and learning theory, this book will load HTML and CSS into your brain in a way that sticks. So what are you waiting for? Leave those other dusty books behind and come join us in Webville. Your tour is about to begin. **The Slayers** Nov 06 2021 This essential d20 System RPG details the 78-episode fantasy anime series, *The Slayers*. Brothel in Pimlico Jul 02 2021  
Roy Brooks became a legend in his own time for the puckish delight he took in telling the truth, the whole truth - and even the unwholesome truth - about the properties, as an estate agent, that he advertised for sale. From 1950 to his death in 1971, his fame for these revolutionary, outrageous, funny, and on occasions, painful advertisements spread far and wide. In a trade well known for its euphemisms, optimistic cliches and skilful camouflage, he won the delighted applause of the property-buying and newspaper-reading public.; This is a collection of the best of Roy Brooks' property advertisements in the Sunday Times and Observer newspapers.

*Competition Law and Consumer Protection* Dec 27 2020 The assumption that competition law and consumer

protection are mutually reinforcing is rarely challenged. The theory seems uncontroversial. However, because a positive interaction between the two is presumed to be self-evident, the frequent conflicts that do in fact arise are often dealt with on an ad hoc basis, with no overarching legal authority. There is a clear need for a detailed and coherent understanding of exactly where the complements and tensions between the two policy areas exist. Dr Cseres in-depth analysis provides that understanding. Proceeding from the dual perspective of law and economics that is, of justice, fairness, and reasonableness on the one hand, and of efficiency of the other she fully considers such underlying issues as the following: the role of competition law and consumer law in a free market economy; the notion of consumer welfare; the effect of the modernisation of EC competition law for consumers; economics theories of information, bounded rationality, and transaction costs; the special significance of vertical agreements and merger control; and, how consumers are affected by information asymmetries. The ultimate focus of the book is on current and emerging EC law, in which a rapprochement between the two areas seems to be under way. Dr. Cseres provides a knowledgeable guide to the various strands of theory, policy, and jurisprudence that (she shows) ought to be taken into account in the process, including

schools of thought and law and policy experience in both Europe and the United States. A special chapter on Hungary, where post-1989 law and practice reveal a fresh and distinctly forward-looking understanding of the matter, is one of the book's most extraordinary features. Competition Law and Consumer Protection stands alone as a committed contribution to bridging a gap in legal knowledge the significance of which grows daily. It will be of immeasurable value to a wide range of professionals from academics and researchers to officials, policymakers, and practitioners in competition law, consumer protection advocacy, economic theory and planning, business administration, and various pertinent government authorities.
