Traumatic Scar Tissue Management Oct 26 2020 The management of scar tissue is a huge and growing problem for massage and other manual therapists. This book fills that gap, explaining the physiologic and pathophysiologic background, and providing practical guidance about how to help patients.

Intersections of Identity and Sexual Violence on Campus Oct 07 2021 While sexual violence has been present and prevalent on campus for decades, the work of recent college student activists has made it an issue of major societal and institutional concern. This book makes an important contribution to and provides a foundation for better contextualizing and understanding sexual violence. Each chapter in this edited volume focuses on populations that are not often centered in the discourse of campus sexual violence and accounts for individuals' intersecting identities and how they interlock with larger systems of domination. Challenging dominant ideologies concerning assumptions

of white women as the only victims-survivors, the racialization of aggressors, and the deleterious rape myths present in both research and practice, this book draws attention to the complexities of sexual violence on the college campus by highlighting populations that are frequently invisible in research, reporting, and practice. The book places sexual violence on campus in a historical context, centering the experiences of populations relegated to the margins, and highlighting the relationship between racism, classism, homophobia, transphobia, and other forms of domination to sexual violence. The final chapters of the book explore how critical models of intervention and prevention and a critical analysis of existing institutional policies may be implemented across college campuses to better address sexual violence for multiple populations and identities in higher education. This book will expand educators' understanding of sexual violence to inform more effective policies, procedures, practice, and research that reaches beyond preventing sexual violence and addresses the dominant systems from which sexual violence stems, in an attempt to eradicate, not just prevent, the act and the issue.

Decade of the Brain: Poems Sep 25 2020 In the deeply personal Decade of the Brain, Janine Joseph writes of a newly-naturalized American citizen who suffers from post-concussive memory loss after a major auto accident. The collection is an odyssey of what it means to recover—physically and mentally—in the aftermath of trauma and traumatic brain injury, charting when “before” crosses into “after.” Through connected poems, buckling and expansive syntax, ekphrasis, and conjoined poetic forms, Decade of the Brain remembers and misremembers hospital visits, violence and bodily injury, intimate memories, immigration status, family members, and the self. After the accident I turned out all of the lights in the room while I watched, concussed, from the mirror. I edged like a fever with nothing on the tip of my tongue.

Textbook of Women’s Reproductive Mental Health May 02 2021 “More women (47.6%) receive mental health services compared with men (34.8%). Women are twice as likely as men to develop major depressive disorder. Furthermore, 10%-15% of women experience depression during the perinatal period, which makes depression one of the most common complications of childbirth (Gaynes et al. 2005). These statistics illustrate that psychiatric disorders in women are common during the reproductive years and that the hormonal fluctuations associated with the reproductive life cycle contribute to the etiology of mental illness in women. Medical practitioners in all fields will encounter female patients with mental illness across the lifespan, particularly major depressive and anxiety disorders. Consequently, there is a great imperative for high-quality educational materials that increase the competency of providers. This outstanding work is divided into two parts. Part I provides a comprehensive overview of the reproductive life cycle and covers mental health concerns across the lifespan, including the relationship between gynecological and sexual health and mental health as well as infertility, the premenstrual period, and perimenopause. Part II is devoted to the perinatal period and offers a conceptual framework for a clinical approach to the pregnant and postpartum patient, followed by evidence-based reviews of the management of psychiatric disorders (by diagnostic category), as well as covering stress in pregnancy, infant mental health, and legal/forensic issues. Critical summaries of the epidemiology, risk factors, screening methods, and clinical features are presented. This book must be required reading for all faculty and trainees who will care for women”--

Evaluation of Data Completeness of Client Intake Form (CIF) Before and After Data Quality Audit (DQA) of a Voluntary Medical Male-circumcision (VMMC) Program in Zimbabwe Oct 31 2023 Purpose: To evaluate and compare the data completeness of Client Intake Forms (CIFs) collected both before and after a Data Quality Audit (DQA) in February 2015 and to identify the factors contributing to incompleteness of CIFs used for the Voluntary Medical Male Circumcision (VMMC) procedure in Zimbabwe. Methods: Four out of ten sites that received a DQA in February 2015 were selected based on convenience sampling. Secondary data analyses were conducted using data from CIFs, which were filled out by the staff during the VMMC procedures at the sites. Two-levels of completeness were evaluated in two months (November 2014 and May 2015). The record availability of CIFs was assessed by measuring the percentage of VMMC clients whose CIF was on file at each site. Then, a data completeness evaluation tool was used to measure the completeness of 34 key variables on the CIF, and a comparison of the performance on pre- and post- data-completeness in each sampled site was conducted. Results: Record availability at the Norton and Mutoko sites were generally maintained in high standard (around 100%); the record availability in site Muvonde was 88.0% before the DQA and then improved 8.0% after the DQA; the record availability in site Gokwe South was 79.8% before the DQA and then improved 9.7% after the DQA. The average monthly completeness rate on CIFs prior to the DQA studied for site Muvonde, Gokwe South, Mutoko and Norton is 88.0%, 95.6%, 94.6% and 95.3%, respectively. The average monthly completeness rate after the DQA for site Muvonde, Gokwe South, Mutoko and Norton is 96.6%, 98.3%, 98.3% and 93.6%, respectively. Three of the four sites had statistically significant improvements in data completeness across 34 key indicators, with mean improvement of 8.6%, 2.7%, 3.8%, respectively (p

In addition to updates to existing chapters, the third edition features new chapters on the real relationship, emotional expression, immediacy, therapist self-disclosure, promoting treatment credibility, and adapting therapy to the patient's gender

identity and sexual orientation. Featuring expanded coverage and an enhanced practice focus, the third edition of the seminal *Psychotherapy Relationships That Work* offers a compelling synthesis of the best available research, clinical expertise, and patient characteristics in the tradition of evidence-based practice.

Illegal Encounters Jul 04 2021 The impact of the U.S. immigration and legal systems on children and youth in the United States, millions of children are undocumented migrants or have family members who came to the country without authorization. The unique challenges with which these children and youth must cope demand special attention. *Illegal Encounters* considers illegality, deportability, and deportation in the lives of young people—those who migrate as well as those who are affected by the migration of others. A primary focus of the volume is to understand how children and youth encounter, move through, or are outside of a range of legal processes, including border enforcement, immigration detention, federal custody, courts, and state processes of categorization. Even if young people do not directly interact with state immigration systems—because they are U.S. citizens or have avoided detention—they are nonetheless deeply affected by the reach of the government in its many forms. Contributors privilege the voices and everyday experiences of immigrant children and youth themselves. By combining different perspectives from advocates, service providers, attorneys, researchers, and young immigrants, the volume presents rich accounts that can contribute to informed debates and policy reforms. *Illegal Encounters* sheds light on the unique ways in which policies, laws, and legal categories shape so much of daily life for young immigrants. The book makes visible the burdens, hopes, and potential of a population of young people and their families who have been largely hidden from public view and are currently under siege, following their movement through complicated immigration systems and institutions in the United States.
