The Imagination Machine answers these questions and more. Drawing on the experience and insights of CEOs across several industries, as well as lessons from neuroscience, computer science, psychology, and philosophy, Martin Reeves of Boston Consulting Group's Henderson Institute and Jack Fuller, an expert in neuroscience, provide a fascinating look into the mechanics of imagination and lay out a process for creating ideas and bringing them to life: The Seduction: How to open yourself up to surprises The Idea: How to generate new ideas The Collision: How to rethink your idea based on real-world feedback The Epidemic: How to spread an evolving idea to others The New Ordinary: How to turn your novel idea into an accepted reality The Encore: How to repeat the process—again and again. The word is often only associated with children, artists and daydreamers, but in reality, imagination is an integral part of almost every action and decision that we make. Simply put, imagination is a person's ability to create scenarios in his or her head: this can include everything from planning a grocery list, to honing a golf swing, to having religious hallucinations. And while imagination has positive connotations, it can also lead to decreased productivity and cooperation, or worse, the continuous reliving of past trauma. The human brain is remarkable in its ability to imagine—it can imagine complex possible futures, fantasy worlds, or tasty meals. We can use our imaginations to make us relaxed or anxious. We can imagine what the world might be, and construct elaborate plans. People have been fascinated with the machination of the human brain and its ability to imagine for centuries. There are books on creativity, dreams, memory, and the mind in general, but how exactly do we create those scenes in our head? With chapters ranging from hallucination and imaginary friends to how imagination can make you happier and more productive, Jim Davies' Imagination will help us explore the full potential of our own mind. How do we become better people? Initiatives such as New Year's resolutions, vision boards, thirty-day plans, and self-help books often fail to compel us to live differently. We settle for small goals--frugal spending, less yelling at the kids, more time at the gym--but we are called to something far greater. We are created to be holy. Award-winning author Jessica Hooten Wilson explains that learning to hear the call of holiness requires cultivating a new imagination--one rooted in the act of reading. Learning to read with eyes attuned to the saints who populate great works of literature moves us toward holiness, where God opens up a way of living that extends far beyond what we can conjure for ourselves. Literature has the power to show us what a holy life looks like, and these depictions often scandalize even as they shape our imagination. As such, careful reading becomes a sort of countercultural spiritual discipline. The book includes devotionals, prayers, wisdom from the saints, and more to help individuals and groups cultivate a saintly imagination. Foreword by Lauren F. Winner.
