Fire, one of three new QUEER FILM CLASSICS this fall, delves into the controversial 1996 lesbian love story by Indian-born director Deepa Mehta. Set in a contemporary middle-class Hindu household in the heart of Delhi, Fire is the story of Radha and Sita, the wives of two brothers, who fall in love with one another. Crisis overtakes the extended family when a servant discovers the relationship and tells one of the husbands; overcoming both a literal and allegorical 'trial by fire,' the two women leave their marriages to make a life together. The film premiered to great acclaim in 1996, and travelled the international circuit before being finally released in India in 1999. The consequences of the film's Indian premiere were both profound and provocative: outraged by the film's explicit depiction of a lesbian relationship, protesters went on a rampage, tearing down posters, vandalizing cinemas showing the film, and disrupting screenings in Delhi and Bombay, setting off a maelstrom of public discourse on issues such as homosexuality and freedom of speech in India. Director Deepa Mehta and the two leading actresses were targeted for attack and harassment by extremists of the Hindu Right. This book examines the controversy that divided a nation, but which ultimately led to counter protests among the film's supporters, resulting in its successful and uninterrupted run in Indian theaters. The book also considers Fire's scathing attack on both heterosexism and Hindu practices in India that oppress and marginalize women, as well as its revolutionary treatment of female characters, whose traditional duties are imbued with an unprecedented sensuality.

Excerpt from Complete History of the Boston Fire Department: Including the Fire-Alarm Service and the Protective Department, Fro, 1630 to 1888

The information for the History of the Boston Fire Department has been very difficult to obtain, owing to the unsatisfactory manner in which the records have been left. In fact, there is no register of events made by the department in existence, the data previous to 1840 being scattered over numerous sources. In the task of research, I have given the care and patience the subject demanded, and trust I have succeeded in combining into one volume all the important matters in relation to the department that heretofore have been distributed through hundreds. The location of the various engines, hose-carriages, and ladder-trucks, and the companies attached to each, have been traced, as far as it has been possible to do so by the existing records, from their organization up to the date of closing this history, except from 1822 to 1860, at which time the membership became so large (each company having

from fifty to one hundred and fifty members on the roll-book), that to mention all their names would occupy a large amount of space, and would be of no great value, as they can be obtained at the office of the Board of Fire Commissioners. I have therefore deemed it sufficient to mention only the officers. The work of obtaining photographs and biographical sketches of members of the present department was begun during 1888, since which many changes have been made in the companies, so that by the time the portraits of one company were engraved, a member of the company represented by the plate would be transferred to other quarters, and he succeeded by another, thus making it impossible to retain a complete company for any length of time. It was found, therefore, impracticable to take notice of such changes after December 31, 1888, at which time the accompanying plates correctly represent the companies formed at that time. "Vinge is one of the best visionary writers of SF today."- David Brin Thousands of years in the future, humanity is no longer alone in a universe where a mind's potential is determined by its location in space, from superintelligent entities in the Transcend, to the limited minds of the Unthinking Depths, where only simple creatures, and technology, can function. Nobody knows what strange force partitioned space into these "regions of thought," but when the warring Straumli realm use an ancient Transcendent artifact as a weapon, they unwittingly unleash an awesome power that destroys thousands of worlds and enslaves all natural and artificial intelligence. Fleeing this galactic threat, Ravna crash lands on a strange world with a ship-hold full of cryogenically frozen children, the only survivors from a destroyed space-lab. The rapid development of China's transportation system brings huge challenges to fire safety issues. Fire Protection Engineering Applications for Large Transportation Systems in China analyzes key fire issues for large transportation systems in rail, airport, tunnels, etc. and offers solutions

and best practices for similar projects throughout the world. The first monograph to look at transportation hub fire issues in China looks at architecture features, occupancy and area classification, fire hazard and design difficulties based on local code design. The book then provides case studies to identify the common problems and introduces possible solutions in order to develop a best practice for future design and improvement. The authors worked directly on the case studies provided, which include the Hongqiao airport transportation hub, Beijing and Pudoing airport PBD study, subways in different cities and the high speed train system Cross China. They use their research and investigation to form the theoretical basis for the fire design of urban large transportation hubs and the establishment of corresponding fire codes. The cutting-edge technologies discussed include: Smoke control strategy in complicated multiple function space, assistant evacuation performance based study new technology on fire separation new fire products for smoke detection and intelligent guiding system for evacuation BIM and internet of things used to improve fire management

National Book Critics Circle Award Winner: “The terrifying story of the worst disaster in the history of the US Forest Service’s elite Smokejumpers.” —Kirkus Reviews A devastating and lyrical work of nonfiction, *Young Men and Fire* describes the events of August 5, 1949, when a crew of fifteen of the US Forest Service’s elite airborne firefighters, the Smokejumpers, stepped into the sky above a remote forest fire in the Montana wilderness. Two hours after their jump, all but three of the men were dead or mortally burned. Haunted by these deaths for forty years, Norman Maclean puts together the scattered pieces of the Mann Gulch tragedy in this extraordinary book. Alongside Maclean’s now-canonical *A River Runs Through It* and *Other Stories*, *Young Men and Fire* is recognized today as a classic of the American West. This edition of Maclean’s later triumph—the last book he would write—includes a powerful new foreword by Timothy Egan, author of *The Big Burn* and *The Worst Hard Time*. As moving and profound as when it was first published, *Young Men and Fire* honors the literary legacy of a man who gave voice to an essential corner of the American soul. “A moving account of humanity, nature, and the perseverance of the human spirit.” —Library Journal “Haunting.” —The Wall Street Journal “Engrossing.” —Publishers Weekly

A companion book to a 1996 exhibition organized by the Harvard University Art Museums, concentrating on the role of technology in the production of Greek and Roman sculpture and detailing new methods for studying ancient styles and techniques. Chapters by archaeologists, conservators, and art historians explore areas including the sculptor and the poet in classical art, and the private use of small bronze sculpture. A catalogue of the exhibition includes technical observations of pieces. Contains high-quality color and bandw photos.

Come on a whirlwind ride across time and place with one of the most recognizable figures of Western history - Joan of Arc. We all know of her, but few know the details of her life. Travel back in time, through the words of *The Maid*, in a series of imaginary interviews conducted by the author. Join her on her journey from shepherdess to warrior woman, to her rise to sainthood. Enjoy Joan's own words, recorded through two arduous trials. Listen to her own descriptions of the many battles and political maneuvers she lived through and starred in. Admire her courage and stoicism when wounded, her compassion for the enemy, her battle strategies and her horsemanship. Under the duress of imprisonment and trial, she still maintained her sense of humor, to the point of making her accusers and judges laugh out loud. Five hundred years later, the Catholic Church who condemned her as a heretic, made her a Saint. Come with Joan the Maid. Ride the wind. Choose the fire. Describes the 1911 fire that destroyed the Triangle Shirtwaist factory in New York's Greenwich Village, the deaths of 146 workers in the fire, and its implications for twentieth-century politics and labor relations. #1 NEW YORK TIMES BESTSELLER •

The thrilling history of the Targaryens comes to life in this masterly work, the inspiration for HBO’s *Game of Thrones* prequel series *House of the Dragon* “The thrill of *Fire & Blood* is the thrill of all Martin’s fantasy work: familiar myths debunked, the whole trope table flipped.”—Entertainment Weekly

Centuries before the events of *A Game of Thrones*, House Targaryen—the only family of dragonlords to survive the Doom of Valyria—took up residence on Dragonstone. *Fire & Blood* begins their tale with the legendary Aegon the Conqueror, creator of the Iron Throne, and goes on to recount the generations of Targaryens who fought to hold that iconic seat, all the way up to the civil war that nearly tore their dynasty apart. What really happened during the Dance of the Dragons? Why was it so deadly to visit Valyria after the Doom? What were Maegor the Cruel’s worst crimes? What was it like in Westeros when dragons ruled the skies? These are but a few of the questions answered in this essential chronicle, as related by a learned maester of the Citadel. Readers have glimpsed small parts of this narrative in such volumes as *The World of Ice & Fire*, but now, for the first time, the full tapestry of Targaryen history is revealed. With all the scope and grandeur of Gibbon’s *The*

History of the Decline and Fall of the Roman Empire, *Fire & Blood* is the first volume of the definitive two-part history of the Targaryens, giving readers a whole new appreciation for the dynamic, often bloody, and always fascinating history of Westeros. Praise for *Fire & Blood* “A masterpiece of popular historical fiction.”—The Sunday Times “The saga is a rich and dark one, full of both the title’s promised elements. . . . It’s hard not to thrill to the descriptions of dragons engaging in airborne combat, or the dilemma of whether defeated rulers should ‘bend the knee,’ ‘take the black’ and join the Night’s Watch, or simply meet an inventive and horrible end.”—The Guardian

The crew of a hook-and-ladder truck responds to the alarm and fights the fire in a city building. Round the Fire Stories is a splendid anthology of suspense and adventure tales. Revolving around the themes of murder, insanity, mystery, unsolved crimes and ghosts, the work showcases Doyle's interest in the supernatural. *A Chariot of Fire* by Elizabeth Stuart Phelps When the White Mountain express to Boston stopped at Beverly, it slowed op reluctantly, crashed off the baggage, and dashed on with the nervousness of a train that is unmercifully and unpardonably late. It was a September night, and the channel of home-bound summer travel was clogged and heaving. A middle-aged man—a plain fellow, who was one of the Beverly passengers—stood for a moment staring at the tracks. The danger-light from the rear of the onrushing train wavered before his eyes, and looked like a splash of blood that was slowly wiped out by the night. It was foggy, and the atmosphere clung like a sponge... We are delighted to publish this classic book as part of our extensive Classic Library collection. This is the large print edition of *Ride The Wind, Choose The Fire*, with a larger font / typeface for easier reading. Examines the role of Theodore Roosevelt and Giffor Pinchot in advocating the conservation of forest land and describes how the great forest fire of 1910 along with the heroism of the fire rangers changed public opinion in favor of supporting the cause. From a leading journalist and activist comes a brave, beautifully wrought memoir. When Darnell Moore was fourteen, three boys from his neighborhood tried to set him on fire. They cornered him while he was walking home from school, harassed him because they thought he was gay, and poured a jug of gasoline on him. He escaped, but just barely. It wasn't the last time he would face death. Three decades later, Moore is an award-winning writer, a leading Black Lives Matter activist, and an advocate for justice and liberation. In *No Ashes in the Fire*, he shares the journey taken by that scared, bullied teenager who not only survived, but found his calling. Moore's transcendence over the myriad forces of repression that faced him is a testament to the grace and care of the people who loved him, and to his hometown, Camden, NJ, scarred and ignored but brimming with life. Moore reminds us that liberation is possible if we commit ourselves to fighting for it, and if we dream and create futures where those who survive on society's edges can thrive. *No Ashes in the Fire* is a story of beauty and hope—and an honest reckoning with family, with place, and with what it means to be free. Reproduction of the original. National Book Award–winner Timothy Egan turns his historian's eye to the largest-ever forest fire in America and offers an epic, cautionary tale for our time. On the afternoon of August 20, 1910, a battering ram of wind moved through the drought-stricken national forests of Washington, Idaho, and Montana, whipping the hundreds of small blazes burning across the forest floor into a roaring inferno that jumped from treetop to ridge as it raged, destroying towns and timber in the blink of an eye. Forest rangers had assembled nearly ten thousand men to fight the fires, but no living person had seen anything like those flames, and neither the rangers nor anyone else knew how to

subdue them. Egan recreates the struggles of the overmatched rangers against the implacable fire with unstoppable dramatic force, and the larger story of outsized president Teddy Roosevelt and his chief forester, Gifford Pinchot, that follows is equally resonant. Pioneering the notion of conservation, Roosevelt and Pinchot did nothing less than create the idea of public land as our national treasure, owned by every citizen. Even as TR's national forests were smoldering they were saved: The heroism shown by his rangers turned public opinion permanently in favor of the forests, though it changed the mission of the forest service in ways we can still witness today. This e-book includes a sample chapter of *SHORT NIGHTS OF THE SHADOW CATCHER*. *Large Outdoor Fire Dynamics* provides the essential knowledge for the hazard evaluation of large outdoor fires, including wildland, WUI (wildland-urban interface), and urban fires. The spread of outdoor fires can be viewed as a successive occurrence of physical and chemical processes – solid fuel combustion, heat transfer to surrounding combustibles, and ignition of heated combustibles – which are explained herein. Engineering equations frequently used in practical hazard analyses are derived and then integrated to implement a computational code predicting fire spread among discretely distributed combustibles. This code facilitates learning the procedure of hazard evaluation for large outdoor fires. Chapters cover underlying assumptions for analyzing fire spread behavior in large outdoor fires, namely, wind conditions near the ground surface and fundamentals of heat transfer; the physical mechanism of fire spread in and between combustibles, specifically focusing on fire plumes (both reacting and non-reacting) and firebrand dispersal; and the spatial modeling of 3D objects and developing the computational framework for predicting fire spread. The book is ideal for engineers, researchers, and graduate students in fire safety as well as mechanical engineering, civil engineering, disaster management, safety engineering, and planning. Companion source codes are available online. We are delighted to publish this classic book as part of our extensive Classic Library collection. Winner of the Western Writers of America Spur Award for Teen Fiction from the author of *Hitch and Paper Daughter*. “A must-read for adrenaline junkies.”—VOYA On a hot summer day in 1910 a teenage soldier assembled his rifle. A girl argued to save trees on a mountain homestead. A young man set out to fight fire. None knew that soon the many blazes burning across northern Idaho would blow up and send a wall of flame racing their way. Portraying a natural disaster that would dictate how the United States would fight wildfire in the 20th century, *The Big Burn* brings to life a turning point in fire science, forestry, and history. Richly drawn characters doing their best against gigantic odds will grip your heart. The realistic depiction of wildfire will make you feel you were there. With non-fiction Field Notes and an Afterword about firefighting today, it's a novel that moves from the 1900s into the 21st century. Whether you're an adult or young adult reader, you'll come away with a new understanding of nature and a “heighten[ed] appreciation for the courage and sacrifice of firefighters and settlers” (Publishers Weekly). Montana Book Award Honor “Historically accurate and dramatically engaging.”—Teen Reads “Presents a vivid picture of a natural disaster while skillfully conveying in fluid prose the individual stories of the three young people.”—Horn Book “Fascinating and harrowing . . . for any kid whose tastes run to disaster and survival, mixed into a coming of age story.”—Richie's Picks “A solid adventure story with a well-realized setting.”—Booklist

Reproduction of the original. On October 8th, 2017 at about 10:30 pm, the winds outside my home were moving the large Redwood Trees back and forth, though no storm, or wind had been predicted. I went outside and saw several flashes of blue light pulse in the vortex winds forming above me. At 4:30 am, my neighbor was pounding on my door telling me that emergency evacuations were being conducted due to several fires on the ridges. Going outside I could see only orange skies to the North and East, but no flames and no trees ablaze. Thus began my journey into discovering and uncovering how and why 157 “abnormal” fires began in 9 different counties in Northern California. I toured some of the over 4,000 homes were destroyed to ash while trees adjacent were left untouched. I saw 3,000 pound cars flipped on their roofs. I saw a 100,000 sq. foot Kmart building, where the fire had to jump the six lane 101 freeway, cross a large parking lot and completely torch

the inside, while the outside remained untouched. Thus began my journey into learning about what former Governor of California has deemed "The New Abnormal" for fires to occur in California over "The next 10, 15, 20 years time". Never before have firemen seen such fire activity and they have no context for understand the advanced weaponry used on not only these fires, but fires that have been set ablaze in over 15 separate areas of California over the past 1 1/2 years. The deadliest of all California fires was the Camp Fire that occurred in Butte County on November 8th, 2018. This fire began with an explosion, again no weather related forecast, where winds were said to travel at "80 football fields per minute" which means these fires traveled at a never before speed of 273 mile per hour. 52,000 people were said to have safely evacuated Paradise, yet residents who were lucky to escape the fires, claim this is nowhere close to being true and many perished while fire departments stood down and military police locked down all of Paradise for a month, before allowing the victims that remained, to return to see if their homes still stood. There was no warning from public service officials. There were no winds the morning of the fire ignition, which has said to have been caused by 1) power poles falling, 2) bullet holes in transformers and recently, "fire igniting embers" that somehow entered into homes and turned them to ash. To a person I have interviewed said they received no help from any charitable organizations that has taken in millions of dollars donated to help the victims. They fled with the shirt on their backs, yet, just like in Santa Rosa after our fires, many become homeless or are sleeping in their cars with no one to turn to. This book is a result of some of my 80 YouTube videos I published while investigating the Paradise fires, as well as directly experiencing the 170 CA fires in October 2017. I also cover in this book the likely weaponry used to start the fires, the agenda behind the fires, and those who were directly benefit aka disaster capitalists. You can find my work also on YouTube at "Aplanetru3", "WellHealed2" and websites; Tabublog.com, Avvi.info, Aplanetru3.info and Wellhealed.life. This book details like no other before, the new abnormal and the takeover of California's precious resources. This book follows a squad of French volunteer soldiers on the front in France after the German invasion. The book opens and ends with broad visions shared by multiple characters. The anecdotes are episodic in nature, each with an individual chapter title. In contrast to many war novels which came before it, Under Fire describes war in gritty and brutal realism. A powerful and earnest portrayal of life at the frontline during World War I. Berbusse's depiction of the horrors and tragedies of war is staggeringly realistic. He draws the reader's attention to the appalling conditions in which soldiers lived and fought through various anecdotes. Highly perceptive and thought-provoking!
