Most projects are inexpensive, taking advantage of free online tools, upcycled or repurposed materials, and low cost electronics such as Arduinos. Each project can be approached as an offering for makerspace visitors or can be created by library employees themselves as tools to engage in outreach and promote the makerspace, library services, the institution, and more. Every project has been created and tested in a real library setting by the authors, who present lessons learned, possible variations, and different ideas on how to implement the projects to their fullest extent. Explore the idea of using the makerspace to highlight the value of other library services, or simply find new and fun ways to engage with your users.
