Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series. Published under provisions of the Act of the State Assembly approved April 13, 1899, a record of the Pennsylvania Volunteers who served in the Spanish-American War. Contains the reports of city officials for the preceding year. What student—or teacher—can resist the chance to experiment with Rocket Launchers, Drinking Birds, Dropper Poppers, Boomwhackers, Flying Pigs, and more? The 54 experiments in Using Physics Gadgets and Gizmos, Grades 9–12, encourage your high school students to explore a variety of phenomena involved with pressure and force, thermodynamics, energy, light and color, resonance, buoyancy, two-dimensional motion, angular momentum, magnetism, and electromagnetic induction. The authors say there are three good reasons to buy this book: 1. To improve your students' thinking skills and problem-solving abilities 2. To acquire easy-to-perform experiments that engage students in the topic 3. To make your physics lessons waaaaay more cool The phenomenon-based learning (PBL) approach used by the authors—two Finnish teachers and a U.S. professor—is as educational as the experiments are

attention-grabbing. Instead of putting the theory before the application, PBL encourages students to first experience how the gadgets work and then grow curious enough to find out why. Students engage in the activities not as a task to be completed but as exploration and discovery. The idea is to help your students go beyond simply memorizing physics facts. Using Physics Gadgets and Gizmos can help them learn broader concepts, useful critical-thinking skills, and science and engineering practices (as defined by the Next Generation Science Standards). And—thanks to those Boomwhackers and Flying Pigs—both your students and you will have some serious fun. For more information about hands-on materials for Using Physical Science Gadgets and Gizmos books, visit Arbor Scientific at <http://www.arborsci.com/nsta-hs-kits>

Kosovo: The Politics of Identity and Space explores the Albanian-Serbian confrontation after Slobodan Milosevic's rise to power and the policy of repression in Kosovo through the lens of the Kosovo education system. The argument is woven around the story of imposed ethnic segregation in Kosovo's education, and its impact on the emergence of exclusive notions of nation and homeland among the Serbian and Albanian youth in the 1990s. The book also critically explores the wider context of the Albanian non-violent resistance, including the emergence of the parallel state and its weaknesses. Kosovo: The Politics of Identity and Space not only provides an insight into events that led to the bloodshed in Kosovo in the late 1990s, but also shows that the legacy of segregation is one of the major challenges the international community faces in its efforts to establish an integrated multi-ethnic society in the territory.

Historical and biographical annals of Columbia and Montour counties, Pennsylvania, containing a concise history of the two counties and a genealogical and biographical record of representative families The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.
