Tallinn is the capital of Estonia and the oldest capital city in northern Europe. Estonia is one of the smallest countries in Europe and Tallinn's well-preserved buildings and Old World feel delight its visitors. The city is the financial, business and technology hub of the Baltic region and The New York Times has called the city the "Silicon Valley on the Baltic Sea." Helsinki is Finland's capital located on the Gulf of Finland in the country's south. This Scandinavian city is surrounded by water on three sides and has thousands of tiny islands, inlets and skerries. Helsinki is a modern city known for its high quality architectural design. The city can be explored on foot or by taking a few short tram journeys. Finnish figure skater Kiira Korpi's career included triumphal championships and bitter disappointments. Trained from early childhood in a sport that demands uncompromising self-discipline and unrelenting work, her "fight until you make it" attitude brought her success and fame--and an insidious performance anxiety. Mental and physical burnout forced her retirement in 2015. With interviews and quotes from family, friends, coaches and competitors, Korpi's candid memoir describes the making and eventual undoing of a champion, reveals a darker side to the "ice princess" image of women's figure skating and advocates a more holistic, athlete-centered model of training. Photography possesses a powerful ability to bear witness, aid remembrance, shape, and even alter recollection. In Beyond Memory: Soviet Nonconformist Photography and Photo-Related Works of Art,

the general editor, Diane Neumaier, and twenty-three contributors offer a rigorous examination of the medium's role in late Soviet unofficial art. Focusing on the period between the mid-1950s and the late 1980s, they explore artists' unusually inventive and resourceful uses of photography within a highly developed Soviet dissident culture. During this time, lack of high-quality photographic materials, complimented by tremendous creative impulses, prompted artists to explore experimental photo-processes such as camera and darkroom manipulations, photomontage, and hand-coloring. Photography also took on a provocative array of forms including photo installation, artist-made samizdat (self-published) books, photo-realist painting, and many other surprising applications of the flexible medium. Beyond Memory shows how innovative conceptual moves and approaches to form and content-echoes of Soviet society's coded communication and a Russian sense of absurdity-were common in the Soviet cultural underground. Collectively, the works in this anthology demonstrate how late-Soviet artists employed irony and invention to make positive use of difficult circumstances. In the process, the volume illuminates the multiple characters of photography itself and highlights the leading role that the medium has come to play in the international art world today. Beyond Memory stands on its own as a rigorous examination of photography's place in late Soviet unofficial art, while also serving as a supplement to the traveling exhibition of the same title. Estonia and the Estonians provides the first compendious survey in any language of Estonian history, from prehistoric times to the twenty-first century. Estonia's strategic geopolitical location—a crossroads where the major powers of northeastern Europe have struggled for influence—and the small number of ethnic Estonians are crucial factors that have shaped the history of the area and its inhabitants. The book emphasizes the period since the mid-nineteenth century, when a national movement calling for Estonian cultural and political autonomy began to emerge. During the two world wars, Estonia gained and lost political self-determination. Yet a modern Estonian culture was firmly established, and a strong sense of national identity survived the Soviet era. This book, examining smart-city trends and developments from global, Chinese and EU perspectives, shows how the concept of the smart city varies from city to city. A detailed analysis is made to present the smart city as an up-to-date model of world city. Thirty pilot cities answer questions designed by the "Smart City Evaluation Framework," including managerial entities, stakeholders, project description and performance and whatever else relates to smart cities. By assessing the answers, researchers reveal major trends, best practices and challenges confronting smart city campaigns. Recommendations and solutions are provided. This is a must-read for anyone wishing to understand Chinese and European cities in terms of ideas about city development, plausible practice, natural and geographic conditions, economic structure and infrastructure robustness. Innovation and updates in telecommunication technology is regarded as indicative of city intelligence and green, low-carbon and sustainable development. This innovative book offers an interdisciplinary perspective and shall be of interest to researchers, policy analysts and technical experts involved in and responsible for the planning, development and design of smart cities. The Kalevala, or runic, songs is a tradition at least a few thousand years old. It was shared by Finns, Estonians and other speakers of smaller Baltic-Finnic

languages inhabiting the eastern side of the Baltic Sea in North-Eastern Europe. This book offers a combined perspective of a musicologist and a linguist to the structure of the runic songs. Archival recordings of the songs originating mostly from the first half of the 20th century were used as source material for this study. The results reveal a complex interaction between three different processes participating in singing: speech prosody, metre, and musical rhythm. In this age of globalism and high-speed travel, Seth Stevenson, the witty, thoughtful Slate columnist, takes us back to a time when travel meant putting one foot in front of the other, racing to make connections between trains and buses in remote transit stations, and wading through the chaos that most long-haul travelers float 35,000 feet above. Stevenson winds his way around the world by biking, walking, hiking, riding in rickshaws, freight ships, cruise ships, ancient ferries, buses, and the Trans-Siberian Railway-but never gets on an airplane. He finds that from the ground, one sees the world anew-with a deeper understanding of time, distance, and the vastness of the earth. In this sensational travelogue, each step of the journey is an adventure, full of unexpected revelations in every new port, at every bend in the railroad tracks, and around every street corner.
