North Country Dad by Lois Richer Widower Grant Adams loves his twin stepdaughters, but what does he know about being a full-time father? And when he meets Dahlia Wheatley, he realizes the twins need more than a nanny—they need a mother. With her own harrowing past, Dahlia is as reluctant to get emotionally involved as Grant is. Yet his startling proposition just may form a happy new family of four. 2 Uplifting Stories An Alaskan Christmas and North Country Dad When the railroad tracks through Sumner are abandoned, twelve-year-old Jess McCormick and his little brother, Brian, find an opportunity to capitalize on the situation. Seventy-five miles of railroad right-of-way become a go-kart highway, practically running through their backyard. With technical skills beyond those of their peers, endless

resources, tools and used parts, they become entrepreneurs by opening up a custom go-kart shop in an old work shed behind their house. Their shop becomes the go-kart center of the trail. Every kid in Sumner and the surrounding area comes to see the small-engine whiz kids about getting modifications made to their go-karts. Everyone scrounges, saves and raids area junkyards in search of resources to build the faster, better go-kart. Some come by the local pizza parlor to challenge Jess, who is known all along the trail to have the fastest go-kart. The hard working boys make a few enemies along the way, but they also embrace friendships. They make a little money, hang out a lot, go on a few hairy rides, and even get a friend or two out of a tight scrape. It isn't until they venture into the world of Jr. Drag Racing that their mechanical as well as business skills are really put to the test. Around the Cul-de-sac is a short story collection that charts the inner workings of Sydney Lagunilla, a kid growing up in the '90s who views trespassing on her neighbors' properties as doing them a favor. In this work of realistic fiction, the Central Florida native finds a way to skirt a standardized test worksheet, and in an above-ground pool, acts out the farewell floating door scene in Titanic. Sydney's ruling passions undergo rapid shifts, occupying her time with rowboat adventures or whatever sport features in the latest (now nostalgic) family comedy. She could be catching lizards one moment, then staging a performance of the 1996 Grammy Nominees album in the next. The 16 stories are magnetic and will leave readers bemused through seriously funny and honest narration. This is the debut short stories collection by emerging humor writer Christina De Paris. excited from cover to cover! This 6-Pack includes six copies of this title and a lesson plan. This thesis deals with the design and fabrication of go-kart chassis. The objective of this thesis is to design and fabricate a go-kart chassis of an electric go kart. The main problem is the cost for current go-kart chassis is too expensive so the project is decide to fabricate with a lower cost. The scopes identified chassis design should bear load of 150kg and the go-kart chassis must with floor dimension of chassis is 1400mmx830mm. There are many steps taken to design and fabricate this chassis. The first stage is did some literature review about the existing go-kart and go-kart chassis. Mostly current model of go-kart chassis is made from tubular pipe. Hence, this project is to modify the current model of go-kart chassis into a model that is easier to design, build and modify. Follow up with some designing and sketching. During this phase, three designs had been sketch to be as the design concepts. The structural three-dimensional solid modelling of go-kart chassis was developed by using Solid Works engineering drawing software. As for each design have their advantages and disadvantages. After done with design and sketch, conceptual process is done and design 3 has been chosen because this design is more advantageous than other two designs. Design 3 is lightweight and easier to design, build and modify. Some modification is done on design 3 where, the go-kart chassis is more space saving and the design has provided protection to the users to prevent the user from fall during drive the go-kart. Next stage after finalize the design, the project is continued with fabrication process. The fabrication process also undergoes many steps such as material marking, cutting, drilling, welding, grinding and finalizing the go-kart chassis by painting to make a go-kart chassis more interested. Thus, by finishing this project, the objective of the project is achieved. Finally, the conclusion about this project and the recommendations for the future plan also attached together with this thesis.

The Go Kart is a type of open wheel car. Go Karts come in all shapes and size, from motor less models to high powered racing machines. Some such as Super karts are able to beat racing cars or motorcycles on long circuit. It is a small four wheeler run by I.C Engine. It is a miniature of a racing car. Go Kart is not a factory made product; it can be made by engineers. This report documents the process and methodology to produce a low cost go-kart. Now a days the Go Karts which are available in the market which have cost more than Rs.1 lakh. We have made a simple, self-fabricated Go Kart in just 50000 rupees. Chassis formed by hollow rectangular bar, powered by 125 cc engine fitted with disc brake. The chassis are made of mild steel. There is no suspension therefore chassis have to be flexible enough to work as a suspension and stiff enough not to break or give way on a turn. We are replacing hollow tubular shaft with hollow rectangular shaft. The purposes of this replacement are; For the same length of tubular shaft, rectangular shaft weighs the same, for visual improvement, for better mounting ability and the main thing is our aim is to make a Kart which is cost effective and it is found that hollow rectangular shaft has more bending stress than the tubular shaft.
