Foundations of Property Law Mar 07 2022 Foundations of Property Law: Things as Objects of Property Rights is an abridged translation of the first volume of Christian von Bar's Gemeineuropäisches Sachenrecht -a milestone in European private law theory, and in comparative property law more broadly. Radical in content and scope, the English version examines the dynamics of interaction between the objects, contents, and holders of property. The conceptual framework of 'property law' is presented as a domain of erga omnes monopoly rights that govern the relationship between persons and objects of value. Within that framework, a reciprocal relationship is illustrated between "property rights" and their objects; property rights play a role in constituting the very objects ("things") in which they are held. With comprehensive comparative analysis, insights are gleaned from all the jurisdictions of the European Union and the United Kingdom, presenting a critical evaluation of property law systems in both Common and Civil Law traditions. This book joins all the national legal systems in a single inquiry, treating their traditions and arguments with the respect they deserve and taking advantage of the knowledge embodied in the diversity of European private law. A scholastic work, offering deep and unique insights into the European property law systems, Foundations of Property Law will quickly become a go-to resource for anyone interested in European private law and comparative property law.

ENCYCLOPAEDIA OF INTERNATIONAL AVIATION LAW Aug 12 2022 The four volumes of the Encyclopaedia of International Aviation Law are intended for students, lawyers, judges, scholars and readers of all backgrounds with an interest in Aviation Law; and to provide the definitive corpus of relevant national and regional legislation, including global aviation treaties and legislation to enable all readers without exception, to develop the background, knowledge and tools to understand local, regional and international Aviation Law in contextual fashion.

McQueen's Motorcycles Jan 25 2021 The long-departed Steve McQueen is still the coolest man on two wheels. Get an intimate look at his coolest bikes right here, right now, in McQueen's Motorcycles. Even thirty years after his death, Steve McQueen remains a cultural icon. His image continues to appear in advertising and pop culture and his fan base spans from car lovers to racing enthusiasts to motorcycle obsessives. In his movies, McQueen's character always had an envy-inducing motorcycle or car, but in his personal life, motorcycles were always McQueen's first true love. McQueen's Motorcycles focuses on the bikes that the King of Cool raced and collected. From the first Harley McQueen bought when he was an acting student in New York to the Triumph "desert sleds" and Huskys he desert raced all over California, Mexico, and Nevada, McQueen was never without a stable of two wheelers. His need for speed propelled him from Hollywood into a number of top off-road motorcycle races, including the Baja 1000, Mint 400, Elsinore Grand Prix, and even as a member of the 1964 ISDT team in Europe. Determined to be ahead of the pack, McQueen maintained his body like it was a machine itself. He trained vigorously, weight lifting, running, and studying martial arts. Later in his life, as he backed away from Hollywood, his interests turned to antique bikes and he accumulated an extensive collection, including Harley-Davidson, Indian, Triumph, Brough Superior, Cyclone, BSA, and Ace motorcycles. Today, McQueen still has the Midas touch; anything that was in the man's possession is a hot commodity. McQueen's classic motorcycles sell for top dollar at auctions, always at a multiple of what the same bike is worth without the McQueen pedigree. McQueen's Motorcycles reveals these highly sought-after machines in gorgeous photography and full historical context.

African perspectives in international investment law Sep 01 2021 The tremendous growth in foreign direct investment (FDI) in Africa comes at a time when the field of international investment law and arbitration is witnessing a renewal. The investment has led to big business for law firms in the area of investment arbitration and the last decade has witnessed an increased number of investment treaties, proliferating investment disputes, the rise of mega-regional trade agreements and the negotiation of mega-regional infrastructure projects. Yet, while the argument in support of investment treaties as instruments to attract foreign direct investment is highly contested, many African countries are no doubt becoming more aware of the need to reshape the international investment architecture. This volume explores trends in FDI on the African continent, the benefits and challenges that FDI presents for African States, and Africa's participation in the international investment law regime. Featuring contributions from leading African international lawyers, arbitrators, jurists, academics, and litigation experts, this landmark volume is the first of its kind to explore African perspectives in international investment law. Hodu and Mbengue bring together non-mainstream approaches to the debate on the nexus between foreign investment and development, addressing key conceptual issues that will define contemporary international investment law for decades to come. With insights and critical comments on the challenges of Africa's foreign investment climate and international investment law, this timely collection is essential reading for academics, students, and practitioners alike.

French International Arbitration Law Reports: 1963-2007 Mar 19 2023 The French law of international arbitration has a beginning (1963) and a culminating point (2007), but fortunately it does not have an ending. Indeed, it does not cease to evolve, to improve, to perfect itself. Thus it invites one to carefully observe it. But before undertaking this careful observation by annually identifying the most important decisions, as this collection has been doing since 2008, it is important to recall the origins of French law on international arbitration, how it was built, and in so doing, predict where it is heading. Looking into the past to anticipate the future, that is also the interest of a book like the present one. This selection, necessarily subjective, is also shaped by the advantages that a retrospective look offers. The benefit of hindsight allows one to confidently distinguish between the decisions that deserve mention and those which did not make it into history. Only the former are printed in the following pages, but all of such decisions are included. Conversely, all decisions from 2008 onwards will be methodically published in the annual reports of this collection, of which two editions have already been released for the years 2008 and 2009. Aimed for practitioners and academics alike, the knowledge of French case law is indispensable to understanding international arbitration and its important influence around the world.

This edition of the Yearbook contains chapters on the population size and distribution, the population of capital cities, fertility, foetal mortality, infant and maternal mortality, general mortality, nuptiality and divorce.

Proceedings of the Standing Senate Committee on Legal and Constitutional Affairs Dec 24 2020

Embryo Research in Pluralistic Europe Apr 08 2022 Recent advances in techniques and understanding in the fields of genetics, embryology and reproductive biology have opened up new ways to treat a wide range of medical problems. They range from new options for infertility treatment and pre-implantation genetic diagnosis to stem-cell-based therapies for debilitating diseases. Since all these approaches involve the manipulation of human gametes, embryos or embryonic cells, and could also permit more contentious uses, they have stimulated a controversial debate as to what aims are desirable and to what extent experiments on human embryos are morally permissible, if permissible at all. The situation is further complicated by the fact that scientific projects are increasingly realized through international co-operation and that patients are increasingly ready to seek morally contentious medical treatment wherever it is available and thus to bypass national legislation. In view of this situation the Europäische Akademie assembled a temporary interdisciplinary project group in which scientists from universities and non-university research organizations in Europe working on the relevant subjects were brought together and charged with establishing a knowledge base and providing suggestions for long-term solutions that would be acceptable for society. Presented here are the results of this project, ranging from a discussion of the theoretical and practical possibilities in human-embryo experimentation and its alternatives in research on adult stem cells, a comparison of the situations and prospects of regulation of embryo research in Europe, a survey of European public attitudes, and a philosophical analysis of the arguments and argumentative strategies used in the debate.

Sex, Honor and Citizenship in Early Third Republic France Jan 05 2022 A repositioning of French women's struggle for suffrage within the distinct cultural landscape of the masculine honour system. Whether activists demanded admission to the popular ritual of the duel or publicly shamed men for their extramarital sexual behaviour, they appropriated extralegal honour codes to enact new civic and familial identities.

Free and Open Source Software (FOSS) and other Alternative License Models Feb 23 2021 This book discusses the main legal questions raised by free and open source software (FOSS) licenses and other alternative license models, such as Creative Commons. The legal questions raised by FOSS and other alternative licenses have been the subject of an intense international debate among legal scholars and practising lawyers in the last years. Courts in different jurisdictions have confirmed that the core features of FOSS licenses are compliant with the respective applicable laws and thus enforceable in the respective jurisdictions. What is still missing so far is an in-depth comparative analysis of the legal issues raised by FOSS, Creative Commons and other alternative license on a worldwide scale. This book presents a general report on FOSS licenses and alternative license models to establish common ground and enable comparison between jurisdictions. The general report is followed by 24 national reports covering the world's most important IT-markets. General and national reports use the same structure to facilitate the comparison. The book shows that despite the differences in their origins, all FOSS projects use detailed licenses for the organisation of their communities. It also shows the differences in the proofing of these licenses by courts in some jurisdictions and the tailor-made provisions established by some legislators to solve the legal issues raised by the license model.
