Created in collaboration with the Medical Commission of the International Olympic Committee this exciting new book is a must-have tool for all those involved in assessing and treating the active individual with injuries sustained in sports and physical activity: from primary care and ER physicians to general physical therapists, athletic trainers, nurse practitioners and physician's assistants. Written and edited by an international cast of world-leading experts, the book embraces a problem-oriented approach to guide the reader through the assessment and management of injuries in physical activity. Covering the various body regions and distinguishing between common and rarer injuries, the book follows a trajectory from history taking and physical examination to diagnosis and treatment, providing clear and actionable guidance on management of the most common injuries and disorders. Over 500 beautiful full-color illustrations augment the text, showing readers detailed views of the techniques, procedures and other clinically-relevant information being described. Over the course of the last decade there have been significant developments in our understanding of sports injuries – what they are, how they should be assessed, and how they should be treated. The IOC Manual of Sports Injuries distills these advances into straightforward, practical guidance that clinicians can count on to optimize their care of the physically-active patient. A reproduction of the Floyd Clymer Factory Workshop Manual, as published in Clymer's Metropolitan Owners Handbook, for the 1954-1962 Austin/Nash/American Motors Metropolitan. When Clymer published the Metropolitan Owners Handbook he had to reduce the overall size of the workshop manual to fit his 5 x 8 inch book size. This reduction in size resulted in extremely small images and text. The VelocePress edition has been restored to the original print size which is more than 200% larger than the Clymer publication and consequently, much easier to read! A profusely illustrated manual that includes all of the data you would expect from a factory

publication for the repair and overhaul of all major and minor mechanical and electrical components. There are separate sections that deal with the repair and overhaul procedures for the engine, cooling system, carburetion, exhaust system, clutch, A & B series transmission, shifting system, brakes and wheels, hubs and drums, rear axle, drive shaft, front suspension, steering gear, weather eye system, a detailed electrical service section plus an exhaustive 62 page body section that deals with all facets of the bodywork including the correct procedure for fitting replacement panels! This is a - must have - reference for any Metropolitan enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior to purchasing one of these classic automobiles. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Metropolitan enthusiasts worldwide.

Modern Automotive Technology MLR Shop Manual: Maintenance and Light Repair Job Sheets for Performance-Based Learning covers 100% of the tasks in the 2013 NATEF Maintenance and Light Repair Task List. It is designed specifically for use in MLR-accredited training programs, as well as in programs seeking MLR accreditation. This manual is divided into eight sections that correspond to the ASE certification areas and eight areas of the NATEF Task List. Each section of the manual is further divided into a number of jobs. Each job is a hands-on activity that covers one or more NATEF maintenance and light repair tasks. The eight sections of the manual and the jobs they contain are color coded to make it easy to locate specific content. Each job in this manual is designed to be accomplished in a single lab session. Check boxes are provided in the left-hand column of the jobs so the student can mark off tasks as they are performed. Three types of special notices appear throughout the jobs, bringing attention to special information or safety considerations for the task being performed.
