On a foggy July evening in 1956, the Italian cruise liner Andrea Doria, bound for New York, was struck broadside by another vessel. In eleven hours, she would sink nearly 250 feet to the murky Atlantic Ocean floor. Thanks to a daring rescue operation, only fifty-one of more than 1,700 people died in the tragedy. But the Andrea Doria is still taking lives. Considered the Mount Everest of diving, the Andrea Doria is the ultimate deepwater wreck challenge. Over the years, a small but fanatical group of extreme scuba divers have investigated the Andrea Doria, pushing themselves to the very limits of human endurance to explore her—and not all have returned. Diver Kevin McMurray takes you inside this elite club with a hard, honest look at those who go deeper, farther, and closer to the edge than others would ever dream. Deep Descent is the riveting true story of the human spirit overcoming human frailty and of

fearsome, mortal risks traded for a hard-core adrenaline rush. Chronicling these adventures in his page-turning narrative and in dozens of dramatic photos, McMurray draws us deeper into the cold heart of the unforgiving sea, giving us a powerful vision of a place to which few will ever have the skills—or the courage—to go. Beneath those waters there really is an entirely new world - a world full of beauty and mystery that few humans have the opportunity to experience. But the lucky few who do have the opportunity to experience this vast under water world are able to do so because they are scuba divers. Obviously, human beings cannot breathe underwater, so instead, they rely on a portable respiratory system that is self contained. In fact, that is what the word Scuba means: Self Contained Underwater Breathing Apparatus. This apparatus allows human beings to dive to depths that were once unthinkable, and to stay under the water for long periods of time, depending on how full the air tank is.
